 Dredging transferred, 303.
 Engineer, Acting, 116.
Automobile tariff, 410, 418.
Automobiles, number in Canal Zone, 17.

B

BAGGAGE contract, Panama railroad, 109.
Balboa townsite, 269, 429.
Balboa, Vasco Nunez, monument, 273.
Band, Commission—
 Abolished, 202.
 Concerts. *See each issue.*
Barracks, Marine, 421.
Barges—
 Dump, order placed, 269.
 Sand, converted, 61, 273.
Bills, work performed, 354.
Birds, hunting, 58, 271.
Boats—
 Flat, passenger capacity, 322.
 Motor, dredging service, 444.
Bombs, excavated, Cristobal harbor, 261.
Boston business men, visit, 306.
Breakwaters—
 Colon harbor—
 Embankment and trestle, 18, 117, 165, 309.
 Lighthouse, 12.
 Washout, 101.
 Cost statements, Part 2, Nos. 12, 26, 40, 52.
 Naos Island, Pacific entrance—
 Pipeline, water, 45.
 Trestle and fill, 85, 135, 225, 309.
 See also Reports, Chairman and Chief Engineer, 28, 71, 103, 175, 217, 253, 289, 324, 368, 405, 441.
Bridge—
 Ancon-Corozal road, 349.
 Cardenas River, highway, 181.
 Culebra Cut, railroad, 37.
 French canal, Cristobal, 264.
 Gamboa, footwalk, 422.
 Gatun River, railroad, 77, 197.
Buildings—
 Administration, Culebra, addition, 440.
 Ancon-Balboa road, 45.
 Appraisal, board, 416.
 Permanent, 57, 61, 81, 221, 241, 358, 361, 365, 427.
 See also Shops.
 Public sale, 34, 36, 44, 84, 107, 116, 123, 132, 390, 398.

Buildings—

Removal, Gatun Lake area, 229, 249, 373, 385.
See also Reports, Chairman and Chief Engineer, 28, 71, 103, 175, 217, 253, 289, 324, 368, 405, 441.
Buoys, gas, Canal channel, 168, 206.

C

CABLE—

Locks, pulling record, 421.
Telephone-telegraph, underground, 277.
Transisthmian, conduits, 229, 385.
West India and Panama, break, 373.
Caisson shells, mixing plant, 207.
California-Atlantic S. S. *Pleiades* aground, 1, 38.
Canal Law, 3-5.
Carnival at Gorgona, 95.

Cars—

Card removal, 183, 282.
Chains, return, 427.
Doors, kept closed, 391.
Hand and push, repair, 318.
Observation, 134.
Passenger, color change, 297.
Repairs, 375.
Report, daily, 339, 347.
Retirement, Lidgerwood flat, 421.
Unloading and release, 164, 212.
Catto, Mrs. J. F., benefit, 282.
Castings, brass, cost, 171.

Cement—

Bids, contract, 9, 25.
Consumption, 365.
Storage, permanent, 377, 413.

Central Division—

Accountant, Chief, appointment, 82.
Construction districts, 50.
Division Engineer, Acting, 318, 435.
General Inspector, appointment, 447.

Central and South American Telegraph Company—

Cable conduits, 229, 385.

Chagres River—

Fluviograph station, Bohio, demolished, 413.
Freshets, 117.
Gravel, report, handling method, 397.
Stages. *See each issue.*
Water supply, auxiliary for reservoirs, 301.

Chagres Society, 107, 162, 438.

Chairman and Chief Engineer—

Acting, 154, 347.
Engagements, Sunday, 306.
Reports, monthly, 28, 71, 103, 175, 217, 253, 289, 324, 368, 405, 441.

Checks, metal retention, 61.

Chilean students, visit, 226.

Chiriqui, volcano, 424.

Christmas celebrations, 122, 130, 137, 139, 153.

Church—

Bible Society, 202.
Bishopric of Panama, 6.
Christ Church, Colon, 210, 362.
Christian League, Culebra, 403.
Christmas celebrations, 122, 130, 137, 139, 153.
Cristobal Union Church, officers, 170.
Easter services, 243.
Episcopal, Panama mission, 14.
Jewish, opened in Colon, 271, 281.
Missionary convention, 58, 63, 79.
Organizations, growth, 272.
Salvation Army, 22, 250, 374, 430.
San Blas mission, 130, 222, 351.
Sunday School Association, 186, 302, 417.
Thanksgiving celebrations, 114.
Wesleyan Methodist, Panama, 293.

Circulars, official—

Absence, authorized, 211.
Accounts, classified expenditures, 139, 171, 179, 295, 382.

Artisans—

Force reduction, 318.
Transfers, classified service, 282.

Atlantic Division—

Assistant Division Engineer, appointment, 259.
Division Engineer, acting, 116.
Dredging transferred, 303.

Bills, work performed, 354.

Cars—

Card removal, 183, 282.
Chains, return, 427.
Doors, kept closed, 391.
Flat, release, 164.
Hand and push, repair, 318.
Maintenance, 266, 375.
Report, daily, 339, 347.
Unloading and release, 164, 212.

Castings, brass, cost, 171.

Central Division—

Accountant, Chief, appointment, 82.
Construction districts, 50.
Division Engineer, acting, 318, 435.
General Inspector, appointment, 447.
Chairman and Chief Engineer, acting, 154, 347.

Civil Administration—

Head of Department, appointment, 435.
Property accountability, 362.

Coal—

Loss in transit, 223.
Orders, correspondence, 411.
Collector of Revenues, acting, 23.

Commissary—

Coupon books, 50, 67, 154, 347, 419.
Supplies, delivery, 435.

Conductors, examination and promotion, 67, 123.

Construction and Engineering Department—

Chairman and Chief Engineer, acting, 154, 347.
Reorganization, 139.

Correspondence—

Carbon copy, 139.
Coal orders, 411.
Valueless, disposition, 238.

Cranemen, steamshovel, promotion, 7, 23.

Customs, parcels post, 274.

Depot Quartermaster, acting, 35.

Devol, Brig. Gen. C. A., relieved from duty, 311.

Disbursing Officer, appointment, 164, 419.

Dredging, consolidation, 303.

Duty, imported articles, 43.

Ear and eye examination, 211, 231, 295.

Electric fixtures, locks, 139.

Electric power, charges, 375.

Electrical and Mechanical Engineer, absence, 131.

Electrical equipment, installation, repair, and operation, 447.

Employment, applications, 7.

Engineers, railway, examination, 67, 123.

Equipment—

Survey, 274.
Transfer, 7, 60.

Estimates, fiscal year, 339.

Examiner of Accounts, acting, 164.

Expenditure accounts, classified, 139, 171, 179, 295, 382.

Farm, disabled laborers, 35, 67, 196.

Fourth of July celebration, 318, 331, 362.

Garlington, Lieut. Creswell, assignment, 427.

Circulars, official—

Gravel estimate, 331.
 Gravel prices, 231.
 Holidays, 67, 100, 139, 231, 318, 435.
 Hotel coupon books, 50, 190, 116, 212, 347, 419.
 Hotel Tivoli, rates, 362.
 Hotel Washington, Manager, appointment, 354, 391.
 Household effects, shipment, 231.
 Hunting in Canal Zone, 131, 435.
 Hydraulic work, Culebra Cut, 391.
 Ice, economy in use, 247.
 Injury compensation, 231, 238, 311.
 Judge, Senior District, appointment, 43.
 LaBoca, permanent settlement, 447.
 Lakes, construction material, removal, 427.
 Land Commission—
 Appointment, 189.
 Claims, Commission employees, 339.
 Landscape architect, 361, 427.
 Lanterns, oil, 203.
 Laundry, price list, 50.
 Law Department, acting Head, 35, 154.
 Leave, accumulated, 7, 23, 247, 419.
 Locks, electrical fixtures, 139.
 Maintenance of Canal, committee, 305, 318.
 Material and supplies, sale, 382.
 Mechanical Committee abolished, 339.
 Mechanical Division—
 Changes, 411, 435, 419.
 Chief Clerk, appointment, 411.
 Headquarters, 447.
 Transfers, 266.
 Mileage books, half rate, 91, 171, 223, 259.
 Medical Board, tropical diseases, 391, 435.
 Municipal Engineering, Division, 399, 411, 435.
 Oil containers, 203, 347.
 Organization charts, 399.
 Overtime work 238.
 Pacific Division abolished, 139.
 Pacific Mail S. S. Company rates, 203.
 Panama Railroad. *See Panama railroad.*
 Parcels post packages, customs, 274.
 Pay certificate car discontinued, 82.
 Pay certificate signatures, 35, 179, 183.
 Peninsular & Occidental S. S. Company rates and sailings, 196.
 Police and Prisons—
 Chief, acting, 139.
 Chief, Assistant, appointment, 82.
 Station, Gorgona, discontinued, 411.
 Port Captains, appointments, 274, 347.
 Promotions, 50, 331.
 Public works—
 Superintendent, acting, 375.
 Transfer, 399.
 Purchasing Agent, acting, 43.
 Quartermaster's Department—
 Building construction assignments, 427.
 Chief Quartermaster, appointments, 23, 203, 339.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, AUGUST 28, 1912.

No. 1.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Work at the Spillway of Gatun Dam.

Following the completion and closing of the upper guard gates in Gatun Locks, the sluice gates in the ogee of Gatun Spillway dam were closed on August 17. The upper lock gates are holding the water pumped out of the culverts, up to the level of the emergency dam sill plus 37.4, with very slight leakage. The surface of the lake is rising about .5 foot per day, and its rise and spread are plainly perceptible. The old Panama railroad embankment between Gatun and Lion Hill is discernible only by a scant fringe of the tops of weeds.

At the Spillway, concrete is being placed from the trestle built out to the ogee from the east side of the Spillway channel, across the intake of the penstocks for the hydroelectric station. The work at present is on the abutment at the east end of the ogee. It will be built to 115 feet above sealevel, and will take the place of a pier in the support of the regulating gate at the east end of the ogee. Wooden forms are being erected for the building of several of the piers which will be placed 45 feet apart along the top of the dam. The 14 gates which will be raised and lowered between piers to regulate the surface of the lake, when it is higher than 50 feet above sealevel, have been assembled by the forces of the McClintic-Marshall Company, in the abandoned borrow pit north of the division office building. All of them have been erected to full height, the work yet to be done on them consisting of sheathing, riveting, and caulking.

Transfer of Air Compressor Equipment.

Construction work, in connection with the new terminal at Balboa, requires additional facilities for the supplying of compressed air, and to this end, one air compressor and one boiler will be transferred from Las Cascadas and installed in the plant at Balboa, which, with the two small compressors already there will, in part, relieve the situation. It is probable that by October 1 work in the Central Division will have advanced sufficiently to permit the transfer of one compressor and two

boilers remaining at Las Cascadas, to Balboa, which will furnish an adequate supply of compressed air at a proper working pressure for all purposes. For the present, however, the additional equipment will be used in furnishing air mainly to the 20 tripod drills now engaged in the terminal work, while the well drills and small concrete mixers to be set up, will have to be operated by steam. The transfer of the machinery, which is in charge of the Mechanical Division, will necessitate the construction of a spur track leading from the nearest available track in the East Balboa yard to the compressor plant.

New Break in West Bank at Culebra.

Another break occurred in the west bank of the Canal at Culebra, near where the observation platform formerly stood, about midnight, Monday, August 26. The section of the bank that gave way consisted of a projecting mass, which settled, and, following the usual course, heaved up in the bottom of the Cut. The material overflowed one of the construction tracks, and partly buried steamshovel No. 219, but when the machine was freed, it was found to be only slightly damaged. The amount of material involved in this break, which in reality forms a part of the main break on the west bank at Culebra, is estimated at about 900,000 cubic yards.

The situation in the Cut, north of Empire, where a break occurred in the Obispo Diversion on August 20, is well under control, and construction trains began operating out of the north end on Wednesday, August 28. A temporary dike has been built across the bottom of the Cut, and the trains will use it in passing around the toe of the slide. The dike serves the additional purpose of keeping the water that escapes from the diversion channel, while it is being relocated, from finding its way through the Cut southward. One pump, mounted on a flat car, operated by steam supplied by locomotives, has been kept in operation continuously since the day of the slide, and has unwatered the greater part of the inundated section, emptying the water into the drainage ditch on the north side of the dike. A steamshovel has been working day and night excavating a new channel for the diversion. The slope of the hill back of the former channel is very abrupt, and in making the new one, the excavation is wholly in the side of this hill, the material removed being dumped on the opposite side to form a retaining wall for the relocated diversion. A cross-section measurement of the break shows that about 300,000 cubic yards of material will have to be taken out at this point.

Reconstruction of Culebra Clubhouse.

The continued breaking back of a slide on the west bank of Culebra Cut, from Station 1726 to Station 1804, has developed large cracks in the earth beneath the Commission clubhouse at Culebra, and the north end of

the building has moved 19 inches toward the Cut, despite the shoring timbers with which it has been repeatedly jacked up. Notice has been posted at the front of the clubhouse, warning all who would enter that it shall be at their own risk, and work has begun on reconstructing the building for safety. All of the heavy, two-story front part is to be removed. The bowling alley and adjacent tourists' platform, comprised in a one-story structure, will be left in the present location, and the part of the two-story structure occupied by the kitchen and serving space will be reduced to one story. Definite plans in regard to the erection of a reading, pool and billiard, and assembly room cannot be announced until the advisory committee has acted on this matter.

Progress on Gatun Dam.

The inner sides of the north and south toes of the west wing of Gatun Dam were brought together at the junction of that wing of the Dam with the concrete Spillway approach channel on August 24. In the process of dumping on the two sides of the hydraulic core the toes have been brought closer together, while the surface of the hydraulic fill has been rising; and, as the latter was on the point of flowing over the top of the wall of the Spillway approach channel, dry filling on the toes was concentrated near the wall for two weeks, in order to form an embankment to retain the hydraulic fill at levels higher than the top of the channel wall. The top of the wall is at elevation plus 95 feet, and the surface of the hydraulic fill in the west wing of the Dam is now at 90 feet above sealevel. Hydraulic filling is practically completed, and the Dam will be finished with dry fill, which will be carried on all along the upper sides of the north and south toes, which are now, on an average, about 100 feet apart.

On the east wing of the Dam, where the toes were first brought together during the month of March, 1912, they are now together for a distance of over 1,000 feet, from the Spillway channel toward the Locks. The top of the Dam has been brought to elevation plus 103.35 feet, but after the Dam has settled, the top will be graded, so that the eventual height will be 105 feet above sealevel. Additional filling is being made about halfway up the side of the north toe, to bring its surface to the grades prescribed in the plans.

Steamship "Pleiades" Aground.

The Balboa office of the California-Atlantic Steamship Company was advised by cable on August 24 that the steamship *Pleiades*, plying in the service of the company between San Francisco and Balboa, was aground on the coast of Mexico. Particulars as to location, possible loss of life, and salvage measures have not been received. It is presumed that, as the vessel was about five days out from San Francisco, the wreck occurred along the Low-

NEW CANAL LAW.

Full Text of the Measure Made a Law by President's Signature on August 24.

The following is the full text of the new Canal law, which was signed by President Taft on August 24:

AN ACT TO provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the zone of land and land under water of the width of ten miles extending to the distance of five miles on each side of the center line of the route of the Canal now being constructed thereon, which zone begins in the Caribbean Sea three marine miles from mean low water mark and extends to and across the Isthmus of Panama into the Pacific Ocean to the distance of three marine miles from mean low water mark, excluding therefrom the cities of Panama and Colon and their adjacent harbors located within said zone, as excepted in the treaty with the Republic of Panama dated November eighteenth, nineteen hundred and three, but including all islands within said described zone, and in addition thereto the group of islands in the Bay of Panama named Perico, Naos, Culebra, and Flamenco, and lands and waters outside of said limits above described which are necessary or convenient or from time to time may become necessary or convenient for the construction, maintenance, operation, sanitation, or protection of the said Canal or of any auxiliary canals, lakes, or other works necessary or convenient for the construction, maintenance, operation, sanitation, or protection of said Canal, the use, occupancy, or control whereof were granted to the United States by the treaty between the United States and the Republic of Panama, the ratifications of which were exchanged on the twenty-sixth day of February, nineteen hundred and four, shall be known and designated as the Canal Zone, and the Canal now being constructed thereon shall hereafter be known and designated as the Panama Canal. The President is authorized by treaty with the Republic of Panama to acquire any additional land or land under water not already granted, or which was excepted from the grant, that he may deem necessary for the operation, maintenance, sanitation, or protection of the Panama Canal, and to exchange any land or land under water not deemed necessary for such purpose for other land or land under water which may be deemed necessary for such purposes, which additional land or land under water so acquired shall become part of the Canal Zone.

Section 2. That all laws, orders, regulations, and ordinances adopted and promulgated in the Canal Zone by order of the President for the government and sanitation of the Canal Zone and the construction of the Panama Canal are hereby ratified and confirmed as valid and binding until Congress shall otherwise provide. The existing courts established in the Canal Zone by Executive Order are recognized and confirmed to continue in operation until the courts provided for in this Act shall be established.

Section 3. That the President is authorized to declare by Executive Order that all land and land under water within the limits of the Canal Zone is necessary for the construction, maintenance, operation, sanitation, or protection of the Panama Canal, and to extinguish, by agreement when advisable, all claims and titles of adverse claimants and occupants. Upon failure to secure by agreement title to any such parcel of land or land under water the adverse claim or occupancy shall be disposed of and title thereto secured in the United States and compensation therefor fixed and paid in the manner provided in the aforesaid treaty with the Republic of

Panama, or such modification of such treaty as may hereafter be made.

Section 4. That when in the judgment of the President the construction of the Panama Canal shall be sufficiently advanced toward completion to render the further services of the Isthmian Canal Commission unnecessary the President is authorized by Executive Order to discontinue the Isthmian Canal Commission, which, together with the present organization, shall then cease to exist; and the President is authorized thereafter to complete, govern, and operate the Panama Canal and govern the Canal Zone, or cause them to be completed, governed, and operated, through a governor of the Panama Canal and such other persons as he may deem competent to discharge the various duties connected with the completion, care, maintenance, sanitation, operation, government, and protection of the Canal and Canal Zone. If any of the persons appointed or employed as aforesaid shall be persons in the military or naval service of the United States, the amount of the official salary paid to any such person shall be deducted from the amount of salary or compensation provided by or which shall be fixed under the terms of this Act. The governor of the Panama Canal shall be appointed by the President, by and with the advice and consent of the Senate, commissioned for a term of four years, and until his successor shall be appointed and qualified. He shall receive a salary of ten thousand dollars a year. All other persons necessary for the completion, care, management, maintenance, sanitation, government, operation, and protection of the Panama Canal and Canal Zone shall be appointed by the President or by his authority, removable at his pleasure, and the compensation of such persons shall be fixed by the President, or by his authority, until such time as Congress may by law regulate the same, but salaries or compensation fixed hereunder by the President shall in no instance exceed by more than twenty-five per centum the salary or compensation paid for the same or similar services to persons employed by the Government in continental United States; that upon the completion of the Panama Canal the President shall cause the same to be officially and formally opened for use and operation.

Before the completion of the Canal the Commission of Arts may make report to the President of their recommendation regarding the artistic character of the structures of the Canal, such report to be transmitted to Congress.

Section 5. That the President is hereby authorized to prescribe and from time to time change the tolls that shall be levied by the Government of the United States for the use of the Panama Canal: *Provided*, That no tolls, when prescribed as above, shall be changed, unless six months' notice thereof shall have been given by the President by proclamation. No tolls shall be levied upon vessels engaged in the coastwise trade of the United States. That section forty-one hundred and thirty-two of the Revised Statutes is hereby amended to read, as follows:

"Section 4132. Vessels built within the United States and belonging wholly to citizens thereof, and vessels which may be captured in war by citizens of the United States and lawfully condemned as prize, or which may be adjudged to be forfeited for a breach of the laws of the United States, and seagoing vessels, whether steam or sail, which have been certified by the Steamboat Inspection Service as safe to carry dry and perishable cargo, not more than five years old at the time they apply for registry, wherever built, which are to engage only in trade with foreign countries or with the Philippine Islands and the islands of Guam and Tutuila, being wholly owned by citizens of the United States or corporations organized and chartered under the laws of the United States or of any State thereof, the president and managing directors

of which shall be citizens of the United States, and no others, may be registered as directed in this title. Foreign built vessels registered pursuant to this Act shall not engage in the coastwise trade: *Provided*, That a foreign built yacht, pleasure boat, or vessel, not used or intended to be used for trade, admitted to American registry pursuant to this section, shall not be exempt from the collection of *ad valorem* duty provided in section thirty-seven of the Act approved August fifth, nineteen hundred and nine, entitled 'An Act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes.' That all materials of foreign production which may be necessary for the construction or repair of vessels built in the United States and all such materials necessary for the building or repair of their machinery, and all articles necessary for their outfit and equipment may be imported into the United States free of duty under such regulations as the Secretary of the Treasury may prescribe: *Provided further*, That such vessels so admitted under the provisions of this section may contract with the Postmaster General, under the Act of March third, eighteen hundred and ninety-one, entitled 'An Act to provide for ocean mail service between the United States and foreign ports, and to promote commerce,' so long as such vessels shall in all respects comply with the provisions and requirements of said Act. Tolls may be based upon gross or net registered tonnage, displacement tonnage, or otherwise, and may be based on one form of tonnage for warships and another for ships of commerce. The rate of tolls may be lower upon vessels in ballast than upon vessels carrying passengers or cargo. When based upon net registered tonnage for ships of commerce, the tolls shall not exceed one dollar and twenty-five cents per net registered ton, nor be less, other than for vessels of the United States and its citizens, than the estimated proportionate cost of the actual maintenance and operation of the Canal, subject, however, to the provisions of article nineteen of the convention between the United States and the Republic of Panama, entered into November eighteenth, nineteen hundred and three. If the tolls shall not be based upon net registered tonnage, they shall not exceed the equivalent of one dollar and twenty-five cents per net registered ton as nearly as the same may be determined, nor be less than the equivalent of seventy-five cents per net registered ton. The toll for each passenger shall not be more than one dollar and fifty cents. The President is authorized to make, and from time to time amend, regulations governing the operation of the Panama Canal, and the passage and control of vessels through the same or any part thereof, including the locks and approaches thereto, and all rules and regulations affecting pilots and pilotage in the Canal or the approaches thereto through the adjacent waters.

Such regulations shall provide for prompt adjustment by agreement and immediate payment of claims for damages which may arise from injury to vessels, cargo, or passengers from the passing of vessels through the locks under the control of those operating them under such rules and regulations. In case of disagreement, suit may be brought in the district court of the Canal Zone against the governor of the Panama Canal. The hearing and disposition of such cases shall be expedited, and the judgment shall be immediately paid out of any moneys appropriated or allotted for Canal operation.

The President shall provide a method for the determination and adjustment of all claims arising out of personal injuries to employees thereafter occurring while directly engaged in actual work in connection with the construction, maintenance, operation, or sanitation of the Canal or of the Panama railroad, or of any auxiliary canals, locks, or other

works necessary and convenient for the construction, maintenance, operation, or sanitation of the Canal, whether such injuries result in death or not, and prescribe a schedule of compensation therefor, and may revise and modify such method and schedule at any time; and such claims to the extent they shall be allowed on such adjustment, if allowed at all, shall be paid out of the moneys hereafter appropriated for that purpose or out of the funds of the Panama Railroad Company, if said company was responsible for said injury, as the case may require. And after such method and schedule shall be provided by the President the provisions of the Act entitled "An Act granting to certain employees of the United States the right to receive from it compensation for injuries sustained in the course of their employment," approved May thirtieth, nineteen hundred and eight, and of the Act entitled "An Act relating to injured employees on the Isthmian Canal," approved February twenty-fourth, nineteen hundred and nine, shall not apply to personal injuries thereafter received and claims for which are subject to determination and adjustment as provided in this section.

Section 6. That the President is authorized to cause to be erected, maintained, and operated, subject to the international convention and the Act of Congress to regulate radio communication, at suitable places along the Panama Canal and the coast adjacent to its two terminals, in connection with the operation of said Canal, such wireless telegraphic installations as he may deem necessary for the operation, maintenance, sanitation, and protection of said Canal, and for other purposes. If it is found necessary to locate such installations upon territory of the Republic of Panama, the President is authorized to make such agreement with said Government as may be necessary, and also to provide for the acceptance and transmission, by said system, of all private and commercial messages, and those of the Government of Panama, on such terms and for such tolls as the President may prescribe: *Provided*, That the messages of the Government of the United States and the departments thereof, and the management of the Panama Canal, shall always be given precedence over all other messages. The President is also authorized, in his discretion, to enter into such operating agreements or leases with any private wireless company or companies as may best insure freedom from interference with the wireless telegraphic installations established by the United States. The President is also authorized to establish, maintain, and operate, through the Panama Railroad Company or otherwise, drydocks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances for the purpose of providing coal and other materials, labor, repairs, and supplies for vessels of the Government of the United States and, incidentally, for supplying such at reasonable prices to passing vessels, in accordance with appropriations hereby authorized to be made from time to time by Congress as a part of the maintenance and operation of the said Canal. Moneys received from the conduct of said business may be expended and reinvested for such purposes without being covered into the Treasury of the United States; and such moneys are hereby appropriated for such purposes, but all deposits of such funds shall be subject to the provisions of existing law relating to the deposit of other public funds of the United States, and any net profits accruing from such business shall annually be covered into the Treasury of the United States. Monthly reports of such receipts and expenditures shall be made to the President by the persons in charge, and annual reports shall be made to the Congress.

Section 7. That the governor of the Panama Canal shall, in connection with the opera-

tion of such Canal, have official control and jurisdiction over the Canal Zone and shall perform all duties in connection with the civil government of the Canal Zone, which is to be held, treated, and governed as an adjunct of such Panama Canal. Unless in this Act otherwise provided all existing laws of the Canal Zone referring to the civil governor or the civil administration of the Canal Zone shall be applicable to the governor of the Panama Canal, who shall perform all such executive and administrative duties required by existing law. The President is authorized to determine or cause to be determined what towns shall exist in the Canal Zone and subdivide and from time to time resubdivide said Canal Zone into subdivisions, to be designated by name or number, so that there shall be situated one town in each subdivision, and the boundaries of each subdivision shall be clearly defined. In each town there shall be a magistrate's court with exclusive original jurisdiction coextensive with the subdivision in which it is situated of all civil cases in which the principal sum claimed does not exceed three hundred dollars, and all criminal cases wherein the punishment that may be imposed shall not exceed a fine of one hundred dollars or imprisonment not exceeding thirty days, or both, and all violations of police regulations and ordinances and all actions involving possession or title to personal property or the forcible entry and detainer of real estate. Such magistrates shall also hold preliminary investigations in charges of felony and offenses under section ten of this Act, and commit or bail in bailable cases to the district court. A sufficient number of magistrates and constables, who must be citizens of the United States, to conduct the business of such courts shall be appointed by the governor of the Panama Canal for terms of four years and until their successors are appointed and qualified, and the compensation of such persons shall be fixed by the President, or by his authority, until such time as Congress may by law regulate the same. The rules governing said courts and prescribing the duties of said magistrates and constables, oaths and bonds, the times and places of holding such courts, the disposition of fines, costs, forfeitures, enforcements of judgments, providing for appeals therefrom to the district court, and the disposition, treatment, and pardon of convicts shall be established by order of the President. The governor of the Panama Canal shall appoint all notaries public, prescribe their powers and duties, their official seal, and the fees to be charged and collected by them.

Section 8. That there shall be in the Canal Zone one district court with two divisions, one including Balboa and the other including Cristobal; and one district judge of the said district, who shall hold his court in both divisions at such time as he may designate by order, at least once a month in each division. The rules of practice in such district court shall be prescribed or amended by order of the President. The said district court shall have original jurisdiction of all felony cases, of offenses arising under section ten of this Act, all causes in equity, admiralty, and all cases at law involving principal sums exceeding three hundred dollars and all appeals from judgments rendered in magistrates' courts. The jurisdiction in admiralty herein conferred upon the district judge and the district court shall be the same that is exercised by the United States district judges and the United States district courts, and the procedure and practice shall also be the same. The district court or the judge thereof shall also have jurisdiction of all other matters and proceedings not herein provided for which are now within the jurisdiction of the Supreme Court of the Canal Zone, of the Circuit Court of the Canal Zone, the District Court of the Canal Zone, or the judges thereof. Said judge shall provide for the selection, summoning, serving,

and compensation of jurors from among the citizens of the United States, to be subject to jury duty in either division of such district, and a jury shall be had in any criminal case or civil case at law originating in said court on the demand of either party. There shall be a district attorney and a marshal for said district. It shall be the duty of the district attorney to conduct all business, civil and criminal, for the Government, and to advise the governor of the Panama Canal on all legal questions touching the operation of the Canal and the administration of civil affairs. It shall be the duty of the marshal to execute all process of the court, preserve order therein, and do all things incident to the office of marshal. The district judge, the district attorney, and the marshal shall be appointed by the President, by and with the advice and consent of the Senate, for terms of four years each, and until their successors are appointed and qualified, and during their terms of office shall reside within the Canal Zone, and shall hold no other office, nor serve on any official board or commission, nor receive any emoluments except their salaries. The district judges shall receive the same salary paid the district judges of the United States, and shall appoint the clerk of said court, and may appoint one assistant when necessary, who shall receive salaries to be fixed by the President. The district judge shall be entitled to six weeks' leave of absence each year with pay. During his absence, or during any period of disability or disqualification from sickness or otherwise to discharge his duties, the same shall be temporarily performed by any circuit or district judge of the United States who may be designated by the President, and who, during such service, shall receive the additional mileage and per diem allowed by law to district judges of the United States when holding court away from their homes. The district attorney and the marshal shall be paid each a salary of five thousand dollars per annum.

Section 9. That the records of the existing courts and all causes, proceedings, and criminal prosecutions pending therein, as shown by the dockets thereof, except as herein otherwise provided, shall immediately upon the organization of the courts created by this Act be transferred to such new courts having jurisdiction of like cases, be entered upon the dockets thereof, and proceed as if they had originally been brought therein, whereupon all the existing courts, except the Supreme Court of the Canal Zone, shall cease to exist. The President may continue the Supreme Court of the Canal Zone and retain the judges thereof in office for such time as to him may seem necessary to determine finally any causes and proceedings which may be pending therein. All laws of the Canal Zone imposing duties upon the clerks or ministerial officers of existing courts shall apply and impose such duties upon the clerks and ministerial officers of the new courts created by this Act having jurisdiction of like cases, matters, and duties.

All existing laws in the Canal Zone governing practice and procedure in existing courts shall be applicable and adapted to the practice and procedure in the new courts.

The Circuit Court of Appeals of the Fifth Circuit of the United States shall have jurisdiction to review, revise, modify, reverse, or affirm the final judgments and decrees of the District Court of the Canal Zone and to render such judgments as in the opinion of the said appellate court should have been rendered by the trial court in all actions and proceedings in which the Constitution, or any statute, treaty, title, right, or privilege of the United States, is involved and a right thereunder denied, and in cases in which the value in controversy exceeds one thousand dollars, to be ascertained by the oath of either party, or by other competent evidence, and also in criminal causes wherein the offense charged is punishable as a felony. And such appellate jurisdiction, subject to the right of review by or

appeal to the Supreme Court of the United States as in other cases authorized by law, may be exercised by said circuit court of appeals in the same manner, under the same regulations, and by the same procedure as nearly as practicable as is done in reviewing the final judgments and decrees of the district courts of the United States.

Section 10. That after the Panama Canal shall have been completed and opened for operation the governor of the Panama Canal shall have the right to make such rules and regulations, subject to the approval of the President, touching the right of any person to remain upon or pass over any part of the Canal Zone as may be necessary. Any person violating any of such rules or regulations shall be guilty of a misdemeanor, and on conviction in the District Court of the Canal Zone shall be punished by a fine not exceeding five hundred dollars or by imprisonment not exceeding a year, or both, in the discretion of the court. It shall be unlawful for any person, by any means or in any way, to injure or obstruct, or attempt to injure or obstruct, any part of the Panama Canal or the locks thereof or the approaches thereto. Any person violating this provision shall be guilty of a felony, and on conviction in the District Court of the Canal Zone shall be punished by a fine not exceeding ten thousand dollars or by imprisonment not exceeding twenty years, or both, in the discretion of the court. If the act shall cause the death of any person within a year and a day thereafter, the person so convicted shall be guilty of murder and shall be punished accordingly.

Section 11. That section five of the Act to regulate commerce, approved February fourth, eighteen hundred and eighty-seven, as heretofore amended, is hereby amended by adding thereto a new paragraph at the end thereof, as follows:

"From and after the first day of July, nineteen hundred and fourteen, it shall be unlawful for any railroad company or other common carrier subject to the Act to regulate commerce to own, lease, operate, control, or have any interest whatsoever (by stock ownership or otherwise, either directly, indirectly, through any holding company, or by stockholders or directors in common, or in any other manner) in any common carrier by water operated through the Panama Canal or elsewhere with which said railroad or other carrier aforesaid does or may compete for traffic, or any vessel carrying freight or passengers upon said water route or elsewhere; and in case of the violation of this provision each day in which such violation continues shall be deemed a separate offense."

Jurisdiction is hereby conferred on the Interstate Commerce Commission to determine questions of fact as to the competition or possibility of competition, after full hearing, on the application of any railroad company or other carrier. Such application may be filed for the purpose of determining whether any existing service is in violation of this section and pray for an order permitting the continuance of any vessel or vessels already in operation, or for the purpose of asking an order to install new service not in conflict with the provisions of this paragraph. The commission may on its own motion or the application of any shipper institute proceedings to inquire into the operation of any vessel in use by any railroad or other carrier which has not applied to the commission and had the question of competition or the possibility of competition determined as herein provided. In all such cases the order of said commission shall be final. If the Interstate Commerce Commission shall be of the opinion that any such existing specified service by water other than through the Panama Canal is being operated in the interest of the public and is of advantage to the convenience and commerce of the people and that such extension will neither exclude, prevent, nor re-

duce competition on the route by water under consideration, the Interstate Commerce Commission may, by order, extend the time during which such service by water may continue to be operated beyond July first, nineteen hundred and fourteen. In every case of such extension the rates, schedules, and practices of such water carrier shall be filed with the Interstate Commerce Commission and shall be subject to the Act to regulate commerce and all amendments thereto in the same manner and to the same extent as is the railroad or other common carrier controlling such water carrier or interested in any manner in its operation: *Provided*, Any application for extension under the terms of this provision filed with the Interstate Commerce Commission prior to July first, nineteen hundred and fourteen, but for any reason not heard and disposed of before said date may be considered and granted thereafter.

No vessel permitted to engage in the coastwise or foreign trade of the United States shall be permitted to enter or pass through said Canal if such ship is owned, chartered, operated, or controlled by any person or company which is doing business in violation of the provisions of the Act of Congress approved July second, eighteen hundred and ninety, entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," or the provisions of sections seventy-three to seventy-seven, both inclusive, of an Act approved August twenty-seventh, eighteen hundred and ninety-four, entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," or the provisions of any other Act of Congress amending or supplementing the said Act of July second, eighteen hundred and ninety, commonly known as the Sherman Antitrust Act, and amendments thereto, or said sections of the Act of August twenty-seventh, eighteen hundred and ninety-four. The question of fact may be determined by the judgment of any court of the United States of competent jurisdiction in any cause pending before it to which the owners or operators of such ship are parties. Suit may be brought by any shipper or by the Attorney General of the United States.

That section six of said Act to regulate commerce, as heretofore amended, is hereby amended by adding a new paragraph at the end thereof, as follows:

"When property may be or is transported from point to point in the United States by rail and water through the Panama Canal or otherwise, the transportation being by a common carrier or carriers, and not entirely within the limits of a single State, the Interstate Commerce Commission shall have jurisdiction of such transportation and of the carriers, both by rail and by water, which may or do engage in the same, in the following particulars, in addition to the jurisdiction given by the Act to regulate commerce, as amended June eighteenth, nineteen hundred and ten:

"(a) To establish physical connection between the lines of the rail carrier and the dock of the water carrier by directing the rail carrier to make suitable connection between its line and a track or tracks which have been constructed from the dock to the limits of its right of way, or by directing either or both the rail and water carrier, individually or in connection with one another, to construct and connect with the lines of the rail carrier a spur track or tracks to the dock. This provision shall only apply where such connection is reasonably practicable, can be made with safety to the public, and where the amount of business to be handled is sufficient to justify the outlay.

"The commission shall have full authority to determine the terms and conditions upon which these connecting tracks, when constructed, shall be operated, and it may, either in the construction or the operation of such tracks, determine what sum shall be paid to or

by either carrier. The provisions of this paragraph shall extend to cases where the dock is owned by other parties than the carrier involved.

"(b) To establish through routes and maximum joint rates between and over such rail and water lines, and to determine all the terms and conditions under which such lines shall be operated in the handling of the traffic embraced.

"(c) To establish maximum proportional rates by rail to and from the ports to which the traffic is brought, or from which it is taken by the water carrier, and to determine to what traffic and in connection with what vessels and upon what terms and conditions such rates shall apply. By proportional rates are meant those which differ from the corresponding local rates to and from the port and which apply only to traffic which has been brought to the port or is carried from the port by a common carrier by water.

"(d) If any rail carrier subject to the Act to regulate commerce enters into arrangements with any water carrier operating from a port in the United States to a foreign country, through the Panama Canal or otherwise, for the handling of through business between interior points of the United States and such foreign country, the Interstate Commerce Commission may require such railway to enter into similar arrangements with any or all other lines of steamships operating from said port to the same foreign country."

The orders of the Interstate Commerce Commission relating to this section shall only be made upon formal complaint or in proceedings instituted by the commission of its own motion and after full hearing. The orders provided for in the two amendments to the Act to regulate commerce enacted in this section shall be served in the same manner and enforced by the same penalties and proceedings as are the orders of the commission made under the provisions of section fifteen of the Act to regulate commerce, as amended June eighteenth, nineteen hundred and ten, and they may be conditioned for the payment of any sum or the giving of security for the payment of any sum or the discharge of any obligation which may be required by the terms of said order.

Section 12. That all laws and treaties relating to the extradition of persons accused of crime in force in the United States, to the extent that they may not be in conflict with or superseded by any special treaty entered into between the United States and the Republic of Panama with respect to the Canal Zone, and all laws relating to the rendition of fugitives from justice as between the several States and Territories of the United States, shall extend to and be considered in force in the Canal Zone, and for such purposes and such purposes only the Canal Zone shall be considered and treated as an organized Territory of the United States.

Section 13. That in time of war in which the United States shall be engaged, or when, in the opinion of the President, war is imminent, such officer of the Army as the President may designate shall, upon the order of the President, assume and have exclusive authority and jurisdiction over the operation of the Panama Canal and all of its adjuncts, appendants, and appurtenances, including the entire control and government of the Canal Zone, and during a continuance of such condition the governor of the Panama Canal shall, in all respects and particulars as to the operation of such Panama Canal, and all duties, matters, and transactions affecting the Canal Zone, be subject to the order and direction of such officer of the Army.

Section 14. That this Act shall be known as, and referred to as, the Panama Canal Act, and the right to alter, amend, or repeal any or all of its provisions or to extend, modify, or annul any rule or regulation made under its authority is expressly reserved.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

There will be a meeting of the Executive Board of the Canal Zone Federation of Women's Clubs at Cristobal on Friday afternoon, August 30.

The report has been received that the Federation protégé, Elysium James, the blind boy who was sent to receive one year's schooling at the Perkins Institute for the Blind at Boston, has arrived in that city and will enter the school in September.

The Cristobal Woman's Club has completed its year book and the copy is now in the hands of the printer. The book will be issued at the opening of the club on September 28.

The Ancon Study Club began its study of Shakespeare at the meeting on Friday, August 16. The course will extend over several months.

Church Work.

Probably for the first time in the history of the See, the consecration of a bishop for the bishopric of Panama, took place in the Panama cathedral on Sunday morning, August 18. The Rt. Rev. Gaspard Stork, the bishop of Costa Rica, was the officiant, and the bishop-elect was the Rev. Dr. William Rojas, priest of the Order of St. Vincent. The ceremony was carried out according to the ancient rites of the Roman Catholic Church, but on account of local conditions, slight divergences were permitted, chief among these being the attendance upon the consecrating bishop of two priests in the place of two bishops, as required by the canonical law. Besides the six priests in attendance upon the two bishops, there were present in the chancel twelve of the local clergy, several brothers in orders, and one layman, or server. Among the priests were the superior of the Jesuits of the college of Panama, and a visitor of the Salaisan Fathers of Costa Rica. At 9 o'clock, the procession of priests, acolytes, the bishop of Costa Rica, and the bishop-elect crossed the square from the palace to the cathedral, and at 11 o'clock, when the ceremony was concluded by the singing of the *Te Deum* and the *Credo*, the procession reformed, headed by the two bishops, preceded by their symbols of office. The bishop of Costa Rica arrived in Panama on Monday, August 12, and took up his residence in the episcopal palace in Cathedral Square. He was accompanied by two priests and one layman from the cathedral in San José. He left for Costa Rica on the *Turrialba*, on Tuesday, August 20.

On Saturday evening August 31, the local council, Knights of Columbus, No. 1371, will hold a banquet at the Hotel Tivoli in honor of the new bishop of Panama, Monseigneur Rojas.

The parish of St. Ferdinand, Empire, celebrated the first anniversary of the opening and blessing of the parish house on Sunday, August 25. The ceremony took place after the mass. Since the opening of this house, the interest in the social activities of the parish has greatly increased. Several fairs, banquets, and other social entertainments have been held there, and the meetings of the church, societies, and guilds are weekly events in the life of the parish. A school for children has been opened in the basement of the building.

The next meeting of the Woman's Altar Guild of St. Luke's Hospital chapel, Ancon, will be held at the Hotel Tivoli on Tuesday

morning, September 3. This is the monthly business meeting and it is urgently requested that all active members be present.

Gatun Sunshine Society.

The Gatun Sunshine Society held a "home baked" supper in the Commission chapel on Thursday evening, August 22. The supper consisted of baked beans, brown bread, salad, and coffee. The patronage was large and the net receipts amounted to \$50. A similar entertainment is planned to be given about Thanksgiving time. At an election of officers for the society held early this month, the following were chosen: President, Mrs. Jervy; vice-president, Mrs. Wood; secretary, Mrs. Wagner; treasurer, Mrs. Fortney. These officers will serve for one year. The next meeting of the sunshine society will be held on Wednesday, September 4.

Admission to Examinations.

Attention is invited to the fact that a card of admission will be sent by this office to each applicant for civil service examination found to be eligible to be admitted to examination, immediately after the receipt of the examination questions from the Civil Service Commission, when a date of examination can be definitely fixed. No person should report at Culebra for examination before receiving a card of admission, or, in case such a notice has not been received, before having previously ascertained by telephone, or otherwise, the date on which the desired examination is scheduled to be held. Such a request should not be made except on the day before the date on which it is understood an examination is to be held, as occasionally it happens that the questions arrive only a day or two before the scheduled date.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., August 24, 1912.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the two weeks ending August 24:

Carrillo, August 11, from New York with 36 packages castings for superintendent of erection; 1 crate electrical material, for Pacific Division; 2 cases steel, 8 cases gate machinery, for emergency dam; 3 cases varnish, 16 kegs nails and washers, 8 coils rope, 13 cases rubber hose, for stock.

Tagus, August 11, from New York, with 196 pieces heel beams, for Panama railroad; 3 barrels brass cocks, 4 cases hardware, for stock.

Ormesby, August 12, from Brunswick, Ga., with 40,500 pieces cross-ties, for stock.

Cristobal, August 13, from New York, with 1 piece casting, for Empire store; 6 cases metal treads, for Panama railroad; 58 cases seal devices, for superintendent erection; 672 bundles steel, for Pacific Division; 1 launch, for Quarantine Officer; 119,919 bags cement, for Atlantic and Pacific Divisions; 2 cases machinery, for Mechanical Division; 1,327 bundles galvanized sheet iron, 63 bundles galvanized sheet iron, 240 barrels coal tar, 3 cases wrenches, 34 cases graphite, 5 crates fire brick, 12 pieces steel plates, 117 cases coolers, for stock.

Prinz Eitel Friedrich, August 13, from New York, with 112 bundles steel bolts, for fortifications; 70 cases paper, 16 drums lime, for stock.

Santa Maria, August 14, from New York, with six cases incandescent lamps, for Mechanical Division; 20 cases electric motors, five cases reflectors, four cases and six pieces traveling crane, for superintendent of erection; 12 crates stovepipe, for Pacific Division; three casks zinc, one case gaskets, six cases lanterns, for stock.

Parismina, August 15, from New Orleans, with 7,386 pieces yellow pine lumber, 209 pieces white oak lumber, for Mechanical Division; eight pieces white oak lumber, for Pacific Division; 50 pieces white oak lumber, for stock; 1,703 pieces yellow pine lumber, 149 pieces piling, one case sash tool brushes, 384 cases fire brick, two reels wire rope, two cases brushes, one case gauges

32 bundles shingles, 200 cases scouring soap, one case castings 228 drums oils, for stock; four crates and three bundles castings, for Panama Railroad Company; 908 bundles castings, for superintendent of erection; 51 cases brick, for Mechanical Division.

Colon, August 15, from New York, with six cases machinery, for superintendent of erection; 30 pieces engine couplers, for Mechanical Division; 30 pieces rough castings, 10 cases chloride of lime, 110 kegs bolts, 15 cases varnish, 29 pigs tin, 35 coils lead pipe, 147 pieces steel plate, 40 pieces steel bars, 162 packages switches and fittings, 100 cases garbage cans, 67 bundles baskets, 11 cases brass valves, 334 bundles roofing iron, 130 drums paint, 20 cases wrapping paper, for stock; 11 cases electrical material, for Panama Railroad Company; and a miscellaneous cargo, the whole consisting of 1,440 packages, weighing 200 tons.

Turrialba, August 18, from New York, with 13 cases gate machinery, for superintendent of erection; 12: bales rubber hose, seven cases hardware, for stock.

Tricolor, August 19, from Puget Sound, with 3,000 sacks oats, 152,477 pieces Douglas fir lumber, for stock four pieces spud timber, for Atlantic Division.

Kiora, August 20, from New York, with 434 pieces structural steel, for Panama Railroad Company; 162 bundles rack castings, for superintendent of erection; 40 drums gasoline, for stock.

Metapan, August 21, from New York, with 108 cases window glass, 212 coils manila rope, 12 cases wire, 86 drums lime, for stock; 28 cases gearings, 55 packages electrical material, for superintendent of erection.

Thelma, August 21, from St. Mary's Ga., with 5,985 pieces yellow pine lumber, 765 pieces piling, for stock.

Abangarez, August 22, from New Orleans, with 15 crates iron boxes, 1,093 pieces lumber, 94 pieces piling, for stock; 7,465 pieces lumber for Mechanical Division; 621 pieces lumber, for Atlantic Division.

Advance, August 22, from New York, with 12 coils wire, 10 cases files, 20 bales cotton mops, 13 cases pipe wrenches, 400 crates garbage cans, 21 bales rubber hose, 208 kegs bolts, 83 pieces steel beams, 25 crates lavatories, 200 kegs white zinc, 100 barrels alum, 98 bales waste, 10 cases glassware, for stock; 41 barrels brick, for Mechanical Division; 261 bundles steel bars, for Pacific Division; 30 pieces locomotive tires, for Mechanical Division; 579 bundles steel bars, for superintendent of erection; and a miscellaneous cargo, the whole consisting of 2,350 packages, weighing 415 tons.

Misdirected Letters.

ANCON, C. Z., August 28, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts and may be secured upon request of the addressees:

Barcroft, Frederick T.	Melgord, Julius

Lost—On Panama railroad train between Panama and Gorgona, or between the railroad station and fire engine house in Gorgona, a gold bar pin set with pearls. Finder please return to Mrs. F. H. Townsend, house No. 122, East Balboa, and receive reward.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The greater part of the Culebra clubhouse has been declared unsafe, and it is likely that the work of demolishing the main part of the building will begin early in September. The bowling alleys, soda fountain, and a few other rooms connected with them will remain for the present thus accommodating a part of the activities. Definite plans as to future work will be announced within a few days.

The annual interassociation tenpin bowling tournament has been organized and the following officers elected: President, Mr. Dougherty of Culebra; secretary, Mr. Pinney of Empire; official scorer, Mr. King of Gorgona. The tournament will open on the first Saturday in October. The president, secretary, and official scorer constitute a committee to draw up a schedule, and will also act as a standing committee to settle any disputes that may arise. The length of the schedule will be decided by the various men composing the teams.

The annual interassociation basketball league will start early in October.

CULEBRA.

The informal social planned for Tuesday evening, and the program of the Hindoo entertainers to have been given on Friday evening, were cancelled, because of the condition of the building.

The local bigpin bowling tournament will continue until all the games are played. The standing is, as follows:

Team.	Won.	Lost.	P. C.
Exploders.....	2	7	.222
Wreckers.....	3	6	.333
Piledrivers.....	6	3	.667
Trackshifters.....	5	4	.447
Unloaders.....	6	3	.667
Spreaders.....	6	3	.667
Empire opposed Culebra in a bigpin bowling series Saturday evening and took three games. Scores:			
Empire.....	221 184 202	Cushing.....	124 153
Pinney.....	193 148 224	Mengel.....	157 154 171
Gustavson.....	127 192 166	Coppin.....	176 173 159
Grund.....	180 181 165	Tuleu.....	144
Goolsby.....	167 212 193	Anderson.....	144 165 170
Huson.....		Dougherty.....	178 160 190

Total.....888 917 950 799 776 843
Owing to the dismantling of the clubhouse, the basketball league games will not be played.

The following are the high scores for the week in bowling: Cushing, 200; Anderson, 211.

Highest games bowled for the gold medal were: Dougherty, 249, 214; Hobbs, 227; Mengel, 221, 208; Anderson, 212, 200; Coppin, 202.

EMPIRE.

It is expected that the bowling alleys will be ready for use by Tuesday, September 3. Two games remain to be bowled in the local league.

One dozen new tenpin bowling balls have been received from the United States.

A pool and billiard tournament will be started early in September. All wishing to enter are requested to hand their names to the pool room manager.

The standing of the local basketball tournament is, as follows:

	Won.	Lost.
English.....	4	2
Americans.....	4	2
Germans.....	1	3

The tie will be played off on Wednesday, August 28.

GORGONA.

New supplies for the pool and billiard room, and bowling alleys, have been ordered from the United States.

GATUN.

Moving pictures will be shown at Gatun on Friday evening, August 30. There will be a special music number for this night.

The regular monthly meeting of the executive council was held on Friday, August 23. The financial and statistical reports, as given by the clubhouse secretary, show the Gatun clubhouse to be in good condition. The membership has now reached a total of 415.

Joe Mitchell will have charge of the basketball practices until the new physical director arrives. Practice games will be held twice a week.

CRISTOBAL.

The next moving picture show will be held on Thursday night, August 29.

The Cristobal debating and literary club will resume its sessions beginning with a meeting Wednesday, September 4. The subject for debate at this meeting will be, "Resolved, That immigration should be further restricted." The membership in this club is open to all men interested in discussing topics of current interest

and literary betterment, and it is desired that all who can take an active interest in the work.

The local bowling league will close this week. At present, four of the six teams are practically tied for first honors. The following high scores were made by the local bowlers during the past week:

Tenpins—Barrett, 222, 212; Collins, 201; Bullard, 206; Vanderburg, 212; Buser, 204; Herrington, 205.
Duckpins—Bullard, 102; Cotton, C., 100.
Candlepins—Witmer, 100; Buser, 100; Carpenter, 101.

Rainfall from August 1 to 24, 1912, Inclusive.

STATIONS.	Maximum in one day.	Date.	Total for period.

8. Medley—*In the Shadows*.....Williams
9. March—*Stars and Stripes*.....Souza

OLIVER KIMBALL, Acting Musical Director.

The next concert will be given at Corozal, C. Z., on September 8.

OFFICIAL CIRCULARS.

Accumulated Leave.

CULEBRA, C. Z., August 22, 1912.

CIRCULAR No. 132-M (Cross 279-E):

Heretofore, the rule followed in limiting the amount of leave which an employee may accumulate has been that an employee on the monthly roll may accumulate not to exceed eighty-four days' leave, even though he earned part of it by previous service on the hourly roll; and that an employee on the hourly roll may accumulate not to exceed fifty-six days' leave, even though he earned part of it by previous service on the monthly roll.

Hereafter, an employee may accumulate only the amount of leave earned in two consecutive years; provided, however, that decisions given in writing by this office in individual cases under the old rule prior to this date shall not be changed.

Cases have arisen where it would be to the advantage of an employee, who has served more than two years without taking a leave, to waive his claim to leave for certain periods of service. Such waivers, when made in writing, in proper form, will be accepted.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Promotion of Steamshovel Cranemen.

CULEBRA, C. Z., August 22, 1912.

CIRCULAR No. 387-B:

Effective this date, one out of three positions as steamshovel engineer, to be filled, will be filled by the promotion of cranemen by seniority, as provided in Circular No. 387. Two out of each three positions will be filled by the employment of experienced engineers:

1. Who are already in the service as cranemen or in other capacities.
2. By appointment through the Washington Office.
3. Who are on the Isthmus open for engagement.

New employments will be made preferably by appointment through the Washington Office, unless the needs of the service make it necessary to secure engineers immediately on the Isthmus.

This change in the seniority promotion rights of cranemen, as given them in the circular above mentioned, is made at the request of the steamshovel men in a petition addressed to this office, and which is signed by a majority of the cranemen who would probably be promoted during the remaining stages of the work. It is stated in the petition that the motive which actuates them is the good of the service, in that it is realized that a proper standard of efficiency cannot be maintained by breaking in cranemen to fill all vacancies for engineers. The cranemen are especially commended for voluntarily surrendering a privilege for the more expeditious advancement of the work.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Transfer of Tools, and Other Articles, with Equipment.

CULEBRA, C. Z., August 22, 1912.

CIRCULAR No. 370-C:

When a locomotive, locomotive crane, spreader, track shifter, or other piece of equipment is transferred from one division or department to another, there will be transferred with it the authorized tools and oiling equipment, boxes and chains with locks for securing tools and oiling equipment, water cooler, etc.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Applications for Employment.

CULEBRA, C. Z., August 21, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is requested that when applications are received from persons in the United States, for employment in this service, same be forwarded to this office, informally, for informal transmission to the Washington Office of the Commission, where such action as is necessary may be taken thereon.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Accommodations on the "Panama."

CULEBRA, C. Z., August 21, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

A few scattered berths remain open on the steamship *Panama* sailing September 3. It is not desired, however, that any further requests for transportation for families be submitted for this sailing.

By direction of the Chairman.

C. A. McILVAINE, Chief Clerk.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

The following vessels arrived at, or departed from, the port of Balboa during the week ending August 24:
 Arrivals—August 18, *Chile*, from Guayaquil; August 19, *Guatemala*, from Callao; August 20, *Quito*, from Guayaquil; August 19, *Tricolor*, from San Francisco; August 21, *Urubamba*, from Callao; August 22, *Peru*, from San Francisco; August 23, *Aztec*, from San Francisco.

Departures—August 20, *Ucayali*, to Callao; August 20, *Huasco*, to Valparaiso; August 23, *Barracouta*, to Central America; August 23, *Chile*, to Guayaquil.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, SEPTEMBER 4, 1912.

No. 2.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Erection of Emergency Dams.

Arrival of recent shipments has placed on the Isthmus all of the material for the emergency dam for the east chamber of Gatun Locks, with the exception of the gates, which are not essential to the progress of erection at present; and most of that for the west chamber dam. Erection is confined at present, however, to the east dam. All of the steel work on the quadrant over which the short arm of the bridge will travel is in place on its concrete base. The large center casting on which the bridge will pivot is in position; the center track, 30 feet 4 inches in diameter, surrounding the casting, has undergone final adjustment; and all of the heavy center girders, which are to turn on discs about the center casting, are erected in place. The force of the American Bridge Company, in charge of erection, was increased on August 9, by eight bridgemen, and on September 3, by four bridgemen, from the United States.

New Cement Bids.

Bids were opened at the office of the General Purchasing Officer in Washington on September 3 for furnishing an additional million barrels of Portland cement for use on the Canal and auxiliary works, under Circular 721. The specifications provided that this amount may be increased or decreased between 30 and 15 per cent at the option of the Canal Commission. The rate of delivery under the proposed new contract will probably vary from a minimum of 2,000 barrels to a maximum of 5,000 barrels a day from the date deliveries begin until July 1, 1913, and from that date until the completion of the contract, the deliveries will probably range between 500 and 3,000 barrels a day. Deliveries will be expected to be begun not earlier than November 1, 1912, and not later than January 1, 1913, and may extend over a period of two years. In making a contract, the Canal Commission will reserve the right to select the bid, or combination of bids, that

will, in its judgment, be most advantageous to the United States.

The original contract for furnishing cement for use on the Canal work was awarded to the Atlas Portland Cement Company in January, 1909, and called for the delivery of 4,500,000 barrels at the minimum rate of delivery of 2,000 barrels, and the maximum rate of 10,000 barrels a day, with the right to increase the order 15 per cent. Up to August 1, over 4,000,000 barrels had been received on the Isthmus, and there still remained to be shipped approximately 500,000 barrels. The prices under the existing contract were \$1.19 per barrel in wood, and 92 cents per barrel in bags, calculating bags to the barrel, this price being contingent on the return to the manufacturer of eight good empty sacks to the barrel, as each bag is shipped in a double container. On this contract the Atlantic Division received 1,343,757 barrels in wood, but since May, 1911, they have received all cement in bags, as did the Pacific Division from the beginning of shipments.

Recreation Hall at Toro Point.

In response to a petition of the majority of the employes of the Isthmian Canal Commission at Toro Point, a building is being constructed near the site of the bandstand to afford a place of assembly and recreation. It will be of one story, 25 by 40 feet in plan, and open on all sides. To the height of three feet above the floor, the sides will be sheathed with corrugated iron, above which copper screening will reach to the roof. Wide eaves will protect against blowing rains.

Improving the Sabanas Road.

The work of resurfacing that part of the Sabanas road lying within the limits of the Canal Zone has been completed for a distance of about two miles, beginning at the Zone line, just beyond the Sabanas police station. Since the original work was authorized, it has been decided also to resurface and otherwise improve the Tumba Muerta road, one and one-half miles long, which branches off and gives accessibility to a number of farmhouses situated to the north of the Sabanas highway.

The work of improvement consists in covering the road with a layer of No. 2 crushed rock to a depth of four inches, dressing it with a coat of screenings, and then rolling. The work was begun at the eastern boundary of the Zone, in order not to subject the completed section to the wear of the heavy wagons transporting crushed rock and other supplies. When the rolling is finished, the road will be treated with several kinds of road oil to determine the grade best adapted for use on the roads of the Canal Zone. One hundred and twenty barrels of oil for this purpose were received during the month of June, about 40 barrels each of Texaco, Tarvea, and the product manufactured by the West India Oil

Company. It is purposed to divide the road into sections, each section to be treated with a different kind of oil. In addition, a further test will be made of the crude oil manufactured by the Union Oil Company of California, which was applied to several Canal Zone roads during the past dry season. The Sabanas road is much used by automobiles, and on this account, the macadam has been subjected to greater wear. It is believed that the use of oil will not only serve as a dust preventive, but will effectively bind the macadam as well.

New Quarantine Launch.

A new launch has been received and placed in commission for use of the quarantine service at Colon and Cristobal. It is modeled after the pilot boat in the service of the Panama Railroad Company, and was built by the same firm, C. L. Seabury and Company, Morris Heights, N. Y. It has a top length, overall, of 35 feet six inches, with an 8-foot beam, outside measurement. Its engine is a No. 153, Model C. A., and is capable of developing from 32 to 40 horsepower. The deck is provided with a hand rail of brass pipe 1½ inches in diameter, three feet three inches high, which begins at a point nine feet from the tip of the bow, and extends back to the after end of the engine, covering a distance of 10 feet six inches. The cover of the engine compartment is in two leaves. The hull is coppered up to four inches above the water line, and has a keel one foot deep and four inches wide. The boat is equipped with a heavy rope fender all around, and carries the required life-saving apparatus. The launch, formerly used by the Colon and Cristobal quarantine authorities, while entirely serviceable, was too small, and has been transferred to Gatun Lake for the use of the sanitary inspector of that district. The name of the new launch is *Pysche Rittenhouse*.

Lower Approach Wall for Miraflores Locks.

Concrete is being placed for the lower approach wall for Miraflores Locks, extending into the Pacific entrance channel. In structure, it will be two walls, back to back, with an interval of eight feet between bases, and with faces in continuation of the center wall. The outer ends will be joined by a concrete wall, eight feet thick, perpendicular to the parallel walls, and the space thus enclosed will be filled with rock and screenings, after which decking will be laid over the top. Like the other approach walls for the three locks, the wall will be 1,200 feet long and 58 feet wide. It will contain 82,000 cubic yards of concrete.

The structure is to be similar to that of the lower approach wall for Pedro Miguel Lock, except that the bases of the parallel walls will not touch and that each of the two parallel walls of the structure is to rest on rock at elevation 45 feet below mean sealevel, with a toe along the outer side about 10 feet wide

OBISPO DIVERSION.

Work Done Since Construction to Prevent Its Breaking Into the Canal.

The Obispo Diversion, which takes care of the water from the drainage area on the east bank of the Canal, between Gold Hill and Gamboa, has given trouble at four different points along its route of five or six miles during the past year, and the work of relocating the channel to remove it from the danger zone is at present in progress at three of these places.

During the French canal times, and up to 1909, the Obispo River flowed into the Cut, thence found its way to the Chagres River. As the excavation in the Canal, through this section, proceeded, it became evident that this flow would have to be diverted, and on June 1, 1909, an artificial channel was completed. It begins near the foot of Gold Hill, and practically parallels the Canal to a point opposite Haut Obispo, where the hills were so close to the Cut that the diversion was turned into a ravine which ends in the Chagres River about one-fourth of a mile above Gamboa. The drainage area of the diversion is about 10 square miles, the greatest flood recorded in the Obispo River during French times being on June 23, 1881—6,014 cubic feet per second. The gaging was taken just below the La Pita River, so that it included the flow of the Camacho, which does not run into the diversion at present. It has been estimated that this discharge of 6,014 cubic feet per second would be about 4,200 cubic feet under present conditions. The diversion was constructed to carry 6,000 cubic feet per second at its outlet, with a depth of 13 feet, and a velocity of over seven feet per second. Its bed, for 14,500 feet, has a fall of 5.28 feet to the mile, and for 9,000 feet, 13.2 feet to the mile. The bottom width of the channel averages about 50 feet. The original excavation aggregated 1,108,662 cubic yards, but additional excavation from time to time since, on account of changing the channel, has brought the total excavation to July 1, 1912, to 1,238,389 cubic yards. The first cost was about \$1,000,000.

Although located well back from the east bank of the Canal, as it existed in 1908 and 1909, the frequent slips and slides have brought the diversion, in several places, in close proximity to it, with the result that two extensive breaks have occurred, and several other points have been threatened. The diversion was located and mostly excavated between Gold Hill and La Pita before the width of the Canal was changed from 200 feet at the bottom, to 300 feet. Local conditions made it necessary for economy at the time to widen out 75 feet on the east side and 25 feet on the west. Had it not been widened out 75 feet on the east side, most of the slides would not have reached to the original location.

The first break of importance took place on May 7, 1910, at a point a short distance north of Empire, known as La Pita, and allowed the water from the diversion to inundate the Cut to a depth of 55 feet above sealevel. The damage was temporarily repaired by the construction of a wooden flume, which was substituted subsequently for one of concrete.

In March of this year, a crack appeared on the west side of the diversion, south of the Empire suspension bridge, near Station 1725, which indicated a movement in the bank in-

volving between 400,000 and 500,000 cubic yards of material, and threatened the diversion back from the bank of the Canal for a distance of about 600 feet. During the following month, the diversion was relocated 550 feet, at its most distant point, farther to the east, by making a detour 1,970 feet long, which caused the excavation of 26,128 cubic yards. The Empire-Paraiso wagon road, and the railroad, were shifted at the same time to the west bank of the new channel.

A few months ago, the slide between Station 1618 and Station 1637 on the east bank of the Canal, opposite Whitehouse, threatened to break back into the diversion, and it was decided to relocate the latter about 100 feet more to the east. This work, which was completed during the months of July and August of this year, required the construction of about 500 feet of trestle, and the excavation of 13,000 cubic yards of material.

A steamshovel is now engaged in making a detour in the diversion, about one-fifth of a mile in length, at a point crossed by the Las Cascadas plantation road, just north of the Empire suspension bridge. The new channel involves the changing of the wagon road, which formerly was at right angles with the bank of the Canal, and then ran parallel to it to the bridge. The new route will be in a direct line to the bridge from where the detour work is in progress.

The break in the diversion, north of Empire, on August 20, which flooded the Cut and involved a slide of considerable proportions, is being repaired as rapidly as possible, and it is expected that the stream will be flowing in its new channel on Thursday, September 5. The heavy showers over the drainage area of the diversion last week carried the water into the Cut, north of the temporary dike at the foot of the break, faster than the pumps at Gamboa could lift it into the Chagres, with the result that the bottom of the Canal was flooded to the depth of two or three feet all the way from the slide to the Gamboa dike. The water was again under control on Saturday, August 31.

Reorganization of Canal Zone Police.

Effective September 1, the organization of the Division of Police and Prisons has been changed to conform with a redistricting of the Canal Zone territory, made on account of the depopulation of part of the Gatun Lake area and the extension of Canal and fortification operations at different points. The Gorgona police district is abolished, the greater part of its territory being merged into the Empire district, while the Bohio subdistrict is absorbed in the Gatun subdistrict, a part of Cristobal district. The present districts are those of Ancon, Empire, and Cristobal.

The boundaries of the Ancon district are coincident with those of the present administrative district of Ancon. The subdistrict of Miraflores is abolished, being consolidated with that of Pedro Miguel. A new subdistrict is designated to include Naos, Flamenco, Culebra, and Perico Islands, which have been policed for some time without distinct district designation. Ancon district is now divided into the subdistricts of Naos Island, Balboa, Las Sabanas, Corozal, and Pedro Miguel.

The boundaries of the Empire police district are coincident with the present boundaries of the administrative districts of Empire and

Gorgona, the district court at Gorgona being continued for the present. The subdistricts of San Pablo and Tabernilla are abolished, and their depopulated territory is merged with that of the new subdistrict of Gorgona. The subdistricts of Empire district are designated as Paraiso, Culebra, Las Cascadas, Bas Obispo, and Gorgona.

The Cristobal police district is the same in territory as the present Cristobal administrative district. Its subdistricts are Gatun, Toro Point, and Porto Bello. The subdistrict of Toro Point includes all of the Canal Zone territory lying west of Limon Bay.

The police stations at Ancon, Empire, and Cristobal are designated as the central stations of their respective districts, other stations being designated as substations and call stations. Substations of Ancon station are Naos Island, Las Sabanas, Corozal, and Pedro Miguel; call stations are Balboa, and Miraflores.

Empire central station has substations at Paraiso, Culebra, Las Cascadas, Bas Obispo, Matachin, and Gorgona. Its call stations are at Cucaracha, Golden Green, Gamboa, and Frijoles.

The substations of Cristobal central station are Gatun, Mount Hope, Toro Point, and Porto Bello, and call stations are located at Monte Lirio, and Colon Hospital.

The reorganization has enabled the division to dispense with the services of one lieutenant and five corporals, though the number of first-class privates was increased by five at the same time. The number of lieutenants is now three; sergeants, eight; corporals, 15; first-class privates, 122; second-class privates, 90.

PERSONAL.

Mr. Emory R. Johnson, professor of transportation and commerce of the University of Pennsylvania, arrived at Colon on Thursday, August 29. This is his third visit to the Isthmus, having been here as a member of the Isthmian Canal Commission of 1899-1904, and again last year. He is the special commissioner of the United States Government on Panama Canal traffic and tolls, and prepared a preliminary statement on the subject, by direction of the Secretary of War, in the early part of this year.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Local Inspectors, at the Administration Building, Ancon, on Wednesday, September 11, 1912, at 8 a. m. All applicants for licenses as chauffeurs must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8 a. m., with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability to properly operate an automobile, and must have the automobile with them.

Missing Man.

Any one having information regarding the whereabouts of Pinkney Albert Davies, who was at one time in the employ of the Isthmian Canal Commission, is requested to communicate with THE CANAL RECORD.

WEST BREAKWATER LIGHT.

Harbor Light and Fog Signal Station, Part of Plan for Lighting the Canal.

In the general scheme for lighting the Canal a harbor light and fog signal station is to be built at the outer end of the west breakwater in Colon Harbor. An "L," turning inward, will

FIG. 1—SOUTHEAST ELEVATION OF STATION.

be made at the end of the breakwater and the tower built in it, so that thorough protection from the waves will be obtained.

The natural bottom of the harbor at this

FIG. 2—PLAN OF PUMP ROOM AND CISTERNS.

point is about 45 feet below mean tide, and is made mostly of silt brought down by the streams entering Limon Bay. On this silt a pile of riprap for the subfoundations will be dumped, allowed to settle for some time, and leveled off by a diver at elevation 22 feet below sealevel.

Already a reinforced concrete caisson has been built up to a height of 15 feet at the Mount Hope drydock, floated out to the powder dock at Mindi, and there built up to a height of 25 feet. It is now sunk in 20 feet of

water in an isolated part of Limon Bay, where it will remain until time to place it on the riprap foundation, when it will be towed out and sunk to its position by letting water into the 16 pockets through valves made for that purpose. The caisson will then be built to a height of 36 feet, the outside pockets filled with rock, decked over with a reinforced concrete floor, and the superstructure built on that.

The caisson is 46 by 46 feet in plan by 36 feet high, and is divided into 16 pockets by three transverse walls running each way. The bottom is 18 inches thick; the outer walls are 14 inches thick, and the interior walls 12 inches. All are reinforced with 1-inch twisted steel rods, and the water pressure against the outside walls is taken care of by differential spacing of the reinforcement. Each exterior pocket has a 5-inch pipe, with a globe valve, which connects it with the outside, and will permit the caisson to be sunk on an even keel in a few minutes. The four interior pockets are connected in a similar way to the exterior pockets. After the caisson is in place the valves will be recovered. The four interior pockets will be utilized from 24 feet up by making cisterns in two of them, and using the other two for a gasoline engine and pump room. Intake and waste pipes are placed as shown in Figure 3.

The superstructure will be of reinforced

FIG. 3—VERTICAL SECTION OF STATION.

concrete, except the roof, which will be of tile,

and the floor beams, which will be I-beams encased in concrete.

The first floor contains the gasoline engine, air compressors, air tanks, shower bath, etc., the second floor, a kitchen, pantry, living room, dry room, closets, etc., for the attendants, while the third will be the watch room, and the fourth floor, the lantern.

The superstructure will be 26 by 26 feet in plan, and the focal plane is 56 feet four inches above mean sealevel.

When completed, this station will have a light of the fourth order, a compressed air fog signal, and a submarine bell.

Annual Inventories.

The annual inventories, taken as of June 30, 1912, show a reduction in stock in the various material storehouses of the Quartermaster's Department of \$790,568.50, as compared with the same date a year ago. The total value of material carried in stock in the storehouses at the end of the past fiscal year was \$3,721,212.90. Every storehouse showed a decrease, with the exception of Ancon and Toro Point. The general storehouse at Mount Hope, and the two largest storehouses next in order, Gorgona and Empire, showed decreases of \$138,958.44, \$196,323.63, and \$162,984.87, respectively. The material returned to stock by other divisions during the fiscal year ending June 30, aggregated \$862,400.78.

Red Cross Finances.

The financial statement of the Canal Zone chapter, American National Red Cross, for the month of July, 1912, is, as follows:

RECEIPTS.

July 1. On hand.....	\$2,300.36
July 25. Membership dues.....	3.00

Total receipts..... \$2,303.36

DISBURSEMENTS.

July 1. Relief of patient at Colon Hospital, deported to Jamaica.....	\$10.00
July 2. Relief of American ex-employee, sent to the United States on account of being totally blind.....	150.00
July 17. Relief of destitute colored woman at Culebra.....	10.00
July 26. Relief of patient at Colon Hospital, deported on account of tuberculosis.....	10.00
July 26. Relief of Spaniard at Culebra, deported to Spain on account of tuberculosis.....	50.00
July 29. Relief of man and wife from Empire, deported to England.....	15.00

Total disbursements..... \$245.00

July 31. Balance on hand..... \$2,058.36

JOHN L. PHILLIPS, Treasurer.

Approved:

C. A. DEVOL, Chairman.

Canal Zone Postal Savings Bank Transactions.

A statement of Canal Zone postal savings bank transactions at Canal Zone post-offices, for the period of July 1 to July 29, follows:

NAME OF OFFICE.	Postal Savings Certificates Issued.	Postal Savings Certificates Paid.
Ancon.....	\$9,340.00	\$4,458.00
Balboa.....	9,378.00	6,149.00
Bas Obispo.....	960.00	1,261.00
Corozal.....	10,747.00	9,986.00
Cristobal.....	9,951.00	6,858.00
Culebra.....	9,758.00	6,818.00
Empire.....	6,080.00	4,325.00

CULEBRA CUT SLIDES.

Excavation on this Account During the Past Fiscal Year Larger Than Ever Before.

There was removed from slides and breaks in the Culebra Cut section of the Central Division during the twelve months ending June 30, 1912, a total of 5,915,000 cubic yards of material, which is the greatest amount taken out on this account in any one year since the beginning of operations. A statement showing the total excavation, the amount removed from slides and breaks, and the percentage involved in the slides and breaks, is given below. There is also presented a graphical illustration showing the total estimated excavation on account of slides, as compared with the original total of excavation in the Canal prism in the Culebra Cut section; also, the estimate of total excavation remaining on July 1, 1912, showing the amount of excavation remaining on that date due to slides:

This circle represents the total amount of material excavated from the Canal prism in the Culebra Cut section by the Americans, exclusive of slides, to July 1, 1912.

This circle represents the total amount of material excavated from slides from the Culebra Cut section by the Americans up to July 1, 1912.

The circle on the left represents the material remaining to be excavated from the Canal prism in the Culebra Cut section, exclusive of all slides, from July 1, 1912.

The circle on the right represents the material in slides on the banks of the Canal in the Culebra Cut section, remaining to be excavated according to estimate made as of July 1, 1912.

FISCAL YEARS.	Total excavation.	Removed from slides.	Percent of total amount removed from slides.
	<i>Cu. Yds.</i>	<i>Cu. Yds.</i>	
1904-1909....	40,983,366	3,227,059	7.87
1910.....	17,865,808	2,649,563	14.83
1911.....	18,552,644	4,879,378	26.30
1912.....	17,143,067	5,915,000	34.50
Total.....	94,544,885	16,671,000	17.63

The first large slide to occur in the banks

of the Canal in the Culebra Cut section was that at Cucaracha, known as the Cucaracha slide, which developed in July, 1905, and from which nearly 3,000,000 cubic yards of material have been excavated to date. During the twelvemonth period ending June 30, 1912, only 170,000 cubic yards of material were removed from this slide, which, at present, gives no evidence of any future considerable movement. It covers an area of 47.1 acres.

The most extensive slide, or rather break, is that on the west bank of the Canal at Culebra, which extends practically continuously from Station 1726 to Station 1804, covers an area of 63 acres, and has now broken back to a point where the site of the Culebra clubhouse is involved. From this area, a total of 6,765,500 cubic yards of material had been removed up to June 30, 1912, and it is estimated that 1,300,000 cubic yards remained to be excavated on that date. A total of 2,710,000 cubic yards was taken out from the area involved in this slide during the twelvemonth ending June 30, 1912. It first developed in January, 1907.

The slide next largest in extent is situated on the east bank of Culebra Cut directly opposite the one on the west bank, is practically continuous from Station 1741 to Station 1796, and covers an area of 50.7 acres. A total of 4,290,000 cubic yards of material had been removed from this slide up to June 30, 1912, and approximately 600,000 cubic yards remained to be removed on that date. It first developed in January, 1907.

The three slides above described are the only ones which have so far developed in which the total amount of material involved exceeded 1,000,000 cubic yards. A statement showing the slides in the Central Division, which had developed up to June 30, 1912, all of which are confined to the Culebra Cut section, follows:

LOCATION.	Date of development.	Removed year ending July 1, 1912.	Material excavated to date.	Material remaining.	Area of slide in acres.
		<i>Cubic Yards.</i>	<i>Cubic Yards.</i>	<i>Cubic Yards.</i>

Total.....		5,915,000	16,671,000	3,595,000	208.00

Since June 30, 1912, two or three other slides have developed, the most important being the break in the east bank of the Cut about one-half mile north of Empire, which occurred on August 20, and allowed the water in the Obispo Diversion to flow into the Cut, and another break in the west bank at Culebra.

The work of decreasing the pressure where breaks and slides might be expected, by excavation with steamshovels, has continued uninterruptedly since January, 1911. Three shovels have been kept continuously at work terracing the west bank at Culebra, and the same number were occupied during the latter

part of 1911 on the opposite bank. The excavation has been made in each locality in a series of nine terraces. In addition, one shovel has been engaged in similar work at the Whitehouse yard, and another on the east bank, a little south of the Empire suspension bridge. The maximum depth of material removed at one spot in the west bank at Culebra was 80 feet, measured vertically, and on the east bank 70 feet in one place.

The record shows that while the lightening of weight has, on the whole, been beneficial, it has not wholly stopped the moving and heaving. The results obtained so far, however, warrant a continuance of this work, and it will probably be prosecuted until all excavation in the Cut by steamshovels has been completed. Most of the so-called slides during the past year, or more, were, properly speaking, breaks in the banks of the Cut, due to the inability of an underlying layer of rock of poor quality to support the enormous pressure superinduced by the weight above it. This weight crushes the underlying material, forces it laterally, and causes it to heave in the bottom of the Cut. Observations made show that the material at times has heaved to a height of 30 feet, but within the past year, or more, 15 or 20 feet has been about the maximum height. Other observations made of these upheavals go to show that the material involved is not clay or stiff mud, as is commonly supposed, but rather argillaceous sandstone in pieces ranging in volume from a few cubic inches to 20 or 30 cubic yards, with an average perhaps of from one to three cubic yards.

Colon Humane Society.

A special meeting of the Colon Humane Society was held in the Municipal building, Colon, on Wednesday evening, August 29, Dr. Bieberach presiding. Among the cases reported were two of destitute children; the first, Doris Godfrey, a patient in Colon Hospital, who has been deserted by her parents. A

person has been found who wishes to adopt the child provided he can procure legal guarantee that the parents cannot claim it at any future time. As no such provision is made in the laws of the Republic of Panama, the little girl remains at the hospital pending further decision of her case. The second case was that of a child orphaned by the recent death of its parents. The case was referred to the governor of Colon, in order that steps may be taken to have the child placed in the government asylum in Panama. It was reported that the city authorities are taking steps to prevent the employment of children in saloons.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

Among other questions discussed at the meeting of the Executive Board of the Canal Zone Federation of Women's Clubs, held at Cristobal on Friday, August 30, were the arrangements for the January meeting, at which it is thought the Federation will formally disband, owing to the decrease in membership, due to the completion of Canal construction. In case this action is taken, single clubs in the Canal Zone will be at liberty to join the General Federation. The January meeting will be made one of special interest.

An invitation has been extended to the federation, in connection with the state federations throughout the United States, to send representatives to the XV International Congress of Hygiene and Demography, to be held in Washington, October 23 to 28, and the president was authorized to be its representative at that meeting.

During the absence in September and October of the president and the corresponding secretary, all matters concerning the federation may be referred to the recording secretary, Mrs. Carl H. Elliott, Cristobal.

For the information of those women who have no club affiliation in local organizations, and yet are interested in such activities, the following notice which appeared in THE CANAL RECORD of February 21 is reprinted herewith:

"The board, at its meeting at Gorgona on February 9, authorized a revision of the Federation by-laws in order to admit a class of individual members, or what will be known as general members. This class of members will be composed of women residing in Canal Zone villages where there are no federated clubs. General members will have all the rights and privileges of regular members; they may hold office, vote on all questions and act on any Federation committee. The annual dues for such members will be one dollar, payable at the time of admittance to membership. A membership committee was appointed, composed of the president and the two secretaries. Any woman wishing to become a general member, who is endorsed by clubwomen, should communicate with the corresponding secretary, Mrs. Thomas E. Brown, Jr. of Cristobal." This class of members will act on committees, especially on civic and local concerns, by which means they will become members of the executive board and have voice in all matters which may come before that body. The provision for this general membership was considered advisable by the constant changes in the personnels of the various clubs, and also by the removal of many clubwomen from the Isthmus, which, in several cases caused the disbandment of organizations. In order that the federation work be carried out according to its original plan, it was necessary to maintain its membership, and by this means the board hopes it may be done.

A circular has been issued among the organizations of women in the Canal Zone in the interest of the \$500,000 fund for the "Woman's Titanic Memorial" to be erected in the city of Washington by the women of America, in memory of the men who lost their lives, in the sinking of the *Titanic*, in order that the women and children should have

first place. The object of sending this communication to the president, or secretary, of each organization was to bring the matter before the women in the Canal Zone. It is not to be regarded as an appeal to any organization, but it was thought by the local committee that a larger number of Canal Zone women might be reached by this means than if a general announcement was made. The plan is that each woman subscribe one dollar to the fund. A committee has been formed, composed of women of St. Luke's Altar Guild, for the purpose of centralizing the local effort.

The rector of Christ Church, Colon, assisted by the members of the Woman's Altar Guild, entertained the members of the Gatun mission guild at the rectory on Saturday afternoon, August 24.

Church Work.

The annual report of the Panama mission of the Episcopal church of America has just been compiled, and a summary of the status of the work at the end of the fiscal year, July 1, is, as follows: The staff of clergy in the mission comprises four white priests, including the general missionary, and two West Indians, one of these having been advanced to the priesthood in January at the time of the annual visitation of the bishop in charge. In addition to these, there is a staff of nine catechists for the West Indian missions at Gorgona, Bas Obispo, Mount Hope, Las Cascadas, Paraiso, Panama, and Darien. The value of church property has been increased by the transfer of the stone structure of Christ Church, on Colon beach, from the Panama Railroad Company to the mission, valued at \$33,000, and the construction of a mission church at Pedro Miguel. The total valuation of church properties is \$69,100. The total offerings for the year from all sources amounted to \$9,293.34. The number of communicants was 1,343. There were 961 baptisms during the year, and 283 candidates were presented to the bishop for confirmation at his visitation. There are four altar guilds, composed of American women; these are in connection with Christ Church, Colon; Gatun mission; St. Mary's, Empire, and St. Luke's Hospital chapel, Ancon. In addition to its responses to the needs of the church, this last named society contributed \$50 toward the building fund of St. Michael's mission at Pedro Miguel, as its Easter offering.

Owing to the progress of the work on the Canal it was found necessary to suspend the work of the church for Americans at Culebra; to abandon the missions at San Pablo and Tabernilla, and to establish the mission before referred to at Pedro Miguel. The mission authorities are looking toward the abandonment of the missions at Gorgona, Empire, Culebra, Bas Obispo, and Las Cascadas by 1913, and the establishing of a mission in the thickly populated suburbs of Panama. Recommendations for a reorganization, at the visitation of the bishop in 1913, to meet the demands of the permanent Canal force are also contained in the report.

At the meeting of the Woman's Altar Guild of St. Luke's Hospital Chapel, held at the Hotel Tivoli on Tuesday morning, September 3, it was decided to suspend all meetings of the guild until November 1, All Saints' Day, at which time the annual meeting of the guild will be held, with election of officers. The day will begin with the corporate communion of

the guild, in the chapel, the time of which service will be announced later, and the annual meeting, followed by a social session, will be at the home of Mrs. R. E. Noble. This will complete the fifth year of the organization. The membership is sustained and interest in the various activities of the guild has been uniformly keen. During the recess, altar duty will be taken by the members, as requested by the chairman of the altar committee.

Sunday and Labor Day Excursions.

A large number of Canal employes took advantage of the two holidays, Sunday, September 1, and Labor Day following, for various outings and excursions. A party of 50 left on Saturday evening on the steamer *Veraguas* for a trip to the Pearl Islands. It stopped at San Miguel on Rey Island and returned to Panama on Monday afternoon. Two other parties made a trip to these islands. A second party, composed of Commission employes, including a number of the staff of Ancon Hospital, left on Saturday evening for a trip to the Bayano River. During the stay on the river, the members of the party spent the time in alligator shooting and orchid hunting. The trip included a walk from Capitan to Chepo, the return to Panama being made on Monday evening. A party of 16 spent Sunday on Taboguilla beach, leaving Panama by the launch *Aurora* at 9.30 a. m., on Sunday, and returning the evening of the same day. The time was spent in fishing, orchid hunting, and bathing. Lunch was taken in an abandoned palm-thatched native hut. There were also several excursions to Taboga.

United Spanish War Veterans.

A meeting of Chagres Camp, No. 1, U.S.W.V., will be held in the Kangaroo hall, Empire, at 3 p. m., Sunday, September 8, 1912. This meeting is for the purpose of installing a full staff of officers for the new camp. After the meeting, an entertainment, with refreshments, will follow. All members of the camp are requested to be present. The Panama Auxiliary, No. 1, and all eligibles; and ladies, are invited to attend.

Civil Service Examinations.

Examinations for the following named positions are scheduled to be held at Culebra on October 20: Agricultural inspector, Philippine Service; assistant observer, nonapportioned Departmental Service; cadet engineer, cadet officer, Lighthouse Service; mechanical draftsman, topographic draftsman, Isthmian Canal Service; engineer, Indian Service (steam engineering, electrical engineering, heating, refrigeration, gas and gasoline engines, hydraulics;) farmer, Indian Service; fish culturist, nonapportioned Departmental Service; junior engineer (civil,) junior (mechanical or electrical,) engineer, department at large; pharmacist, Public Health and Marine Hospital Service; printer, Government Printing Office; scientific assistant, Department of Agriculture, nonapportioned Departmental Service; trained nurse, Indian and Isthmian Canal Services; wireman, nonapportioned Departmental Service.

Women will be admitted to the examinations for scientific assistant and trained nurse mentioned above.

Applications for the above named examinations will not be received in this office after September 26. This date will be changed if necessary. In requesting information the

kind of examination desired should be specifically mentioned. A limited supply of a special announcement on the scientific assistant examination has been received.

All instructions found in application forms and in the Manual of Examinations concerning an examination desired should be carefully read and understood before filing application. In answering question 4 in applications, residence must be shown in a State, and county thereof, of the United States, *up to the time of making application*. The date of examination should be omitted in application forms.

ISTHMIAN CIVIL SERVICE BOARD.
Culebra, C. Z., August 31, 1912.

Obituary.

Alfred Smith, an employe of the Central Division at Empire, died in Ancon hospital on August 30. He was 47 years of age, married, and had been on the Isthmus six years. He is survived by his wife, living at Empire.

Miss Margaret E. Gannon, a nurse in Colon hospital, died in the hospital on August 22. She was 29 years of age, and had been on the Isthmus four and one-half years. She is survived by a brother, George Gannon, living in Philadelphia, Pa.

Mrs. George M. Kane, the mother-in-law of Edward G. Bath of Gatun, died in Colon Hospital on August 28. She was 63 years of age and had been on the Isthmus six months, coming here from Ohio.

Knights of Pythias Memorial Exhibit.

The Canal Zone Knights of Pythias have been invited to participate in a Pythian bazaar and states exhibit to be held in Baltimore, in October, the proceeds of which will be devoted toward a fund for the erection of a Pythian memorial castle. The Canal Zone exhibit will consist of objects representative of the Isthmian life of the American people. The Young Men's Christian Association, the Society of the Chagres, the Boy Scouts, and other local organizations have been asked to participate in the Canal Zone exhibit. The local committee is formed of the following members of the Knights of Pythias: W. S. Lawrence, C. R. Chisholm, Cristobal; J. H. Stevenson, C. O. Jones, Gatun; C. S. Boyer, K. R. S., Gorgona, F. G. Calvert, K. R. S., Las Cascadas; S. A. Benninger, R. E. Murphy, Empire; Geo. A. Jones, K. R. S., Culebra; T. L. Kent, J. W. Pickett, Paraiso; R. H. Hall, Balboa. The Baltimore exhibit will be opened on October 1, probably by President Taft.

Misdirected Letters.

ANCON, C. Z., September 4, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Arnold, Mrs. John	Langston, Argle
Barker, Arthur J.	Lyons, S. J.
Bennett, C. S.	Marshall, Louise E.
Carvallis, Carlos	Matsumoto, M.
Catleyne, Thomas A.	Mitchel, McD.
Cot, John	Phillips, Betsy (pkg.)
Dye, Ira W.	Roldanz, Antonio R.
Edwards, Lenard	Rose, Chas. D.
Hallet, Charles	Saldien, Aug.
Hughes, R.	Senior, Miss Beatrice
Keeler, Mrs. Marey L.	Von Pflugk, Mrs. Lucy
Kitchen, F. L.	Williams, J. E.
Lang, Edward R.	Williams, S. G.

Band Concert.

A concert will be given by the Isthmian Canal Commission band at Corozal, C. Z., on Sunday, September 8, at 4.30 p. m.

The next concert will be given at Empire on Sunday, September 15.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

Corozal bowlers met defeat at the hands of Gorgona, Saturday night, August 31. The scores were, as follows:

Gorgona.	Corozal.
Sims..... 136 161 185	Sims..... 156 144 158
Everett..... 148 181 173	Dalton..... 146 138 165
Gebert..... 120	Snyder..... 158 147 134
King..... 181 181 149	Bordt..... 145 164 159
Davis..... 149 202 170	Coonly..... 147 184 158
Johnston..... 150 136	

Total.... 734 875 813 752 727 774

CULEBRA.

The following departments of the clubhouse will remain and the activities carried on as usual: Barber-shop, bowling alleys, pressing club, reading room, library, cigar stand, and soda fountain.

Following is the standing of the bigpin bowling teams:

Team.	Won.	Lost.	P. C.
Spreaders.....	7	3	.700
Unloaders.....	7	3	.700
Wreckers.....	6	3	.667
Track shifters.....	4	6	.400
Piledrivers.....	3	6	.333
Exploders.....	2	8	.200

EMPIRE.

After being closed for one month for repairs, the bowling alleys were opened on Wednesday, September 4. On Saturday night, September 7, the Gatun and Culebra teams will bowl two of the Empire teams on the Empire alleys.

The winners of the local basketball league will play the "All-Star" team on Friday, September 6.

New classes in Spanish will be formed the first of September. The classes meet on Tuesday and Thursday evenings.

GORGONA.

George R. D. Kramer, formerly secretary of the Culebra clubhouse, has been appointed secretary at Gorgona to fill the position made vacant by the resignation of Thomas Booz. He will take charge shortly.

The bowling alleys are undergoing repairs.

GATUN.

"Open house" was observed on Saturday evening, August 31. The affair was held on the first floor. A large number of the latest phonograph records were played for the first time. The euchre pool tournament created interest and resulted, as follows: Miller, 123 balls; Cheeks, 114; Chenault, 99; Eggleston, 66; Huttlemaler, 66; Dennis, 63; Twitchell, 60; Sherrard, 54. Mr. Miller will receive a cue for winning first prize in the tournament. For the four-cornered billiard tournament, Townsley received the cue for first prize; Wurster was awarded second, Eggleston, third; Miller, fourth. Immediately after the pool tournament, those present congregated in the lobby, where the following men were presented with gold medals as members of the winning team of the recent Isthmian pool tournament: W. C. Dalton, D. C. Galloway, G. L. Hughes, Louis DePoorter. Mr. C. E. Vierbuchen was presented with a medal as first prize in the July duckpin tournament. On behalf of the council and members of the clubhouse, P. Wilbert Brunner, who, for the past seven weeks, has been volunteer acting physical director, was presented by Secretary Smith, with a gold ring with pearl setting, and a pair of gold cuff buttons, as a token of appreciation for the services he has rendered the association, and of the members' personal esteem. A reception was then held in honor of Mr. P. T. Woolworth, formerly of Rochester, N. Y., who has been appointed physical director of the Gatun clubhouse. During the evening, Mr. H. S. Glick entertained the visitors with piano selections. Refreshments were served.

A three-cushioned billiard tournament will be started this week. Any member is entitled to enter. Hand your name to Louis DePoorter.

Gatun's membership of 416 is the largest of any clubhouse on the Isthmus. The membership receipts for August were over \$450.

Five new billiard cloths were received from the United States during the past week, and the tables will be recovered immediately. New balls have been ordered also.

Six new tenpin balls have been ordered from the United States.

The physical department is being reorganized this week under the management of the new physical director, Mr. Woolworth. The gymnasium nights this week will be Tuesday and Thursday, and the basketball practice will be held on Wednesday and Friday nights.

The boys' department will be reorganized also. Regular systematic gymnasium work, with games, etc will be held Monday, Wednesday, and Saturday mornings at 9 o'clock. Mr. Woolworth will have charge.

CRISTOBAL.

A pennant was awarded to A. M. Gibson for the highest tenpin score during August. Score, 255. Mrs.

Raymond Bell was awarded a pennant for the highest score in duckpins made by the ladies during the month. Score, 98. A ragtime tournament will be started next week.

The next moving picture show will be on Friday night, September 6, at 8.15 o'clock.

Beginning with Tuesday night, September 10, regular basketball practice will be resumed, and any who wish to try for the team which will represent the Cristobal clubhouse in the Isthmian League are urged to come out. The league games will begin in October.

Rainfall from August 1 to 31, 1912, Inclusive.

September 11...	3.20	9.35	3.43	9.56

Married.

GALLAGHER-SULLIVAN—At St. John's Church, Canton, Mass., on Tuesday, August 20, Catherine E. Sullivan of Canton, Mass., to William P. Gallagher of Milton, Mass., the Rev. John J. Farrell officiating. Canal Zone residence, Culebra.

Auction of Fire Horses at Cristobal.

Three fire horses, which are no longer necessary in the fire department on account of the new automobile fire engines, will be offered for sale to the highest bidder, for cash, at the Cristobal fire station, Saturday afternoon, at 2 p. m., September 7, 1912. The horses are now at the Cristobal fire station and may be inspected by any one interested. The three horses were purchased in the United States at a cost of \$250 each. Their weight is about 1,300 pounds; color, bay; height, about 15½ to 16½ hands. Right is reserved to reject any or all bids.

C. E. WEIDMAN, Fire Chief.

COMMISSARY DEPARTMENT.

The commissaries are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning September 1, 1912:

*Indicates reduction from last list.

**Indicates 5 cents allowed for return of bottle.

†Indicates advance on last list.

††Fowls weigh each about as follows: 3, 3½, 4, 4½ and 5 pounds. Prices are based accordingly; when size ordered is not in stock next lightest weight is supplied and refund note sent for difference.

‡Sold only from commissaries; no orders taken for delivery.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, and Colon, during the week ending August 31:

Tivies, August 25, from New York, with 30 barrels rosin, 16 cases chain blocks, four cases hardware, for stock; 20 cases sheet copper, for fortifications; 57 cases castings, for superintendent of erection.

Oruba, August 25, from New York, with 17 cases babbitt metal, 391 bundles roofing iron, for stock; 210 packages track material, for superintendent of erection.

Mathilda, August 25, from New York, with 205 cases blasting caps, 37 drums gasoline, for stock; 137,685 bags cement, for Atlantic and Pacific Divisions.

Prinz Sigismund, August 27, from New York, with 20 bundles rakes, for stock; 112 bundles anchor bolts, 38 kegs washers and nuts, for fortifications.

Belgian, August 27, from Liverpool, with 100 barrels carbolic acid, for stock.

Zacapa, August 28, from New York, with 60 drums calcium carbide, 50 cases toilet paper, 12 cases stationery, for stock; 62 cases incandescent lamps, for Mechanical Division; 50 cases gate machinery, for superintendent of erection; 13 crates stove pipe, for Pacific Division;

Panama, August 28, from New York, with 312 bundles steel bars, 37 barrels bricks, for Pacific Division; 114 kegs rivets, 27 pieces steel beams, for Panama Railroad Company; 200 pieces car couplers, for Mechanical Division; 86 barrels insulators, 26 cases castings, for superintendent of erection; nine cases paint, 20 cases stationery, 18 reels steel rope, 11 pieces steel channels, 300 kegs white lead, 139 bundles steel bars, 600 cases linseed oil, 67 cases candles, 30 cases sal soda, 1,340 kegs wire nails, 100 drums welding compound, 70 pieces lumber, for stock; and a miscellaneous cargo, the whole consisting of 3,785 packages, weighing 400 tons.

Atenas, August 29, from New Orleans, with 2,868 pieces lumber, for Mechanical Division; 218 pieces piling, 416 pieces lumber, 153 barrels sea coal facing, 70 cases paint, 413 sacks feed, 167 drums kerosene, 400 cases kerosene, for stock.

Ancon, August 30, from New York, with 77 barrels pitch, 650 packages garbage cans, 16 cases handles, 62 kegs nuts, 30 cases stationery, 32 cases hardware, for stock; 30 barrels white cement, for Panama Railroad Company; 199,975 bags cement, for Atlantic and Pacific Divisions.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston, at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans, via Limon, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 2 p. m.

The following vessels arrived at, or departed from, the port of Balboa during the week ending August 31: Arrivals—August 25, *Manavi*, from Buenaventura; August 26, *Huallaga*, from Callao; August 27, *Peru* (P. S. N.), from Guayaquil; August 28, *San José*, from San Francisco; August 29, *City of Para*, from San Francisco; August 29, *Aysen*, from Valparaiso; August 31, *California*, from Corinto.

Departures—August 26, *Guatemala*, to Callao; August 26, *Quito*, to Guayaquil; August 28, *Urubamba*, to Callao; August 29, *Peru*, to San Francisco; August 30, *Manavi*, to Buenaventura; August 31, *Tricolor*, to San Francisco.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, SEPTEMBER 11, 1912.

No. 3.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Canal Record Index.

The index to Volume 5 of THE CANAL RECORD, in form suitable for binding, will be ready for distribution shortly. It will be sent free, on application, to such persons, institutions, libraries, etc., as desire to preserve their copies of THE CANAL RECORD in book form. Application should be made to the Secretary, Isthmian Canal Commission, Ancon, C. Z.

Panama Inaugural Ceremonies.

An invitation has been extended through the Chairman of the Commission to all American citizens on the Isthmus to attend the inauguration of President-elect Belisario Porras on October 1, and a special invitation has been extended to the fraternal and other organizations on the Isthmus to participate actively in the celebration.

The Chairman regrets his inability to declare a holiday on this occasion, but there is no objection to employees being excused for this purpose if their services can be spared on that day by the heads of the respective departments and divisions. Societies or organizations desiring to accept this invitation should communicate with Mr. Samuel Lewis, Panama, Republic of Panama.

Canal Work in August.

The grand total of Canal excavation to September 1 was 178,344,405 cubic yards, leaving to be excavated 33,882,595 cubic yards, or a little over one-fifth of the entire amount necessary for the completed Canal. The total excavation for the month of August was 2,443,353 cubic yards, as compared with 2,706,223 cubic yards in August, 1911.

The dry excavation amounted to 1,356,625 cubic yards, and was principally by steam-shovels. The dredges removed 955,617 cubic yards from the Canal prism, and 131,111 cubic yards from the site of the Balboa terminals, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on

the locks at Gatun, Pedro Miguel and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 515,947 cubic yards. Of this total, 1,974 cubic yards, consisted of dry excavation near the Locks, and the remainder was wet excavation—429,415 cubic yards from the Atlantic entrance, and 84,558 cubic yards between the Locks and the sea.

The total excavation in the Central Division was 1,094,132 cubic yards, 1,067,300 cubic yards from the Culebra Cut section, and 26,832 cubic yards from the Obispo Division.

In the Pacific Division, the total excavation was 833,274 cubic yards, 260,519 cubic yards of which, consisted of dry excavation, 183,570 cubic yards from the Canal prism, 64,963 cubic yards from the terminal site, and the remainder near the locks. Of the 572,755 cubic yards of wet excavation, 441,644 cubic yards were from the channel, while the remainder was in connection with the terminal work.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
Dry excavation—			
Locks, dam and spillway	Cu. Yds. 1,974	Cu. Yds.	Cu. Yds. 1,974
Mindi
Total	1,974	1,974
Wet excavation—			
Atlantic entrance.....	429,415	429,415
Locks, dam and spillway	84,558	84,558
East Diversion
Total	513,973	513,973
Total wet and dry excavation	515,947	515,947

CENTRAL DIVISION.

Dry excavation—		
Culebra Cut.....	1,067,300	1,067,300
Chagres section.....
Obispo Diversion	26,832	26,832
Total	1,094,132	1,094,132

PACIFIC DIVISION.

Dry excavation—		
Locks, dams and spillways	11,986	11,986
Balboa terminals	64,963	64,963
Prism, south of Miraflores Locks.....	183,570	183,570
Total	260,519	260,519
Wet excavation—		
Pacific entrance.....	441,644	441,644

Total	572,755	572,755
Total wet and dry excavation	833,274	833,274

TOTAL CANAL EXCAVATION.

Dry excavation	1,356,625	1,356,625
Wet excavation.....	1,086,728	1,086,728
Total	2,443,353	2,443,353
Mean rainfall along Canal (ten stations), 11.98 inches.		
By "Work" excavation is meant excavation actually		

made for one of the constituent parts of the Canal, such as a prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc.. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

DAM AND LOCK CONSTRUCTION.

MATERIAL.	Atlantic.	Pacific.	Total.
	Cu. Yds.	Cu. Yds.	Cu. Yds.
Concrete laid in locks.	6,855	81,801	88,656
Concrete laid in dams and spillways.....	1,223	1,223
Fill placed in dams....	244,618	57,621	302,239

Culebra Clubhouse to be Dismantled.

The Culebra clubhouse will be demolished, because of the decision to remove the ground upon which it stands, in order to lighten the weight upon the west bank of the Canal at this point. All Y. M. C. A. activities will be discontinued, but arrangements are being made to use the upper floor of the schoolhouse for white children at Culebra for moving picture shows and other entertainments. The present equipment will be stored at the Lirio planing mill.

Automobiles in the Canal Zone.

On September 1, 1912, there were 65 automobiles licensed to travel in the Canal Zone. Of these, 14 are the property of residents of the Canal Zone, and the remainder of citizens of the Republic of Panama. With one exception, all are passenger vehicles, the exception being a motor wagon in use at Mount Hope and Cristobal. The first Canal Zone automobile license was issued on December 3, 1910. Six licenses were issued in 1910; 28 during 1911, and 48 to date in 1912, making a total of 82 licenses granted, seventeen of which have lapsed. The number of motor cycles licensed on September 1, 1912, was 31, of which 28 are the property of residents in the Canal Zone.

Water Capacity of Gatun Lake.

The surface of Gatun Lake was 39.06 feet above sealevel at 5 p. m., on September 2, and calculations based on contour surveys indicate that the amount of water in the lake was then 34.29 billion cubic feet. At 5 p. m., on September 9, the surface of the lake was 42 feet above sealevel, and the quantity of water had increased by 5.74 billion cubic feet, or to 40.03 billion cubic feet, which is 299,424,400,000 gallons. The maximum capacity of the Rio Grande reservoir, when the surface of its water is even with the dam, at elevation plus 238 feet, is 65,588,000 cubic feet, less than one-seventh of the average daily flow into Gatun Lake. The Rio Grande has approximately twice the capacity of the Camacho, and six and a half times the capacity

STEAMSHOVEL RECORDS.

Work of Central Division Machines During the Month of August.

During the month of August, the total amount of material excavated in the Central Division was 1,094,132 cubic yards, of which 197,597 cubic yards were classified as earth, and 896,535 cubic yards as rock.

The entire total of 1,094,132 cubic yards was removed by steamshovels.

The high record for the month was made by shovel No. 217, working 27 days in the Culebra district, which excavated 49,157 cubic yards of rock.

The second best record for the month was made by shovel No. 212, working 27 days in the Culebra district, which excavated 44,713 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 27 days in the Culebra district, which excavated 41,793 cubic yards of earth.

Shovel No. 229, working in the Culebra district, made a high record for one day by excavating 3,021 cubic yards of rock on August 1.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month, and for one day, are shown in the following table:

Civil Service Examinations.

Examinations for the following named positions are scheduled to be held at Culebra, probably on October 20: Agricultural inspector, Philippine Service; assistant observer, non-apportioned Departmental Service; cadet engineer, cadet officer, Lighthouse Service; mechanical draftsman, topographic draftsman, Isthmian Canal Service; engineer, Indian Service (optional—steam engineering, electrical engineering, heating, refrigeration, gas and gasoline engines, hydraulics); farmer, Indian Service; fish culturist, nonapportioned Departmental Service; junior engineer (civil), junior engineer (mechanical or electrical) Engineer department at large; pharmacist, Public Health and Marine Hospital Service; printer, Government Printing Office; scientific assistant, Department of Agriculture, nonapportioned Departmental Service; trained nurse, Indian and Isthmian Canal Services; wireman, nonapportioned Departmental Service.

Women will be admitted to the examina-

tions for scientific assistant and trained nurse mentioned above.

Applications for the above named examinations will not be received in this office after September 26. This date will be changed if necessary. In requesting information the kind of examination desired should be specifically mentioned. A limited supply of a special announcement on the scientific assistant examination has been received.

All instructions found in application forms and in the Manual of Examinations concerning an examination desired should be carefully read and understood before filing application. In answering question 4 in application, residence must be shown in a State, and country therein, of the United States, *up to the time of making application*. The date of examination should be omitted in application forms.

ISTHMIAN CIVIL SERVICE BOARD.
Culebra, C. Z., August 31, 1912.

PERSONAL.

Mr. H. H. Rousseau, accompanied by his family, and Mrs. George R. Goethals, sailed for New York on the *Panama*, on Tuesday, September 3, on his annual leave.

Lieut.-Col. C. A. Devol sailed on the *Allianca* on September 8, on his annual leave.

The Hon. H. Percival Dodge, the American minister, accompanied by Mrs. Dodge, sailed for New York on the United Fruit Company's steamer *Zacapa*, on Thursday, September 5, on his annual leave.

Mr. Frank Feuille sailed on September 5 on the *Atenas*, to New Orleans, to spend his annual leave in the United States.

Col. Tom M. Cooke sailed for the United States on the *Panama* on Tuesday, September 3, on 84 days' leave of absence, 42 days of which are without pay.

Mr. J. A. Smith and Mr. Frank A. Gause were among the passengers on the *Allianca*, who returned from leave on Monday, September 2.

Mr. James C. Courts, clerk of the House Committee on Appropriations, is a passenger on the *Cristobal* scheduled to arrive at Cristobal on Thursday, September 12.

I. B. of S. S. and D. M.

Local No. 19, I. B. of S. S. and D. M., will hold its regular meeting on Sunday, September 15, at the Empire lodge hall, at 12.15 p. m. All members are requested to attend.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending September 7:

DATE.	Hours worked.	Cubic Yards.
September 2. (Holiday).....
September 3.....	6.50	2,403
September 4.....	7.25	2,589
September 5.....	8.05	2,627
September 6.....	8.05	2,801
September 7.....	7.55	2,713
Total.....	38.20	13,133

Building Notes.

Additional quarters are to be provided at Corozal by the removal of two Type 14-two-family houses from Culebra for the use of gold married employees, and the conversion of two laborers barracks, in the rear of the Corozal hotel, into quarters for American bachelor employees. Each of these barracks

will contain eight rooms, four on each side of a hallway that will extend through the center of each building. In addition, there will be a Type 18 house near the hotel, which is to be brought from Bas Obispo. This building will provide a total of 24 rooms for gold bachelor employees.

Plans have been made for the erection of an office building, 14 by 30 feet in size, near the Spillway site at Gatun, for the use of the supervisors of erection of the lock gates. It will contain two principal rooms, one for a general, and the other, for a private office.

Labor Trains to East Balboa.

An extension of labor train service between Balboa and East Balboa has been put into effect to accommodate employees in the former village, which is now without a hotel, and the crews of dredges which change shifts at 6 a. m., and 6 p. m. During the lunch hours, a train of two cars operates between the repair shop at Balboa and the foot of Ancon crusher, which is within a few hundred yards of the East Balboa hotel. The Panama-Balboa labor train schedule has been amended, as follows: The trains which leave Panama at 5.25 a. m., and 5.35 p. m., run direct to the East Balboa commissary store, then return to Big Tree, and arrive at Balboa 20 minutes after leaving Panama; and the trains which leave Balboa at 6 a. m., and 6.10 p. m., follow the same route in reverse. With the exception of these four trains the Panama-Balboa schedule remains the same.

Pacific Division Sand Service.

A report of sand cars loaded and shipped from Balboa during the month of August, follows:

DESTINATION.	Number Cars.	Cubic Yards.
Pacific Division.....	2,493	44,924
Atlantic Division.....	5	121
Central Division.....	24	360
Mechanical Division.....	4	68
Quartermaster's Department.....	4	100
Civil Administration.....	1	25
Fortifications.....	*101	2,823
First Division.....	28	428
Lighthouse Division.....	1	23
Panama Railroad Company.....	2	50
Concrete dock, P. R. R.....	3	61
Balboa terminal.....	3	45
Total.....	*2,669	49,028

*In addition, one barge load was shipped.

Central Division Unloaders for August.

The following statement shows the number of trains and Lidgerwood cars unloaded by the Central Division during the month of August:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa.....	4	1,331	26,620
Miraflores*.....	3	592	11,840
Gamboa.....	3	580	12,130
Total.....	10	2,503	50,590

*Two unloaders, working from August 1 to 20, unloaded 357 trains, consisting of 7,140 cars; three unloaders, working from August 21 to 31, unloaded 235 trains, consisting of 4,700 cars, making a grand total of 592 trains, consisting of 11,840 cars.

Missing Man.

Information is desired as to the whereabouts of Mr. Frank H. Weakley, formerly of Nashville, Tenn. He was known to be at Las Vegas, Nevada, in February, 1910, but no trace of him has been discovered since. Any person having knowledge of him is requested to send it to THE CANAL RECORD.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

MONTHLY TOTALS BY CUBIC YARDS OF EXCAVATION AND LOCK AND DAM CONSTRUCTION.

THREE YEARS OF LOCK WORK.

Review of Concrete Construction at Gatun, Pedro Miguel, and Miraflores.

Placement of concrete for the Gatun Locks was begun on August 24, 1909, and on August 24, 1912, 91.95 per cent of the 2,055,000 cubic yards required in their construction had been laid. The amount in place at the close of that day was 1,889,673 cubic yards, leaving to be placed approximately 165,000 cubic yards.

An average of 1,075 cubic yards per working day was laid during the year ending August 24, 1912. During the year ending August 24, 1911, the daily average was 2,911 cubic yards. The decrease is due to the completion of the heavy masonry.

Concrete for the upper and intermediate locks, exclusive of the south approach wall, was practically completed by September 1, 1911, and about 38.62 per cent of the concrete for the lower level was in place at that time. During the past year, the mass work for the lower level, exclusive of the north approach walls, has been completed, leaving about 153,000 cubic yards of concrete yet to be placed. At the upper end of the Locks, piers and arches for the wing walls were completed, and the cellular approach wall, for which the first concrete was laid on September 30, 1911, is within three per cent of completion.

As the heavy masonry was brought to completion, mixer production was decreased. Early in September, 1911, the construction plant, with eight two-cubic yard mixers, began to reduce production by using fewer of the cubes continuously, though the number in use on any day was affected by immediate conditions. From August 24 to December 31, 1911, the average number of mixers used was 5.3; from January 1 to June 1, 1912, the average was 3.43. From May 9 to August 2, only two mixers were in use. Since August 2, work on the upper approach wall, which had been suspended for three months to allow the part of the wall already erected to settle, has been hastened, and two and three mixers have been in daily use. The average number for the year, August 24, 1911 to August 24, 1912, was 4.05.

The auxiliary mixing plant, equipped with two two-cubic yard mixers, used both of them continuously until February 6, 1912, from which date to the time the plant was closed down, on March 11, 1912, it had a daily average of 1.21 mixers, not counting five days on which the plant was closed. Note of the closing and removal of this plant, with a résumé of its operations, was made in THE CANAL RECORD of March 27, 1912.

The placement of concrete from month to month, since the beginning of the work is shown in the following table:

MONTH.	1909	1910	1911	1912
January.....	54,136	72,919	34,983	
February.....	55,696	72,103	26,664

Total.....	116,072	886,451	758,821	128,329

*August 1 to 24, inclusive.

In accord with the approach to completion of the concrete work, the hauling of

sand from Nombre de Dios was discontinued on November 17, 1911. On December 29, 1911, shipments of Chamé sand began from the Pacific Division, and were continued during January, February and March, a total of 20,315 cubic yards being received. Arrangements were then made for securing sand from one of the dredges filling into the Dam from the old bed of the Chagres River, north of the north toe of the Dam, and since May 15, 1912, 40,025 cubic yards have been received from this source, 1,265 yards in cars, and 38,760 yards in barges, which were unloaded by the cableways.

The rock crushing plant at Porto Bello was closed on April 30, 1912.

The steel back, side, and culvert forms were sold through bids opened on May 8, 1912.

Two of the three duplex cableways, which had been engaged in placing concrete in the lower level, were devoted, early in 1912, to the placing of backfill and of dry fill in the center wall, and only one of the four sets is now in use for placing concrete.

The wall filling and backfilling for the locks

proper is nearly completed. In April, 1912, dumping was begun to extend the east backfill of the upper lock to the nearby hill, to form a dam with its tops at 92 feet above sea-level. The east dam is within two per cent of completion.

The principal concrete work yet to be done for the Locks will be on the lower wing and approach walls. No concrete has been placed there, the sites being under water, while dipper and pipe-line suction dredges are excavating for rock foundation.

The approximate distribution of the concrete remaining to be placed is, as follows:

	Cu. Yds.
Paving.....	10,000
Valves.....	2,000
North approach walls.....	153,000
Total.....	165,000

LOCK BUILDING AT PEDRO MIGUEL.

The third year of lock building at Pedro Miguel ended on September 1, and the period closed with concrete construction well advanced. On that date, out of the total amount to be laid, 901,718 cubic yards, there remained, based upon the estimate of November 1, 1911, a total of 35,335 cubic yards, 25,214 cubic yards of which are plain concrete, and the remainder, 10,121 cubic yards, reinforced concrete. The remaining work is confined to the northeast and northwest wing walls, the northeast core wall, the south center guide wall, and some detail work in connection with the finishing of the lock. The two features of Pedro Miguel lock completed, so far as concrete placement is concerned, are the floors, and the southwest wing wall. It is expected

that the greater part of the concrete remaining will be in place by January 1, 1913.

The total concrete placed during the first year of operations in this lock, namely, from September 1, 1909 to September 1, 1910, was 257,308 cubic yards, place measurement, or an average of over 843 cubic yards each working day; the amount placed during the ensuing year was 446,101 cubic yards, place measurement, or an average of over 1,462 cubic yards each working day, and the amount placed in the third year ending September 1, 1912, was 162,974 cubic yards, place measurement, or over 532 cubic yards for each working day. As will be noted, the year of greatest work at this lock was that of 1910-1911, when the permanent handling plant was in complete operation, and the concrete placed was largely massive in character.

The amount of concrete laid up to September 1, 1912, and the amount remaining to be laid as of that date, divided into plain and reinforced concrete, in the various parts of the lock, based upon the estimate of November 1, 1911, is shown in the following table:

The estimate of November 1, 1911 had been exceeded on September 1, 1912, in various features of lock construction, in the following amounts: Floors, 415 cubic yards of plain concrete; east wall, 573 cubic yards of reinforced concrete; center wall, 20 cubic yards of reinforced concrete; west wall, 236 cubic yards of reinforced concrete; southeast wing wall, 914 cubic yards of reinforced concrete; around ducts in area "A," 69 cubic yards, and around ducts in area "C" 56 cubic yards, all reinforced concrete.

MIRAFLORES LOCKS.

The concrete work at Miraflores Locks was begun in February, 1910, but for the first seven months the amount placed was small. The output was from portable mixers, operated under difficulties, or by hand, and was used principally in the construction of the floors and floor culverts. As soon as the berm and chamber cranes at Pedro Miguel could be spared, and upon their transfer to Miraflores, the work went forward more rapidly. The installation of the Miraflores permanent mixing and handling plant was completed in October, 1911, but operations with a part of the plant had been in progress for some months previous. From the beginning of the work in February, 1910, up to September 1 of that year, there had been laid in the locks a total of 11,898 cubic yards, place measurement. During the period, September 1, 1910 to September 1, 1911, there was a decided increase in placement, the total aggregating 353,074 cubic yards, place measurement, or an average of 1,157 cubic yards each working

day. The year of greatest work at these locks was that of September 1, 1911 to September 1, 1912, when 803,263 cubic yards, place measurement, were mixed and laid. The greatest concrete output at any of the locks of the Canal in any one month was that of April, 1912, at Miraflores, when 97,735 cubic yards, place measurement, were handled, an average of 3,759 cubic yards each working day of the

month. The greater part of the massive concrete in these locks is now in place, and the output from this time on will show a reduction. The amount of concrete laid to September 1, 1912, and the amount remaining to be laid as of that date, divided into plain and reinforced concrete, in the various parts of the locks, based upon the estimate of November 1, 1911, is shown in the following table:

LOCATION.	Laid up to date.		Remaining to be laid.	
	Plain.	Reinforced.	Plain.	Reinforced.
Northeast wing wall.....		778		2,638
North center guide wall.....		26,349		16,668

Totals.....	1,133,472	34,763	209,587	36,297
		1,168,235		245,884

The estimate of November 1, 1911 had been exceeded on September 1, 1912, in various features of lock construction, in the following amounts: West wall, 304 cubic yards of plain concrete; around ducts in operating tunnel "A," 93 cubic yards of reinforced concrete; around ducts in operating tunnel "C," 50 cubic yards of reinforced concrete.

Church Work.

A special meeting of the Woman's Altar Guild of Christ Church, Colon, was held at the home of the president on Friday afternoon, September 6. The report from the recent entertainment, given by the guild in the Commission clubhouse, showed that the sum of \$50 was added to the altar fund. The fund has now reached nearly \$250, and plans for the new altar are being made.

The various corps of the Salvation Army in the Canal Zone held memorial services and street parades on Sunday, September 1, in honor of the late commander, General Booth, who died in London last month. Changes are pending in the administration of the local work. The territorial commander, Col. Sydney Maidment, will leave for Canada to assume the post of secretary to Commissioner Rees, and Col. Charles Rothwell of London will take the post of territorial commander, with headquarters at Kingston, Jamaica.

Red Cross Finances.

The financial statement of the Canal Zone chapter, American National Red Cross, for the month of August, 1912 is, as follows:

July 31. On hand..... \$2,058.36

DISBURSEMENTS.

August 14. Expenses incurred by chairman, Cristobal section..... \$2.00
August 23. Relief of Canadian stranded at Colon... 25.00
August 25. Relief of destitute patient at Ancon Hospital..... 25.00

Total disbursement..... 52.00
August 31. Balance on hand..... \$2,006.36

JOHN L. PHILLIPS, Treasurer.

Approved:
C. A. DEVOL, Chairman.

National Revolver and Pistol Championship Matches.

The Culebra Pistol Club will hold an open championship match for the Canal Zone and the United States at the range in Culebra on September 28 to October 6, 1912, both dates

inclusive. The range will be open all day on September 29 and October 6, and from 12 to 2, and 5 to 7 o'clock each afternoon of September 28 and 30, and October 1, 2, 3, 4, and 5, provided contestants make arrangements beforehand.

The match will be shot under the rules of the United States Revolver Association, and will be held synchronously with matches at different ranges in the United States. There will be five events, all at 50 yards, on the standard American target with 8-inch bullseye, as follows:

Match A, revolver championship—Fifty shots, any revolver, with any ammunition.

Match B, pistol championship—Fifty shots, any pistol, with any ammunition.

Match C, military championship—Seventy five shots, military revolver or magazine pistol, with full charge service ammunition.

Match D, military record match—Twenty-five shots, military revolver, with service ammunition.

Match F, pocket revolver championship match—Twenty-five shots, pocket revolver with service ammunition.

The entry fee for matches A, B and C will be \$3 each for members of the U. S. R. A., and \$5 for all nonmembers; no reentries allowed; match D \$1, reentries permitted; match F, \$2, no reentries allowed.

Entrants should communicate with L. D. Cornish, Culebra, Canal Zone.

Gold, silver, and bronze medals will be awarded as first, second, and third prizes.

Opening of the Canal Zone Schools.

The public schools of the Canal Zone will open Tuesday, October 1, at 9 a. m.

All children of the Canal Zone, whether of employes or nonemployes, and all children of nonresident employes of the Isthmian Canal Commission, are entitled to free school privileges. No child will be admitted, however, who will not be six years old on or before February 1, 1913.

White schools will be opened at Ancon,

Pedro Miguel, Paraiso, Culebra, Empire, Las Cascadas, Bas Obispo, Gorgona, Gatun, Cristobal, and Porto Bello.

Colored schools will be opened at Ancon, Miraflores, Pedro Miguel, Paraiso, Cucaracha, Culebra, Empire, Mandingo, Cruces, Matachin, Gorgona, Gatun, Mount Hope, Cristobal, and Majagual.

High schools will be conducted, as follows: A branch high school at Gatun for first and second year pupils, residing at Cristobal and Gatun.

A branch high school at Empire for first and second year pupils, residing at Gorgona and Culebra, and intermediate points.

The consolidated high school at Ancon for first and second year pupils, residing south of Culebra, and for all third and fourth year pupils in the Zone.

Pupils attending the high schools at Gatun and Empire will report at 9 o'clock Tuesday morning, October 1; those attending the consolidated high school at Ancon will report at 1.15 p. m., on that date.

Requests should be made to this office immediately for railroad transportation for all white children living in communities where schools of appropriate grades, or brake service, are not provided.

FRANK A. GAUSE,

Approved: Superintendent of Schools.

M. H. THATCHER,

Head of Department of Civil Administration.

Ancon, C. Z., September 7, 1912.

Services on Day of Atonement.

Divine services will be conducted on Friday, September 20, which, in the Jewish calendar, is the beginning of "Yom Kipur," or the Day of Atonement, at 6.30 p. m., and on Saturday, September 21, at 8.30 p. m., in the room on the upper floor of the Panama Government's school for girls, corner of Second and Bolivar streets, and Bottle alley. All Israelites in Colon, and in the Canal Zone, are invited to attend.

L. S. SIMONS, Honorable Secretary.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Empire, C. Z., Sunday, September 15, 1912, at 5.45 p. m. The program follows:

1. March—*The Hero of the Isthmus*.....Lampe (Respectfully dedicated to Col. Geo. W. Goethals.)
2. Selection—*Madam Sherry* (By request).....Hoschna
3. Waltz—*Tres Jolie*.....Waldteufel
4. Overture.....Selected
5. Popular number.....Selected
6. Broadway Review.....Lampe
7. Selection—*Floradora* (By request).....Stuart
8. Medley of popular songs.....Williams
9. Grand fantasia—*Home, Sweet Home, the World Around*.....Lampe

OLIVER KIMBALL, Acting Musical Director.

The next concert will be given at Paraiso, C. Z., on September 22.

Misdirected Letters.

ANCON, C. Z., September 11, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured on request of the addressees:

*Indicates reduction from last list.

**Indicates 5 cents allowed for return of bottle.

†Indicates advance on last list.

††Fowls weigh each about, as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock next lightest weight is supplied and refund note sent for difference.

‡Sold only from commissaries; no orders taken for delivery.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending September 7:

Allianca, September 2, from New York, with 102 pieces steel beams, for Pacific Division; 97 barrels asphalt, 36 crates rolled copper, for fortifications; 250 pieces steel knuckles, 136 pieces car couplers, 26 bundles steel bars, for Mechanical Division; 47 bales rubber hose, 16 bundles baskets, 110 drums paint, 67 barrels flour, 60 bundles roofing iron, 100 kegs red lead, 13 cases varnish, 68 bundles handles, 34 cases caustic soda, 26 bales waste, for stock; and a miscellaneous cargo, the whole consisting of 1,376 packages, weighing 150 tons.

Prinz Joachim, September 2, from New York, with 180 bales oakum, 15 cases hardware, for stock.

Greenbrier, September 4, from New York, with 15 cases benzine, 16 cases tape fuse, seven cases hardware, for stock.

Sarnia, September 4, from Hamburg, with 18 cases thrust screws, for superintendent of erection.

Almirante, September 4, from New York, with 10 cases paint, 20 cases lead washers, 102 cases soap, for stock; 12 crates stovepipe, for Pacific Division; 60 packages castings, 208 packages track material, for superintendent of erection.

Grunewald, September 5, from Hamburg, with 24 cases thrust screws, for superintendent of erection.

Heredia, September 5, from New Orleans, with 247 pieces piling, 1,815 pieces lumber, four pieces steam-shovel chains, 91 pieces castings, 98 sacks feed, for stock; 926 pieces lumber, for Mechanical Division.

Oxonian, September 7, from Liverpool, with three reels hoisting cable, for Pacific Division.

Lewis Luckenbach, September 7, from San Francisco, with 969 bales alfalfa hay, 10 drums bisulphide, three cases brushes, for stock.

Married.

DOBY-VICKNAIR—At Cristobal, on September 5, 1912, by Judge Thomas E. Brown, Jr., Mary Evelyn Vicknair of New Orleans, Louisiana, to Walter F. Doby of Lexington, North Carolina. Canal Zone residence, Paraiso.

MOVEMENT OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston, at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

The following vessels arrived at, or departed from, the port of Balboa during the week ending September 7:

Arrivals—September 1, *Ecuador*, from Guayaquil; September 2, *Mexico*, from Valparaiso; September 3, *Luckenbach*, from San Francisco; September 3, *Pachilea*, from Callao; September 4, *Chile*, from Guayaquil.

Departures—U. S. S. *Californian*, to Corinto; September 3, *Aysen*, to Valparaiso; September 3, *Peru* (P. S. N.), to Guayaquil; September 7, *San José*, to San Francisco.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, SEPTEMBER 18, 1912.

No. 4.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of August is published in full on Pages 28, 29, 30, 31, 32 and 33 of this issue of THE CANAL RECORD, which consists of 12 pages. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Highest Monthly Steamshovel Record.

Steamshovel No. 257 (J. H. LaRowe, engineer; Austin, Ashley, and Simonson, cranesmen,) working in the west borrow pit for Gatun Dam, excavated during the month of August a total of 86,844 cubic yards of earth and rock. This is the highest monthly record for a shovel of any class since the beginning of operations by the Canal Commission.

New Contract for Supplying Cement.

Bids were opened in Washington on September 3, for furnishing the cement required to complete the Canal, estimated at 1,000,000 barrels, more or less. Only two tenders were received. The manufacturers of Alpha and Lehigh cement, combined, offered to supply their products at the price of \$1.51 per barrel, in barrels; and \$1.91 per barrel, in bags, the price in bags to be subject to a rebate of 10 cents a bag, delivery to be made at Jersey City, or Santa Cruz, California. The Portland Cement Company offered to supply their product at the rate of \$1.97 per barrel, in bags, only, subject to 10 cents rebate per bag, delivery to be made at San Francisco.

In connection with the advertisement for proposals, a letter was received by the General Purchasing Officer at Washington, from the Atlas Portland Cement Company, the former contractors, offering to continue deliveries as may be needed to complete the work on the Canal, at the price obtaining under their former contract. Under the contract referred to, cement was supplied the Canal Commission at the rate of \$1.60 per barrel, in bags, from which there was deducted a credit of

68 cents, representing the value of eight sacks to the barrel at 8½ cents each, making the net price per barrel 92 cents.

The Alpha and Lehigh manufacturers were the lowest bidders of the two above mentioned, and, on the basis of their bid of \$1.91 per barrel, in bags, less eight sacks to the barrel, amounting in value to 80 cents, the net price to the Canal Commission would be \$1.11 per barrel, or 19 cents more per barrel than the price named in the contract with the Atlas company.

The Chairman and Chief Engineer has recommended, subject to the approval of the Secretary of War, that a new contract be entered into with the Atlas Portland Cement Company, to supply all cement required to complete the Canal, in accordance with their written offer.

West Upper Lock Wall at Miraflores Nearing Completion.

The concrete work in the west wall of the upper lock at Miraflores will be brought to completion during the latter part of September, which will permit the removal of berm crane "G" into the lower lock. On account of the under clearance of the boom on the berm crane, the backfill of the west wall cannot be brought higher than 15 feet below the top of the wall at the present time. As soon as the crane is moved, the backfill will be built to grade as rapidly as possible to allow the laying of a construction track, so that the First Division may begin operations at this point.

Bids on Panama Railroad Terminal in Panama.

Bids were opened at the office of the Panama Railroad Company in Colon, on Tuesday, September 10, for the construction of the new railroad terminal in Panama. The work was divided into two parts, namely, the erection of the main station building, and the building of the baggage room wing, including the razing of the present station. Five bids were received, as follows:

Central American Construction Company—Main building, \$59,032; baggage wing, \$29,000. Total, \$88,032.

J. W. Sneed—Main building, \$64,300; baggage wing, \$26,221. Total, \$90,521.

J. A. Wilson and J. Preston Moore—Main building, \$70,775; baggage wing, \$40,775. Total, \$111,550.

W. E. Weigle—Main building, \$94,000; baggage wing, \$21,000. Total, \$115,000.

J. G. Duque—Main building, \$112,200; baggage wing, \$22,500. Total, \$134,700.

The Central American Construction Company was the lowest bidder on the main building, and W. E. Weigle on the baggage wing, the two bids aggregating \$80,032. A supplementary bid was made, however, by the Central American Construction Company, which stated that if the company was awarded the contract for both buildings, it would do the work for the sum of \$81,500. The committee

appointed to consider the bids, consisting of Lieut. Frederick Mears, R. L. Mock, and H. E. Bartlett, reported against dividing the work, for the reason that it could be more advantageously handled by one company than by two, inasmuch as there would probably be less controversy, and more assurance of satisfactory completion. The contract has been awarded to the Central American Construction Company at \$81,500.

Borrow Pits for Gatun Dam.

Since the shipment of spoil from the Central Division excavation to Gatun Dam was discontinued, with the opening of the single track relocated line of the Panama railroad on February 15, 1912, a system of borrow pits, the largest for any feature of the Canal and railroad construction, has been developed to the west and north of the Dam for supplying dry fill for both wings. The new pits are a development separate from the red clay borrow pits, which have been furnishing material for the cores of the wings. The first of these was located west of the Spillway discharge channel, and operations were carried on in it from December 29, 1910, until July, 1912, when the two shovels were transferred to the present red clay pit north of the Spillway hotel.

Four shovels are excavating in the large earth and rock borrow pit beyond the west end of the Dam. The development of this pit has been carried on with the twofold purpose of obtaining a large quantity of spoil within a comparatively short distance and of loading a large part of it on a level with or above the high levels of the Dam, in order to facilitate transportation. The site lay up a narrow ravine, between the high hill against which the west end of the Dam rests, and a lower hill to the east, the latter of which was to furnish the bulk of the material required, amounting to about 2,500,000 cubic yards. Excavation was begun against the face of the higher hill, at 80 feet above sealevel. The first shovel advanced up a grade of one per cent to elevation plus 110 feet, and proceeded with the development of a pit and the excavation of the low hill on that level. Another shovel made a parallel cut along the west side of the ravine, on a down grade of one per cent to reach the 80-foot level. The saddle between the main ridge and the low hill was cut down first to the 110-foot level, and later, to the 80-foot level, a trestle being built across the deep cut to carry the track connecting with the upper bench of the main borrow pit, the topography being such that it proved necessary to switch back on both levels to reach the site with easy grades. Shovels, working at 110 feet above sealevel, have excavated all but about 100,000 cubic yards above that elevation on the lower hill, preparing, in the meantime, an even plateau against which the shovels on the 80-foot level can operate on a 30-foot face, which has been found to be the

COMMISSARY SALES.

Large Increase in Fiscal Year 1911-1912, Compared With the Preceding Twelve Months.

The business of the commissary department of the Panama Railroad Company during the fiscal year ending June 30, 1912, aggregated \$6,702,355.68, an increase of \$921,055.27, or about 16 per cent, over the preceding year. The increase in stock was mainly represented by groceries, cold storage supplies, and footwear. A classified statement of importations, the figures being for cost, insurance, and freight paid, delivered on the Isthmus, follows:

CLASS.	1911.	1912.
Groceries.....	\$1,278,594.79	\$1,529,845.41
Hardware.....	86,768.86	99,947.78
Dry goods.....	603,490.18	851,072.15
Boots and shoes.....	164,168.89	259,869.25
Cold storage supplies.....	1,573,202.97	1,965,082.64
Furniture.....	9,020.48	10,492.85
Tobacco.....	182,590.96	208,489.88
Raw material.....	315,375.22	342,146.38
Stationery.....	54,579.70	58,461.73
Total.....	\$4,267,792.05	\$5,325,408.07

There were heavy increases in the importations of groceries, hardware, dry goods, boots and shoes, cold storage provisions, and tobacco, the notable increases being in groceries, dry goods, and boots and shoes. On many articles of staple groceries prices were reduced. Boots and shoes, and dry goods generally were sold at lower prices than similar goods in the United States. Owing to the large volume of business, and to the institution of various economies, it was possible to reduce the surcharge on most of the standard lines of shoes, and on a great many articles of wearing apparel. During the latter part of the fiscal year, there was a phenomenal advance in the price of all meats, especially beef, the latter reaching a point during the month of June, 1912, never before equalled in the United States. However, with but few exceptions, the price of beef at the commissaries was kept down to the same figure of the previous year.

On account of the abandonment of the old track of the Panama railroad, between Gatun and Gorgona, and the completion of work on the relocation, the commissaries at Camp Totten, Tabernilla, and San Pablo, were closed during the year, while new ones were opened at Camp Bierd, Miraflores, and Naos Island. Nineteen commissaries were in operation at the close of the fiscal year.

The following table gives the importations of meat and dairy products, in comparison with the figures for the fiscal year 1910-11:

ARTICLE.	1911	1912
Fresh meats, lbs.....	5,454,989	6,453,138
Cured and pickled meats, lbs.....	3,786,869	976,445
Cheese, lbs.....	110,415	142,786
Eggs, doz.....	692,060	725,580
Butter, fresh, lbs.....	429,267	427,683
Poultry, lbs.....	554,028	503,590
Fresh milk, gals.....	57,016	81,388
Fresh cream, gals.....	29,950	37,750

Importations of fresh vegetables for the two years were, as follows:

ARTICLE.	1911.	1912.
Potatoes, white.....	5,250,609	5,843,692
Potatoes, sweet.....	787,881	1,016,392
Onions.....	1,151,921	896,850
Turnips.....	107,902	129,310
Beets.....	53,279	61,747
Carrots.....	101,788	135,256
Cabbage.....	640,681	677,234
Yams.....	193,127	300,045
Other vegetables including celery, tomatoes, and other Northern seasonal produce.....	499,952	741,627

The importation of fresh fruits in 1911-12

showed notable increases in nearly all classes over the preceding fiscal year, as follows:

ARTICLE.	1911.	1912.
Apples, lbs.....	668,485	916,622
Peaches, lbs.....	42,958	99,467
Pears, lbs.....	45,637	83,457
Plums, lbs.....	30,825	36,226
Grapes, lbs.....	62,608	92,534
Oranges, doz.....	225,984	171,787
Lemons, doz.....	34,550	36,850
Grape fruit, doz.....	10,446	11,254
Limes, doz.....	6,848	11,225
Cantaloupes, each.....	56,155	62,750
Watermelons, each.....	18,888	34,358
Other fruits, lbs.....	29,480	104,857

Sales and issues to all departments, for the two years, were, as follows:

DEPARTMENT.	1911.	1912.
Isthmian Canal Commission.....	\$1,625,348.77	\$1,734,842.59
United States Government.....	102,138.31	185,375.50
To others, for cash.....	103,706.31	117,496.30
To others, for coupons.....	3,609,358.01	4,280,366.25
Issued to departments of the railroad, and used in operation of commissary.....	208,223.82	275,938.48
Issued to Panama Railroad Steamship Line.....	8,904.09	8,492.77
Condemned and damaged goods, shrinkage, etc.....	98,276.38	99,843.79
Total sales.....	\$5,754,955.69	\$6,702,355.68
Average sales and issues per month.....	479,579.64	558,529.64
Stock on hand, June 30.....	997,175.60	1,166,481.76

MANUFACTURING PLANTS.

Laundry—There was a large increase in the business of this department during the year, 4,243,614 pieces having been handled, as compared with 3,581,923 pieces the previous year. The revenue amounted to \$108,096.83, as compared with \$98,303.29 the preceding year. The average number of employes served monthly was about 7,500.

Bakery—During the year, there were 20,233 barrels of flour used, in comparison with 16,638 the previous year. The product consisted of 6,014,667 loaves of bread, 651,844 rolls, and 114,134 pounds of cake, as against 5,236,474 loaves of bread, 557,557 rolls, and 91,581 pounds of cake the previous year. The value of the product was \$260,865.35, an increase for the year of \$39,513.27.

Coffee roasting plant—During the year, 341,780 pounds of green coffee were roasted, producing 280,909 pounds of roasted coffee, valued at \$64,220.98, an increase over the previous year of \$3,677.12. The high price of coffee continued during the year, but the commissary selling price remained unchanged.

Ice plant—Ice to the amount of 37,248 tons was produced during the year, an increase of 3,981 tons over 1910-11. The value of the product was \$229,535.98, and the increase in revenue for the year, \$23,347.18.

Ice cream plant—The business of this plant increased to such an extent during the year that it became necessary to replace the direct-gear circular motion freezers, with the more modern vertical brine freezers, capable of producing 50 gallons of ice cream each hour. The new freezers are more sanitary, the operators not touching the cream at any stage of the manufacture. The output for 1911-12 was 138,551 gallons, an increase of 28,343 gallons over the previous fiscal year. The value of the product was \$110,993.68, a gain for the year of \$31,674.88. The demand for ice cream grows steadily, and to insure the quality, fresh milk and cream are imported from the United States, in refrigeration, for its manufacture.

Automatic weighing and packing depart-

ment—Goods, in the following amounts were packed by this department during the year:

ARTICLE.	POUNDS.
Rice.....	2,126,532
Flour.....	1,786,194
Coffee.....	288,005
Beans.....	228,633
Peas.....	183,723
Starch.....	73,252
Nuts.....	16,105
Garbanzos.....	3,059
Corn meal.....	2,880
Total.....	4,708,383

The increase in the amount of goods packed over the preceding fiscal year was 792,608 pounds, and the cost of packing was reduced from \$1.90 per ton to \$1.16 per ton.

Beef corning—The experiment of making corned beef showed satisfactory results, and the advantages obtained by buying beef in the carcass, instead of by the quarter, have served largely to keep the prices of fresh beef down to the present low figures in the face of a high market. The output in this department during the year was 263,573 pounds, manufactured from 259,724 pounds of fresh beef, the difference in weight being represented by the amount of moisture that the beef takes up in the process of corning. There were also produced 9,635 pounds of Hamburger steak. The total value of the product in this plant was \$29,594.24.

Butter printing department—During the year, 333,658 pounds of butter were printed, valued at \$122,660.26. The operations of the department has resulted not only in a saving in the price of butter, but has presented it for sale in a much better condition than when purchased in the United States already printed.

Industrial laboratory—The activities of this branch were largely extended during the year, and included the addition of an industrial laboratory to the experimental laboratory, already established. The equipment required for the new laboratory consisted of four steam kettles, one of 125-gallon, one of 75-gallon, and two of 40-gallon capacity; one baking oven, one sterilizer, one bottle washing machine, and two bottle corking machines. The value of the product manufactured was \$10,275.49, some of the principal items being, as follows: Vanilla extract, \$5,115.94; lemon extract, \$1,272.15; coffee extract, \$183.60; denatured alcohol, \$2,129; talcum powder, \$258.25; soap, \$235.93; witch hazel, \$100.80; hydrogen peroxide, \$150.84; bay rum, \$171. During the present year, it is intended to increase the scope of the laboratory by manufacturing tooth powder, toilet preparations of various kinds, etc.

Electric light, power, and refrigerating plant—One A. C. D. C. Westinghouse motor generator set was installed during the year, operated from the power plant at Gatun, and takes the place of two high speed direct current generators, formerly in use. There was also added one boiler feed water weigher for weighing boiler feed water, in order to determine amount of evaporation, as a check against fuel consumption.

Cold storage plant—A new ventilating system for purifying the air was installed during the year. It is operated by a 24-inch motor-driven fan, and is so arranged as to be able to pull in fresh air from the outside, at the same time passing it over refrigerated coils, which are sprayed with a calcium brine. The air is both purified and dried by passing it through this brine bath.

CANAL WORK IN AUGUST.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

Culebra, C. Z., September 13, 1912.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of August, 1912:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry.....	Cubic yards.....	1,974	1,094,132	260,514	1,356,655

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineers and the erection subdivision of this office, the inspection of this work being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF RISING STEM GATE VALVES.

The work of preparing rising stem gate valve chambers, and installation of valves, etc., is progressing satisfactorily, the following work having been completed to the end of the month:

Gatun—Of the six side wall intake valve chambers, all have been completed and the valves have been installed. Of the 28 sets of operating valves, three sets have been completed, including installation of valves, and three sets of valve chambers have been completed ready for the installation of valves. The work on 15 of the remaining 22 sets of valve operating chambers has been about 33 per cent completed.

Pedro Miguel—Work is proceeding in 11 of the 12 sets of operating valve chambers, and they are approximately 38 per cent completed, but no valves have yet been placed.

Miraflores—No work has been done in any of the 18 sets of operating valve chambers in the locks at this point.

INSPECTION OF SPILLWAY GATES AND CAISSONS.

Gatun—The work of erection of the 14 Spillway gates at Gatun has continued, and the following work was completed at the end of the month: Seventy and six-tenths tons of material were erected, which completes erection of structural material in all the Spill-

way gates at this point; reaming and riveting of the structural material was begun, and the total reaming was about 27 per cent completed, the total riveting being about seven per cent completed on all the gates. No work has been done as yet on the caisson for this spillway.

Miraflores—No work has been done as yet on the eight spillway gates and caisson at this point.

LOCK GATES AND PROTECTIVE DEVICES.

Up to the 20th of August, a total of 57,106 tons of steel plates and shapes were accepted at the rolling mills, of which 1,754 tons were accepted between July 20 and August 20.

Of this last amount, 1,414 tons applied on replacement orders, making a total of 55,692 tons rolled on original order. A total of 44,108 tons of riveted structural steel has been shipped from the Rankin shops, or about 87 per cent of the total contract weight of this class. Of this last item, 1,945 tons were shipped between July 20 and August 20. Up to August 20, shipments have been made of material for lock gates in the following manner: Sixty-four per cent of middle gates, middle locks, and 76 per cent of the lower guard gates at Gatun; 90 per cent of the lower guard gates at Pedro Miguel; 89 per cent of the upper gates, 49 per cent of the middle gates, 24 per cent of the lower gates, upper lock, and six per cent of the lower gates, lower lock, at Miraflores.

LOCK GATE ERECTION.

Gatun—Upper guard gates, 54 feet 8 inches high, leaves Nos. 37 to 40, inclusive—On the fourth of the month, these leaves were finally closed. The amount of work remaining to be done consists of installation of footwalks, manhole covers in the top girders, top fenders, and painting, both interior and exterior. The erection of these leaves began May 27, 1911.

Upper gates, 77 feet high, leaves Nos. 33 to 36, inclusive—Practically all riveting was completed, except in way of false work. End reaction castings on leaf No. 33 were assembled on the quoin end and about 47 per cent riveted. The miter end is being ground in readiness to receive end reaction castings. End reaction castings at quoin end of leaf No. 34 were assembled; wedge fillers are being fitted, and holes drilled. The end reaction castings at quoin end of leaf No. 35 were erected and fitted complete, and the miter end is being ground. This leaf was lowered on its pintle and adjusted in position August 31. Leaf No. 36 has all end reaction castings at quoin end erected and riveted up complete. The

grinding at the miter end was passed upon as satisfactory and was in readiness for the reception of the end reaction castings. This leaf was lowered on its pintle August 22. The erection of these leaves began October 9, 1911.

Middle gates, upper lock, 77 feet high, leaves Nos. 29 to 32, inclusive—Very little work was done on these leaves during the past month, except on leaf No. 30, on which six per cent of the riveting on downstream sheathing was done. On leaves Nos. 31 and 32, about 53 per cent of the riveting on upstream sheathing, and about 47 per cent of the downstream sheathing was done. The erection of these leaves began January 27, 1912.

Safety gates, upper lock, 77 feet high, leaves Nos. 25 to 28, inclusive—The main work on these leaves done during the month consisted of reaming and bolting of sheathing, and a small amount of riveting on leaves Nos. 27, and 28. About 94 per cent of the reaming has been done on leaves Nos. 25 and 26. On leaves Nos. 27 and 28, about 85 per cent of the reaming was done, and 10 per cent of the riveting. The erection of these leaves began April 1, 1912.

Lower gates, upper lock, 77 feet high, leaves Nos. 21 to 24, inclusive—The skeletons of these leaves have been erected complete, with the exception of the top girders on leaves Nos. 21 and 22. About 58 per cent of the riveting of interior framing was done on leaves Nos. 21 and 22, and about 94 per cent of the interior riveting was done on leaves Nos. 23 and 24. About 53 per cent of the upstream sheathing, and about 17 per cent of the downstream sheathing, was erected on leaves Nos. 21 and 22. The upstream sheathing was erected to the entire height on leaves Nos. 23 and 24, and about 60 per cent was in readiness for reaming. On leaf No. 24, the downstream sheathing was erected to the entire height, and on leaf No. 23 about 82 per cent of the downstream sheathing was erected, and about 10 per cent was in readiness for reaming. The erection of these leaves began June 29, 1912.

Middle gates, lower lock, 77 feet high, leaves Nos. 9 to 12, inclusive—The skeletons of these leaves have been erected to their entire height and interior riveting done, with the exception of the top panel. All sheathing is erected, but practically no bolting has been done, except on leaves Nos. 11 and 12. A small percentage of reaming was done on leaves Nos. 11 and 12. The erection of these leaves began April 12, 1912.

Lower gates, lower lock, 77 feet high, leaves Nos. 5 to 8, inclusive—The first girders for leaves Nos. 5, 6, and 8 were placed in the lock chamber on August 29, and for leaf No. 7, on August 30. An additional girder was added to each of these leaves before the end of the month.

Lower guard gates, lower lock, 47 feet four inches high, leaves Nos. 1 to 4, inclusive—At the end of the month, the bottom girders for these leaves were having the heel and upper pintle castings fitted and secured to them.

Pedro Miguel—Upper guard gates, 54 feet eight inches high, leaves Nos. 50 to 53, inclusive—All structural material was in place and the reaming and riveting practically completed before August 10. Thirty per cent of the end reaction castings was erected in place, about 20 per cent of the wedge fillers fitted, and about 15 per cent of the riveting done in way

of these castings. There also remains about 20 per cent of the grinding to be done on the ends of the leaves before the balance of the end reaction castings can be erected. On leaf No. 50, the end reaction castings have been fitted and riveted complete at the quoin end, and, at the miter end, the end reaction castings have been assembled but not adjusted on the leaf. The quoin end of leaf No. 51 has been inspected and end reaction castings erected to the height of four panels; the grinding at miter end is practically completed. At the quoin end of leaf No. 52, the end reaction castings have been erected to the height of eight panels, and wedge filler fitted in three panels; the grinding at the miter end was practically finished, but has not been inspected. The quoin end of leaf No. 53 has all end reaction castings erected and fitted complete; the grinding at the miter end was practically finished, but has not been inspected. Erection of these leaves began August 7, 1911.

Upper gates, 79 feet high, leaves Nos. 54 to 57, inclusive—All structural work was in place before August 1, and all interior rivets driven. The sheathing has been erected, and about 73 per cent bolted, 46 per cent of the reaming done, and about 10 per cent of the rivets driven. No grinding has been done on the ends of the leaves. The erection of these leaves began January 29, 1912.

Middle gates, 79 feet high, leaves Nos. 58 to 61, inclusive—By August 1, the skeletons of these leaves had been completely erected, 91 per cent of the sheathing plates attached, and all interior riveting done. No holes were reamed in sheathing, nor rivets driven. The erection of these leaves began June 18, 1912.

Safety gates, 79 feet high, leaves Nos. 62 to 65, inclusive—All structural work was in place prior to August 1, and all interior rivets driven, 96 per cent of the reaming done, and about 78 per cent of the rivets driven. No ends were ground nor end reaction castings erected. The erection of these leaves began December 15, 1911.

Lower gates, 79 feet high, leaves Nos. 66 to 69, inclusive—No work has been done on these leaves other than as reported for the month of July, 1912. The erection of these leaves began May 1, 1912.

Lower guard gates, 47 feet 4 inches high, leaves Nos. 70 to 73, inclusive—The skeletons of leaves Nos. 70, 71, and 72 have been erected to their full height. Thirty per cent of the riveting has been done in the interior of leaves Nos. 70 and 71, while no riveting has been done on leaf No. 72. Leaf No. 73 has about 40 per cent of the skeleton erected, but no riveting nor reaming has been done.

Miraflores—The work accomplished during the month consisted in the fitting and securing of the heel and upper pintle castings to the bottom girders of leaves Nos. 100 to 103, inclusive (upper guard gates,) and leaves Nos. 112 and 113 (safety gates, upper locks.)

The total tonnage of lock gate material erected on the Canal to September 1, 1912, without regard to its being fully reamed or riveted, was 24,787 tons, out of a total of 58,000 tons, or about 42 per cent. Of this, 1,675 tons, or about three per cent, was erected during the month of August. The total number of field rivets driven was 1,375,888, or about 23 per cent of the total number of field rivets to be driven; of which 213,660, or about three per cent, were driven in August. The tonnage erected was about 48 per cent less than in the preceding month, and the number of

rivets driven was a small number in excess of the preceding month.

LOCK GATE RECESS COVERS.

Of the total of 36 recess covers at Gatun, all of which are erected, 14 remain to be aligned and grouted. At Pedro Miguel, all of the 20 covers for this lock have been erected, but seven remain to be aligned and grouted. At Miraflores, of the 24 recess covers for these locks, eight have been erected and bolted, but none aligned and grouted.

BABBITTING OF HOLLOW QUOINS.

The babbitting of all hollow quoins at Gatun and Pedro Miguel has been completed, and the work inspected and accepted. The hollow quoins for two leaves at Miraflores have been aligned and babbitted, but not accepted to the end of the month.

CHAIN FENDERS.

The material manufactured by the contractors for one complete chain fender machine, and some of the hawsepipe castings for other chain fenders, arrived on the Isthmus during the month. Hawsepipe castings for chain fender pits Nos. 812 and 813, Gatun, were placed in position, but will not be bolted to anchors until the machine is erected. All parts for the machine to be installed in pit No. 813 are at the site of pit in readiness for erection, with the exception of the plunger base and anchor bolts, which parts have delayed the starting of erection of the machine for this pit.

INSPECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection, as follows:

(1) *For the rising stem and cylindrical valve machines, motors, and limit switches for same, and auxiliary culvert valve machines, purchased under Circular No. 614*—Fifty-three rising stem gate valve machines have been shipped from the works of the contractors. Satisfactory delivery of the various groups, stated in the contracts as parts not required to be tested, is being made, but does not conform entirely to schedule.

Seventy-four cylindrical valve machines have been shipped from the works of the contractor. To date, 58 machines have been received on the Isthmus, in addition to the two trial machines.

Six auxiliary culvert valve machines have been received to date on the Isthmus.

Twenty motors for the rising stem gate valve machines have been received on the Isthmus, 16 for Gatun, and four for Pedro Miguel.

Shipment has been resumed, via Baltimore, of material manufactured by the contractors at Wheeling, W. Va. This material has, for the past few months, been shipped via New York on account of the strike on the docks at Baltimore.

(2) *For the gate and girder hoisting machinery for the emergency dams, purchased under Circular No. 616*—Test of the second girder hoisting machine was conducted during the month at the works of the contractor in the United States. The hand operating gear for this machine was also tested, as well as the reconnected motors and solenoids.

The motors for operating the mechanism for turning the emergency dam have been tested, and were found to comply with the requirements of the specifications in every respect. Shipping authority has been issued

for a large number of the motors, which are to be used in connection with the operation of the emergency dams.

(3) *For the rack railway and other material relative thereto, purchased under Circulars Nos. 619, 628, 635, 636-D, 647, 666, and 688*—Out of the 57 items of all of the above circulars, 52 items are 100 per cent completed, and satisfactory progress is being made on the delivery of the balance of the items.

(4) *For the gate operating machines, Class 1, and miter forcing machines, Class 2, and motors for same, Classes 3 and 4, purchased under Circular No. 627*—Tests of the two miter gate moving machines and one miter forcing machine were conducted during the month. These three machines were installed complete, although temporary control was used on all machines. Gates Nos. 37 and 38 were controlled from a common point on the center wall. It was determined that the gates were brought accurately to miter by the miter gate moving machines, and locked effectively by the miter forcing machine. Gate No. 37 was moved several inches from its miter position, and was forced home by the miter forcing machine against the resistance of the springs in the strut. The general operation of all machines was satisfactory.

Unsatisfactory progress is being made in the delivery of the various parts for the 90 miter gate moving machines. The foundation bolts, washers, and pipes for the 90 machines have been received complete.

Outline drawings of the miter gate moving machine motors were approved during the month, and it is expected that the manufacture of these motors will proceed rapidly.

(5) *For the equipment for the hydroelectric station, purchased under Circular No. 648*—The first turbine was dismantled at the shops of the contractor, and, after satisfactory inspection, was shipped, and is now on the Isthmus.

The first generator unit was assembled at the works of the contractor for test, as well as the second and third generator units.

The 30-ton traveling crane, Class 3, has been received on the Isthmus.

(6) *For electric towing locomotives, purchased under Circular No. 650*—The work is progressing slowly on the the first locomotive, owing to difficulty in obtaining satisfactory steel castings, and it is estimated that the contractor will be about one month behind in making delivery.

(7) *For the Spillway gate machines and pumps, purchased under Circular No. 661*—The contractors for the machines under this circular advise that the first machine would be ready for test the latter part of August.

(8) *For control apparatus for all locks, purchased under Circular No. 679*—The contractor is submitting drawings of apparatus to be furnished under this circular, but they are behind in this respect.

(9) *For motors, pumps, float switches, and starters, purchased under Circular No. 681*—Work has been commenced at the factory of the contractor on the manufacture of the two trial pumps for the chain fender machines. Drawings under this circular are being submitted by the different contractors.

(10) *For crossovers, purchased under Circular No. 688*—The first crossover was assembled at the works of the contractor, and, after examination, it appeared to be satisfactory. By the end of the month, four crossovers had been received on the Isthmus.

(11) For cable designated in Circular No. 695—No cable was received on the Isthmus during the month.

ATLANTIC DIVISION LOCKS.

During the month, 1,140.6 cubic yards of concrete were placed; amount previously reported was 2,749.4 cubic yards, bringing the total to date to 3,889.9 cubic yards.

Temporary lighting was placed in various valve machinery chambers, operating tunnels, etc.

Bonding, cross-bonding, and bonding around gate pintles is 98 per cent completed for the track installed. Five hundred and ten feet of steel conductor rail were laid on the east wall return track, and necessary brackets and insulators installed. Two hundred and twenty feet of copper conductor rail were laid on east wall towing track, and necessary brackets and insulators installed.

PACIFIC DIVISION LOCKS.

During the month, 898.7 cubic yards of concrete were placed; amount previously placed was 479.8 cubic yards, bringing the total to date to 1,378.5 cubic yards. In addition to the above, 112.72 cubic yards of mortar were placed during the month.

Six hundred feet of supporting I-beams have been placed, and 400 feet of return track have been laid on these I-beams.

EMERGENCY DAMS.

At the mills, the following material was manufactured during the month: Nickel steel, 380 tons; structural carbon steel, 198 tons; turning and wedging machinery, 55.2 tons.

At the shops, the following material was fabricated during the month: Nickel steel, 650 tons; structural carbon steel, 100 tons; turning and wedging machinery, 80.6 tons.

The roller bearings for the gates and yokes for one dam were fitted in place, the tests required prior to acceptance were made, and the bearings found satisfactory.

The condition of the work for each dam is, as follows:

Gatun, east dam—Nickel steel, 100 per cent completed and shipped; structural carbon steel, with exception of gates, 100 per cent completed and shipped; gates, 100 per cent completed, and 80 per cent shipped; turning and wedging machinery, 100 per cent completed, and 90 per cent shipped.

West dam—Nickel steel, 100 per cent completed and shipped; structural carbon steel, with exception of gates, 100 per cent completed and shipped; gates, 98 per cent completed; turning and wedging machinery, 100 per cent completed, and 90 per cent shipped.

Pedro Miguel, east dam—Nickel steel, 99 per cent rolled, 80 per cent punched, 75 per cent assembled, 50 per cent riveted, and 45 per cent finished; structural carbon steel, including gates, 99 per cent rolled; turning and wedging machinery, 100 per cent completed in foundries, and 50 per cent completed in shops.

West dam—Nickel steel, 99 per cent rolled, 98 per cent punched, 80 per cent assembled, 65 per cent riveted, and 60 per cent finished; structural carbon steel, including gates, 99 per cent rolled; gates, seven per cent completed; turning and wedging machinery, 100 per cent completed in foundries, and 50 per cent completed in shops.

Miraflores, east dam—Nickel steel, 75 per cent rolled; structural carbon steel, 85 per

cent rolled; turning and wedging machinery, 30 per cent completed in foundries.

West dam—The condition of the work for this dam is the same as that for the east dam at Miraflores.

INSPECTION ON THE ISTHMUS.

Gatun, east dam—Material delivered at site of dam, 1,824 tons. All wicket girders, rack and track segments for turning quadrant, part of bottom chord of long arm, and compression chord of horizontal truss, have been placed in temporary position. All wedge seats for short arm of dam, center casting, center pivot (including upper, center, and lower discs, and upper center casting,) have been set in permanent position. Longitudinal and transverse center girders, both bottom chords of short arm, and trailing wheels at center (including their structural supports,) have been bolted together ready for riveting. The total tonnage of material placed in permanent position, and that bolted together ready for riveting, is 365 tons.

Gatun, west dam—Material delivered at site of dam, 1,371 tons.

AIDS TO NAVIGATION.

Construction—Range No. 3-4 (old number 9-11,) Pacific Division—Both towers are completed, with the exception of hanging steel lantern door, painting towers, and installing permanent lights.

Range No. 12-13 (old number 1-2,) Pacific Division—Front tower, foundation is completed and temporary frame tower has been erected thereon. Rear tower, completed, except the steel lantern door must be hung, tower painted, and light installed.

Range 1-2 (old number 13-14,) Pacific Division—Both towers are completed, except that stair railing must be erected, steel lantern doors hung, towers painted, and permanent lights installed.

Range No. 5-6, Atlantic Division—Both towers are completed, with the exception of erecting stair railing, hanging steel lantern doors, painting towers, and installing permanent lights.

Range No. 21-22, Gatun Lake section—Front tower completed, except that door must be hung, steel ladder erected, lantern glass set in place, tower painted, and light installed. No work has as yet been done on the rear tower of this range.

Range No. 24-25, Gatun Lake section—Both towers are completed, except that steel lantern doors must be hung, towers painted, and lights installed. The stair railing must also be erected in rear tower.

Range No. 1-2, Gatun Lake section—Front tower is completed, except that stair railing must be erected, steel lantern door hung, and tower painted. *Rear tower*—This tower is located on the rock fill in the rear of the north end of the west wall of the upper locks at Gatun. In order to secure a good foundation for the reinforced tower, the focal plane of which will be at 82 feet four inches above the lock walls, it is necessary to go down to rock. A cylindrical reinforced concrete caisson foundation, 18 feet external diameter, and 15 feet six inches internal diameter, is, therefore, being sunk. The site of the tower was leveled off at elevation plus 81, and the first section of the caisson, six feet in height, was cast and sunk. Another six feet of cylinder was cast in place, and the whole gradually sunk. This process is repeated every six feet. At the end of the month, 24 feet of cylinder had been

cast in place and sunk to plus 62. The concrete in the cylinder amounted to 63.6 cubic yards. The excavation, not including the preliminary leveling off, amounted to 184 cubic yards. At present, the caisson is being sunk at the rate of 12 feet every six days.

Range No. 5-6, Gatun Lake section—The reinforced foundation for the front tower, 20 feet in diameter and 24 feet high, was completed, and the tower was finished, except that the vestibule must be constructed, the steel ladder erected, the lantern glass set in place, tower painted, and the light installed.

Range No. 3-4, Gatun Lake section—The site for the front tower was selected and leveled off. Practically all of the material had been delivered at the site and the foundation slab was in place. The front section, four feet high, of the forms for the submarine foundation was in place. The construction party is quartered in camp at this station.

Beacon No. 5, Pacific Division—Five concrete bearing piles were driven to refusal.

Beacon No. 7, Pacific Division—Five concrete bearing piles, 35 feet long, were driven to refusal and capped with a concrete slab. The reinforced concrete caisson, forming the base of the beacon, was towed to the site and sunk in place. The steel skeleton frame tower was erected, and the steel members were encased in concrete up to and including the watchroom floor.

Beacon No. 8, Pacific Division—Five concrete bearing piles, 30 feet long, were driven to refusal and capped with a reinforced concrete slab in the shape of a cross.

General plant of lighthouse subdivision at Balboa—The following reinforced concrete material was cast during the month: Fifty-two reinforced concrete stair treads, eight stair stringers, four 48-inch by 48-inch gas buoy sinkers, and five 24-inch by 24-inch spar buoy sinkers.

West breakwater light, Limon Bay—The reinforced concrete caisson, 46 feet by 46 feet, was completed at Mindi powder dock up to a height of 25 feet; the outside forms were stripped off, and on August 6, it was towed out into Limon Bay and sunk in 20 feet of water. It will remain there until the riprap foundation at the outer end of the west breakwater is completed.

Surveys—To obtain better locations for the rear towers of Ranges Nos. 11-12 and 21-22, the tangents of both ranges were prolonged and suitable locations found. Gas buoy No. 37 was located at Bohio and referenced.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month, the excavation for the locks backfill and construction tracks amounted to 105,954 cubic yards.

Backfill—Backfilling behind the side and center walls of the locks was continued. The quantity placed during the month aggregated 108,819 cubic yards. The total placed to September 1, amounted to 1,775,664 cubic yards.

Receiving and issuing material—The issues of sand exceeded the receipts by 1,086 cubic yards; the receipts of cement exceeded the consumption by 2,323 barrels; the issues of rock amounted to 6,352 cubic yards, no rock being received.

Mixing and placing plants—Plant No. 1, and the portable mixers, were kept in satisfactory operation during the month.

Concrete work—There was a decrease of 1,237.5 cubic yards in the amount of concrete

laid, as compared with the figures for the preceding month. The daily average for the 27 working days was 254 cubic yards, as compared with a daily average of 311 cubic yards during July. The total amount of concrete placed during the month was 6,855 cubic yards. The bucket measurement exceeded the place measurement by 111 cubic yards. Of the total, 3,763 cubic yards were placed in the upper lock, 1,474½ cubic yards in the middle lock, and 1,617½ cubic yards in the lower lock. The concrete work for the entire lock system was 94.50 per cent completed on September 1.

OPERATION OF THE PERMANENT CONCRETE CONSTRUCTION PLANTS.

Length of working day (hours).....	9.00
Average number of hours per day worked, per strand of cableway laying concrete (actual working time).....	.42
Average number of mixers per day.....	2.00
Average hourly output per mixer (actual working time) cubic yards.....	41.87
Average amount of concrete laid per hour, per strand of cableway (actual working time) cubic yards.....	23.74
Concrete laid (cubic yards) cableways.....	3,612.00
Concrete laid (cubic yards) derricks.....	3,354.00
Concrete laid (cubic yards) portable mixers.....	41.00

Total amount of concrete laid (cubic yards) 7,007.00

GATUN DAM.

Construction during the month increased the total fill, as determined by cross section of the material in place, by 244,618 cubic yards, making the total amount in place 20,235,385 cubic yards. On September 1, the Dam was 92.2 per cent completed.

Hydraulic fill—The dredges increased the hydraulic fill by 43,589 cubic yards, making the total hydraulic fill in place August 31, 10,061,416 cubic yards.

Dry fill—The material received from the steamshovels, amounting to 201,029 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place 10,173,969 cubic yards.

GATUN SPILLWAY.

Hydroelectric plant—During the month, 1,974 cubic yards of rock were removed by crane in preparing foundations for the hydroelectric plant, increasing the total excavation for this purpose to 92,849 cubic yards.

Concrete—The work of placing concrete was continued, the amount placed during the month aggregating 1,223 cubic yards. The concrete work for the Spillway was 91.10 per cent completed.

Backfill—There was no backfilling done during the month, the total remaining at 16,495 cubic yards.

Excavation—There was no excavating done during the month, the total remaining at 1,591,086 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging from the ocean to Mindi—Four dredges removed 377,718 cubic yards of earth, and 51,697 cubic yards of rock, from the Canal prism. In addition, the dredge *Mindi* removed 48,552 cubic yards of coral rock from the slip between Docks 16 and 17, Panama Railroad Company's Cristobal terminal docks. On August 31st, 40 feet of water could be carried from zero to zero plus 2,100 feet, 35 feet to mile post 4 plus 3,500 feet, 30 feet to mile post 5 plus 2,000 feet, 20 feet to mile post 6 plus 1,900 feet.

Approach to Gatun Locks—Two dredges removed 69,098 cubic yards of earth, and 15,460 cubic yards of rock, from the Canal prism.

PORTO BELLO.

During the month, 9,556 cubic yards of rock

were shipped to Toro Point for use in construction of the breakwater.

ROCK TRANSPORTATION SERVICE.

In connection with this service, plant steamed 2,056 miles, handled 109 barges, and carried 1,115 passengers.

WEST BREAKWATER, COLON.

During the month, the single track trestle was extended 120 lineal feet. On September 1, the trestle extended 11,267 lineal feet from shore. Nine thousand three hundred and thirty-two cubic yards of Porto Bello rock were unloaded, making the total to September 1st, 83,143 cubic yards.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work.

Work was continued on the Colon street improvements.

Central Division.

During the month of August, the total amount of material excavated by the Central Division was 1,094,132 cubic yards, of which 197,597 cubic yards were classified as earth and 896,535 cubic yards as rock. The total of 1,094,132 cubic yards was removed by steamshovels. Of the total, 1,067,300 cubic yards consisted of primary excavation from the Canal prism, and 26,832 cubic yards were removed from the Obispo Diversion.

The daily average number of steamshovels at work during the month was 34.11, and the total number of shovel days was 921, as compared with 38.71 at work during the month of July, with 1,006½ shovel days.

For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W. Kg. days.	Av. yards per shovel per day.
		Rock.	Earth.			
1911:	Cu. Yds.	Cu. Yds.	Cu. Yds.			C. Y.
Aug.	1,442,402	1,262,309	173,093	40.66	27	1,316.66
1912:						
Aug.	1,094,132	896,535	197,597	34.11	27	1,187.98

Rainfall at Empire: 1911, 5.98 ins.; 1912, 10.53 ins.

The above table shows the average output per shovel to be 9.57 per cent less than in August, 1911.

The total amount of material excavated from the Culebra section of the Central Division in August, 1912—1,094,132 cubic yards—was the lowest record in that section for the month of August, since August, 1907, when only 786,866 cubic yards were removed.

The total estimated amount of material (dry excavation) to be removed in the Central Division, according to revised estimate of July 1, 1912, was 106,116,221 cubic yards; and, up to September 1, 1912, 96,832,179 cubic yards had been removed, leaving 9,284,042 cubic yards to be removed, in order to complete all dry excavation in the Central Division. From these figures, it will be seen that 91.25 per cent of all excavation in the Central Division had been accomplished up to the close of the month of August, and the amount to be removed was 8.75 per cent.

Considering the two sections which compose the Central Division, the excavation completed, and that yet to be completed, at the close of August operations was, as follows:

CULEBRA SECTION.		Cu. Yds.
Completed.....	84,447,524	
To be completed.....	9,284,042	
CHAGRES SECTION.		Cu. Yds.
Completed.....	12,384,655	

From the above figures, it will be seen that

the Culebra section, locally known as "Culebra Cut" is 90.09 per cent completed, with 9.91 per cent to be completed. The Chagres section is completed so far as dry excavation is concerned, but it is estimated that about 300,000 cubic yards of wet excavation will have to be removed in this section.

During the month, 49,095 cubic yards of material were dumped in the embankment for the new roadbed of the relocation of the Panama railroad, increasing the total amount used for this purpose to 4,358,092 cubic yards.

During the month, no material was furnished to the Atlantic Division for use in the construction of the Gatun Dam, the total amount remaining at 5,374,310 cubic yards.

There were furnished during the month to the Panama railroad, 7,367 cubic yards of material for the terminals in Colon.

The daily average number of laborers at work on the whole division during the month was 5,935, while the daily average number of gold employes was 585.

Pacific Division.

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation during the month amounted to 195,556 cubic yards, of which 91,868 cubic yards were classified as earth and 103,688 cubic yards as rock.

Filling and embankment—During the month of August, 12,481 cubic yards of dry filling were added to the prism of the Pedro Miguel west dam, increasing the total amount of material in place at the end of the month to 611,072 cubic yards. The backfill at Pedro Miguel was increased by 25,301 cubic yards, the total quantity in place at the close of the month being 693,426 cubic yards.

At Miraflores, the dry filling in the toes of the west dam, was increased by 45,140 cubic yards, making the total quantities of dry and hydraulic filling in place at the end of the month, 1,324,584 cubic yards, and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 78,689 cubic yards, increasing the total amount in place at the end of the month to 783,263 cubic yards.

Pedro Miguel Lock—During the month, excavation was continued in the Canal prism, south of Pedro Miguel lock, in the vicinity of the guide wall extension. Two steamshovels were engaged in this work, and the spoil was used principally for the topping of the west dam, and for filling the middle of the lower guide wall. One steamshovel continued the excavation for the northwest wing wall. The amount of iron placed in the masonry aggregated 84,296 pounds.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours).....	8.00
Average number of hours per day worked laying concrete and large stone (actual working time).....	6.11
Average number of mixers per day.....	4.44
Average hourly output per mixer (actual working time) cubic yards.....	8.38
Large stone laid, cubic yards.....	
Concrete laid, cubic yards.....	6,413.00
Total concrete laid, cubic yards.....	6,413.00

Mixing plant consisted of one 2-cubic yard mixer, daily average number 0.63, and a daily average of 3.82 one-half cubic yard mixers. Placing plant consisted of a daily average of 3.82 one-half cubic yard mixers discharging directly into forms, and a daily average of 0.82 locomotive cranes or derricks.

Concrete work—The total amount of concrete and large stone laid at Pedro Miguel was 6,413 cubic yards, as compared with 11,959 cubic yards during July. The concrete was placed, as follows: Two thousand five hun-

dred and fourteen cubic yards in the north-east wing wall, 398 cubic yards in the north-west wing wall, 591 cubic yards in the east wall, 133 cubic yards in the center wall, 321 cubic yards in the west wall, 765 cubic yards in the floors, 914 cubic yards in the southeast wing wall, 234 cubic yards in south center guide wall, 69 cubic yards around ducts in operating tunnel "A," 56 cubic yards around ducts in operating tunnel "C," and 418 cubic yards in northwest core wall.

Miraflores Locks—Dry excavation, principally in the Canal prism, south of the locks, was continued with eight steamshovels, the spoil being used for backfilling behind the east and west lock walls, for filling the west dam, and for filling swamps. Two pioneer cuts are being made, one on the east, and one on the west side of the Canal prism, through the high ground separating the present steamshovel and hydraulic excavation areas, with the view of expanding the congested steamshovel area to the south. New spoil dumps are being opened up in the swamp area east of the present dike across the Canal, to take care of the output of the proposed increase in steamshovel equipment. The construction of the north approach wall and northeast wing wall was continued. Creosoted piles are being driven for the foundation of the northwest wing wall. The amount of iron placed in the masonry amounted to 825,613 pounds.

Concrete work—The total amount of concrete and large stone laid at Miraflores was 75,388 cubic yards, as compared with 66,076 cubic yards during July. The concrete was placed, as follows: Six hundred and thirty-eight cubic yards in northeast wing wall, 5,378 cubic yards in north center guide wall, 9,093 cubic yards in east wall, 40,210 cubic yards in center wall, 12,615 cubic yards in west wall, 1,059 cubic yards in floors, 1,386 cubic yards in southeast wing wall, 4,866 cubic yards in south center guide wall, 143 cubic yards around ducts, 93 cubic yards of which were placed in operating tunnel "A," and 50 cubic yards in operating tunnel "C."

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)...	8 & 12.00	8 & 12.00
Average number of hours per day laying concrete and large stone (actual working time).....	6.09	6.30
Average number of mixers per day	7.00	8.04
Average hourly output per mixer (actual working time) cubic yards.....	30.77	28.67
Average amount of concrete and large stone laid per hour per berm or chamber crane, (actual working time) cubic yards.....	53.57
Large stone laid.....		
Concrete laid (cubic yards).....	57,758.00	17,630.00
Total concrete laid (cubic yards)	57,758.00	17,630.00

Four chamber cranes, two berm cranes, and two 2-cubic yard auxiliary concrete mixers worked twelve hours a day. Permanent plant consisted of four berm cranes and four chamber cranes. Auxiliary plant consisted of a daily average of two 2-cubic yard mixers, and a daily average of 6.04 one-half cubic yard mixers. Output of two-cubic yard mixers was placed by chamber cranes; output of one-half cubic yard mixers was discharged directly into forms, or placed by locomotive cranes or derricks, of which there was an average of 2.7 per day.

DISTRICT NO. 2—DREDGING, BALBOA SHOPS, AND SHIPWAYS.

The following is a statement of the output of the six dredges, which were in

operation during the month, and the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.		PLANT.		Total.	Remarks.
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	
Cardenas.....	Dipper.....	17.150	17.150			17.150	Place measurement
Corozal.....	Ladder.....	52.739	52.738			105.477	Place measurement
Marmot.....	Ladder.....	39.955	2.675			42.630	Place measurement
Badger.....	Ladder.....	131.111				131.111	Place measurement
Mole.....	Ladder.....	9.856	2.800			12.156	Scow measurement
Culebra.....	Suction.....	189.200				189.200	Scow measurement
Total.....		422.861	74.563			497.724	
Hydraulic excavation.....		75.031*				75.031	Place measurement
Grand total.....		497.892	74.563			572.755	

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 49,111 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa sand bins.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, and oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.	
Length of working day (hours).....	8.00
Average number of hours per day (actual working time).....	7.83
Average number of cubic yards crushed per hour per working day.....	289.63
Average number of cubic yards crushed per working hour.....	333.05
Total output for the month (cubic yards)...	70,383.00

Quartermaster's Department.

Labor—The shortage in unskilled labor at 10 cents an hour continued.

Buildings—Twelve buildings at Balboa were demolished during the month, and the work of moving and reerecting buildings at Ancon was completed. Work on the addition to the dining room and ballroom of the Hotel Tivoli was commenced. Two laborers' barracks have been moved from Gorgona and are being reerected at Corozal. Two Type-14 houses, which are in the slide area at Culebra, are being demolished, and will be reerected at Corozal. One Type-18 house is to be taken down at Bas Obispo and also reerected at Corozal. The Commission clubhouse at Culebra is being demolished on account of being included in the slide area.

Quarters—The increase of force on the Pacific end of the Canal has taxed the capacity of the quarters in the districts of Ancon, Corozal, and Pedro Miguel. With the houses now being moved and reerected, additional quarters will be provided for 136 additional gold bachelor employees.

Material and supplies—The value of material received during the month was \$1,113,701.57. Supplies were delivered by 34 steamers, the total weight of cargo, exclusive of lumber, piling, and ties, being 28,383 tons.

Subsistence Department.

The operation of the European laborers' messes, colored laborers' kitchens, and line hotels, showed a net profit of \$4,732.47. The operation of the Hotel Tivoli showed a net loss of \$1,513.16, and there was a net loss on penitentiary restaurants, tugs, and dredges of \$1.41. The net profit on subsistence operations was \$3,217.90.

Department of Civil Administration.

COURTS.

During the month, one civil case was disposed of in the Supreme Court, 91 civil and 46 criminal cases in the Circuit Courts, and 35 civil and 516 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for August amounted to

\$365,073.51, and the fees to \$1,703.92. Receipts from stamp and card sales, and news-

paper postage, aggregated \$7,992.02. The total collection of revenues made by the division was \$18,821.63, and the collection on account of court fines, costs, and fees, \$2,393.19.

Twenty-five vessels entered at, and a like number cleared from the port of Ancon; and 15 vessels entered at, and 18 cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 522, of whom 466 were men and 56 women. Twenty-four nations, or 41 separate states and dependencies were represented. The total number of arrests for the month was a increase of 45, as compared with the month of July. Twelve convicts were committed to the penitentiary, and 10 were discharged, leaving 137 convicts in confinement at the close of the month. The cost of guarding and subsisting the convicts was \$2,683.75, and the value of their work on Canal Zone roads was \$2,468.95.

DIVISION OF FIRE PROTECTION.

Three fires were reported in the Canal Zone during the month. The damage to private property was \$65.

DIVISION OF PUBLIC WORKS.

In the city of Panama, the average daily consumption of water was 1,710,209 gallons, and in Colon, 1,325,784 gallons. The usual inspection and maintenance work in this division was performed during the month.

DIVISION OF SCHOOLS.

The schools were not in session during the month.

Department of Sanitation.

The total number of deaths from all causes among employes was 42. These were divided, as follows. From disease, 32; from violence, 10, giving the annual average per thousand of 7.63 and 2.38, respectively, on the basis of the number of employes estimated by the Department of Sanitation. The annual average death rate per thousand among employes for the month of August, 1911, was 9.17.

The annual average death rate per thousand in the Canal Zone, and in the cities of Colon and Panama, including both employes and nonemployes, was 25.69. This rate is based upon a population in the Canal Zone of 62,810, according to the census of February, 1912, and a population in Panama and Colon of 47,172, and 20,232, respectively, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of August, 1911, was 20.31.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: For whites, 6.91; blacks, 7.86, giving a general average for disease of 7.63. For the same month during 1910, the annual average death rate per

thousand from disease among whites was 5.28; blacks, 8.11, giving a general average of 7.35; and for the same month during 1911, whites, 6.45; blacks, 6.23, giving a general average of 6.27.

Among employes during the month, deaths from the principal diseases were, as follows: Hæmoglobinuric fever, one; lobar pneumonia, nine; malaria fever, E. A., one; tuberculosis, eight, leaving 13 deaths from all other diseases, and 10 deaths from external violence.

No cases of yellow fever, smallpox, or plague originated on, or were brought to the Isthmus during the month.

Respectfully,
GEO. W. GOETHALS, *Chairman.*

PERSONAL.

Capt. Courtland Nixon sailed for New York on the *Colon*, on Sunday, September 15, on his annual leave of absence.

Capt. Frank. O Whitlock, accompanied by his family, sailed for the United States on the *Ancon*, on Thursday, September 12, on annual leave.

Civil Service Examinations.

Examination will be held, probably on October 27, for the positions of stenographer and typewriter, Isthmian Canal Service; stenographer and typewriter, Philippine Service; and typewriter, Isthmian Canal Service.

Persons interested should request a copy of Form 1424, which contains information in regard to the above named examinations.

Applications will not be received after October 2; this date may be changed if necessary.

Competitors in the above named examinations must bring their own typewriting machines to the examination room.

It is to be noted that in answer to questions as to residence, applicants must show such residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.
Culebra, C. Z., September 14, 1912.

Canal Zone Postal Savings Bank Transactions.

A statement of Canal Zone postal savings bank transactions at Canal Zone post-offices, for the month of August, follows:

NAME OF OFFICE.	Postal Savings Certificates Issued.	Postal Savings Certificates Paid.
Ancon.....	6,775.00	4,776.00
Balboa.....	8,806.00	7,521.00
Bas Obispo.....	645.00	535.00
Corozal.....	12,879.00	10,843.00
Cristobal.....	7,541.00	8,889.00
Culebra.....	9,850.00	9,051.00
Empire.....	5,256.00	4,812.00
Gatun.....	10,056.00	8,646.00
Gorgona.....	16,455.00	12,549.00
Las Cascadas.....	5,137.00	6,224.00
Matachin.....	706.00	209.00
Miraflores.....	4,818.00	2,956.00
Paraiso.....	6,368.00	3,890.00
Pedro Miguel.....	15,383.00	11,085.00
Cristobal, Sta. A.....	395.00	210.00
Cristobal, Sta. B.....	734.00	279.00
Total.....	\$111,804.00	\$92,475.00

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Local Inspectors, at the Administration Building, Ancon, on Wednesday, September 25, 1912, at 8 a. m. All applicants for licenses as chauffeurs must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and

information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8 a. m., on September 25, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability to properly operate an automobile, and must have the automobile with them.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending September 14:

DATE.	Hours worked.	Cubic Yard.
September 9.....	7 55	2,480
September 10.....	8 30	3,354
September 11.....	7 35	2,724
September 12.....	6 55	2,915
September 13.....	5 40	1,665
September 14.....		398
Total.....	36 35	13,536

Obituary.

Edward Ray, an employe of the McClintic-Marshall Construction Company at Gatun, died in Colon Hospital on September 13. He was 40 years of age, single, and had been on the Isthmus 19 months, coming here from Ohio.

Killed in Fall from Lock Wall.

Lawrence B. Fay, an assistant engineer in the First Division, fell from the upper east wall of Gatun Locks, onto the floor of the east chamber of the middle lock, a distance of about 105 feet, at 9.45 a. m., on Tuesday, September 17, causing, among other injuries, a compound fracture of the skull, from which death resulted almost instantly. It is believed that while standing on the lock wall, he was seized with a spell of vertigo, or dizziness. He was 28 years old, single, and had been on the Isthmus since January 5, 1911. His home was in Washington, D. C.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 91 per cent completed, 205,697 cubic yards, out of a total of 225,000, having been placed at the close of work on September 14. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid	Hours worked.	No. Mixers.
	<i>Cu. Yds.</i>		
September 9.....	11	1.50	1
September 10.....	16	1.75	1
September 11.....			
September 12.....	24	1.50	1
September 13.....	68	5.00	1
September 14.....	280	16.00	2
Total.....	399	25.75	1.20
Previously reported...	205,298		
Grand total.....	205,697		

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Paraiso, C. Z., Sunday, September 22, at 2 p. m. The program follows:

1. March—*Vesuvius*.....Kane
2. Selection—*The Red Widow*.....Gebest
3. Waltz—*Tres Julie*.....Wal Henfel
4. Overture—*It I Were King*.....Adam
5. Popular number.....Selected
6. The Broadway Review.....Lampe
(Extracts from the latest Broadway hits.)
7. Medley of popular songs.....Von Tilzer
8. Grand fantasia—*Home, Sweet Home, the
World Around*.....Lampe
9. March—*The Cavalier*.....S. P. Harris

CHARLES E. JENNINGS, *Musical Director.*
The next concert will be given at Hotel Tivoli, September 29.

GATUN LAKE WATER SUPPLY.

Effects of Dry Seasons on Quantity of Water in Storage.

The past dry season, January 1 to April 30, 1912, was the driest observed in the last 22 years (1890 to 1912,) the average discharge of the Gatun lake watershed being 795 cubic feet per second, whereas the average discharge during the previous record dry season was 1,191 cubic feet per second.

The following tabulation shows the maximum and minimum discharge at Gatun during the last 22 years, and also the average discharge during the same period.

DISCHARGE BY RIVER, YEARS MAY 1 TO APRIL 30, IN CUBIC FEET PER SECOND.

Wet season (May to December,) eight months, and dry season (January to April,) four months.

PERIOD.	1905 -06	1907 -08	1909 -10	1911 -12	22 years
Eight wet months.....	6,017	7,421	13,971	6,556	9,655
Four dry months.....	1,542	1,191	6,518	795	3,074
River year.....	4,526	5,344	11,486	4,636	7,462

The figures in black face type indicate maximum or minimum discharge.

The record dry season of 1912 is of interest, mainly, on account of the effect a similar dry season, occurring after the opening of the Canal, would have on the lockage capacity of the Canal, without lowering the lake surface sufficient to limit the draft of vessels through the lake section and the Culebra Cut.

The discharge, or net yield, of the Gatun watershed during the past dry season is very different from what the net yield would be with Gatun Lake completely filled, the net yield in the latter case being the run-off from the land area, plus the rainfall on the lake surface, less unavoidable losses, such as evaporation from lake, 1,000 cubic feet per second, leakage at gates and valves, 275 cubic feet per second, seepage through the lake bottom, 85 cubic feet per second, and the amount used by the hydroelectric plant, 275 cubic feet per second.

These two conditions are shown in the following table, giving the monthly yield of the watershed from December to May, inclusive:

GATUN WATERSHED.

Monthly net yield in cubic feet per second, based on records of December, 1911 to May, 1912.

	De- cem- ber	Janu- ary	Feb- ruary	March	April	May
Without lake.....	4,042	1,351	992	482	350	2,692
With lake filled.....	1,400	-550	-363	-1,190	-1,002	2,450

In the above table it may be noticed that the net yield, with the lake is a minus quantity from January to April, the aggregate losses from the lake in these months being greater than the inflow.

Assuming that Gatun Lake was at elevation plus 87 on December 1, and that the hydroelectric plant was in continuous operation, and that 48 lockages a day were being made, the level of the lake would be reduced to its lowest point (plus 79.5,) on May 7, after which it would continuously rise. If the hydroelectric plant was not operated during the entire dry season, the lowest point reached would be plus 80.3. With the water at plus 79 in Gatun Lake, there would be 39 feet of water in the Culebra Cut, which would be ample for navigation.

It is estimated that 48 is the greatest number of lockages which could be made in 24 hours, and that this is the limiting capacity of the Panama Canal.

PANAMA TREES AND PLANTS.

List and Names of Those Grown in Ancon Hospital Grounds.

An article on the plants and trees grown in Ancon Hospital gardens was published in THE CANAL RECORD on July 31 (No. 49, vol. 5.) As there occurred in this list numerous typographical errors, a revised and corrected list, arranged alphabetically, is here subjoined:

Acacia Farnesiana.....	Flor de Aromo.
Acalypha mosata.....	Chenille plant.
Acalypha Sanderi.....	Chenille plant.
Achras ingeto.....	Mamey zapote.
Achras mamosa.....	Sapodilla.
Achras sapota.....	Sapodilla.
Acrocomia sclerocarpa.....	Wine palm.
Actinorhynchus calloparia.....	Century plant.
Agave Americana.....	Century plant.
Alibertia edulis.....	Madroño de comer.
Allamanda cathartica.....	Madroño de comer.
Aniaryllis (Hippeastrum) equestre.....	Madroño de comer.
Anacardium occidentale.....	Cashew.
Anacardium rhinocarpus.....	Espavé.
Andira inermis.....	Cabbage tree.
Anona muricata.....	Sour-sop.
Anona palustris.....	Sour-sop.
Anona reticulata.....	Sour-sop.
Anona squamosa.....	Sugar apple.
Antigonon leptopus.....	Coral vine.
Apeiba Tibourbou.....	Corteza.
Aralia Guilloylei.....	Corteza.
Araucaria excelsa.....	Norfolk Island pine.
Arenga saccharifera.....	Sugar palm.
Aristotelia macqui.....	Jack fruit.
Artocarpus integrifolia.....	Jack fruit.
Artocarpus Incisa.....	Bread fruit.
Astrocaryum polystachium (Coyolillo).....	Bread fruit.
Attalea gomphococca.....	Palma real.
Bambusa argentea.....	Japanese bamboo.
Bambusa arundinacea.....	Japanese bamboo.
Bauhinia purpurea.....	Flamboyant Blanco.
Bixa orellana.....	Anatto.
Blighia sapida.....	Aqui.
Botor tetragonoloba.....	Seguidilla.
Bryophyllum calycinum.....	Leaf of life.
Butea frondosa.....	Bastard teak.
Bunchosia glauca.....	Cerizo.
Byrsonima crassifolia.....	Nance.
Caesalpinia pulcherrima.....	Dwarf poinciana.
Catsea zanzibariensis.....	Coitee.
Cajanus indicus.....	Pigeon pea.
Caladium.....	Palo Maria.
Calophyllum calaba.....	Palo Maria.
Calophyllum kunsteri longuolum.....	Palo Maria.
Calycophyllum candidissimum.....	Alazano.
Camphora.....	Camphor.
Canna.....	Papaya.
Carica papaya.....	Papaya.
Carludovicia palmata.....	Panama hat palm.
Caryophyllus malaccensis.....	Large rose apple.
Caryota urens.....	Fern palm.
Cassia leiantha.....	Cañahstola.
Castilla panamensis.....	Native rubber of Panama.
Casuarina equisetifolia.....	Australian pine.
Catha edulis.....	Khat.
Cavanillesia platanifolia.....	Snake wood.
Cecropia palmata.....	Snake wood.
Cedrela odorata.....	Jamaica cedar.
Chlorophora tinctoria.....	Fustic.
Chrysophyllum Cainito.....	Star apple.
Cicca disticha.....	Tahiti gooseberry.
Citrus Acidia.....	Lime.
Citrus Aurantium Dulcis.....	Sweet orange.
Citrus Dancy (Nobilis).....	Tangerine orange.
Citrus decumana.....	Pumelo. Grape-fruit.
Citrus limonum.....	Lemon.
Clerodendron Balfouri.....	Blue pea.
Clitoria ternatea.....	Blue pea.
Cochlospermum hibiscoides.....	Poroporo.
Cocos nucifera.....	Cocoanut.
Coccoloba uvifera.....	Grape tree.
Codiaeum variegatum.....	Crotons.
Coleus.....	Taro.
Cola Acuminata.....	Cola.
Colocasia esculentum.....	Taro.
Cordia Gerascanthus.....	Laurel.
Cornutia pyramidata.....	Calabash.
Crescentia cujete.....	Calabash.
Crinum erubescens.....	Job's tears.
Coix lacryma-jobi.....	Job's tears.
Croton panamensis.....	Sangrillo.
Cycas revoluta.....	Sago palm.
Cycas circinalis.....	Sago palm.
Cytherexylum caudatum.....	Sago palm.
Cuscuta.....	Royal Poinciana.
Delonix regia.....	Royal Poinciana.
Didymopanax morototoni.....	Pavilla.
Dioscorea alata.....	Yam.
Diphysa robinoides.....	Macano.
Dracaena Linden.....	Dragon tree.
Duranta Plumieri.....	Dragon tree.
Elaeis melancocca.....	Oil palm.
Enterolobium cyclocarpum.....	Corotu.

Eriobotrya japonica.....	Loquat.
Erythrina sp.....	Loquat.
Erythrina corallodendron.....	Pito.
Eucalyptus botryoides.....	Rose apple.
Eugenia Jambos.....	"Surinam cherry."
Eugenia uniflora.....	Poinsettia.
Euphorbia pulcherrima.....	Poinsettia.
Feijoa sellowiana.....	Rubber tree.
Ficus elastica.....	India rubber.
Ficus Indica.....	Cluster fig.
Ficus sp.....	Edible fig.
Ficus carica.....	Edible fig.
Ficus altissima.....	Edible fig.
Furcraea.....	Pimbe.
Garcinia livingstonei.....	Mangosteen.
Garcinia mangostana.....	Mangosteen.
Garcinia morella.....	Cape Jessamine.
Garcinia xanthochyma.....	Cape Jessamine.
Garcinia Florida.....	Jagua.
Genipa caruto.....	Cacho de venado.
Gilbertia arborea.....	Bougainvillea.
Glabra Bougainvillea.....	Bougainvillea.
Glichenia.....	Fern sp.
Gliciridia maculata.....	Bala.
Grevillea robusta.....	Silk oak.
Guazuma ulmifolia.....	Guacimo.
Guilicima utilis.....	Thorny palm.
Gustavia superba.....	Membrilla.
Gynandropsis pentandra.....	Membrilla.
Hamelia patens.....	Kaffir plum.
Harpephyllum caffrum.....	Kaffir plum.
Hebechium coronarium.....	Ginger lily.
Hermesias grandiceps.....	Cross tree.
Hevea brasiliensis.....	Para rubber.
Hibiscus rosa.....	Para rubber.
Hippeastrum (Amaryllis) equestre.....	Lily.
Hura crepitans.....	Sandbox.
Hymenaea courbaril.....	Algaroba.
Inga spectabilis.....	Guava real.
Ipomoea bona-nox.....	Moon-flower.
Ipomoea guamoclit.....	Sweet-William.
Ipomoea tube-rosa.....	Yellow morning-glory.
Ixora sp.....	Graceful Jessamine.
Jasminum gracillimum.....	Spanish Jessamine.
Jasminum grandiflorum.....	Hardy Jessamine.
Jasminum officinale.....	Umbrella tree.
Jatropha actonifolia.....	Umbrella tree.
Jatropha curcas.....	Medicine nut.
Judd Lily.....	Medicine nut.
Kentia Belmoreana.....	Curly palm.
Lagerstroemia Indica.....	Crape myrtle.
Lansium domesticum.....	Langsat.
Lantana camara.....	Fern palm.
Lantana Borbonica.....	Fern palm.
Lawsonia alba.....	Henna.
Luhea rufescens.....	Guacimo colorado.
Luhea sp.....	Guacimo blanco.
Mamea Americana.....	Mamey.
Manihot aipi.....	Cassava.
Mangifera Indica.....	Mango.
Maranta arundinacea.....	Arrowroot.
Martinezia caryotifolia.....	Palm sp.
Melia Azedarach.....	China-berry.
Mimosa pudica.....	Sensitive plant.
Mirabilis jalapa.....	4-o'clock.
Momordica charantia.....	Cunde Amar.
Moringa olcitera.....	Marango.
Murraya exotica.....	Banana.
Musa Sapientium.....	Plantain.
Musa Paradisiaca.....	Plantain.
Myroxylon.....	Dragon's eye.
Nephelium longana.....	Oleander.
Nerium Oleander.....	Oleander.
Ocotea.....	Royal palm sp.
Oreodoxa oleracea.....	Porto Rican Royal palm.
Oreodoxa Borinquena.....	Royal palm (Cuba).
Oreodoxa regia.....	Royal palm (Cuba).
Ordinancia.....	Medicine nut.
Pachira Barrigon.....	Medicine nut.
Pachira Fendleri.....	Medicine nut.
Pachira macrocarpa.....	Medicine nut.
Paico.....	Medicine nut.
Panax excelsum.....	Medicine nut.
Panax plumatum.....	Medicine nut.
Pancratium ovatum.....	Medicine nut.
Pandanus utilis.....	Medicine nut.
Pandanus Veitchii.....	Medicine nut.
Passiflora laurifolia.....	Water lemon.
Passiflora quadrangularis.....	Grenadilla.
Pent. celtura.....	Avocado.
Persea gratissima.....	La Viuda.
Petroea volubilis.....	La Viuda.
Philodendron.....	Date palm.
Phoenix dactylifera.....	Ornamental date.
Phoenix reclinata.....	Ornamental date.
Phyllanthus acuminatus.....	Jobo de Iguana.
Phyllanthus umblica.....	Jobo de Iguana.
Phyllanthus sp.....	Jobo de Iguana.
Phyllanthus nivosus Var.....	Jobo de Iguana.
Rosea picta.....	Snow-flake.
Pilea.....	Lace plant.
Piper cottonella.....	Rain tree.
Pithecolobium saman.....	Rain tree.
Platymiscium polystachyum.....	Quira.
Plumbago capensis.....	Frangi-Pani.
Plumieria.....	Royal Poinciana.
Poinciana regia.....	Royal Poinciana.
Pollanthes (Pancratium) tuberosa.....	Tube rose.
Polypodium.....	Tree fern.
Pritchardii Gaudichaudii.....	Palm sp.
Pritchardii pacifica.....	Fan palm.

Psidium guava.....	Guava.
Punica granatum.....	Pomegranate.
Ravenala Madagascariensis.....	Traveller's tree.
Rheo bicolor.....	Marking nut.
Rhinacanthus nasutus.....	Marking nut.
Rollinia orthopetala.....	Biriba.
Sapindus saponaria.....	Soap berry.
Sapium Moritzianum.....	Marking nut.
Schizolobium excelsum.....	Marking nut.
Selenipedium chica.....	Vanilla.
Semecarpus anacardium.....	Marking nut.
Spondias lutea.....	Yellow plum.
Spondias edulis.....	Plum.
Spondias purpurea.....	Red plum.
Spondias dulcia.....	Ciruelo chino.
Sesbania grandiflora.....	Bobug nut.
Sterculia foetida.....	Bobug nut.
Sterculia carthaginensis.....	Panama.
Strychnos nux vomica.....	Kaffir orange.
Strychnos spinosa.....	Kaffir orange.
Swietenia mahogany.....	Mahogany.
Tabernaemontana coronaria.....	Crape Jessamine.
Tamarindus Indica.....	Tamarind.
Tectona grandis.....	Teak wood.
Theobroma cacao.....	Chocolate.
Thespesia populnea.....	Santa Maria.
Thevetia nerifolia.....	Cojon de gato.
Thevetia nitida.....	Thatch palm.
Thrinax parviflora.....	Thatch palm.
Trichilia.....	Thatch palm.
Vernonia.....	Para rubber.
Vinca rosea.....	Para rubber.
Vismia panamensis.....	Para rubber.
Xanthosoma sp.....	Indian Kale.
Xanthosoma atrovirens.....	Indian Kale.
Xanthosoma violaceum.....	Malagueto grande.
Xylopia grandiflora.....	Spanish bayonet.
Vucca elephantipes.....	Spanish bayonet.
Zebrina pendula.....	Wandering Jew.
Zephyranthes (Amaryllis) rosea.....	Zephyr Lily.
Zingiber officinale.....	Ginger.

Sand Plant at Nombre de Dios.

The sand dredging plant at Nombre de Dios, with the exception of the buildings, was removed in November, 1911, at which date sand dredging operations were discontinued. Since that time, the additional sand required at Gatun has been shipped from Balboa, or procured from one of the dredges filling into the Dam at Gatun from the old bed of the Chagres River. The work of dredging sand at Nombre de Dios was begun in March, 1909, and, during the period of operations there, a total of 785,893 cubic yards was shipped to the works, at an average cost of \$1.9177 per cubic yard delivered in stock pile at Gatun. A table of the shipments, by months, follows:

MONTHS.	1909	1910	1911
	Cu. Yds.	Cu. Yds.	Cu. Yds.
January.....	15,746	18,400	33,412
February.....	32,794	32,794	47,885
March.....	33,660	33,660	47,801
April.....	22,484	22,484	40,003
May.....	26,351	26,351	24,236
June.....	4,656	25,026	24,512
July.....	4,239	29,022	27,818
August.....	9,737	33,382	32,401
September.....	6,553	44,691	39,444
October.....	5,982	45,375	19,948
November.....	7,172	42,092
December.....
Total.....	51,007	368,432	366,454

SUMMARY.

	Cu. Yds.
1909.....	51,007
1910.....	368,432
1911.....	366,454
Total.....	785,893

One bid was received in answer to the advertisement recently for the sale of the Canal Commission buildings at Nombre de Dios, consisting of a Type-5 quarters, sick camp, and eight smaller houses. The tender was made by Robert Wilcox of Colon, who offered \$305 for the Type-5 house, sick camp, and six of the smaller buildings, but, in view of the fact that the upset price had already been fixed at \$1,000 for the lot, his bid was regarded as unsatisfactory, and it was rejected.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

At the first meeting of the new Executive Board of the General Federation of Women's Clubs, held at French Lick, Indiana, the corresponding secretary of the Canal Zone. Mrs. Thomas Edwin Brown, Jr., was unanimously elected a member of the committee of social and industrial conditions. Mrs. Brown has been president of the Cristobal Women's Club, and for two years, 1909-1911, was president of the Federation. Prior to her coming to the Isthmus, she was vice-president of the Jacob Riis settlement in New York City.

At the meeting of the Women's Foreign Missionary Society of the Methodist Episcopal Church, held at East Balboa, with Mrs. Townsend, on September 6, Miss Annie Cooper, a missionary, who, for many years, has been working among the Indians in Central and South America, gave an informal talk concerning her work. The regular study of the meeting was suspended. The next meeting will be on October 4, at the home of Mrs. Rounds in Culebra. There will be an election of officers at that time.

Summer School at Gatun.

A summer school has been opened at Gatun with 14 pupils. The school, which is under the direction of Miss Florence Neville, the daughter of the president of the Gatun Woman's Club, is held in the Commission chapel every morning, except Saturday, from 8.45 to 11 o'clock. The pupils do drawing, painting, clay modeling, and raffia work. On Tuesday, Thursday, and Friday afternoons, a kindergarten class for small children is held.

Postal Business and Canal Zone Revenues.

The total amount of money orders issued in the Canal Zone during the month of August was \$365,073.51, of which \$296,762.83 was payable in the United States, \$67,005.58 in the Canal Zone, \$1,067.60 in Martinique, and \$237.50 in Costa Rica. The number of orders issued was 17,063, and the average value was \$21.38. Money order fees amounted to \$1,703.92, and the amount paid and repaid was \$87,887.66. Postal sales amounted to \$7,983.84, and newspaper postage to \$15.18.

Revenue collections during the month of August were, as follows: Bicycle and chauffeur licenses, \$80; motor vehicle licenses, \$303.50; steamboat inspection, \$89.45; taxes, licenses, etc., \$6,582.54; total, \$7,055.49.

Tug Service to Porto Bello and Toro Point.

Following is the schedule of Atlantic Division tugs in the service between Dock 13 and Porto Bello, and Dock 13 and Toro Point:

PORTO BELLO.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays—Leave Dock 13 at 5 p. m., arrive Porto Bello 10 p. m., returning, leave Porto Bello 11 p. m., arrive Dock 13 at 3 a. m.

Saturdays—Leave Dock 13 at 9 a. m., arrive Porto Bello 11 a. m., returning, leave Porto Bello 2 p. m., arrive pier No. 4, Colon, 4 p. m.

Every Saturday, except the first Saturday after the 20th of each month. *Sailing No. 1*—Leave Dock 13 at 2 p. m., arrive Porto Bello 4 p. m., returning, leave Porto Bello at 4 p. m., arrive at pier No. 4, Colon, 6 p. m. *Sailing No. 2*—Leave Dock 13 at 6 p. m., arrive Porto Bello 11 p. m., returning, leave Porto Bello 12 midnight, arrive Dock 13 at 4 a. m.

Sundays, immediately following the 20th of each month, ONLY—Leave Porto Bello 6 a. m., arrive Dock 13 at 8 a. m.

TORO POINT.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays. *Sailing No. 1*—Leave Dock 13 at 6.30 a. m.,

arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2*—Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m. *Special, Wednesdays, ONLY*—Leave Dock 13 at 12 noon, arrive Toro Point 12.30 p. m., returning, leave Toro Point 12.30 p. m., arrive Dock 13 at 1 p. m.

Saturdays. *Sailing No. 1*—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2*—Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5.30 p. m., arrive Dock 13 at 6 p. m.

Sundays. *Sailing No. 1*—Leave Dock 13 at 9.30 a. m., arrive Toro Point 10 a. m.; returning, leave Toro Point at 10.30 a. m., arrive Dock 13 at 11 a. m. *Sailing No. 2*—Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5 p. m., arrive Dock 13 at 5.30 p. m.

OFFICIAL CIRCULARS.

Acting Head of Department of Law.

CULEBRA, C. Z., September 5, 1912.

CIRCULAR No. 459:

Effective this date, Mr. William K. Jackson will act as Head of the Department of Law during the absence on leave of Judge Frank Feuille.

GEO. W. GOETHALS, Chairman.

Signature of Witnesses on Pay Certificates.

CULEBRA, C. Z., September 10, 1912.

TO ALL CONCERNED:

It has been brought to my attention that the practice is more or less prevalent of timekeepers signing their names as witness in the blank space provided therefor on pay certificates prior to the actual affixing of the signature by the payee. This practice, if allowed to continue, opens the way for fraud.

Any one detected in signing as witness in this manner will be discharged.

GEO. W. GOETHALS, Chairman and Chief Engineer.

Partially or Totally Disabled Employees.

CULEBRA, C. Z., September 12, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

Please advise me not later than September 18, how many men are employed in your rolls, both gold and silver, who are partially or totally disabled on account of injuries received in the service, their present occupation, rate of pay, and whether they have families dependent upon them for support.

This refers particularly to men who are permanently crippled, and not to those who are temporarily disabled, and who will later on be able to perform ordinary laborer's duties, such as in the case of a man whose leg has been broken.

GEO. W. GOETHALS, Chairman.

Accommodations on the Steamship "Cristobal."

CULEBRA, C. Z., September 16, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

The entire accommodations on the steamship *Cristobal*, scheduled to sail from New York, on or about November 7, having been reserved for special purposes on both the southbound and northbound trips, no requests for transportation for employees, or members of their families, will be issued by this office for the northbound voyage.

GEO. W. GOETHALS, Chairman.

Acting Depot Quartermaster.

CULEBRA, C. Z., September 16, 1912.

Mr. C. L. PARKER,

Assistant Depot Quartermaster,
Mount Hope, C. Z.

Sir: Effective September 15, 1912, and during the absence of Capt. Courtland Nixon, on leave, you will act as depot quartermaster. You are authorized to receive and receipt for supplies of the Isthmian Canal Commission consigned to Col. C. A. Devol, or the Chief Quartermaster, Isthmian Canal Commission, to accomplish bills of lading, to certify invoices for payment as to quantity and quality of supplies shown on such invoices, and, in general, to perform such duties as properly belong to the position of the depot quartermaster.

R. E. WOOD, Acting Chief Quartermaster.

Family Quarters.

Applications for married quarters on file on August 31, 1912, were, as follows:

DISTRICT.	List No. 1.	List No. 2.
Ancon.....	4 (1)	79 (24)
Ancon Hospital.....		3
Balboa.....	1 (1)	41 (6)
Bas Obispo.....		22 (2)
Colon Hospital.....		1
Corozal.....	2	63 (17)
Cristobal.....		120 (16)
Culebra.....		35 (1)
Empire.....		62 (19)
Gatun.....	1	102 (23)
Gorgona.....	1 (1)	61 (23)
Las Cascadas.....		26 (6)
Pedro Miguel.....	5 (2)	50 (11)
Porto Bello.....	1 (1)	8 (3)
Toro Point.....		4
Total.....	15 (6)	677 (140)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

Cold Storage Prices Unchanged.

The prices of cold storage articles at the commissaries, as printed in *The Canal Record* of September 11, remain unchanged.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

EMPIRE.

The local bowling tournament has closed, with the following results:

Team.	Won.	Lost.
Independents.....	16	8
Democrats.....	13	11
Progressives.....	13	11
Socialists.....	12	12
Suffragettes.....	8	16

Mr. Potter of the "Independent" team won the high average, with a record of 173 for 24 games. Mr. Sawtelle of the "Socialist" team made the high score of 244.

Saturday, September 14, two of the Empire teams bowled a team from Gorgona, and one from Corozal, winning two out of three games from both teams.

The pool match between Mr. DePoorter of Gatun and Mr. Pearson of Empire, played on September 14, was won by Mr. DePoorter by a score of 157 to 65.

GORGONA.

Owing to repairs on the bowling alleys at Gorgona, they have been closed temporarily.

A pool and billiard tournament has been started. Following is the standing of the teams:

Name.	Won.	Lost.	P. C.
Harter.....	4	0	1.000
Robitoy.....	1	1	.500
Means.....	0	1	.000
Trent.....	0	1	.000
Walcott.....	0	2	.000

The basketball team practices twice a week, and expects to be in condition when the league opens in October.

A new carom board has been procured at the clubhouse for the boys' department.

A mixed chorus will soon be organized. All singers of Gorgona are requested to hand their names to the secretary. It is desired to know of any talent that may be available for this purpose.

GATUN.

A "smoker" was held on Saturday evening, September 14, with an attendance of over 300 men. Among those who participated were the following: Tenth Infantry orchestra; R. S. Mosher, baritone; Henry Cogan, song soloist; Charles Ray, banjoist; Tenth Infantry Squad in army calisthenics; Robitoy and Cogan, song and dance artists; E. Burmaster in a "Barbados Talk"; Fred White, xylophone soloist; Archie Harper, Scotch songs; Joe Lynch, old time ballads; G. R. D. Kramer, Jr., club swinging; E. Paul Case, bass; wrestling, Heine versus Brennan, and Hughes versus Flynn.

There is considerable interest in the "Lock City" billiard tournament. There are 13 entries. The first week's results will probably be published in the next issue of THE CANAL RECORD.

Messrs. DePoorter and Pearson will play a 150-point match to decide the pool championship of the Isthmus on Saturday, September 21. At the same time, "open house" will be observed, with additional pool and billiard games.

CRISTOBAL.

The next of the series of moving picture entertainments will be on Friday night, September 20.

There will be regular basketball practice on Tuesday and Thursday nights of each week, at 8 o'clock, when entertainments do not conflict. All members interested in trying for the team, which is to represent the Cristobal association in the Isthmian league, are requested to come and try out.

On Saturday night, September 14, the Cristobal bowling team took two out of three games from the Culebra team by the following scores:

Culebra.....	841	804	789
Cristobal.....	752	854	828

Mr. T. Burns rolled 221 in the second game for Cristobal.

On Saturday night, a "Married Folks" tournament will be rolled in duckpins. Any members, with their wives are eligible, and should hand their names to Mr. Bullard by September 21.

The two classes in Spanish are making progress. On Monday, a new class was organized with eight pupils. Mr. José Gomez is the teacher.

On Friday night, September 13, Mr. F. L. Bernsee played simultaneous checkers. Forty-five games, in all, were played; two games were lost to Mr. Gartrell of Gatun, one was drawn with Mr. Hagan, and one with Dr. Dunn, Mr. Bernsee winning 49 games.

Sale of Public Buildings at Cucaracha.

OFFICE OF THE CHIEF QUARTERMASTER,
CULEBRA, C. Z., September 16, 1912.

Sealed proposals will be received at this office until 3 p. m., Monday, September 30, 1912, and then opened, for the purchase of any or all of four buildings located at Cucaracha. Number of buildings and full information will be furnished upon application to any District

Quartermaster, or to this office. Proposals must be accompanied by five per centum (5%) of amount bid. Envelopes containing proposals should be endorsed "Proposals for purchase of buildings" and addressed to Capt. R. E. Wood, Acting Chief Quartermaster, Culebra, Canal Zone.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon, during the week ending September 14: *Thames*, September 8, from New York, with 245 bundles steel pipe, for stock.

Carrillo, September 8, from New York, with 66 pigs tin, 59 cases soap, for stock; 50 cases roofing paper, for Mechanical Division; 13 cases water heaters, for Panama Railroad Company; 71 cases castings, for superintendent of erection.

Colon, September 9, from New York, with 10 cases crane material, 20 cases hair, for Panama Railroad Company; 106 pieces castings, 15 cases insulating tape, 12 bundles car springs, 19 barrels batteries, 18 locomotive tires, for Mechanical Division; 50 cases valve parts, 56 barrels insulators, for superintendent of erection; 45 kegs wire nails, 20 kegs rock salt, 50 cases handles, 31 bales packing, 62 pigs tin, 250 bundles brooms, 70 bales rubber hose, 13 cases paint, for stock; 16 cases rubber boots, for Pacific Division; 30 cases drugs and sundries, for Sanitary Department; and a miscellaneous cargo, the whole consisting of 1,060 packages, weighing 120 tons.

Eastlands, September 10, from Baltimore, with 128 pieces structural steel, 26 pieces hawsepipes, 35 packages valve parts, 242 crates rack castings, 319 cases valve machinery, 80 cases gate machinery, for superintendent of erection; 180 pieces steel girders, for Panama Railroad Company; 146 bundles steel bars, for Pacific Division; 1,122 bundles steel bars, for fortifications; one life boat, for Atlantic Division; 12,000 cases dynamite, 100 cases turpentine, 82 bundles steel bars, 22,665 pieces steel bars, for stock.

Santa Marta, September 11, from New York, with 25 crates stove pipe, for Pacific Division; 14 coils rope, 10 crates hardware, for stock.

Abangarez, September 12, from New Orleans, with 71 pieces castings, 27 rolls cotton duck, 40 cases paint, 150 cases scouring bars, 929 pieces lumber, 302 pieces piling, 720 cases oils, for stock; 885 pieces lumber, for Mechanical Division.

Cristobal, September 12, from New York, with 26 packages castings, for superintendent of erection; 28 cases rubber hose, for stock; 168,628 bags cement, for for Atlantic and Pacific Division.

The total value of material received during the month of August was \$1,113,701.57 distributed, as follows:

Mount Hope (stock).....	\$313,684.10
Atlantic Division.....	42,741.72
Pacific Division.....	141,496.74
Mechanical Division.....	68,107.32
Sanitary Department.....	7,290.18
Chief Engineer.....	636.87
Civil Administration.....	308.79
Superintendent of Erection.....	432,838.65
Examiner of Accounts.....	252.65
Fortification Division.....	12,174.69
Panama Railroad Company.....	94,169.86

Total.....\$1,113,701.57

The material was received by 34 steamers, the total weight of cargo exclusive of lumber, piling and ties being 28,393 tons. Some of the more important items received were, as follows: 1,540,438 feet, board measure, yellow pine lumber; 3,447,648 feet, board measure, white oak lumber; 1,499 pieces piling; 40,500 pieces cross-ties; 607 pieces steel rails; 1,525 car wheels; 1,000 tons lock machinery; 1,000 tons emergency dams-steel; 800 drums oils.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending September 25, 1912 (75th meridian time):

DATE.	High	Low	High	Low	High
	A.M.	A.M.	A.M.	P.M.	P.M.
September 19.....	13.30	9.32	4.07	10.25	
September 20.....	4.40	10.50	5.20	11.55	
September 21.....		6.05	12.17	6.31	
September 22.....	1.07	7.12	1.25	7.28	
September 23.....	1.57	8.00	2.13	8.15	
September 24.....	2.34	8.40	2.50	8.52	
September 25.....	3.05	9.13	3.20	9.26	

Married.

POTTS-MCCAULEY—At Buffalo, N. Y., on Monday, September 2, Ethel Gertrude McCauley of Buffalo, to Samuel Chatham Potts of Lake Waccamaw, North Carolina. Isthmian residence, Colon, R. P.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

The following ships arrived at, or departed from the port of Balboa during the week ending September 14: Arrivals—September 8, *Manavi*, from Buenaventura; September 9, *Salvor*, from Victoria, B. C.; September 9, *Mantaro*, from Callao; September 11, *Palena*, from Valparaiso; September 11, *Santa Rita*, from Port Harford; September 12, *City of Sydney*, from San Francisco; September 13, *Pennsylvania*, from San Francisco.

Departures—September 8, *Aztec*, to San Francisco; September 9, *Ecuador*, to Guayaquil; September 9, *Mexico*, to Valparaiso; September 9, *Pachitea*, to Callao; September 13, *Chile*, to Guayaquil; September 13, *City of Para*, to San Francisco; September 14, *Manavi*, to Buenaventura; September 14, *Santa Rita*, to Port Harford.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, SEPTEMBER 25, 1912.

No. 5.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Damage in Culebra Cut from Heavy Rains.

High water, pouring from the steep watershed of the Comacho valley during a heavy rain in the evening of September 21, broke through a dike closing an old drain back of the Lirio planing mill and flooded a portion of Culebra Cut, south of Empire. All the tracks on the bottom of the Cut were covered with water and mud. The dike was quickly replaced by a small force of men, using sod and clay with scrap iron lying near, and the Cut was drained by the next evening. The old drain was part of a diversion running north from Culebra, which was intersected by the breaking back of a slide during the past dry season. A new channel was cut farther west, subtending the section broken by the slide, and dikes were built to close the old channel. These had proved sufficient until the extraordinary fall of September 21, when 4.2 inches fell in three hours at Comacho reservoir.

On the east side of the Cut, the repairs to the Obispo Diversion, at La Pita point, three miles from the north end of the Cut, at which it was broken by a slide on August 20, were sufficient to keep the water from breaking through. Had it done so, it is estimated that the heavy flow would have filled the Cut with thirty feet of water. No water has escaped into the Cut at that point since September 8.

Affected by the same heavy rain, the slide on the west bank at Culebra pushed out at the toe, partly burying two steamshovels at its base and closing the pioneer cut for a distance of 50 feet. The cut was reopened, the shovels have been dug out, and the work is progressing as rapidly as possible.

Farm for Disabled Laborers.

A committee, consisting of Maj. R. E. Noble, chairman; Capt. R. E. Wood, and Mr. C. A. McIlvaine, has been appointed to select a site in the Canal Zone for a farm on which laborers who have become insane, chronically ill, or crippled in the service of the Isthmian Canal Commission, can be cared for and given

employment. The chronically ill and the insane have been heretofore the unremunerative wards of the Commission, while the crippled have been engaged for such work as they are able to do. The farm, affording healthful employment, will also be as nearly self-supporting as it is possible to make it.

New Trestle Across Culebra Cut.

Driving piles for the trestle to take the place of the present bridge, No. 57½, of the Panama railroad, crossing Culebra Cut north of Pedro Miguel station, was completed on September 21. Building the 700 feet of trestle occupied 19 days. About 1,300 feet of track have been laid for the approaches to the trestle, and as soon as the track over the trestle is laid, traffic will be sent across it and the removal of the present girder bridge will begin, to allow the completion of the Canal channel at its site. In the construction of the trestle, provision was made, by the installation of several bents which wrecking cranes can easily lift aside, for allowing the ladder dredge *Corozal* to pass through into Culebra Cut, with the surface of the water at approximately 65 feet above sea-level. The molded breadth of the *Corozal* is 45 feet, and its draft, when light, is 12 feet forward, and 14 feet four inches aft.

Steamshovel Record.

Steamshovel No. 134 (H. F. Huth, engineer and Michael J. Carroll, craneman,) working in the red clay borrow pit for Gatun Dam, excavated on September 20, a total of 230 large Oliver dump cars, or a total of 3,910 cubic yards in the working day of eight hours.

This is the highest daily record for a 70-ton shovel since the beginning of operations by the Commission.

Previous high daily records were made on September 16, 17, and 18 by steamshovel No. 120 (Kelleher and Simonson, operators,) which loaded 199, 196, and 214 large Oliver cars, respectively, in the working day of eight hours.

Dock Laborers Quit Work.

The laborers, employed by the cargo handling contractors, Messrs. George Greenslade and Hugh McKay, at the Panama railroad wharf at Balboa, stopped work at noon on Friday, September 20, and during the forenoon of the following day, the men employed by the contractors at the American wharf in Panama quit also. The contract between the Panama Railroad Company and Messrs. Greenslade and McKay for handling the cargoes at Balboa, and in Panama, went into effect on September 9. The contractors established a wage scale, whereby the men received 12 cents gold an hour, and time and a half for nights and overtime, and paid the men as soon as each ship had been unloaded. The laborers became dissatisfied with the wage scale, claiming that they did not receive as much as they expected. A few men re-

mained at work, but up to Tuesday, September 24, practically all the cargo handling was done by the ship crews engaged temporarily by the contractors, and as a result, the work proceeded slowly. On Monday, September 23, the contractors posted a notice that the arrangement under which the men worked when employed by the Panama Railroad Company would be placed in effect as of that date. This provides for a wage scale of 11 cents gold an hour, with time and a half for nights and overtime, a pay day once in two weeks, free quarters, free medical attention, and free transportation to the employees at Balboa, to and from Panama. Some of the men returned to work Monday night, and it is expected that a full complement will be recruited within the next few days.

Reconstruction of Panama Market and Pier.

Distinct advance in the sanitation of Panama will be accomplished through the reconstruction of the old public market, located on the north sea wall, at a point, which has been the principal landing place for small boats from the adjacent coast since the founding of the city. The plan, which is being carried out under the supervision of American engineers in the Department of Public Works of the Republic of Panama, contemplates the rebuilding of the present fish and meat market, and a portion of the adjacent pier; and the building of a new fish market. The new structures, with the exception of the corrugated iron sidings, will be of reinforced concrete throughout. The pier and fish market have advanced well toward completion, and the reconstruction of the market proper has been begun. The old market, as originally built in 1877, rested on land, but an addition was built to it, over the sea, in 1885. Combined, the structures had a front of 163 feet 11½ inches on the street, and a depth of 176 feet six inches. The structural iron used, which was purchased in Italy, is in good condition, and is to be used in the erection of smaller markets in the interior of the Republic.

In the new market structure, the middle part of the roof will be a monitor, raised eight feet above the rest of the roof and 32 feet above the floor. The sides of the monitor will have pivoted windows, manipulated from the floor, to afford light and air to the central part of the building. Directly under the monitor will be a mezzanine floor, 14 feet above the main floor, and 23 feet wide by 136 feet two inches long. The floor area, including the mezzanine and the fish market, will be 37,268 square feet. Stalls for the sale of meat and truck will be built on sanitary lines, with steel and concrete, and the meat and fish sections will be enclosed in fine screening. The entire building will be vermin proof.

The rebuilt market pier is 46 feet seven and one half inches wide and extends 233 feet from the sea wall, connecting at the outer end with a steel pier which, begun in 1909, is in

NOTES OF PROGRESS.

(Continued.)

good condition and forms an extension of the market pier proper. The old market pier was erected in 1890 on steel piers, with a floor system of steel, and columns of cast iron. The supporting piers were encased in concrete in 1909, but continued to corrode, and, as in many instances the flanges and webs of the floor supports had rotted away, the structure was condemned. The new structure, the style of which is typical of the entire reconstruction, is supported on concrete piers built beside the old ones. The concrete was mixed in the proportions of 1:3:6. For some of the piers a waterproofing compound of potash and alum was poured on the face at the time of placing, while in others, no waterproofing compound was used. Records have been kept, and examinations will be made from time to time, of the effect of sea water on the different mixtures. The roof, entirely of reinforced concrete with no special waterproofing, is made tight by a simple arrangement, which is the idea of Mr. A. P. Cray, the designing engineer. On the edge of each slab is raised, at the time of placing the concrete, a lug four inches wide and one and one-half inches high. At the junctures of slabs, two lugs are in juxtaposition; the line of juncture is covered with a reinforced concrete cap, draining off beyond the lugs.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 91 per cent completed, 205,960 cubic yards, out of a total of 225,000, having been placed at the close of work on September 21. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid	Hours worked.	No. Mixers.
	Cu. Yds.		
September 16.....	52	4 75	2
September 17.....	80	7.00	1
September 18.....	52	4.00	1

Immigration at Ports of Ancon and Panama.

The number of persons who landed at the ports of Ancon and Panama from foreign ports during the month of August was 613, consisting

of 476 cabin, and 137 steerage passengers. The number of persons who embarked for foreign ports was 491, consisting of 358 cabin, and 133 steerage passengers. The number of persons who landed at these ports during the month over those who embarked was 122.

Steamship "Pleiades" Saved.

The steamship *Pleiades*, of the California-Atlantic Steamship Company's service, which went aground off Cape San Lazaro, along the

coast of Lower California on August 16, has been recovered by a wrecking outfit sent from San Francisco, and is proceeding to that city under its own steam. No lives were lost in the wreck. One million and a half, out of 3,000,000 feet of lumber consigned to the Isthmian Canal Commission, were jettisoned. The rest of the cargo was saved.

Launch Service to Taboga.

The steamer *Samudra* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

CONCRETE WORK IN THE LOCKS.

About 93 per cent of the concrete for the locks is in place, the amount at the close of work on September 21 being 3,998,560 cubic yards, out of a total of approximately 4,302,563. A total of 12,644 cubic yards of concrete was laid in the locks during the week ending September 21.

GATUN LOCKS.

About 95 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on September 21 being 1,898,090 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day of the week ending September 21, and of the total follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers.	Concrete placed.	Hours worked.	No. of mixers.

*Includes 10 cubic yards mixed by hand.

HOTELS AND MESSES.

More Meals Served Laborers in 1911-12, but Less to Gold Employees.

There were 19 line hotels, three night restaurants, 18 European laborers' messes, and 18 common laborers' kitchens, in operation by the Subsistence Department of the Canal Commission at the close of business on June 30, 1912, an increase of two messes and four kitchens over the previous year.

The hotel and kitchen at Nombre de Dios and the hotel at Tabernilla were closed during the year, because work at those points was completed. One of the two messes at Bas Obispo was also closed. Hotels, messes, and kitchens were opened at Naos Island and at Fort Randolph, a mess and kitchen at Cerro, and kitchens at Rio Grande and Paraiso. The territory served is divided into 15 districts, each in charge of a chief steward.

The total revenue for the year from the line hotels, restaurants, messes, and kitchens was \$1,263,869.81, an increase of \$9,607.41 over last year; the total cost of operations was \$1,226,352.16, an increase of \$4,882.90; the profit was \$37,517.65, an increase of \$4,724.51 over last year. The ratio of supplies consumed to revenue was 0.41 per cent more than last year, and of expense to revenue 0.77 per cent less, making the ratio of total cost of operations to revenue 0.36 per cent less than last year. The percentage of profit to revenue was 2.97 per cent, 0.36 per cent greater than last year.

The expense for salaries and wages for line hotels, restaurants, messes, and kitchens was \$162,006.78, a reduction of \$10,022.74 from last year. The proportion of pay roll to revenue was 12.8 per cent, 0.9 per cent less than last year.

The following table shows the quantities and costs of the principal articles consumed in the line hotels, restaurants, messes, and kitchens during the year:

ARTICLE.	Quantity.	Cost.
Beef, fresh, lbs.	2,782,044	\$276,924.39
Beef, salt, lbs.	28,533	3,330.82
Bacon, lbs.	64,231	14,602.80
Beans, lbs.	227,743	12,804.82
Butter, lbs.	111,363	39,825.48
Bread, lbs.	2,707,652	108,298.08
Cabbage, lbs.	167,190	6,250.90
Cocoa, lbs.	32,798	5,211.72
Coffee, lbs.	83,953	16,015.04
Eggs, doz.	181,787	57,416.65
Fish, fresh, lbs.	113,641	8,464.75
Fish, canned, tins.	41,602	3,850.64
Fish, cured, lbs.	60,109	4,849.28
Flour, lbs.	472,811	14,191.95
Fruits, fresh.		27,537.15
Fruits, canned, tins.	81,458	23,267.86
Garbanzos, lbs.	227,808	9,698.60
Ham, lbs.	36,238	7,017.00
Ice cream, gals.	53,590	27,255.00
Lamb, fresh, lbs.	17,345	2,312.40
Lard, lbs.	108,842	11,115.19
Macaroni, lbs.	206,827	14,837.94
Milk, tins.	229,742	19,878.41
Mutton, fresh, lbs.	22,532	2,547.35
Onions, lbs.	175,730	7,528.04
Peas, lbs.	126,998	6,609.35
Pork, fresh, lbs.	133,400	20,308.46
Pork, salt, lbs.	4,673	576.21
Potatoes white, lbs.	1,436,050	45,445.27
Potatoes, sweet, lbs.	251,067	4,519.02
Poultry, lbs.	189,934	38,338.58
Rice, lbs.	483,717	13,909.85
Rolls, doz.	45,262	10,217.51
Sugar, granulated, lbs.	216,492	11,768.15
Sugar, yellow, lbs.	631,557	28,127.79
Tea, lbs.	9,271	2,989.90
Veal, fresh, lbs.	80,636	12,369.75
Vegetables, fresh, lbs.		18,879.46
Vegetables, canned, tins.	150,932	22,326.82
Yams, lbs.	65,175	1,955.25

The total number of meals served in line hotels was 2,075,335, which was 141,405, or 6.38 per cent less than last year; the total number of rations served in European laborers' messes was 1,108,175, which was 53,630,

or 5.09 per cent more than last year. The total number of rations served in common laborers' kitchens was 584,457, which was 139,954, or 31.49 per cent more than last year. The average daily attendance during June, 1912, was 2,682 at the line hotels, 2,834 at the messes, and 1,446 at the kitchens. The attendance at the line hotels was determined on the basis that each guest averages two meals per day.

Additional accommodations were procured at the Hotel Tivoli during the year by the building of a new wing, which increased the number of rooms opening on private bath from

28 to 90. There was also bought and paid for, as an operating expense, furniture and equipment to the value of about \$10,000, the greater part of which was for use in the new rooms.

As a result of the year's operations, the line hotels and restaurants showed a loss of \$12,085.37, the European laborers' messes showed a profit of \$38,455.78, and the common laborers' kitchens showed a profit of \$11,147.34. The profit for the year resulting from the operation of the Hotel Tivoli was \$53,652.36. The total profits amounted to \$91,170.01, and increase over last year of \$31,949.82.

LABOR FORCE AND QUARTERS IN AUGUST.

On August 28, there were 34,837 employes actually at work on the Canal and the Panama railroad, and of that number, 28,982 were Canal employes. The gold force on the Canal work, composed almost entirely of white Americans, was 4,122. The force report for August 28 was, as follows:

DEPARTMENT.	SILVER EMPLOYES.*											Total silver.	Total gold.	Grand total.

(1) Includes Sabanas police station, Taboga Island, Culebra station, Palo Seco, and Naos Island. (2) Includes Europeans and Asiatics. (3) Includes 64 Panamanians. (4) Includes 29 East Indians. (5) Includes 63 Panamanians. (6) Includes Matachin. (7) Includes Colon Hospital. (8) Includes six Asiatics.

CYLINDRICAL VALVE SEALS.

Recent Modification of Those Used on Canal Locks Lessens Leakage.

A slight modification has recently been made in the seals of the cylindrical valves installed in the locks, which has resulted in a considerable reduction of the leakage found in early tests of these valves.

The valve, which was described in THE CANAL RECORD for November 15, 1911, is shown in Sketch A. It consists essentially of a hollow cylinder mounted on a vertical stem and resting, when closed, on a conical seat. When the valve is opened it rises into a concentric case directly above. The opening between the two rings is closed by a pair of leather seals, shown in Sketch B as A and A1, mounted, respectively, on the upperside of the upper flange C of the valve, and the lower side of the lower flange D of the case, when the

size. When a flexible seal is used, the gap will be closed, even though variations in the level of the seal exist.

An investigation of the valve equipped in this manner, however, discloses the fact that although leather is classed as a flexible material it still possesses enough stiffness to hold the valve off its seat when sufficient difference in the level of the flanges C and D exist. The stiffness of the leather is apparent when attempting to bend the material at short radius. In one case the valve was suspended in this manner by the leather seal from 10 to 15 thousandths of an inch above the seat and not touching it at any point. It is obvious that the leakage through this opening under 60 feet head would be excessive.

In order that the leather seal should allow the valve to take a proper seat under the conditions described it was proposed to bevel the

paraffine prepared, as follows: Two parts of neatsfoot oil and one part paraffine are boiled until the paraffine is absorbed by the oil. This solution is then cooled and the leather

SKETCH B—SECTION AT TOP OF VALVE SHOWING SEALS. soaked for about 72 hours, after which period it is found to be soft and pliable and thoroughly saturated with the compound.

Civil Service Examinations.

Examinations will be held, probably on October 27, for the positions of stenographer and typewriter, Isthmian Canal Service; stenographer and typewriter, Philippine Service; and typewriter, Isthmian Canal Service. Persons interested should request a copy of Form 1424, which contains information in regard to the above named examinations.

Applications will not be received after October 2; this date may be changed if necessary.

Competitors in the above named examinations must bring their own typewriting machines to the examination room.

It is to be noted that in answer to questions as to residence, applicants must show such residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., September 14, 1912.

Ancon Crusher.

Missing Men.

Any one having information regarding the whereabouts of Jacob Tschop, a machinist by trade, and supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

Any one having information regarding J. T. Sullivan, formerly of Black Bayou, La., who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD.

Anyone having information regarding the address of John G. Tobias, formerly of Lincoln, Nebraska, and who is supposed to have come to the Isthmus to work, is requested to communicate with the Director of Posts, Ancon.

Married.

O'CONNOR-PETERS—At Frijoles, on Sunday, September 15, Miss Nina Dorothea Peters to Mr. William Francis O'Connor, both of Empire, Rev. Carl H. Elliott officiating.

SKETCH A—SECTION THROUGH CYLINDRICAL VALVE.
(From The Canal Record, November 15, 1911.)

Diameter of outlet from central culvert $4\frac{1}{2}$ feet; of outlet under valve $6\frac{1}{2}$ feet; of movable cylinder of valve 7 feet $1\frac{1}{2}$ inches.

valve is down. The seal consists of a leather washer made up in sections of leather one-fourth inch thick and held down by segmental plates B and B1 bolted to the flange. The leather projects eleven thirty-seconds of an inch beyond the flange, and, normally, one-fourth inch of the leather makes contact with the opposite flange. This distance may vary by plus or minus three thirty-seconds of an inch which is the radial clearance of the valve and case.

A flexible seal is used at the top of the valve, because if a solid contact was used at both top and bottom it would be practically impossible to have both tight at the same time on account of mechanical irregularities, which are likely to exist in machined parts of this

edge of the segmental plate nearest the free end of the leather seal, thus allowing the leather to bend at an increased radius for a given irregularity of the flanges. This was accordingly done on the valve previously tested. The plates were removed, beveled at E and E1, and again put in place. Leakage tests, made after this modification was completed, showed a leakage under 60 feet head of .014 cubic feet per second, which is a vast improvement over the previous tests, which showed leakage in excess of .5 cubic feet per second. All valves of this type are accordingly being modified in the manner described.

In order to soften the leather seals as much as possible, the seals are being removed and treated with a mixture of neatsfoot oil and

SPILLWAY CAISSON DAM.

Floating Caisson for Spillways of Gatun and Miraflores Lakes.

Enough of the material for the floating caisson for Gatun Dam Spillway has arrived on the Isthmus from the United States to allow the contractors for its fabrication and erection, the McClintic-Marshall Construction Company, to begin the erection within a short time. Inasmuch as the caisson will not be required until after the coming dry season,

The pressure of backwater having been relieved, the caisson will be pumped out and floated away.

In outward appearance the caisson will be a simple rectangular box. The framework, consisting of vertical and horizontal girders, supporting a system of intercostals to form the skeleton, will be covered on both sides with steel sheathing plates, so as to form a watertight box into which will be put a sufficient amount of concrete ballast to cause it

long, by four feet three inches wide, with web plates $\frac{1}{2}$ -inch thick. They will be bolted at the ends to the two vertical girders, 22 feet six inches long, five feet nine and a half inches wide, and $\frac{1}{2}$ -inch thick in the web; and each of the three long spaces thus formed will be crossed at right angles by nine vertical intercostal plates, $\frac{3}{8}$ -inch thick. This skeleton is designed to withstand a maximum head of 22 feet. The sheathing will vary in thickness according to the pressure on it, from $\frac{3}{8}$ to 7-16 of an inch.

SKETCH A—SIDE ELEVATION OF SPILLWAY CAISSON WITH SHEATHING REMOVED.

it will be erected at an elevation between 55 and 60 feet above sealevel, on the lake side of the east wing of the Dam, there being ample time to complete the caisson before the rise of the lake surface above elevation plus 50 feet; while shortly after the Spillway gates have been closed, further to raise the lake, the caisson can be floated off and held ready for service.

The caisson is to be used as a temporary dam for the passages between piers of the Spillway dam, when it is desired to repair the Stoney gates by which the passages will ordinarily be controlled to regulate the surface of the lake. When a gate is to be repaired, the caisson will be towed from its moorings at the side of the Spillway, and swung into place between the piers supporting that gate. Water will be let into the caisson through intakes below the water line until it sinks into position on top of the ogee and against the vertical seats provided on either side. The downstream side of the caisson will then be six feet six and three-fourths inches from the face of the gate. After the placing of the caisson, the gate will be raised slightly to unwater the space between it and the caisson. This will cause a heavy pressure from the lake on the caisson, forcing it more tightly in place, and will afford room for workmen to operate on the upstream side of the gate.

When it is desired to remove the caisson the gate will be lowered and the space between it and the caisson will be filled with water, to the level of the lake, through a pipe passing through the caisson and controlled by a valve.

to float upright and at the proper depth in the water. Timber keels and side sills are provided to make tight joints with the ogee be-

SKETCH B—SECTIONS SHOWING OPERATING STAND FOR 10-INCH VALVE (H-H), AND PUMP (G-G.)

tween piers and the vertical seats against which the caisson will rest when in use.

The horizontal girders, three in number, and the top truss will be 49 feet six inches

All of this material will be of specially tested structural steel.

For ballast, concrete will be laid approximately two feet six inches deep over the entire bottom girder, with a slight grade toward a sump near the center. A number of movable concrete blocks, eight inches square by six inches deep, will be placed on top of this as a means of adjusting the ballast.

The pipes for letting water into the caisson are located above the second girder, holes in which will allow the water to drain to the bottom. These pipes are two in number, four inches in diameter, and controlled by long-stemmed valves operated from the girder above. Swash bulkheads will minimize the rolling of the water within the caisson, assuring steadiness. The flange pipe, through which water will be let into the space between caisson and gate, at the conclusion of repairs to the latter, is at the same level as the filling pipes and between them. It will be 10 inches in diameter, of cast iron, and controlled by an extension valve similar to those for the filling pipes.

The pumps for unwatering the caisson, to float it, is to be of the horizontal force type, hand operated by two handles. It will have a 6-inch stroke, and will draw water from the sump in the ballast through a 3-inch suction pipe and force it out through a 2 $\frac{1}{2}$ -inch discharge pipe, emptying through the side of the caisson about a foot below the top. When the caisson is sunk in place on its seat, its top will be two feet eight inches above the surface of the lake at the maximum elevation of 87 feet above sealevel. The arrangement of pump and

valves, and of other details of construction, is shown in the accompanying diagrams.

Trap doors and ladders will be provided to allow workmen access to the interior of the caisson. The top truss will be decked over with yellow pine lumber; and the keels and end sills will be of white oak. The caisson complete will contain approximately 53 tons of structural steel. The caisson for Miraflores spillway will be of identical construction.

PERSONAL.

Lieut.-Col. D. D. Gaillard returned from leave of absence on the *Panama*, which arrived at Cristobal on Friday, September 20. Returning from leave also on the *Panama*, were Mr. George M. Wells, accompanied by his family, and Mr. T. L. Clear.

Silver Medal Shooting Match.

On Sunday, September 22, the Canal Zone Rifle Club held the first of a series of shoots for a silver medal offered by Mr. W. M. Garlington of Colon. The conditions of the match call for 10 shots at the 200-yard and 600-yard ranges, no marking being done until the 10 shots are fired, which makes the contest an unusually difficult and interesting one. The results of Sunday's match, follows:

Ferris.....	83	Hutton.....	62
Walraven.....	81	Hoffman.....	59
Blaisdell.....	80	Kane.....	57
John.....	75	Taylor.....	55
Haynes.....	72	Bernson.....	53
Greene.....	72		

The medal must be won three times, but not necessarily in succession, to become the personal property of the winner.

Notice to Patrons of Gatun High School.

Pupils, resident at Cristobal, who will attend the Gatun high school the coming year, will leave Colon on the 10.30 train. A morning session of the school will open at 11.10, and close at 11.55. The afternoon session will open at 1 o'clock, and close at 3.15, in time for the afternoon train going north.

All pupils attending the Gatun high school should report at the building at 11.10 a. m., October 1, instead of 9 o'clock, as stated in previous announcement.

FRANK A. GAUSE,
Superintendent of Schools.
Ancon, C. Z., September 16, 1912.

Notice of Teachers' Meetings.

White teachers of the public schools will meet at the Ancon white schoolbuilding on Monday, September 30, at 8 a. m.

Colored teachers will meet at the Ancon white schoolbuilding on Monday, September 30, at 2 p. m.

FRANK A. GAUSE,
Superintendent of Schools.
Ancon, C. Z., September 25, 1912.

Levelman and Transitman Examination.

Examination for promotion to the positions of levelman and transitman is scheduled to be held in the Commission clubhouse at Empire, on Sunday, October 20.

The examination will commence promptly at 9 a. m., and will be divided into three parts, which will be given in the order indicated, viz.: Written and oral examination, and a statement of training and experience. Competitors will be required to complete the written portion of the examination before 1 p. m.

Applications for examination should be addressed to the undersigned, through the

head of department or division, before the close of business on October 17.

Competitors should bring to the examination room, pens, pencils, and tables of circular functions and triangles.

No card of admission will be needed.

A. B. NICHOLS,
Chairman, Examining Board.
Culebra, C. Z., September 21, 1912.

Independent Order of Panamanian Kangaroos.

The various subordinate courts of the Independent Order of Panamanian Kangaroos have decided to consolidate into one court, with temporary headquarters at Empire, this consolidation to become effective October 1.

The members of the various courts will meet at Kangaroo Hall, Empire, on Sunday, October 6, at 9.30 a. m., for the purpose of nominating and electing officers to preside over the new court.

Obituary.

Maj. Benjamin Morgan Harrod, a member of the Isthmian Canal Commission from 1904 to 1907, died at his home in New Orleans, La., on September 8, 1912, at the age of 75 years. He was a member of the Louisiana Engineering Society, and at one time, was president of the American Society of Civil Engineers, and of the Harvard Society of Engineers. He was also a member of the Mississippi River Commission, appointed in 1879, to make a survey of the river and its tributaries.

Drowning of Child at Las Cascadas.

Margaret E. Allen, aged three years and four months, daughter of Mr. and Mrs. Harry H. Allen of Las Cascadas, was drowned in a box culvert, containing about four feet of water, near her home, on Monday, September 23. It was raining heavily at the time, and it is supposed that the child, who was playing under the house, stepped into an open drain, and was carried by the rush of water into the culvert.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon, during the week ending September 21: *Turrialba*, September 15, from New York, with 51 kegs iron washers, 20 cases deck brushes, for stock; 31 packages plumbing fittings, for Panama Railroad Company.

Metapan, September 16, from New York, with 12 cases wire, for Mechanical Division; 34 cases graphite, 10 cases chains, 250 kegs spikes, 800 kegs nails, 20 kegs bolts, 13 crates stovepipe, for stock.

Advance, September 17, from New York, with 18 locomotive tires, for Mechanical Division; 50 cases elevator machinery, for Panama Railroad Company; 36 pieces steel beams, for Pacific Division; 120 packages track material, for superintendent of erection; 54 cases bathtubs, for Panama Railroad Company; 47 barrels cement roofing, 300 cases linseed oil, 70 cases varnish, 142 bundles galvanized roofing, 417 bundles shovels, 17 cases brass valves, 17 barrels pipe-fittings, 12 barrels compound, 10 cases spring cutters, 10 crates cans, for stock; and a miscellaneous cargo, the whole consisting of 1,490 packages, weighing 210 tons.

Atenas, September 19, from New Orleans, with 4,213 pieces yellow pine lumber, 307 pieces piling, 2,257 pieces cypress lumber, 30 cases hardware, for stock; 87 pieces white oak lumber, 6,783 pieces yellow pine lumber, 50 barrels brake shoes, for Mechanical Division.

Panama, September 20, from New York, with nine cases rubber boots, for Pacific Division; eight cases rubber boots, for Atlantic Division; 519 pieces knuckles, 14 pieces car couplers, 63 pieces castings, 20 pieces steel beams, for Mechanical Division; 50 cases drugs and sundries, for Sanitary Department; 20 drums calcium chloride, 20 cases varnish, 100 cases linseed oil, 42 cases lanterns, 19 cases babbitt metal, 40 cases concentrated lye, 125 cases soap, 36 pieces steel beams, 104 bales cotton waste, for stock; nine cases marble slabs, for Panama Railroad Company; and a miscellaneous cargo, the whole consisting of 1,800 packages, weighing 250 tons.

COUNT OF MAIL MATTER.

Comparison of Franked and Paid Classes Handled at Canal Zone Post-Offices.

The Division of Posts, Customs and Revenues made a count of all mail matter received, dispatched, and handled in transit on the Canal Zone from August 1 to August 31, 1912, inclusive. During the same period, the postal matter passing under the frank of "Official business" was weighed, and estimates have been prepared to show the revenues that would accrue if such matter were charged the regular rates. A recapitulation of the count follows:

Mail matter dispatched—The total number of letters dispatched from the Canal Zone offices with postage paid was 191,611; papers and packages, 18,642. Official letters dispatched numbered 79,558; packages, 4,263. Paid registered matter included 5,853 pieces; official registered matter, 6,001 pieces. Total, 305,928.

Mail matter received—The total number of paid letters received was 190,239; the number of papers and packages was 135,264. Official letters received numbered 73,376; packages, 5,546. Paid registered letters received amounted to 4,169, official to 5,570. Total, 414,164.

Mail matter in transit—This comprises all classes of mail matter received and dispatched by the exchange offices at Ancon and Cristobal to the cities of Panama and Colon, and to all countries in the Postal Union. Paid letters in this category numbered 87,424; packets, 14,702, in addition to 4,038 sacks of papers and 18,984 single papers. Registered pieces in transit amounted to 12,943. Total 134,053 pieces, and 4,038 sacks of papers. The total number of pieces handled during the month was 858,183.

Official matter—The weight of official matter, including letters and packages, handled during the month was 24,033 pounds. The estimated weight of the 79,558 official letters dispatched is 9,943 pounds, and regular postage on it would have amounted to \$3,181.76. On the 4,263 packages dispatched, with weight of 10,424 pounds, the postage would have been \$1,667.84. Registry fees on 6,001 official registers would have amounted to \$600.10, and the regular postage on the 13,609 pounds which they weighed would have been \$4,354.88. The total revenue from these four sources would have been \$9,804.58.

Women's Clubs.

The Gatun Woman's Club will open its fifth year on Thursday afternoon, October 10. There will be a program presented, which will call for a schedule, as follows: The first Thursday in each month will be a business meeting, with current events; the second meeting in each month will be in the charge of a chairman of one of the four departments, namely, home, literature, educational, and philanthropy. Programs, suitable to the month, will be arranged, as, in November, a program on Thanksgiving customs; in December, on Christmas customs. In February, there will be a patriotic program to celebrate Washington's Birthday; March and April will be general. Provision will be made for speakers, and it is expected that the club will hold the usual teas and social events.

The Corozal Sunday school held a social and cake sale at the recreation hall on Wednesday evening, September 18. A musical and literary program was one of the features. The net receipts amounted to \$55.35.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Mr. Joseph Page, former secretary of the Y. M. C. A. at Decota, West Virginia, has assumed the duties of secretary at the Porto Bello clubhouse.

Mr. E. J. Schulte, former assistant physical director of the Y. M. C. A. at Lynn, Mass., has begun his work as assistant secretary of the Cristobal clubhouse.

CULEBRA.

The plan of holding moving picture exhibitions in the enlarged room of the schoolhouse at Culebra has been officially approved. Announcement of the next exhibition will be made by bulletin.

The Culebra bowling alleys will be reerected in the rear of the Administration annex, and additional facilities will be procured by connection with that building.

EMPIRE.

Empire bowled the Gorgona team on Saturday, September 21, on the Empire alleys, winning all three games. Following are the scores:

Empire.	Gorgona.
Gustavson... 173 177 152	Simmons... 177 184 156
Potter... 183 162 171	Everet... 127 169 125
Edwards... 146 161 184	Gebbart... 181 159 183
Pearson... 180 154 163	King... 133 155 144
Huson... 184 178 170	Davis... 123 153 147

Total... 866 832 840 741 820 755

The first game in the Isthmian bowling tournament will be bowled on October 5, when Empire will play the Culebra team. Inasmuch as the Culebra team has no home alleys at the present time, they will use the Empire alleys for their tournament games.

Mr. Russell, the assistant secretary, who has been acting secretary at Porto Bello for the last two months, will resume his duties here this week. The regular gymnasium and fencing classes will be started at once.

Sixteen men entered in the local September handicap pool tournament, and eight men in the billiard tournament.

GORGONA.

The following is the standing in the local pool and billiard tournament:

Name.	Won.	Lost.	P. C.
Johnson...	2	0	1,000
Harter...	4	1	800
Walcut...	3	3	500
Robitoy...	1	1	500
Means...	0	2	500

A special musical service will be held at the Gorgona clubhouse on September 28. The service begins at 7 promptly. Every one in Gorgona is invited.

The bowling alleys will soon be in good condition. The league will open on the first Saturday in October. All who wish to join a male quartet, or glee club, are requested to hand their names to the secretary.

GATUN.

The work of shellacking the bowling alleys, which were recently replaned, was begun on Saturday, September 21. It is expected that they will be ready the latter part of this week, when an "Opening" will be held. Several new tenpin halls were received on the last boat. When the Isthmian tournament opens on October 5, Gatun will play at Cristobal.

A beginners' class in Spanish will be started on Wednesday, September 25, which will furnish a good opportunity to acquire a working knowledge of the language. The course runs for 10 lessons. The charge is \$2.50. Any member may join. An advanced class also starts on September 25.

Mr. Pearson of Empire having failed to appear for the final game of pool with Mr. DePoorter of Gatun on Saturday night, September 21, the latter will be declared champion pool player of the Isthmus and will receive a handsome gold medal. The Gatun clubhouse challenges all other clubhouses on the Isthmus to a match game of pool or billiards, or both, the team to consist of any number of men desired.

At the "Open house" held on Saturday evening, September 21, music was furnished by the McClintic-Marshall fire and drum club and the commissary mandolin club.

Forty new books were received from the United

States during the past week, and placed on the shelves for circulation.

There is still an opportunity for those desiring to join the class in shorthand, which meets every Tuesday night.

CRISTOBAL.

Regular basketball practice will be held Tuesday and Thursday evenings. All interested are urged to attend.

The "Married Folks" duckpin tournament held on Saturday night, September 21, was won by Mr. and Mrs. W. J. Burn. The prize was a handsome gold medal. Scores were, as follows:

Name.	1	2	3	Total.
Mr. and Mrs. Burn...	175	152	167	494
Mr. and Mrs. Cotton...	154	147	157	458
Mr. and Mrs. Bell...	144	154	153	451
Mr. and Mrs. Burrell...	139	161	144	444
Mr. and Mrs. Landers...	144	161	137	442

There will be another tournament of this kind on October 2. All interested are invited to participate.

The Isthmian bowling league opens October 5, with Gatun bowling at Cristobal. All bowling fans are invited to attend.

Rainfall from September 1 to 21, 1912, Inclusive.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending September 21:

Arrivals—September 15, *Cordelia*, from Port Harford; September 15, *Quito*, from Guayaquil; September 16, *Guatemala*, from Callao; September 16, *Peru*, from Guayaquil; September 17, *Ucayali*, from Callao; September 20, *Acapulco*, from San Francisco; September 20, *Stanley Dollar*, from San Francisco.

Departures—September 17, *Mantaro*, to Callao; September 17, *Palena*, to Valparaiso; September 18, *Cordelia*, to Port Harford; September 20, *City of Sydney*, to San Francisco.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, OCTOBER 2, 1912.

No. 6.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Pipeline Along Naos Island Breakwater.

The outer end of Naos Island breakwater is within 500 feet of the island, and the Division of Fortifications has begun the laying of a 4-inch pipeline to supply water for the work of construction on the adjacent islands of Perico and Flamenco. Clapets have been used heretofore, hauling water from Balboa. The pipeline will connect with the Ancon-Balboa main near the bridge across the estuary between the East Balboa hotel and the commissary, and will extend across completed dumps at Balboa and along the breakwater track. It will be 17,050 feet in length, and will be capable of delivering at least 100,000 gallons of water per day at Naos Island.

Protecting Culebra Cut from Flooding.

To protect Culebra Cut from inundation by the Chagres River, in consequence of the rise of Gatun Lake, the dike at Gamboa is being raised and strengthened. Earth and rock will also be dumped at a point about a thousand feet south, where the Camacho Diversion, passing under the Panama railroad, strikes at right angles a barrier separating it from the Canal channel. Both dikes will be carried to 78.2 feet above sealevel, and the one across the Canal will be widened approximately 40 feet. The tops of the dikes before the beginning of these operations were 73 feet above sealevel.

Rebuilding of Dredge "No. 85."

The hull of pipeline suction dredge *No. 85* was successfully launched from the shipways at Balboa on Monday afternoon, September 30. This dredge, which was formerly engaged in the hydraulic fill at Gatun Dam, was dismantled about two months ago and shipped to Balboa in sections. The work of putting the hull together has taken about six weeks, and it is expected that within another month, its upper works will have been replaced, when the dredge will again

be ready for service. It will be put to work excavating for the new inner harbor at Balboa, the material from which will be used in filling in the low area on the west side of the Panama railroad, between Corozal hill, and the Balboa wye.

Dock Changes at Balboa.

The remainder of the Panama railroad lumber dock at Balboa, a part of which collapsed on August 17, is being removed. Additional cracks developed at the north end of the wharf early last month, making it unsafe for further use, and the two cranes stationed thereon were at once dismantled and removed from the zone of danger. Most of the lumber in the old wharf is being utilized in the construction of a shed over the cement dock, which is now used regularly by Pacific coast steamers, in taking on and discharging cargo. The cement dock is 656 feet long, and will be covered for practically its entire length. The substructure of this dock recently moved slightly channelward in one or two places, due to the pressure against it of the adjoining land fill. Further movement has been stayed by installing anchor rods fastened to the caissons by steel clamps, the outer ends being embedded in solid concrete bases.

Buildings Along Zone Boundary Road.

Affecting the erection of buildings along the Panama side of the Ancon-Balboa road, between its juncture with the Panama-Balboa road, and the Ancon post-office, the municipal council of Panama has ordained that such buildings shall not extend beyond the alignment marked out by the buildings of the National Institute, and the sidewalks shall have the same width as those of the National Institute on that road. This provides that the sidewalks shall be at least eight feet wide.

Transfer of Compressors to Balboa.

In the transfer of the two air compressors in the plant at Las Cascadas, and the boilers from which they are supplied with steam, to the Balboa power plant, referred to in THE CANAL RECORD of August 28, 1912, one compressor and one boiler will be installed at the Balboa plant within a week; and the other compressor, with two more boilers, is to be transferred by the first of January. Each compressor is capable of compressing 2,500 cubic feet a minute from atmosphere to a pressure of 100 pounds to the square inch, and is driven by a double-cylinder simple engine of 250-horsepower.

The plant can be spared from Las Cascadas on account of the advance of excavation in Culebra Cut. The air mains, which extend the length of the Cut, will then be supplied by the plants at Empire and Rio Grande. The Balboa plant has been using two compressors heretofore, supplying the Ancon quarry through an 8-inch main, and the Balboa

shops through a 6-inch main, crossing the saddle between Sosa High and Sosa Low. The new compressors will be used principally for drills in the excavation for the permanent terminals, which will be supplied through 6-inch mains, skirting both sides of the Sosa hills. They will be installed in the present boiler room of the Balboa plant, requiring no extension of the building, except a small shed.

Erection of Hydroelectric Plant at Gatun.

Operations have begun for the erection of the permanent hydroelectric station at the Spillway of Gatun Dam. Excavation for the turbine pits, close by the Spillway discharge channel, on the east side, has been carried to 5.25 feet below sealevel, over an area of 100 by 30 feet. The sheet steel penstocks are being assembled on the north toe of Gatun Dam, near the Spillway. The penstocks, of which there will be three, with provision for the installation of three more, if desired, will each be 10 feet six inches in diameter, of $\frac{3}{4}$ -inch steel, banded at intervals of eight feet with 3-inch by $\frac{3}{4}$ -inch Z-bars, all set in concrete. The center of intakes will be at elevation plus 68.25, and their discharges into the turbines at elevation plus 27. When Gatun Lake is at its normal level of 85 feet above sealevel the effective head on the turbines will be 77 feet.

Specifications for 350 tons of structural steel for the buildings of the plant have been sent to the General Purchasing Officer for advertisement. The specifications provide for the erection of the steel, either by the contractor, or by the Isthmian Canal Commission. It is expected that the laying of concrete for the foundations of the building and turbines will be begun about the middle of October.

Progress in Erection of Lock Gates.

Following the completion of erection and sheathing for the gates in the upper level of Gatun Locks, the erection bridge, which was employed on that level, is being moved to the middle level. No gate erection has been done in the middle lock, the bridge which is being moved to it having so far been used only for the upper lock, and the second bridge, which was set up across the lower lock in April, 1912, has been used only on that level. The west span of the upper level bridge has been moved, and the east span is to follow during this week. It has been found unnecessary to dismantle the bridge, the ends of the spans being set on trucks and rolled down the inclines of the walls.

The upper guard gates at Gatun Locks are being equipped with footwalks and handrails across the tops, and will shortly be ready for the use of the public in crossing the chambers.

At Miraflores Locks, the skeletons of the upper guard gates have been brought to full height, with the exception of the top girders.

(Continued.)

Over 87 per cent of the concrete for the system of two twin locks at Miraflores was in place September 28, the total amount on that date being 1,233,852 cubic yards, bucket measurement, out of a total of approximately 1,412,736. The record for each working day last week, follows:

EXECUTIVE ORDER

Consolidating the Administrative District of Gorgona with that of Empire, and for other purposes.

By virtue of the authority vested in me I hereby establish the following Order for the Canal Zone:

Section 1. The Administrative District of Emperador shall be known hereafter as the Administrative District of Empire, and the town of Empire shall be the head of the District.

Section 2. The Administrative District of Gorgona is hereby abolished, and the territory heretofore embraced in said District is incorporated into the Administrative District of Empire for all judicial, administrative, and political purposes.

Section 3. The District Court of Gorgona is hereby abolished, and all cases, civil or criminal, pending in said Court, at the time this Order takes effect are transferred to the District Court of Empire, to be tried and disposed of in said court in like manner and form as if they had been originally instituted therein, without prejudice to any rulings or orders that may have been previously made in said cases by the District Court of Gorgona; and all process issued in said cases made returnable to the District Court of Gorgona shall be returnable to the District Court of Empire, and the records and files of the District Court of Gorgona shall be transferred to and become a part of the records and files of the District Court of Empire as soon as this Order takes effect.

Section 4. If at any time it is impracticable to assign a District Judge of one district to hold the court of another District Judge, the Head of the Department of Civil Administration, with the approval of the Chairman of the Isthmian Canal Commission, shall appoint some competent person to act as a special judge to hold such court until the regular judge thereof returns to his duties, or one of the District Judges is assigned to such court under the existing laws. Any person appointed special judge hereunder, while serving in that capacity shall receive compensation for his services at the same rate as that paid to the regular district judge.

Section 5. The powers and duties heretofore vested in and imposed on the administrative officers of the District of Gorgona are hereby transferred to the corresponding administrative officials, respectively, in the District of Empire, together with the records and files belonging to such officers.

Section 6. The areas of Gatun Lake lying outside of the east and west lines of the Canal Zone proper (original ten mile strip) and the lands adjacent to said areas up to contour lines of one hundred feet above mean sea level, are hereby included in the present Cristobal Administrative District, and the Third Judicial Circuit, for all judicial, administrative and political purposes; except, that part of the Chagres and its confluences from the point where the said river intersects the eastern line of the Canal Zone proper, thence to the eastward up to contour lines of one hundred feet above mean sea level, which shall be included in the Administrative District of Empire and in the Second Judicial Circuit for such purposes.

Section 7. All laws and orders or parts thereof in conflict with this Order are hereby repealed.

Section 8. This Order shall take effect ten

days from and after this date; provided, that the office of senior District Judge in accordance with the preexisting laws shall continue until December 31, 1912, at which date the said office shall cease to exist,—and provided further, that nothing in this Order shall be construed to deprive any judicial or administrative officer of the District of Gorgona as now formed, of leave of absence with pay that may be due him when this Order takes effect.

WM. H. TAFT.

THE WHITE HOUSE,
September 12, 1912.

[No. 1605.]

PERSONAL.

Mr. Charles E. Weidman sailed on Tuesday, October 1, on the United Fruit Company's steamer *Tivives* for Kingston, Jamaica, and from there sails on the steamer *Zacapa* for New York, on his annual leave of absence.

Married.

HOFFMAN-BENDER—At Empire, on Saturday, September 21, Geta Fae Bender of Empire, to Warren Engle Hoffman of Empire, the Rev. A. A. Nellis officiating. Canal Zone residence, Empire.

SJOBLOM-RUDER—At Cristobal, on Thursday, September 26, Clara Rose Ruder of Chicago, Ill., to Axel Theodore Sjoblom of Culebra, the Rev. A. A. Nellis officiating. Canal Zone residence, Culebra.

SULLIVAN-SKELTON—At Culebra, on Monday, September 23, Marie Elizabeth Skelton of St. Paul, Minnesota, to James Alexander Sullivan of Seattle, Washington, the Rev. Father Collins officiating. Canal Zone residence, Culebra.

Rainfall from September 1 to 28, 1912, Inclusive.

FUNDS FOR CANAL WORK.

Appropriations for Fiscal Year 1912-13 for Various Departments, and for Fortifications.

Provision for carrying on work on the Canal, and of the fortifications, and the armament thereof, during the fiscal year ending June 30, 1913, was made in the Sundry Civil Act, approved August 24, 1912. The appropriation for the Canal work amounts to \$28,980,000, divided into the following items:

Salaries of officers and employees in the United States.....	\$150,000
Incidental expenses in the United States..	50,000
Salaries of members of the Canal Commission, and officers and employees on the Isthmus, other than skilled and unskilled labor, in the departments of construction and engineering, quartermaster's, subsistence, disbursements, and examination of accounts.....	3,000,000
Skilled and unskilled labor on the Isthmus in the departments of construction and engineering, quartermaster's, subsistence, disbursements, and examination of accounts.....	11,000,000
Material, supplies, and equipment, and other expenses not in the United States, including not exceeding \$50,000 for the payment of damages caused to the owners of private lands, or private property of any kind, for the departments of construction and engineering, quartermaster's subsistence, disbursements, and examination of accounts.....	12,000,000
Miscellaneous expenditures, including recruiting and repatriation of laborers, and all other incidental and contingent expenses not otherwise provided for in the departments of construction and engineering, quartermaster's, subsistence, disbursements, and examination of accounts.....	790,000
Salary of member of the Canal Commission in charge of the Department of Civil Administration, and of the officers and employees, other than skilled and unskilled labor, in the departments of civil administration and law.....	500,000
Skilled and unskilled labor in the Department of Civil Administration.....	15,000
Material, supplies, etc., and contingent expenses of the departments of civil administration and law.....	75,000
Salary of member of the Canal Commission in charge, and of officers and employees, other than skilled and unskilled labor, of the Department of Sanitation on the Isthmus, including those temporarily detailed for duty away from the Isthmus.....	700,000
Skilled and unskilled labor of every grade and kind, for the Department of Sanitation on the Isthmus.....	200,000
Material, supplies, etc., and contingent expenses of the Department of Sanitation on the Isthmus: Provided, That no part of this appropriation shall be used for or toward the construction of a new quarantine station.....	500,000
Total.....	\$28,980,000

The foregoing sums, so far as necessary, shall be available for necessary drydock, coaling plant, shops, and other facilities for repairing and supplying vessels and necessary wharves, sheds, and other terminal facilities, and for the consolidation and preservation of the files of papers and other records which have accumulated or may accumulate during the construction of the Canal.

The entire appropriation is available until expended, and in cases of emergencies arising subsequent to and unforeseen at the time of submitting the annual estimates to Congress, 10 per cent of the foregoing amounts shall be available interchangeably for expenditure on objects named, but not more than 10 per cent shall be added to any one item of the appropriation.

It is directed that all expenditures under this appropriation, including construction of

drydock, coaling plant, shops, and other facilities, but exclusive of fortifications, shall be paid out of the proceeds, derived from the sale of Canal bonds, and that no part shall be applied to the payment of allowances for longevity service or layover days, other than such as may have accumulated prior to July 1, 1909.

FORTIFICATIONS.

The appropriation for continuing the work of fortifying the Canal, and for providing the armament thereof, amounts to \$2,806,950, and is divided, as follows:

SURVEYS.

For detailed surveys of the areas on the Canal Zone, required for military purposes, including the cost of marking permanently the boundaries of such areas... \$ 50,000

CAUSEWAY.

For the construction of a causeway, or bridge, for use in connection with fortifications, Isthmian Canal..... 150,000

SEACOAST BATTERIES.

For construction of seacoast batteries on the Canal Zone, and any balances of the appropriation for the construction of seacoast batteries on the Canal Zone, made by the Act of March 4, 1911..... 1,000,000

SUBMARINE MINE STRUCTURES.

For the construction of mining casemates, cable galleries, torpedo storehouses, tanks, and other structures necessary for the operation, preservation, and care of submarine mines, and their accessories, on the Canal Zone..... 220,200

FIELD FORTIFICATIONS AND CAMPS.

For the construction of field fortifications and the preparation of camp sites on the Canal Zone..... 200,000

ARMAMENT OF FORTIFICATIONS.

For the purchase, manufacture, and test of seacoast cannon for coast defense, including their carriages, sights, implements, equipments, and the machinery necessary for the manufacture at the arsenals, to cost ultimately not to exceed \$2,324,000..... 500,000

For the purchase, manufacture, and test of ammunition for seacoast cannon, including the necessary experiments in connection therewith, and the machinery necessary for its manufacture at the arsenals..... 575,000

SUBMARINE MINES.

For the purchase of submarine mines, and the necessary appliances to operate them for closing the channel leading to the Isthmian Canal..... 111,750

Total..... \$2,806,950

CANAL ZONE FUNDS.

Section 2 of the Act provides that "All funds collected by the Government of the Canal Zone from rentals of public lands and buildings in the Canal Zone, and the cities of Panama and Colon; and from the Zone postal service; and from court fines and fees; and collected or raised by taxation in whatever form under the laws of the Government of the Canal Zone, are hereby appropriated until and including June 30, 1913, as follows: The revenues derived from the postal service to the maintenance of that service; the remaining revenues, including any balances unexpended in prior years, after setting aside a miscellaneous and contingent fund of not exceeding \$10,000, to the maintenance of the public school system in the Zone; to the construction and maintenance of public improvements within the Zone; to the maintenance of the administrative districts; to the maintenance of Canal Zone charity patients in the hospitals of the Isthmian Canal Commission, and to the maintenance of administrative district prisoners. A detailed and classified statement of all receipts and expenditures, without

the duplication of items under this paragraph, shall be submitted to Congress after the close of the fiscal year 1913."

SALE OF MATERIAL, BUILDINGS, ETC.

"Section 3. All funds realized during the fiscal year 1913 by the Isthmian Canal Commission from the performance of services by the Commission or from rentals, or from the sale of materials and supplies under the custody and control of the Commission, are appropriated for expenditure under any of the foregoing classified appropriations for the Department of Construction and Engineering, and a full and separate report in detail of all transactions under this section shall be made to Congress. That until the close of the fiscal year 1913, when any material, supplies, and equipment heretofore or hereafter purchased or acquired for the construction of the Isthmian Canal is no longer needed, or is no longer serviceable, it may be sold in such a manner as the President may direct, and without advertising in such classes of cases as may be authorized by him; and the President is authorized, in his discretion, to sell and convey to the Republic of Panama the building situated in the city of Panama known as 'the Administration Building,' together with the ground on which the same is located, for a sum of not less than \$80,000, and the proceeds of such sale, if made, shall be covered into the Treasury of the United States."

TORO POINT LIGHT.

"Section 4. That hereafter no payments shall be made for maintenance, or other charges, in connection with the Toro Point light, Isthmus of Panama, out of moneys of the United States, or of the Panama Railroad Company."

DIVISION OF RECORDS.

"Section 5. The Chairman of the Isthmian Canal Commission is authorized to establish a division of records, and, as the requirements of the service permit, to consolidate in the custody thereof the files of papers and other records which have accumulated, or may accumulate during the period of the construction of the Isthmian Canal; and he is directed to carefully preserve, properly index, and arrange for use all papers needed or useful in the transaction of current business, or having a permanent value or historical interest; and he is authorized to destroy, or otherwise dispose of, duplications in the files and other papers, which are not needed or useful in the transaction of current business, and have no permanent value or historical interest, and which have been recommended to him for destruction, or other disposition, by a committee of three competent persons, who have personally examined the papers, and in connection with their recommendation, have submitted a concise statement of the condition and character thereof."

FUTURE ESTIMATES.

"Section 6. Hereafter, there shall be submitted in the annual book of estimates, following every estimate for a general or lump appropriation, which exceeds \$250,000 in amount, a statement showing in parallel columns:

"First, the number of persons, if any, intended to be employed and the rates of compensation to each, and the amounts contemplated to be expended for each of any other objects or classes of expenditures specified or contemplated in the estimate; and

"Second, the number of persons, if any,

employed, and the rates of compensation paid each, and the amounts expended for each other object or class of expenditures out of the appropriation corresponding to the estimate so submitted, during the completed fiscal year next preceding the period for which the estimate is submitted.

"Section 7. No specific or indefinite appropriation made hereafter in any regular annual appropriation Act shall be construed to be permanent or available continuously, without reference to a fiscal year unless it belongs to one of the following five classes: Rivers and harbors; lighthouses; fortifications; public buildings; and pay of the Navy and Marine Corps, last specifically named in and excepted from the operation of the provisions of the so-called "Covering-in Act," approved June 20, 1874, or unless it is made in terms expressly providing that it shall continue available beyond the fiscal year for which the appropriation Act in which it is contained makes provision."

CANAL APPROPRIATIONS.

A statement showing the appropriations by Congress for the Isthmian Canal, and for fortifications, and the armament thereof, up to and including the present fiscal year, is given below:

ACT OF CONGRESS APPROVED.	Appropriation.	Deficiency.
June 28, 1902.....	*\$40,000,000.00
April 28, 1904.....	†10,000,000.00
June 28, 1902.....	10,000,000.00
December 21, 1905...	11,000,000.00

FORTIFICATIONS.

March 4, 1911.....	\$3,000,000
August 24, 1912.....	2,806,950
Total.....	\$5,806,950

The expenditures to July 31, 1912, amount to the following:

Canal work.....	\$262,692,619.19
Fortifications.....	1,317,008.58
Total.....	\$264,009,627.77

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The annual reception by the members and guests of the Cristobal Woman's Club to the outgoing and incoming presidents was held on Saturday, September 29, at the Cristobal clubhouse. A short musical program was given, preceded by an address by the new president, Mrs. J. L. Storla.

As this is presumably the last year of federated club work on the Isthmus, an appeal was made to the old members to rally once more, and an invitation was extended to others to become members. The first general meeting of the club was held on Wednesday, October 2, conducted by the philanthropic department. Rev. C. H. El-

liott spoke on the subject of "Art and brotherhood."

The schedule for the year has been completed, and calls for a varied and interesting series of programs. There will be one general meeting each month, and the art and literature and home departments will each hold one meeting a month, with program. The programs of the art and literature department are, as follows: October 16, McDowell afternoon; November 20, Wedgewood and Royal Doulton; December 18, review of new books; in January, a musical evening; February 19, well-known women writers; March 19, modern pictures of children; April 16, Stevenson's verse and song. This department will contribute a program to the general meeting on the subject of Spanish articles. The program of the home department will be: October, recreation in the home; November, system in the home;

CULEBRA CUT.

Status of Work and Plans for Future Operations.

On October 1, the excavation required for the completion of Culebra Cut amounted to approximately 8,300,000 cubic yards. Up to date approximately 85,400,000 cubic yards of material have been removed from the Cut. Practically all of the excavation remaining to be done lies within a distance of about five miles, between the new bridge at Paraiso and La Pita slide, north of Empire. Beyond the ends of this section the work to be done is the removal of inclines, and of material at the foot of several small slides. One of these slides is at Whitehouse yards, on the west bank, and another is almost opposite, at Station 1631, where the Obispo Diversion dike settled in June, 1912. The accompanying profile (A) shows the distribution of excavation to be done between

is due to them. Sketch B shows a cross section of the Cut at Station 1778, opposite Culebra, with heavy slides on either side. It will be noted that the banks have broken back until the width across the top of the Cut at this station is 1,690 feet. Had the material allowed a continuous 1-on-1 slope of the banks, the width at top of a 300-foot channel, carried 270 feet below the original surface, would have been 840 feet, with proportionate decrease in excavation. The action of the slides is indicated further by the crossing of the lines showing sections in October, 1911, and September, 1912.

Because the development and extent of slides cannot be accurately estimated, excavation through the Cut will be prosecuted with vigor to obviate contingencies. The number of steamshovels at work, which has averaged about 37 since the beginning of the

SKETCH A.—PROFILE OF CULEBRA CUT.
(Showing material excavated and to be excavated.)

December, modern kitchens; January, domestic animals; February, home life in the Colonies; and April, gardening. Several speakers have promised their services for the general meetings, and the club looks forward to an unusually interesting year.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Gorgona, C. Z., on Sunday, October 6, at 6 p. m. The program follows:

1. March—*Spirit of Independence*.....Holzman
2. Selection—*The Red Widow*.....Gebert
3. Popular Song—*Climb a Tree With Me*.....Harris
4. Overture—*If I Were King*.....Adam
5. Intermezzo—*Indian Summer*.....Moret
6. Medley selection—*Broadway Review*.....Lampe
7. ————*Humoresque*.....Dvorak
8. Waltz—*Tres Jolie*.....Waldteufel
9. —*Gaby Glide*.....Hirsch

CHARLES E. JENNINGS, Musical Director.

The next concert will be given at Bas Obispo, October 13, at 6 p. m.

The euchre party to be given by the altar society of St. Ferdinand's Church, Empire, has been postponed until October 12. Game will begin at 8.30 p. m.

the dike at Gamboa and Pedro Miguel Lock. The following table of elevations of pioneer cuts indicates the status through the unfinished part:

Station.	Near Village.	Elevation.
1630	Las Cascadas	39
1680	Empire	39
1692	Empire	44
1700	Empire	58
1720	Empire	60
1750	Lirio	62
1760	Lirio	68
1780	Culebra	64
1794	Culebra	48
1820	Cucaracha	40
1880	Paraiso	39
1930	Pedro Miguel	39

The elevations of pioneer cuts are not a complete index, nor one that can be interpreted uniformly, because of breaks and slides along the channel embankments. Over twice the amount of material yet to be taken from the channel to complete the Cut has already been taken out from slides, and about 45 per cent of the excavation remaining to be done

present rainy season, is shortly to be increased to 41 or 42. It is planned to have the dry excavation finished by July 1, 1913. Shortly after that, water will be let into the Cut through the dike at Gamboa, and the ladder dredge *Corozal* is to be brought into the Cut from the Pacific entrance, to work at the foot of any slides which continue to develop, in addition to removing the dike and cleaning out about 150,000 cubic yards of silting in the completed channel between Gamboa and Mamei.

The slides call for no other treatment than unremitting excavation. The plan for excavating at the top, however, has reduced the size of the slides and restricted their menace. Following heavy rains on September 21, 1912, the slides at Culebra, shown in Sketch B, pushed out at the toes. One of them partly buried two steamshovels, and closed the pioneer cut for a distance of 50

feet. Experience leads the engineers in charge to believe that if the tops of these slides had not been previously lightened by excavation, the movement would have been sufficient to bury all tracks and close the Cut from bank to bank. Excavating at the top will be continued on all large slides.

work, the construction districts of the Central Division have been rearranged as of October 1. The Empire district is extended to Station 1760, opposite Culebra, and includes approximately all of the Cut on the north side of the present continental divide. The Culebra district extends in the opposite direction

construction districts of the Central Division will be made effective October 1, 1912.

The Empire construction district will extend from the Chagres River to Station 1760.

The Culebra construction district will extend from Station 1760 to the Pedro Miguel lock, and will include the incline tracks at Paraiso and the I. C. C. main line tracks adjacent thereto, as far south as a point opposite the north face of the northeast wing wall at the Pedro Miguel lock.

The Pedro Miguel construction district will comprise the Central Division tracks south from a point opposite the north face of the northeast wing wall of Pedro Miguel Lock, and the Miraflores and Balboa dumps.

The resident engineer will have station marks erected to show the limits of each construction district.

D. D. GAILLARD, Division Engineer.

Ancon Hospital Laundry Prices.

ANCON, C. Z., September 26, 1912.

Effective November 1, 1912, the following laundry prices will govern at the Ancon Hospital laundry:

Balboa.....	Assistant storekeeper	Every day	Business hours

GEO. W. GOETHALS, Chairman.

Promotions to Positions Vacated after October 1, 1912.

CULEBRA, C. Z., September 25, 1912.

Lieut.-Col. D. D. GAILLARD,
Division Engineer, Empire.

Sir: Request for decision was received from your office this afternoon on the question of promotions to positions which will be vacated by men after October 1, whose leave of absence is commuted to a cash payment, the question being whether promotions to such positions could be made immediately, or whether the promotions should be made after the number of

days had expired, which would have been granted as leave.

Promotions should not be made until the period which would have been granted as leave has expired. This is necessary to prevent allotments of appropriations being expended.

Respectfully,
GEO. W. GOETHALS, Chairman.

Central Division Construction Districts

EMPIRE, C. Z., September 27, 1912.

CENTRAL DIVISION CIRCULAR No. 333:

By authority of the Chairman and Chief Engineer, the following changes in the division lines between the

Misdirected Letters.

ANCON, C. Z., October 2, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts and may be procured upon request of the addressees:

Almour, G. W.	Jones, Nellie
Banks, Ben	Kennedy, Edw.
Bowen, H. A.	Knapp, Josephine B.
Boyd, Charles	Laws, Ewell H.
Brennan, Earl C.	Martindale, Dudley
Briggs, R. M.	Monohan, I. P.
Burns, Robert	Ogill, Dorothy H.
Carson, Mrs.	Podolsky, S.
Chambers, Henry F.	Post, B. H.
Clark, W. C.	Renwick, Arthur B.
Conry, Chas. F.	Repak, Peter
Cumings, C. C.	Rogers, Captain T. J.
Deavours, Jno. C.	Simonson, S. E.
De Force, Clifton	Smyth, Dr. James
Fairbanks, C. M.	Stevens, Sherlock B.
Fiss, C. A.	Stowell, W. Allan (2)

Hurtado, E. L.	Whitehead, R. H. (3)
Jackson, Dr. A. S.	Willes, S.
Jimenez, Roberto A.	Woodford, Earl
Jones, Sidney Earle	

The new railroad bridge over Culebra Cut, north of Pedro Miguel Lock, known as No. 57½, was used by passenger trains for the first time on Thursday, September 26, when train No. 5 passed over it. The work of dismantling the old bridge has been begun.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for next week is, as follows: Monday, October 7, Gorgona; Tuesday, October 8, Gatun; Wednesday, October 9, Cristobal; Thursday, October 10, Culebra; Friday, October 11, Corozal; Saturday, October 12, Empire.

During the illness of Mr. Warr, Mr. Russell will be in charge at the Empire clubhouse.

COROZAL.

A "smoker" was held at the clubhouse on Saturday evening, September 28. Two hundred men were present. The program consisted of the following numbers: Selection, Tenth Infantry; xylophone solo by Private White of the 10th Infantry; song and dance by Mr. Stapleton of Corozal; calisthenic drill by Tenth Infantrymen; Scotch songs in dialect by J. Cullen, Corozal; illuminated club swinging by Mr. Kramer of Gorgona; black face comedy act by Messrs. Cogan, Otis, and Robitoy of Gorgona; Japanese sword contest by Messrs. Callahan and Paul of Corozal; wrestling bout by Messrs. Hughes and Cousineau.

Some of the Corozal wrestlers have been trying out on the new wrestling mat, purchased last week.

The new punching bag platform will soon be ready for use.

There will be a moving picture entertainment at the clubhouse on Saturday evening, October 5.

The standing of those entered in the local handicap pool tournament is, as follows:

Handicap.	Name.	Won.	Lost.	P. C.
60	Souder.....	3	0	1.000
60	Patrick.....	5	0	1.000
60	White.....	4	2	.665
60	Stagg.....	3	2	.600
60	Kent.....	3	3	.500
70	Stapler.....	1	1	.500
50	Underwood.....	2	2	.500
80	Tougher.....	1	1	.500
80	Besile.....	2	4	.333
80	Roberts.....	2	5	.286
80	Hostetter.....	1	5	.167

Highest run—Fourteen balls made by Roberts.

CULEBRA.

After an intermission of several weeks, moving picture exhibitions were resumed at Culebra on Saturday evening, September 28, in the enlarged hall in the second story of the Culebra schoolhouse. The room has a seating capacity of about 250, and is cool and centrally located. The next in the series of exhibitions will be held on Friday evening, October 4.

All the newspapers and periodicals formerly on file at the Culebra clubhouse may, for the time being, be consulted in the room adjoining the office of the superintendent of clubhouses, second floor, Administration annex.

The work of rebuilding the bowling alleys and enclosing the space to be used as a pool room is progressing rapidly.

GORGONA.

Special music was provided for the sunset song service on September 29. Those taking part were: Mrs. A. P. Boyd, soprano; Mrs. G. R. D. Kramer, contralto; Mr. G. R. D. Kramer, tenor; Mr. E. P. Case, bass.

The bowling alleys were reopened on Monday evening, September 30. The local tournament temporarily suspended, in order to repair the alleys, will be resumed next week.

Regular and special gymnasium work was started under the direction of Mr. Watson on Monday, September 30. A special afternoon class for night men will be organized soon.

Basketball practice will be held on Mondays and Thursdays.

GATUN.

The commissary mandolin and guitar club gave an informal concert at the clubhouse on Saturday evening, September 28. One of the attractions was the chess match between the local clubhouse and Culebra. The Gatun players were defeated by a score of 14 to 0.

A gymnasium class, to be known as the married men's class, was started on Monday evening, September 30. The object of this class will be to give all those who find it inconvenient to attend the senior gymnasium class an opportunity for physical exercising. The class will be held twice a week from 5.30 to 6.30 p. m.

Mr. Woolworth is conducting an athletic contest among the members of the senior gymnasium class. This contest is held once a week and will continue for a period of about two weeks. A certain number of points are given for each of the several events; the member who receives the largest total number of points will receive a medal. Considerable interest is being shown in the events. The present standing is, as follows: Rogers, 464; Martinoff, 365; Newcombe, 268; Miller, 244;

Staub, 234; J. Loulan, 219; Flynn, 216; Jendros, 195; Jannus, 166; Baeder, 145; Daniels, 121; Ogilvie, 106. All others are below 100.

The Isthmian basketball tournament will be opened at Gatun on Saturday evening, October 5, when Gorgona will visit the local clubhouse. The public is cordially invited to see the game. Mr. Joseph P. Mitchell was elected captain of the Gatun basketball team. Physical Director Woolworth, Captain Mitchell, and Mr. Ourand have been appointed a committee to decide all questions concerning the Gatun team. The following men form a group from which a first team will be selected: Mitchell, Neeley, Judd, Huber, Wright, Whiston, Fitzpatrick, Hess, Conley, Brinkerhoff, Jendros.

The athletic contest being held among the members of the boys' department resulted, as follows: L. Appleton, 809; Meise, 600; Sisson, 518; Quinn, 463; Neville, 439; Cummings, 414. All others are below 400.

The Spanish classes now number 20 students, and there are five enrolled in the shorthand class. The former meet on Wednesday and Friday evenings, and the latter on Tuesday evening. A beginners' class in Spanish for ladies will be started as soon as five names are received.

CRISTOBAL.

There will be a "smoker" at the clubhouse on Thursday night, October 10.

Saturday evening, September 28, the Gorgona bowling team lost three games to the Cristobal team.

An error occurred in the notice last week concerning

the married folks tournament. The night for the next tournament is October 21, instead of October 2.

A volleyball and handball league will be started soon. Players interested are requested to hand their names in at the desk, or to Mr. Schulte.

Part of the porch of the Corozal commissary has been enclosed, and will be used as a boot and shoe department.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending October 9, 1912 (75th meridian time):

DATE.	High	Low	High	Low	High
	A.M.	A.M.	A.M.	P.M.	P.M.
October 3.....	1.42	7.44	2.18	8.20	
October 4.....	2.40	8.42	3.22	9.27	
October 5.....	3.55	9.56	4.35	10.48	
October 6.....	5.16	11.22	5.52		
		P.M.			
October 7.....	12.10	6.32	12.42	7.00	
October 8.....	1.16	7.35	1.46	7.58	
October 9.....	2.12	8.28	2.39	8.48	

Lost—Sapphire and pearl pin in form of a spray of leaves. "1719 N. Ill." is scratched on back. Lost between Colon station, Quartermaster's, and V. M. C. A., Cristobal. Reward. B. H. Mallory, Gatun.

TELEPHONE DIRECTORY CHANGES.

The following additional changes have been made in the list of subscribers published in the Panama Railroad Company's telephone directory as of May 15, 1912. Telephone subscribers are requested to make a note of these changes in their copy of the directory:

*Indicates reduction from last list.

†Indicates 5 cents allowed for return of bottle.

‡Indicates advance on last list.

††Fowls weigh each about, as follows; 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock next lightest weight is supplied and refund note sent for difference.

?Sold only from commissaries; no orders taken for delivery.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending September 28:

Haakon VII, September 22, from Fernandina, with 8,847 pieces yellow pine lumber, for Mechanical Division; and 1,924 pieces piling, for stock.

Trent, September 22, from New York, with 119 packages track material, for superintendent of erection; 8 cases hardware, for stock; 202 bundles steel bars, 250 pieces steel bars, for Pacific Division.

Twines, September 22, from New York, with 24 cases castings, 97 packages machinery, 13 reels cable, for superintendent of erection.

Prinz Sigismund, September 24, from New York, with 4 cases hardware, for stock.

Zacapa, September 25, from New York, with 7 reels cable, 19 cases machinery, for superintendent of erection; 184 bundles steel bars, for Pacific Division; 2,151 bars copper ingot, for Mechanical Division; 50 coils Manila rope, 30 barrels rosin, 12 pigs metal, for stock.

Portland, September 26, from San Francisco, with 3,000 cases Trojan powder, for stock.

Parismina, September 26, from New Orleans, with 10,872 pieces yellow pine lumber, for Mechanical Division; 266 pieces piling, 1,362 pieces yellow pine lumber, 105 pieces white oak lumber, 12 pieces steam-shovel chains, for stock.

Barbadian, September 27, from Liverpool, with 3 reels cable, for Pacific Division.

Allianca, September 26, from New York, with 16 crates marble, 196 packages enamelware sinks, for Panama Railroad Company; 11 cases machinery, for Pacific Division; 18 cases signal material, for Panama Railroad Company; 9 cases rubber boots, for fortifications; 27 rolls wire fencing, 18 cases paper, 35 cases napkins, 10 cases muriatic acid, 10 cases varnish, 31 reels wire rope, 600 kegs bolts, 20 bales rubber hose, 186 pigs lead, 43 packages plumbing supplies, for stock; 26 packages castings, for superintendent of erection; and a miscellaneous cargo, the whole consisting of 2,300 packages, weighing 250 tons.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's line:

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston, at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending September 28: Arrivals—September 23, *Barracouta*, from San Francisco; September 24, *Urubamba*, from Callao; September 25, *Chile*, from Guayaquil; September 25, *Limari*, from Valparaiso; September 26, *Portland*, from San Francisco; September 26, *San Juan*, from San Francisco.

Departures—September 23, *Peru*, to Guayaquil; September 25, *Quito*, to Guayaquil; September 25, *Guatemala*, to Callao; September 26, *Lewis Luckenbach*, to San Francisco; September 28, *Pennsylvania*, to San Francisco; September 28, *Manari*, to Buenaventura.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, OCTOBER 9, 1912.

No. 7.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

THE CANAL RECORD.

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Gates to Full Height at Pedro Miguel Lock.

All of the gates at Pedro Miguel Lock have been brought to their full height, and the sheathing is in place on all of them, with the exception of the lower guard gates. The last of the two gate erection bridges has been dismantled and transferred to Miraflores. The west flare and cut-off walls at the upper end of the lock have been brought to a height of 40 feet. The east flare wall foundations have been laid, and the site of the cut-off wall is being excavated to rock at elevation about plus 35 feet. The water from the drainage channel in Culebra Cut passes through the center wall culvert, and out the south end. The heavy rain of Thursday, September 26, raised the water in the drainage channel to such an extent that the lower chambers of the lock became flooded. To prevent a repetition of the occurrence a small dike is being built on the west side of the lower chamber.

Canal Work in September.

The grand total of Canal excavation to October 1 was 180,423,874, leaving to be excavated 31,803,126 cubic yards, or a little more than one-sixth of the entire amount necessary for the completed Canal. The total excavation for the month of September was 2,124,440, as compared with 2,538,764 cubic yards in September, 1911, and 2,687,088 cubic yards in September, 1910.

The dry excavation amounted to 1,137,380 cubic yards, and was entirely by steamshovels. The dredges removed 955,181 cubic yards from the Canal prism, in addition to the amount pumped into Gatun Dam by suction dredge. The progress in the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division the total excavation was 498,147 cubic yards. Of this total, 1,025 cubic yards consisted of dry excavation near Gatun Locks, and the remainder was wet excavation—372,302 cubic yards from

the Atlantic entrance, and 124,820 cubic yards dredged between the Locks and the open water channel to the sea.

The total excavation in the Central Division was 935,056 cubic yards, including 909,856 yards from the Culebra Cut section, and 12,856 cubic yards from the Obispo Diversion. This is the lowest record of excavation in the Culebra Cut section since November, 1907.

In the Pacific Division, the total excavation was 691,237 cubic yards, 201,299 cubic yards of which consisted of dry excavation, 143,008 cubic yards from the Canal prism, 50,738 cubic yards from the terminal site, and the remainder near the locks. Of the 458,059 cubic yards of wet excavation, 455,059 cubic yards were from the channel, 31,879 cubic yards from the site of the new inner harbor, and the remainder at Miraflores Locks.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work"	"Plant"	Total

Wet excavation	955,181	31,879	987,060
Total	2,079,469	44,971	2,124,440

Mean rainfall along Canal (ten stations) 12.13 inches. By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal such as a prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as

prism, diversions, or locks, etc., It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

DAM AND LOCK CONSTRUCTION.

MATERIAL.	Atlantic.	Pacific.	Total.
	Cu. Yds.	Cu. Yds.	Cu. Yds.
Concrete laid in locks.	3,162	49,161	52,323
Concrete laid in dams and spillways	1,088		1,088
Fill placed in dams	246,956	31,585	278,551

Spillway Gates Opened.

Two of the gates at Gatun Spillway were opened on October 2, when the surface of the lake was at elevation plus 48. It is proposed to hold the lake approximately at this level for about a week and then allow it to rise and flow over the low part of the Spillway dam, which is at elevation plus 50.

Work of the Dredge "Corozal."

During the week ending 6 a. m., October 6, the ladder dredge *Corozal* excavated 43,000 cubic yards of material, 36,100 cubic yards of which consisted of hard clay and soft rock in equal proportion. The dredge is engaged in cleaning up the west half of the dredged channel, 250 feet wide, to grade, namely, minus 43 feet, and the progress made was 200 lineal feet. The material handled had not been blasted, and the dredge was able to cut one foot deep into this soft rock with ease. The entire output was handled by the tug *Reliance*, with four barges, with an average length of tow of about five miles.

The ability of the *Corozal* to handle this soft rock economically will, it is expected, effect a considerable saving to the Canal Commission, as the bottom 10 feet of the Canal, between Stations 2120 and 2240, 12,000 feet in all, or two and one-fourth miles, is chiefly composed of this material.

Tanks for Storage of Fuel Oil.

Four steel tanks, to be erected on the Isthmus for the storage and distribution of fuel oil, have been contracted for by the Canal Commission. Each will have a capacity of 42,000 barrels of oil, or a combined capacity of 168,000 barrels, and will be 93 feet in diameter by 35 feet high, built of steel plates, in accordance with I. C. C. standard specifications. The tanks are to be provided with steel stairways leading to the manways on the roof, and steel ladders down the inside. Two 6-inch ventilators will be installed in each tank near the center of the roof. Two of the tanks will be erected at Balboa, and two at Cristobal.

Bids for these tanks were opened at Washington on August 27, and were in two classes, one class providing for the manufacture, and, including cost of freight, delivery only, at the ports of Colon, Cristobal, or Ancon; and the other, for the manufacture, delivery, and

CANAL ZONE REVENUES.

Operations of the Division of Posts, Customs, and Revenues for Fiscal Year 1911-12.

The revenue derived from the sale of postage stamps and postal cards at the Canal Zone post-offices during the fiscal year ending June 30, 1912, amounted to \$87,550.21. In addition, the sum of \$144.20 was collected for second-class mail matter, making the total income from postal sales \$87,694.41, as compared with \$82,893.72 for the preceding fiscal year, an increase of \$4,800.69.

In November, 1911, there were placed on sale stamp books, containing 12 or 24 two-cent stamps, or 24 one-cent stamps, which are sold at one cent more than the face value of the stamps in the book. The printing and binding is done in the office of the director of posts, and costs about one-third of a cent a book. A total of 29,979 books had been manufactured up to June 30, of which 19,763 were sold, producing a net revenue of \$131.76.

Registered letters and parcels to the number of 145,633 were handled, consisting of 22,477 domestic letters, 6,549 domestic parcels, 43,823 foreign letters, 1,703 foreign parcels 69,144 official letters and parcels registered free, and 1,937 letters and parcels reregistered free. Forty-seven per cent of the registered matter went under the official frank. The total number of registered letters and parcels handled represents an increase of 4,408 over the previous fiscal year. The exchange offices at Cristobal and Ancon handled a total of 89,894 pieces of registered mail. Of these, 5,491 passed through the Ancon office to and from Panama and Central American points, and 84,403 through the Cristobal office to and from points in the United States, Europe, and the West Indies. The railway mail messengers handled 64,099 pouches, sacks, and registered sacks during the year, and at Cristobal, there were 1,235 dispatches of mail.

There were 227,680 money orders issued during the year, representing a value of \$4,915,077.29, and the fees aggregated \$22,889.90. This shows an increase of 12,900 in the number of orders issued, but a decrease of \$389,829.31 in the amount of money involved, while the total of fees collected was \$565.19 less than last year. The average amount of each order issued was \$21.15, as compared with \$24.69 for the previous fiscal year. Orders drawn payable in the United States and foreign countries, except Martinique and Costa Rica, amounted to \$3,823,517.55. Orders drawn payable in the Canal Zone aggregated \$1,080,825.74 in value; in Martinique \$8,604.95, and in Costa Rica \$2,129.05.

There were handled during the year 39,041 pieces of ordinary unclaimed mail matter, of which 10,487 were domestic letters and parcels, and 28,554 foreign letters and parcels. A total of 1,999 misdirected letters were advertised in THE CANAL RECORD, of which about 60 per cent were delivered or forwarded to the addressees.

On June 30, 1912, there were 17 post-offices in the Canal Zone, two less than at the close of the previous fiscal year. The post-offices at Tabernilla, San Pablo, and Bohio were abandoned on account of the rise of Gatun Lake, and a new office was established at Monte Lirio.

POSTAL SAVINGS BANK.

On February 1, 1912, a postal savings system was established at 16 of the Canal Zone post-offices, and up to June 30, accounts

to the number of 3,518 had been opened, 2,402 of which remained opened at the close of the year, with total deposits aggregating \$356,947. The total amount deposited in postal savings accounts during this period was \$600,898, while the withdrawals amounted to \$243,951. On June 30, 1911, the Canal Zone post-offices held unpaid money orders aggregating \$332,141.60 in value, drawn to the order of the remitter, and payable at the office of issue. This sum represented the extent to which the Zone post-offices were used as depositories at the close of the fiscal year 1911. In like manner, the net totals of postal savings deposits—\$356,947, and of unpaid money orders payable in offices of issue—\$193,817.40, in the Zone post-offices on June 30, 1912, aggregating a sum of \$550,764.40, represent the extent to which the post-offices were used as depositories on June 30, 1912, a net increase of \$218,622.80 over the total of the previous fiscal year. This total of over half a million dollars represents the savings of Canal Commission and Panama railroad employees. The 2,402 postal savings depositors having open accounts on June 30, 1912 represented 30 different nations and dependencies.

CUSTOMS SERVICE.

During the year, 327 vessels, with a total tonnage of 619,422, entered the port of Ancon, and the same number, with a total tonnage of 622,023, cleared. At Cristobal, 284 vessels, with a total tonnage of 784,156, entered, and 282 vessels, with a total tonnage of 775,445 cleared. The above figures show the number of entries and clearances to have been 139 greater in the fiscal year 1912, than for the fiscal year 1910.

REVENUES FROM ZONE LANDS.

On June 30, 1912, there were in force 858 leases and revocable licenses, of which 575 were for building lots, 258 for agricultural lands, and 25 for buildings or rooms in buildings, a decrease of 1,383, as compared with June 30, 1911. There has been a decrease in the area of land leased for agricultural purposes by reason of the removal of all habitations from the Gatun Lake region, as well as the withdrawal of lands in other parts of the Zone required for Canal purposes. The area for agricultural land under lease at the close of the year was 352 hectares, approximately 870 acres, as compared with 1,430 hectares, or approximately 3,534 acres, at the close of the preceding fiscal year. Rents collected during the year amounted to \$16,033.54, as compared with \$23,469.22 for

the year ending June 30, 1911, and \$27,282.29 for 1910. The land rentals show a decrease of \$10,550.44, while building rentals increased \$3,114.76.

TAXES AND LICENSE FEES.

The total collections on account of general taxes and licenses aggregated \$122,674.64, as compared with \$123,876 during the previous year. The distillation tax produced a revenue of \$5,083.71, as compared with \$2,353.88 during 1910-11. The liquor license collections amounted to \$55,200, as compared with \$68,400 the previous fiscal year. The sum of \$1,137.83 was collected from insurance companies doing business in the Canal Zone, an increase of \$625.24 over 1910-11. A total of 72 motor vehicle licenses were issued, and \$2,059 were collected in fees, including a fee of \$1 paid by each licensee for a metal tag bearing the license number. Bicycle licenses to the number of 645, and chauffeur licenses to the number of 97, were issued, producing a revenue of \$645, and \$97, respectively. There were collected under the law providing for the inspection of steam vessels fees aggregating \$2,837.15.

ADMINISTRATION OF ESTATES.

The estates of 60 employes of the Canal Commission and the Panama railroad were settled during the year, and 98 were in process of adjustment on June 30, 1912. The money handled amounted to \$7,306.31.

RECAPITULATION.

The total revenues collected by the division during the fiscal year amounted to \$311,994.81, and the total of all moneys handled was \$5,827,970.10, an increase in the amount of moneys handled of \$175,242.82.

Obituary.

William H. Hanley, an employe of the Pacific Division at Corozal, was killed on the sand track, north of Corozal, on September 30. He was married and had been on the Isthmus about five days, coming here from Rochester, New York. He is survived by his wife, living in Rochester.

W. F. Reed, an employe of the Pacific Division at Corozal, died in Ancon Hospital on October 6. He was 29 years of age, single, and had been on the Isthmus nearly two years. He is survived by his brother, Harris Reed, living at Corozal.

Sailing of the "Cristobal"

The sailing of the steamship *Cristobal* has been set for Monday, October 14, at 3 p. m., from dock No. 11, Cristobal.

FINANCES OF FOURTH OF JULY CELEBRATION.

A statement of the amounts contributed to the Fourth of July celebration fund for 1912, follows:

BALBOA SHOPS PLANT.

Preliminaries of Permanent Works at Pacific Entrance Outlined.

The committee, consisting of Lieut.-Col. T. C. Dickson, Capt. R. E. Wood, Lieut. Frederick Mears, Mr. W. G. Comber, and Mr. H. D. Hinman, appointed to prepare a general scheme showing the relative order in which work on shops, and other buildings; drydock, wharves and piers of the permanent facilities at Balboa, should be prosecuted, to reduce to a minimum interference of this work with the maintenance of the dredging and towing fleets of the Pacific Division, and, in addition, to make recommendations concerning the track layout, and for the removal of certain buildings from the terminal area, has made its report, which has been approved by the Chairman and Chief Engineer. The committee recommends:

1. That double tracks should be laid from the southwest end of the new railroad yard to the Panama railroad steel pier, and as much of these two tracks as will enable them to be completed by December 1, 1912, or as soon thereafter as practicable, should be laid on the permanent location. These tracks should be well ballasted, as they will be used for passenger and labor trains, as well as for freight service. The Panama railroad should abandon the use of the two old freight yards as soon as these double tracks are completed.

2. That a temporary track should be laid to connect the double tracks with the present coal pockets, which should be used as long as possible. When necessary to abandon the coal pockets, arrangements should be made, either to use the coal and rock aprons of the fortification work at Dike Siding, near Station 2145, or temporary pockets should be provided on the old lumber dock.

3. That a single track should be laid from the northeast end of the new lumber dock to the new railroad yards. This track should be laid north of the shop buildings and roundhouse, so it will not interfere with the construction of the new wharf and shop buildings. This track should be laid before January 1, 1913. If the sand dock is to be operated after this track is completed, the spur from near the office of the resident engineer to the new lumber dock should be connected to the above track. This spur should be built, so as not to interfere with the erection of the crane runway extensions and shop buildings.

4. That all large spare parts for dredges, etc., belonging to the Quartermaster's Department should be moved to dump No. 1 before January 1, 1913. The necessary temporary tracks should be provided, so that these parts can be reached with a locomotive crane.

5. That all unserviceable parts, and all other equipment within the terminal area should be moved at once.

6. That the post-office, Panama railroad storehouse, sanitary inspector's office, police station, Quartermaster Department's lumber office, and all other buildings within the area of the terminal facilities, except the office of the resident engineer, the quartermaster's storehouse, shipways, machine shop and blacksmith shop, transformer house, and new terminal office, and the temporary terminal supply house, should be removed by November 1, 1912.

7. All of the machine and erecting shops, and the forge shop, cannot be erected until the sand wharf is removed. The committee

recommends that as soon as the award for structural steel is made, that definite plans be prepared, including the establishment of one or more sand storage piles for the future operation of the Balboa sand plant, in such manner as will enable it to be abandoned early enough to prevent delaying the contractor in completing these buildings.

8. That the present repair wharf should be left intact until sufficient space is available at the new lumber wharf, and the extension thereof to the northeast for making repairs to the floating equipment of the Pacific Division.

9. That it appears that the shipway shops will not have to be abandoned before June, or July, 1913, and that the extension of the coffer dam will not interfere with the use of the shipways before July, or August, 1913, since a considerable portion of the excavation for the large drydock, can be completed before the coffer dam will be required. No means for repairing bottoms of the floating equipment will exist at the Pacific end, when the gridiron and shipways are abandoned, until one of the drydocks shall have been completed. During this interval, equipment requiring repairs to bottom of same can be sent through the Canal to the drydock shops at Cristobal, if the Canal is available, or other arrangements can be made.

10. That the permanent planing mill building should be erected and completed as soon as practicable, and there should be temporarily installed in it the resident engineer's office, the quartermaster's storehouse, and such shop equipment as is necessary for repairs to the floating equipment of the Pacific Division, until the permanent shops are available for that purpose. After this transfer, the office of the resident engineer, the quartermaster's storehouse, and the machine and blacksmith shops and the shipways can be demolished.

11. That the permanent shop buildings be erected in the following order:

1. Planing mill.

2. Foundry, and pattern storage building.

3. Machine and erecting shop, forge shop, boiler shop, gas house, storehouse, and office.

4. Paint shop, and steel storage shed.

5. Boiler house, car repair shop, and galvanizing plant.

6. Roundhouse, and lumber shed.

12. That the section of the repair wharf, northeast of the new lumber dock, and the commercial pier should be completed as promptly as practicable to provide a repair wharf for the floating equipment of the Pacific Division, and increase the dockage facilities for commercial vessels.

13. That, little, if any, work can be done on the section of the repair wharf, southwest of the new lumber dock, until the sand wharf is abandoned.

Administrative District Changes.

The Executive Order abolishing the administrative district of Gorgona went into effect on September 23, and the records of the District Court at that point, as well as the records of the deputy revenue collector, have been transferred to Empire, with which district Gorgona has been consolidated. Act No. 7 of September 1, 1904 established in the Canal Zone the municipal districts of Cristobal, Buenavista, Gorgona, Emperador, and

Ancon, each governed by a mayor and a board of aldermen, who regulated licenses, and administered the affairs of each district through municipal ordinances. The President's Order of March 13, 1907, made effective April 15 of the same year, abolished the district of Buenavista, and the title of "Municipal," as applied to all the districts; and established the administrative districts, as they have existed until recently, part of the Buenavista district having been transferred to Cristobal, and part to Gorgona. District judges were appointed to preside over each district, together with a senior district judge, whose duties, among others, was to preside during the temporary absence of a district judge. This position has been vacant since September, 1911, and was abolished, effective January 1, 1913, by the President's Order of September 12, 1912.

Sale of Scrap Copper Screening, Rope, Rubber, and Hose.

Awards have been made for the sale of all scrap copper screening, manila rope, rubber, and hose, for the period beginning September 5, 1912, and terminating June 30, 1913. Eight bids were received in response to advertisement, which were opened in Washington on August 5. The Nassau Smelting and Refining Works of New York City bid \$12.15 per hundredweight for the scrap copper screening, and received the contract. The Chicago House Wrecking Company, who have the contract for all the old French and American iron scrap remaining on the Isthmus, made the highest bid on the other articles, and procured the privilege. This company's bid for manila rope was \$1.65 per hundredweight; scrap rubber, and hose, \$2.65 each, per hundredweight. The contract for all four classes of material was formerly held by R. Rosenberg and Sons' Company of New York City, and was in force from September 1, 1911, to June 30, 1912. The prices under the old contract were lower on screening, hose, and rubber, but higher on rope, as follows: Copper screening, \$8.25; rubber, \$2.18; rope, \$2.18; rubber hose, \$2.50 per hundredweight. The combined hundredweight price on all four articles is \$3.99 higher, under the new contract, than under the old. Five shipments were made under the Rosenberg contract, consisting of 40,128 pounds of scrap copper screening, 70,869 pounds of old rope, 30,651 pounds of scrap rubber, and 164,989 pounds of old rubber hose, principally air brake hose. The net proceeds from these five sales amounted to \$9,538.40. The material is collected by the various district quartermasters and by them forwarded to Mount Hope storehouse, where it is held until there is enough for a shipment. The last shipment of copper screening was made on May 3 of this year, and, in consequence, there is now on hand 11,924 pounds valued at \$1,448.77.

New Parsonage at Culebra.

A new Baptist parsonage will be built at Culebra for the use of the Rev. S. Moss Lovelidge. It will be a two-story frame building, 23 feet by 39 feet six inches in size, with a veranda in front, of vertical balusters, above and below. On the lower floor, there will be a living room, study, reception room for parishioners, with entrance from the outside, dining room, kitchen, and servant's quarters. Upstairs, there will be four bedrooms, bathroom, dry closet, etc. The parsonage will be situated on the south slope of the hill.

STEAMSHOVEL RECORDS.

Work of Central Division Machines During the Month of September.

During the month of September, the total amount of material excavated in the Central Division was 935,056 cubic yards, of which 164,742 cubic yards were classified as earth, and 770,314 cubic yards as rock. The entire total of 935,056 cubic yards was removed by steamshovels.

The high record for the month was made by shovel No. 217, working 23 days in the Culebra district, which excavated 38,851 cubic yards of rock, and 9,713 cubic yards of earth, a total of 48,564 cubic yards.

The second best record for the month was made by shovel No. 109, working 22 days in the Culebra district, which excavated 37,985 cubic yards of earth.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 22 days in the Culebra district, which excavated 37,985 cubic yards of earth.

Shovel No. 217, working in the Culebra district, made a high record for one day by excavating 3,040 cubic yards of rock on September 13.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month, and for one day, are shown in the following table:

Wanton Destruction of Birds.

Complaint has been made that boys have been stoning and killing birds in the vicinity of settlements in the Canal Zone. The police have been instructed to apprehend all such offenders and to take them home to their parents for discipline, in order that the practice may be stopped.

United Spanish War Veterans.

On Sunday, October 13, Chagres Camp, No. 1, will hold its regular monthly meeting at Gatun lodge hall, at 1 p. m. A report of the ninth annual convention will be made by Past Commander and Delegate W. D. Rogers, and other business will be taken up.

At 9 a. m., on the same date, the camp will join hands with the ladies' auxiliary in a

sightseeing tour of the Gatun Locks on a special train starting from Gatun station.

All members, eligibles for membership, and ladies are invited to attend. Members living at Cristobal must leave on the 6.50 a. m. train from Colon, and those residing at towns toward Panama must leave on the first train.

PERSONAL.

Mr. S. B. Williamson returned from leave of absence on the *Colon*, which arrived at Cristobal on Thursday, October 3.

Among the passengers arriving on the *Cristobal* on Saturday, October 5, were Mrs. George W. Goethals, Major Chester Harding, Mrs. Harding, and Miss Katherine Harding.

Mr. W. G. Comber sailed on the *Colon*, on Wednesday, October 9, for New York, and from there will sail for Europe, on his annual leave of absence.

Mr. A. S. Zinn sailed on the United Fruit Company's steamer *Parismina* on Thursday, October 3, on annual leave.

Assignment of Canal Zone Teachers.

The following assignment of teachers of the white schools in the Canal Zone have been made:

Ancon—Empire high schools—Charles C. Carr, principal; Frederika Hine, Mabel M. Reid, Amelia C. de Lassus.

Ancon—Mildred O. Bates, principal; Mall-ye A. DeCamp, Virginia Best, Jessie Wilson Clark, Annie E. Stone, Etta Reed.

Corozal—Anna Mosteller.

Pedro Miguel—Ida O. Erickson, principal; Grace D. Snediker, Shirley C. Dorsey.

Paraiso—Marie Birmingham.

Culebra—Jennie M. Dunlap, principal; Helen C. Nason.

Empire—Elise Cage, principal; Ida B. Potts, Mary M. Shea, Dove L. Prather, Mary Edmonds, Shellie M. Dunn.

Las Cascadas—Sara D. Elwell.

Bas Obispo—Curraleen C. Smith.

Gorgona—Grace E. McCray, principal; Lydia A. Beeler, Clara L. Voyles, Edna M. Spicer, Florence M. Dildine.

Gatun—Jessie E. Daniels, principal; Archie Pratt, Cora E. Sessions, Bertha H. Mallory, Virginia Paul, Wenonah A. Whiting.

Cristobal—Helen L. Daniels, principal; Emma M. Cobban, Odina J. L. Frost, Charlotte Carter, Edith MacI. McCarthy, Clelia D. Crespi.

Toro Point—Bertha Hale.

Porto Bello—Mary C. Stanners.

Substitute teachers—Georgia T. Munroe, Dora Nielsen.

Road Improvements.

It has been decided to use the samples of road oil, purchased for trial on the Sabanas road, on the Zone boundary road, beginning at Ancon post-office, and running to Balboa, continuing until the supply is exhausted. The sum of \$1,500 was set aside for the road oil experiment, and about half of the amount was expended in the purchase of 120 barrels of oil, representing three different makes. Before the oil is applied, however, the boundary road will be resurfaced and rolled, and this work will probably be done early in the dry season. The municipal engineering force of the Pacific Division is now at work improving the Tumba Muerta road, which branches off from the Sabanas highway, and it is expected that work on both of these roads

will be completed about January 1. A section of the Balboa road, from a point west of the commissary to the bridge over the tidal inlet, has recently been resurfaced and rolled.

Boxer Under Arrest.

A cablegram received on Monday, October 7, advises that Charles W. Boxer, who is wanted here for the embezzlement of the funds of a secret society, entrusted in his keeping, has been arrested at San Francisco, and will be returned to the Canal Zone for trial.

Missionary Convention.

The preparations for the missionary convention to be held at Empire on Friday, October 25, are about completed. The Ladies' Aid Society of the Empire Christian League has arranged an interesting program and several speakers have promised their services. Invitations have been issued to all the organizations of women engaged in Christian work, and transportation has been granted to a limited number of members of each society. The program will include outlines of missionary work of the different churches and denominations; their methods, systems, and results. The convention is in entire accord with the world movement toward Christianity and church unity, and it is expected that this, the first religious convention of women to be held in the Canal Zone, will be met with the hearty response and cooperation of all members of such societies.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Bas Obispo, C. Z., Sunday, October 13, at 6 p. m. The program follows:

1. March—*Cavalier*.....Harris
2. Selection—*The Red Widow*.....Gebest
3. Intermezzo—*Indian Summer*.....Moret
4. Overture—*If I Were King*.....Adam
5. Popular song—*There's A Girl In Havana*.....Goetz
6. Grand fantasia—*Home, Sweet Home, the World Over*.....Lampe
7. Waltz—*Impassioned Dream*.....Rosas
8. Popular selection—*The Broadway Review*.....Lampe
9. March—*Spirit of Independence*.....Holzman

CHARLES E. JENNINGS, Musical Director.

The next concert will be given at Culebra, October 20, at 5 p. m.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending October 16, 1912 (75th meridian time):

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Arrangements have been made for one month's trial service of the "Current event" slides for the division of clubhouses. Four slides, depicting important events of the day, will be mailed daily from New York.

The standing of the Isthmian bowling league on Monday, October 7 was, as follows:

	Won.	Lost.	P. C.
Empire.....	3	0	1.000
Gorgona.....	2	1	.666
Gatun.....	2	1	.666
Cristobal.....	1	2	.333
Corozal.....	1	2	.333
Culebra.....	0	3	.000

The standing of the Isthmian basketball league on Monday, October 7 was, as follows:

	Won.	Lost.	P. C.
Gorgona.....	1	0	1.000
Empire.....	1	0	1.000
Gatun.....	0	1	.000
Cristobal.....	0	1	.000
Corozal.....	0	0	.000

The moving picture schedule for the week beginning October 14 is, as follows: Monday, Culebra; Tuesday, Corozal; Wednesday, Empire; Thursday, Gorgona; Friday, Cristobal; Saturday, Gatun.

COROZAL.

Corozal's first game of the Isthmian tenpin league was rolled on the local alleys against Gorgona last Saturday night, October 5, with the following results:

	1	2	3	Corozal	1	2	3
Sims.....	161	165	174	Dalton.....	143	123	114
King.....	137	177	139	Bordt.....	129	143	157

McCona'h'y	111	149	136	Souder.....	159	163	150
Roper.....	157	165	174	Coonly.....	134	192	224

Total.... 723 803 759 710 786 787
Team average, 762. Team average, 761.

Corozal will bowl Cristobal on the Cristobal alleys on Saturday, October 12.

Mr. Reed Morris has been elected captain of the Corozal basketball team and much interest was shown in the practice game on Thursday night.

The Corozal team plays the Gorgona basketball team on Saturday, October 12, at Gorgona.

The following is the standing of those participating in the local handicap pool tournament:

Handicap.	Name.	Games played.	Won.	Lost.	P. C.
60	Patrick.....	6	5	1	.832
60	Souder.....	5	4	1	.800
60	Stagg.....	8	6	2	.750
80	Tougher.....	4	3	1	.750
70	Stapler.....	8	4	4	.500
60	White.....	11	7	4	.638
60	Kent.....	8	4	4	.500
80	Besile.....	9	4	5	.444
50	Underwood.....	8	3	5	.375
60	Shaffer.....	6	2	4	.333
80	Roberts.....	6	1	5	.167
80	Hostetter.....	9	1	8	.111

High runs, Roberts and White 14 each.

EMPIRE.

The Culebra bowling team was defeated by the Empire team on October 5, by the following scores:

	Empire.	Culebra.
Gustavson.....	168 217 181	Case..... 176 183 180
Potter.....	200 154 145	Mengel..... 141 153 173
Edwards.....	166 174 179	Cushinger..... 162 192 148
Pinney.....	125 193 155	Anderson..... 151 172 145
Huson.....	167 155 174	Dougherty..... 179 189 118

Totals.... 826 893 834 809 889 764

The boys' bowling team of Corozal played a double match game with the Empire boys on Saturday afternoon. The Empire team won the duckpin match, but lost the tenpin game.

The boys' regular hours from now on will be Mondays, Wednesdays and Saturdays from 3.30 to 5 p. m. Mondays will be open for indoor baseball, basketball practice and gymnasium exercises; Wednesdays for bowling. There will be reading room privileges during the same hours on Fridays, and Saturdays will be reserved for contests with other teams, hikes into the country, etc.

The high school girls are showing the benefit of practice at the game of basketball.

An advanced Spanish class will start this week.

The chess match between the Culebra and Empire clubs at Empire, on October 5 resulted, as follows:

Culebra.	Won.	Lost.	Empire.	Won.	Lost.
Shutes.....	1	1	Smith.....	1	1
Vogel.....	2	0	Compton.....	2	0
Minner.....	1 1/2	1/2	Pulsifer.....	1 1/2	1/2
Dubois.....	2	0	Verner.....	2	0
Beaman.....	2	0	Coolsby.....	0	2
McClure.....	1	1	Capt. Knight.....	1	1
Rose.....	0	2	Dr. Sherrard.....	2	0

Totals..... 9 1/2 4 1/2 4 1/2 9 1/2

Mr. Russell is back from Porto Bello and will re-open all gymnasium classes at once. The punching

bag is now ready for use. Fencing classes will start next week. Those who were in the classes formerly may continue. New men who wish to enter, kindly watch for notice. If any night men would like to have a class in the late afternoon, they are requested to hand their names to the secretary.

Basketball practice will occur twice a week.

All men are invited to enter the October handicap pool tournament.

The high scores in tenpins the past week were; Edwards, 223; Gustavson, 220; Pearson, 206; Huson, 202 and 200. Duckpins—Steele, 117 and 101.

GORGONA.

Gymnasium classes are organized, and if any men in Gorgona wish to join they should see Mr. Watson, the physical director. A married men's class will be organized to be held between the hours of 5.15 to 6 p. m.

The bowling alleys were reopened on Monday, September 30, and a prize was given for the high score, which was made by Mr. Roper.

The local league will continue the unrolled games due to the closing of the alleys.

The chorus began rehearsals on Wednesday night, October 9.

An informal social will be given on Friday night, October 11. A program has been arranged, and home made cake and other refreshments will be served. This social is open to everybody in Gorgona, free of charge.

The Corozal basketball team will play at Gorgona on Saturday evening, October 12.

Culebra will bowl at Gorgona on Saturday evening, October 12. Every member at Gorgona should plan to be in town and help Gorgona win.

GATUN.

About 200 people were present at the opening basketball game on Saturday evening, October 5. The score resulted: Gorgona 22, Gatun 17. The lineups were: Gorgona,—Forwards, Ridge and Loudon; center, Christiansen; guards, Stevens and Simka. Gatun,—Forwards, Fitzpatrick, Wright and Whiston; center, Neeley; guards, Mitchell and Huber. Umpire, Rice of Cristobal. Scorers, Webb and Kuntz. Timer, Fomon.

H. H. Hodges won the umbrella given as a prize for the high single game at the reopening of the bowling alleys on Monday evening, September 30. Score, 204. O'Meara's score was 203, and Swallow had two 200 games.

The three-cushion billiard tournament, which has been the means of making the game popular at Gatun for the past few weeks, is being brought to a close. The present standing is, as follows:

	Won.	Lost.		Won.	Lost.
Wurster.....	9	0	Gamble.....	7	6
DePoorter.....	9	1	Bellinger.....	6	6
Townley.....	8	2	Long.....	5	8
Neeley.....	8	3	Meise.....	5	8
Dewey.....	6	3	Eggleston.....	3	10
Cheeks.....	7	4	Myers.....	2	11
Jackson.....	6	6	Heine.....	0	12

Gatun took two out of three games of bowling at Cristobal on Saturday night, October 5.

The following have signed up for the married men's gymnasium class, which meets at 5.30 p. m., twice a week; Windes, Lydecker, Luckey, Purdy, Smith, F. Carter, Bailey, Gerchow, Grier, Fomon, and Ourand.

A root beer fountain has been installed at the refreshment counter. Ice cream sodas are also sold.

An order for new books will be sent to the United States this week. Suggestions are invited.

The following are members of the advanced classes in Spanish and shorthand:

Advanced Spanish—E. S. Waid, G. E. Duckworth, Dr. Farmer, Mr. Hanson, Dr. Burdett, G. E. Conley and S. Dennis.

Elementary Spanish—K. M. Ashley, R. Burns, T. W. Sherrard, J. A. Muller, C. Cornwell, M. J. Dunn, C. E. Mead, C. W. Roberts, A. C. Miller, H. J. Zamp, H. Golden, Dr. Crandall.

Shorthand—Ashley, Burns, Miller, and Swanson.

CRISTOBAL.

The lineup of the basketball game on Saturday night, October 5, between Empire and Cristobal was, as follows:

Empire.	Cristobal.
Rowan.....	left forward..... Mathues
King.....	right forward..... Morton
Hepler.....	center..... Capt. Howe
Adams.....	right guard..... H. Schwallenberg
Capt. Greening.....	left guard..... Hughes
Cousineau.....	relieved Hughes, and Weiss relieved Schwallenberg in the second half.

Score: Empire, 34; Cristobal, 18.

Field goals—Rowan, 7; Kind, 3; Helper, 1; Greening, 4; Morton 2; Mathues, 3; Howe, 2.

Free throws—King, 4; Howe, 4.

The next practice nights for basketball will be October 15 and 17.

In the local ragtime tournament, the following teams are leading: Tenpins—Bullard and Collins, 1181;

duckpins—Bullard and Herrington, 605; candlepins—Barrett and Herrington, 658.

Gatun defeated the local bowling team in two games out of three on Saturday night. The scores follow:

Gatun.	Cristobal
Swallow.....	160 158 188
Morrissey.....	147 112....
Rabbitt.....	211 145 184
Hodges.....	195 205 221
Oettli.....	146 155 163
O'Meara.....	163
Barrett.....	178 183 169
Burns, T.....	177 155 134
Collins.....	131....
Bullard.....	169 158 187
Louch.....	181 141....
Gibson.....	165 161

Totals.... 859 775 919 836 802 794

Hodges rolled in good form and made a total of 621 for his three games.

PORTO BELLO.

Fifteen men enrolled as members in a class in "First aid to the injured" on Friday night, October 4. Arthur W. Wright was elected president of the class, Vernon E. Sauvan, secretary, and James L. Tolar, instructor. The class will meet Tuesday evenings. A mixed class among the children was also organized on the same subject. The children's class meets on Wednesday evenings.

Moving picture entertainments were resumed this week after an interval of about three months' waiting on the arrival of the new picture machine.

A handicap pool tournament started on Monday night, October 7, with 14 entries. The tournament will close with a "smoker" on Saturday night, November 16, at which time prizes will be awarded.

Work is going forward on the rifle range for the Porto Bello gun club. The range will be ready for use early in October.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, and Colon, during the week ending October 5:

Sixaola, September 29, from New York, with 453 cases electrical material, 171 packages track material, for superintendent of erection; 1,451 bags oats, 12 bales hose, for stock.

Navigator, September 29, from Baltimore, with 15,000 cases dynamite, for stock.

Prinz Joachim, September 30, from New York, with 16 drums lime, 12 cases hardware, for stock; 548 barrels sand, for Mechanical Division; 170 packages anchor bolts, for fortifications.

Almirante, October 2, from New York, with 14 cases copper rods, seven kegs bolts and nuts, for superintendent of erection; 31 cases tape fuse, 27 cases wire cloth, 24 cases deck brushes, for stock.

Cartago, October 3, from New Orleans, with 51 barrels brake shoes, 2,068 pieces lumber, for Mechanical Division; 400 cases kerosene, 160 drums kerosene, 725 pieces cast iron pipe, 413 bags feed, 441 pieces piling, 1,112 pieces lumber, 67 boxes library paste, 17 coils rope, 19 rolls cotton duck, for stock.

Colon, October 3, from New York, with 51 bundles castings, five cases testing machine, for Mechanical Division; 11 cases oil, 20 cases electrical material, for superintendent of erection; 77 cases signal material, for Panama Railroad Company; 250 bundles brooms, 68 cases caustic soda, 36 crates fire brick, 198 kegs bolts and rivets, 30 cases metal polish, 380 pieces oak lumber, 500 rolls roofing paper, 21 cases tools, 11 bales life preservers, 30 cases varnish, 10 barrels chipped soap, 10 cases paint, 52 cases paper, 20 cases lubricating oil, 12 cases rubber hose, 16 cases toe calks, for stock; and a miscellaneous cargo, the whole consisting of 2,370 packages, weighing 320 tons.

Misdirected Letters.

ANCON, C. Z., October 9, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the director of posts, and may be secured upon request of the addressee:

Hernandez, Marcelino (pkg.)	

OFFICIAL CIRCULARS.

Transfer of Equipment.

CULEBRA, C. Z., September 27, 1912.

CIRCULAR No. 370 D:

1. Circulars Nos. 356, 370, 370-A, 370-B, and 370-C, and Examiner of Accounts Circular No. 21, are hereby revoked and the following rules will hereafter govern the transfer of equipment and the fixing of the transfer value thereof:

2. Request for the transfer of equipment chargeable to plant account, and of shop machines, between the various departments and divisions of the Commission and between the Commission and the Panama Railroad Company, will be submitted to the Chairman and Chief Engineer on form C. E. 299-1, seven copies to be forwarded for each request.

3. Until a supply of form C. E. 299-1 is received, form C. E. 299-a (original) and 299-b (duplicate) will be used, except that the address therein will be changed to the Chairman and Chief Engineer.

4. The inspector of shops is charged, under my direction, with investigating and recommending action to be taken on requests for the transfer of equipment.

5. Equipment belonging to the Panama Railroad Company that is lent to the Commission will be covered by memorandum receipt taken from the department or division of the Commission using it. Equipment belonging to the Commission that is lent to the Panama Railroad Company will be invoiced to the depot quartermaster, who will obtain memorandum receipt therefrom from the general superintendent of the Panama Railroad Company.

6. The general superintendent of the Panama Railroad Company and the head of each department and division of the Commission having Panama Railroad Company equipment in its possession will submit a monthly report to the chief quartermaster on form QMD 61, showing this equipment by classes and numbers. Form QMD 61 will be submitted monthly by departments and divisions of the Commission, showing numbers and classes of Commission equipment in their service, to the superintendent of the Mechanical Division. The Panama Railroad Company will submit a monthly report on the same form, showing all Commission equipment in its service, to the superintendent of the Mechanical Division, furnishing the chief quartermaster with a copy thereof.

7. When equipment is transferred between departments and divisions of the Commission and between the Commission and the Panama Railroad Company, the division last using the equipment will pay for such repairs as are necessary to put the equipment in operating condition. If further repairs are required by the division to which the equipment is transferred, such expense will be borne by the latter division.

8. When any piece of equipment is transferred from one division or department to another, there will be transferred with it the authorized tools and oiling equipment, boxes and chains with locks and keys for securing tools and oiling equipment, water cooler, etc.

9. Copies of form QMD 4 covering transfers of plant units, copies of all completed surveys covering demolition, destruction, dismantling, or return to stock, will be submitted by the accountable officer to the chief quartermaster as soon as the transfer or other change of status in equipment is effected, so that the equipment records of the chief quartermaster will at all times be complete.

10. All equipment chargeable to plant account, and all shop machines, excepting floating equipment, will be transferred at its original cost price, less one per cent for each month it has been in service; provided, that the net credit to the division releasing the equipment shall not be less than 10 per cent of its original

cost. If the cost of repairs incident to the transfer, deducted from the transfer value determined by this rule, leaves an amount less than 10 per cent of the original cost, the division releasing the equipment will invoice to the division receiving it such portion of the cost of the repairs as is necessary to make its credit 10 per cent of the original cost.

11. The transfer value of floating equipment will be fixed in each case by the board of local inspectors and the surveying officer.

12. The value of equipment transferred between units of work within a division will be determined as prescribed for transfers between divisions.

13. This circular does not apply to the obtaining by departments and divisions of articles in the obsolete storehouse of the Quartermaster's Department.

14. Transfers effected by oral authority of the Chairman and Chief Engineer must in every case be confirmed by formal request on form C. E. 299-1, which will be submitted by the division receiving the equipment; no transfer will be considered as officially authorized until this shall have been done.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Local Treasurer, Panama Railroad Company.

PANAMA RAILROAD COMPANY.

COLON, R. P., October 4, 1912.

To ALL CONCERNED:

Effective at once, the title of Mr. R. H. Wardlaw, cashier, Panama Railroad Company, is changed to that of local treasurer, Panama Railroad Company, and all concerned will kindly address him accordingly, in future.

J. A. SMITH, General Superintendent.

Cold Storage Prices Unchanged.

The prices of cold storage articles at the commissaries, as printed in *The Canal Record* of October 2, remain unchanged.

Rainfall from September 1 to 30, 1912, Inclusive.

WEATHER CONDITIONS, CANAL ZONE, SEPTEMBER, 1912.

The rainfall for September was above the normal over the Pacific half of the Isthmus, but deficient over the Atlantic half. Monthly totals ranged from 7.84 inches at Gatun to 15.10 inches at Rio Grande. Heavy general rains occurred on the 2d, 3d, 23d, 26th, and 27th.

During a heavy shower at Rio Grande, on the 21st, 3.10 inches of rain fell in one hour, establishing a new maximum hourly record for that station.

Mean temperature, relative humidity, atmospheric pressure, and cloudiness were about normal, but the total wind movement was slightly in excess of the monthly average.

Of the fogs observed, 54 per cent were dissipated by 6.30 a. m., 82 per cent by 7.30 a. m., and 98 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

STATIONS.	Press're (reduced to mean of 24 hours.)	Temperature.						Mean relative humidity.	Precipitation.			Wind.			
		Mean.	Maximum.	Date	Minimum.	Date.	Total inches.		Station average.	Number of rainy days.	Total movement (in miles.)	Prevailing direction.	Max. velocity (in miles.)	Direction.	Date.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending October 5:

Arrivals—September 30, *Quilpie*, from Valparaiso; October 1, *Ecuador*, from Guayaquil; October 1, *U. S. S. Cleveland*, from Corinto; October 1, *Huallaga*, from Callao.

Departures—September 29, *Pennsylvania*, to San Francisco; September 30, *Limari*, to Valparaiso; October 1, *Urubamba*, to Callao; October 2, *U. S. S. Cleveland*, to Corinto; October 4, *Chile*, to Guayaquil; October 5, *Stanley Dollar*, to San Francisco.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, OCTOBER 16, 1912.

No. 8.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Canal Medals.

Seven hundred and thirty-five Canal medals earned by Canal and Panama railroad employes during the period from 1909 to 1911, inclusive, have been received on the Isthmus, and will be distributed within the next few days. The service bars for four and six years of continuous service will probably be here before the end of the month.

Permanent Structures.

Mr. Frank W. Reynolds, superintendent on the Isthmus for Mr. Austin W. Lord, the architect employed by the Isthmian Canal Commission to prepare plans for the permanent buildings for the use of the operation and maintenance forces of the Canal, arrived on October 7, bringing with him one-fourth inch scale working drawings of the hydroelectric station at Gatun Spillway, showing the structural steel, as worked out by the engineers on the Isthmus, adapted to local conditions. He also brought drawings of the operating houses at Gatun and Miraflores Locks, which will be identical in construction, and plans for the operating house at Pedro Miguel Lock, in addition to considerable data concerning building materials.

Drawings of the permanent Administration building to be located at the new town of Balboa are expected shortly, when work in preparing the site will be begun. The new building will have 75,000 square feet of floor space, and is to cost not to exceed \$375,000, including \$25,000 for that part assigned to the archives.

Repairs to Crane at Mount Hope Wharf.

The steam cantilever cargo-handling crane at Dock 14, Mount Hope, is being scaled and repainted, and a large part of the woodwork is being replaced, including the footbridge, which extends the length of the cantilever span, 355 feet 11 inches. The crane is built with arms extending equal distances beyond the central support, the top of which is 78 feet above the supporting track. Since the

crane was put in use in February, 1906, it has handled approximately 230,720 tons of cargo.

Increase in Concrete Estimate at Gatun Locks.

Owing to the greater depth of the foundations in the approach walls at Gatun Locks, the estimate for the total amount of concrete necessary to be placed at that point has been increased by 50,000 cubic yards, making the estimate as revised 2,050,000 cubic yards. On October 1, 1912, the concrete work in the locks at Gatun was 92.87 per cent completed.

Panama Railroad Apartment House.

All of the storerooms on the first floor of the Panama railroad apartment house, corner of Front and Eleventh streets, Colon, have been rented. All of the flats on the second and third floors of the building are rented to married employes of the railroad and Canal Commission.

Retention of Metal Checks.

Metal checks in the possession of gold employes of the Canal Commission and the Panama railroad may be retained by them hereafter, upon leaving the service, as souvenirs of the Canal work, the charge of 50 cents for each check having been abolished upon recommendation of the Disbursing Officer, approved by the Chairman. The status of the checks issued to silver employes is not affected by the new arrangement. The present checks are circular in form, and 180,000 of them were manufactured, numbered from one up. Of these, up to about 165,000 have been issued to the various timekeepers for use on the work. The numbers from one to 20,000 were issued to contract men and special laborers, but above that figure they were given out without regard to the gold and silver distinction. There have been a number of issues of brass checks since the beginning of the work in 1904, in square, diamond-shaped, and star-shaped designs.

Conversion of Sand Barges.

Two barges, formerly in the Atlantic Division rock and sand transportation service, which were brought around South America to Balboa a few months ago by the tug *Reliance*, will be converted into dump barges to replace clapnets Nos. 8 and 10, which are no longer serviceable. These barges are of larger capacity than the clapnets, and contain from 500 to 525 cubic yards of material each. It is estimated that the work of conversion will take about three months, and that they will be good for five years' service thereafter.

Postal Business and Canal Zone Revenues.

The total amount of money orders issued in the Canal Zone during the month of September was \$369,094.81, of which \$301,934.08 was payable in the United States, \$66,141.18 in the Canal Zone, \$711.10 in Martinique, and \$308.45 in Costa Rica. The number of orders issued was 18,027, and

the average value was \$20.47. Money order fees amounted to \$1,765.75, and the amount paid and repaid to \$77,580.86. Postal sales amounted to \$6,894.75, and newspaper postage to \$11.74.

Revenue collections during the month of September were, as follows: Bicycle and chauffeur licenses, \$49; motor vehicle licenses, \$68; steamboat inspection, \$60; taxes, licenses, etc., \$14,216.86; total, \$14,393.86.

New Incline Track Out of Culebra Cut.

An additional incline track out of the lower end of Culebra Cut will be built to the east of the former site of Panama railroad bridge No. 57½, by the Central Division forces. Its construction is made necessary by the fact that the new bridge spanning the Cut will not permit the passage of a steamshovel or trackshifter, and gives but a 5-inch clearance for the wrecking crane. The new incline will have a 2.4 per cent grade, and will not permit the operation over it of loaded trains, made up of the usual number of cars without additional helper engine service. The track will serve as a reserve in case traffic over the present incline track out of the Cut at this end is interrupted.

Canal Zone Postal Savings Bank Transactions.

A statement of Canal Zone postal savings bank transactions at Canal Zone post-offices for the month of September, follows:

NAME OF OFFICE.	Postal savings certificates issued.	Postal savings certificates paid.
Ancon	\$7,584	\$7,728
Balboa	9,810	9,629
Bas Obispo	3,053	900
Corozal	13,470	8,850

Pedro Miguel	12,879	7,563
Cristobal, Sta. A.	550	610
Cristobal, Sta. B.	743	380
Total	\$111,786	\$91,999

Preparations for Tourist Season 1912-1913.

Arrangements are being made to move the lecture room, containing the model of Pedro Miguel lock, and that of Gatun Dam, now in the Administration building at Culebra, to the public market building, situated in West Culebra, near the railroad station. A section of this building, containing about 1,200 square feet of floor space, and capable of seating 120 people, will be divided off by a picket partition. It is proposed also, to install the lunch counter and soda water apparatus, formerly in the Commission clubhouse, in the new lecture room, for the convenience of tourists and other visitors.

The construction of an additional sight-seeing car has been authorized. During the busiest part of the last tourist season, other

LABOR FORCE AND QUARTERS IN SEPTEMBER.

On September 25, there were 35,861 employes actually at work on the Canal and the Panama railroad, and of that number 29,571 were Canal employes. The gold force on the Canal, composed almost exclusively of white Americans, was 4,166. The force report for September 25 was, as follows:

DEPARTMENT.	SILVER EMPLOYES.*															Total silver.	Total gold.	Grand total.
	Artisans.					European laborers.		West Indian laborers.										
	Monthly.	44 cents.	32 cents.	25 cents.	20 cents.	16 cents.	20 cents.	16 cents.	20 cents.	16 cents.	13 cents.	10 cents.	7 cents.

Woman's Missionary Convention.

Arrangements have been practically concluded for the woman's missionary convention, which will be held at Empire on Friday, October 25. Mrs. A. A. Nellis will preside, and the program will be, as follows: Devotional exercises, conducted by Mrs. Carl H. Elliott, Cristobal; words of welcome, Mrs. H. A. A. Smith, Empire; response, Mrs. C. P.

Fortney, Gatun; paper on "Woman's Missionary work of the Episcopal Church," Miss J. Macklin Beattie, Ancon; intermission; "Hinduism," an illustrative exercise, by the Empire auxiliary; "Teaching missions to children in the Sunday school," Mrs. Stephen Witt, Gatun; "Missionary work in South America," Mrs. Harry Compton, Panama.

It is expected that Miss Cope will be at the meeting and speak of her work among the San Blas Indians. All women on the Isthmus are invited to be present.

National Revolver and Pistol Championship Match.

An open revolver and pistol championship match was held under the auspices of the Culebra Pistol Club at the range in Culebra on September 28 to October 6, both dates inclusive. The match was shot under the rules of the United States Revolver Association, and was held synchronously with matches at different ranges in the United States. The standard American target with 8-inch bullseye was used. There were five events, all at 50 yards, as follows:

NAME.	Matches.					Aggregate score.
	A	B	C	D	F	
C. B. Larzelere	429	439	489	162	177	1142.8
L. D. Cornish	425	447	...	175	153	...
M. W. Fox	416	429	463	169	167	1104.6
Jacob Bernson	402	442	494	172	185	1127.8
J. M. G. Watt	362
W. L. G. Perry	...	237
B. Balduf	278	...	114	...
J. W. Maddera	264
T. E. L. Lipsey	130	...

Match A, revolver match—C. B. Larzelere, first prize, gold medal; L. D. Cornish, second prize, silver medal; M. W. Fox, third prize, bronze medal.

Match B, pistol match—L. D. Cornish, first prize, gold medal; Jacob Bernson, second prize, silver medal; C. B. Larzelere, third prize, bronze medal.

Match C, rapid fire, military revolver—Jacob Bernson, first prize, gold medal; C. B. Larzelere, second prize, silver medal; M. W. Fox, third prize, bronze medal.

Match D, rapid fire, military revolver—L. D. Cornish, honor medal.

Match F, rapid fire, pocket revolver—Jacob Bernson, first prize, gold medal; C. B. Larzelere, second prize, silver medal; M. W. Fox, third prize, bronze medal.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the two weeks ending October 12:

DATE.	Hours worked.	Cubic yards.
September 30	7.20	2,405
October 1	7.10	2,083
October 2	8.05	2,171
October 3	8.25	2,588

October 5	7.00	2,483
Total	45.50	14,585
October 7	5.40	1,720
October 8	7.00	2,404
October 9	7.45	2,483
October 10	6.55	2,602
October 11	7.25	2,266
October 12	7.15	2,281
Total	42.00	13,756

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Culebra, on Sunday, October 20, 1912, at 5 p. m. The program follows:

1. March—King of the Air.....Everloft
2. Selection—The Red Widow.....Gebest
3.Humoresque.....Dvorak
4. Overture—If I Were King.....Adam
5. Intermezzo—Indian Summer.....Moret
6. Popular song—There's A Girl in Havana.....Goetz
7. Waltz—Impassioned Dream.....Rosas
8. Potpourri of popular songs.....Harris
9. March—Spirit of Independence.....Holzman

CHARLES E. JENNINGS, Musical Director.

The next concert will be given at Cristobal on October 23, 1912, at 8 p. m.

The next Sunday concert will be given at Hotel Tivoli, Ancon, on October 27, at 8 p. m.

CRISTOBAL DOCKS.

Construction of Sheds and Method of Handling Cargo.

Plans for the superstructures for the Atlantic terminal docks at Cristobal are being prepared, and a general idea of their construction, as well as the layout of the docks, is shown in the sketches accompanying this article. In considering the equipment for the new docks, the committee in charge, in its report of April 11, 1912, recommended, that

single pieces, too heavy to be handled by ships' booms, namely 10 tons, or over, could be taken care of by crane boats.

The design and construction of the docks have been carried on under the supervision of Lieut. Frederick Meais, Chief Engineer, Panama Railroad Company, and the preliminary investigations and dock construction has been in charge of Mr. Geo. H. Ruggles, dock engineer.

The dock and pier construction at present

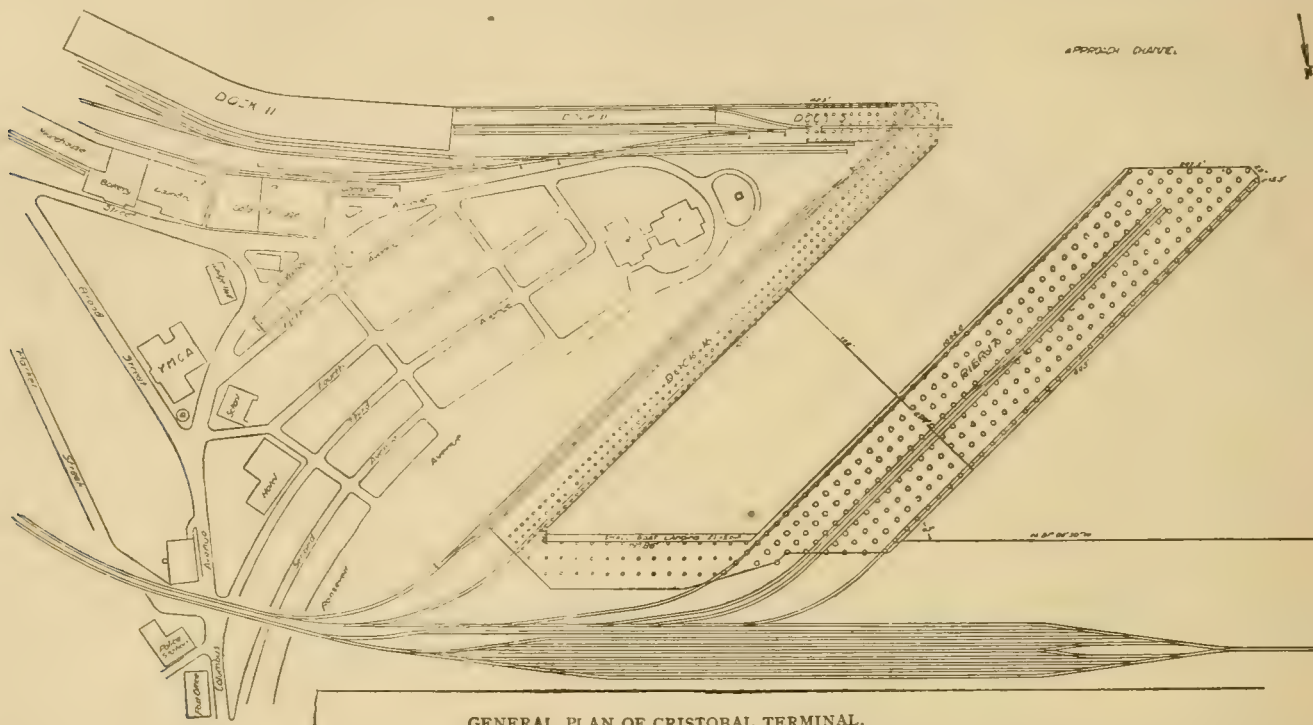

placing of the floor beams. The status of the work on October 1 was about, as follows:

Dock No. 16—All the caissons, and a greater part of the floor beams in place.

Pier No. 17—Most of the cylinders in place, but no work accomplished on the floor supports.

Dock No. 15—No work accomplished on this dock to date.

Dock No. 16 will have a face line 1,073 feet long. The shed to be erected on it,

GENERAL PLAN OF CRISTOBAL TERMINAL.

in view of the uncertainty existing as to the amount of freight to be handled at the Atlantic terminal after the completion of the Canal work, no cargo handling cranes, or special unloading appliances be installed, with the exception of unloading masts, designed for

decided on will give a total frontage of 3,890 feet, in addition to 398 feet frontage at the head of the slip for a small boat landing, or sufficient to provide berthage to five vessels of the size of the Panama railroad steamer *Ancon* at one time. Out of this total frontage,

plans for which have been completed, will be 918 feet long, and will have a width of 80 feet, including the space occupied by two depressed tracks on the inshore side. The width of the warehouse proper is 53½ feet, and that of the depressed track section 26½

SECTION OF FLOOR PLAN, PIER 17.

holding blocks and falls, and that all transfer of freight inside of the dock structures be done with hand or electric trucks, depending on the distance to be traversed, and other conditions. In unloading cargo, it was determined that

there will be under cover about 218,760 square feet of dock space.

The work on the docks during the past year has been largely confined to sinking the steel caissons for the foundations, and the

feet. The depressed tracks are spaced on 13-foot centers, four feet below the level of the dock floor, so that the latter will be exactly on a level with the car floors. On the face line of the dock, a space of 22 feet has

been reserved for an apron track, which will be used in unloading machinery, and other heavy material from ships into cars. The minimum clearance of the interior of the shed from the floor to the lower chord of the transverse truss will be 25 feet. The front wall will be of reinforced concrete, five inches thick and 30 feet high, with a low parapet extending throughout its length. The rear wall will be 34 feet in height, and, with the exception of the part that opens on the loading tracks, will be of similar con-

ported by four piles, and the face line columns will rest on the intersection of the steel I-beams directly over the 4-foot caissons, which, sunk to bed rock and filled with solid concrete, reinforced with steel rails, four lengths to each caisson, form the dock foundations. At the intersection of the caissons with the floor beams, haunches are provided, four to each caisson, which are designed to take the horizontal thrust of whatever shock or jar may be caused by a ship striking the dock with force.

The doors to the building are to be of the steel Kinnear roller type, 18 feet high and 20 feet wide, and will be placed 34 feet apart the entire length of the face line of the building.

On all face line columns, unloading masts will be erected to a height of 65 feet above mean sealevel. These will support longitudinal girders for carrying blocks and falls to be used in unloading cargoes from ships.

In all, 1,501,156 pounds of structural steel will be used in the dock superstructure, which,

TYPICAL SECTION OF DOCK 16, SHOWING SHED.

struction, although windows may be provided at regular intervals for better ventilation. The end walls will also be of concrete, and openings will be left for cars, teams and pedestrians. The structure will be entirely fireproof.

The roof is to be constructed of concrete slabs, two and one-half inches thick, reinforced with expanded metal. The slope will be one in five, and the middle 20 feet will be occupied by a monitor, or ventilator, provided with a skylight at the top, and louvers on the sides. Rainwater will be carried off from the face line side of the dock structure by means of 5-inch downspouts placed 34 feet apart inside of the building. On the rear side, the water will be allowed to pass directly off the roof.

Steel columns will support the main transverse trusses as well as the longitudinal side trusses, which extend the entire length of the building. Midway between the main transverse trusses will be similar intermediate trusses, supported at the ends by the longitudinal side trusses. Two rows of light bracing trusses, situated beneath the two sides of the monitor, will also extend the entire length of the shed. Diagonal tie rods will be used in the plane of the lower chords of the transverse trusses in every bay. The inshore columns will rest on a concrete footing, sup-

The floor of the dock will be composed of Purington vitrified brick, four inches thick, laid on edge, supported by a $\frac{3}{4}$ -inch sand cushion, which, in turn, is upheld by an 8-inch concrete slab resting on the steel I-beams. The floor will have a total sustaining capacity, including live and dead loads, of 1,000 pounds to the square foot, and as there will be about 89,000 square feet of floor space

however, does not include the amount necessary for the framing for the ends, the unloaders, or the weight of the doors.

DOCK NO. 15.

Dock No. 15, which will be 426 feet in length, will be provided with a shed, similar in general construction to that on dock No. 16, but much shorter.

PIER NO. 17.

This pier will be 1,042 feet long, and 209 feet in width. It will be provided with a shed 870 long, rectangular in design, with an exposed section at each end. The floor load will be the same as for dock No. 16, but will be sustained by plate girders, instead of I-beams, resting on 6-foot caissons spaced 27 feet transversely and 30 feet longitudinally with pier, instead of 4-foot caissons, spaced 17 feet each way. There will be an apron track on each side of the pier structure, and two tracks, depressed four feet, will extend through the center of the shed.

TYPICAL SECTION OF CYLINDER, PIER 17

in the dock structure, it will support a total weight, equivalent to about 44,500 tons.

Missing Men.

Any one having information regarding the whereabouts of John R. Ulrich, at one time in the employ of the Isthmian Canal Commission on the Isthmus, and Abraham Glaser, who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

SCHOOL ENROLLMENT.

Number of Pupils in White Schools About the Same as Last Year.

The total enrollment of the white schools of the Canal Zone for the first week ending Friday, October 4, was 1,000, or four less than for the opening week of last year. This number, however, does not take into account the school at Toro Point, which opened on Monday, October 14, with an attendance of about 12. In addition, a new schoolhouse is under construction at Corozal, and a number of children of school age, living in that settlement, have postponed entrance until the building is ready for occupancy. The total enrollment at the close of the month will, in all probability, exceed the enrollment for the same time last year.

A list of the white schools, with the exception of that at Toro Point, with the enrollment of the first week at each place is, as follows:

Ancon.....	204
Pedro Miguel.....	69
Paraíso.....	22
Culebra.....	45
Empire.....	166
Las Cascadas.....	43
Bas Obispo.....	22
Gorgona.....	124
Gatun.....	118
Cristobal.....	172
Porto Bello.....	15

Total..... 1,000

The number enrolled in the high schools is 78. The attendance at the Ancon school is the greatest in its history, due to the removal of a large number of the quarters from Old Balboa to Ancon, and a new influx of population on account of the increased work at the Pacific end of the Canal.

A table showing the enrollment in the white schools of the Canal Zone, with the exception of Toro Point and Porto Bello, by states, countries, and dependencies, follows:

State or country.	Number.
Alabama.....	11
Arkansas.....	3
British Guiana.....	3
British West Indies.....	15
California.....	13
Canada.....	2
Colombia.....	4
Colorado.....	5
Connecticut.....	6
Costa Rica.....	5
Cuba.....	5
Delaware.....	5
District of Columbia.....	17
Ecuador.....	4
England.....	6
Florida.....	11
France.....	8
Georgia.....	11
Germany.....	1
Greece.....	7
Guatemala.....	4
Hawaii.....	1
Idaho.....	1
Illinois.....	30
Indiana.....	14
Iowa.....	19
Kansas.....	4
Kentucky.....	22
Louisiana.....	24
Maine.....	7
Maryland.....	22
Massachusetts.....	26
Michigan.....	25
Minnesota.....	8
Mississippi.....	17

State and Country.	Number.

Panama Railroad Company.....	18	298
Panama Government.....	1	25
Total.....	*2,084	38,538

*Includes one barge.

Embezzlement.

The trial of Frank K. Pilson, charged with the embezzlement of Government funds while employed as assistant postmaster at Cristobal, was held before Justice Thomas E. Brown, Jr., in the Circuit Court at Cristobal, beginning on Thursday, October 10, and terminating on Saturday, October 12. He was

found guilty of having appropriated to his own use two sums of \$20 and \$40, respectively, representing the value of two international money orders issued to P. Evans of Cristobal on April 10, 1911, and was sentenced to 18 months in the Canal Zone penitentiary. In one other embezzlement and four forgery charges that had been filed against him, entries of *nolle prosequi* were made after his conviction on the first charge.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week ending October 26 is, as follows: Monday, Cristobal; Tuesday, Empire; Wednesday, Culebra; Thursday, Gorgona; Friday, Cristobal; Saturday, Gatun.

The standing of the teams in the bowling league on October 14 was, as follows:

	Won.	Lost.	P.C.
Empire.....	4	2	666
Gatun.....	4	2	666
Culebra.....	3	3	500
Cristobal.....	3	3	500
Corozal.....	2	4	333
Gorgona.....	2	4	333

The standing of the basketball league is, as follows:

	Won.	Lost.	P.C.
Corozal.....	1	0	1000
Empire.....	1	0	1000
Gorgona.....	1	1	500
Cristobal.....	0	1	000
Gatun.....	0	1	000

CULEBRA.

The work of installing the bowling alleys and pool tables in the new building was begun October 14. The library and reading room is now open on the second floor of the Administration annex. The moving picture exhibitions are held in the remodeled second story of the schoolhouse. This building is more central in location than the old hall.

EMPIRE.

The fencing class was resumed on Monday, October 14, under the direction of Mr. Russell. Any one wishing to join can do so.

Sixty new library books have been received from the United States, and are ready for the use of the library members.

Twenty men have entered the October handicap pool tournament.

The basketball game played Friday night between the "All-Stars" and the Empire team resulted in a victory for the latter by the score of 34 to 19.

On Saturday, October 19, the members of the boys' department will take an outing.

GORGONA.

The afternoon moving picture show will be given every week on the day when the regular evening show is given. This show is especially for the night men, but every one is invited to attend.

A large number of men are attending the gymnasium classes, but there is room for more.

A social was given on Friday evening for the people of Gorgona. The program was, as follows: Orchestral selections; baritone solo, Mr. Bennyhoff; illustrated lecture on Panamanian life; popular songs, and Barbadian talk by Messrs. Cogan, Robitoy, and Otis; piano solo, Miss Goldie Cranfield; illuminated Indian club swinging, by Mr. Kramer; boys' dumb bell, and free hand drill, by Messrs. Morrison, Brown, and Little; tenor solo, by Mr. Onken. The entertainment closed with popular songs. Refreshments were served.

Corozal won from Gorgona in basketball on Saturday evening, October 12, by the score of 15 to 19.

The Culebra bowling team took three straight games from Gorgona on Saturday evening, October 12. Scores: Gorgona—728, 740, 750. Culebra—787, 768, 830.

GATUN.

The present standing of the "Lock City" billiard tournament is, as follows:

	Won.	Lost.		Won.	Lost.
DePoorter.....	11	1	Gamble.....	7	6
Wurster.....	10	2	Bellinger.....	6	7
Neeley.....	9	4	Meise.....	5	8
Drury.....	7	4	Long.....	5	8
Founslay.....	8	5	Meyers.....	2	11
Cheeks.....	8	5	Heine.....	1	12
Jackson.....	7	6	Eggleston.....	3	10

In a game of 3-cushioned billiards, played on Friday evening, Louis DePoorter made a run of six, and another of five. He will receive a handsome cue for the highest run of the tournament.

The "Lock City" pool tournament will start on Thursday, October 18. Entries are being taken by Mr. DePoorter.

At the bowling match on Saturday, October 12, Gatun won the first and third games, and Empire the second. Scores:

	Gatun.		Empire.
Swallow.....	178 186 178	Gustavson.....	148 201 172
O'Meara.....	192 171 161	Potter.....	156 174 194
Rabbitt.....	155 153 152	Edwards.....	158 161 147
Hodges.....	133 195 197	Pearson.....	144 152 161
Oettle.....	168 172 198	Huson.....	170 195 170

Total..... 826 877 886 776 883 844

Alleys Nos. 3 and 4 will be open for duckpins on Tuesday and Thursday each week. The 200 scores for the week ending October 12 are as, follows: F. G. Smith,

200; O'Meara, 256, 203, 202, 200; Swallow, 210, 200, 200; Humphries, 212; Morrissey, 207; Rabbitt, 207, Hodges, 204. The local tenpin tournament was resumed on Monday, October 14, when New York played Pennsylvania. The commissary mandolin and guitar club will furnish music on several nights of the tournament.

The working boys defeated the schoolboys in a game of basketball on Saturday evening, October 12, by the score of 10 to 0.

The present membership of the Gatun Y. M. C. A. is 422.

Applications for tickets for the San Blas trip may be left with the secretary.

Rogers still leads in the athletic contest, conducted among the members of the senior gymnasium class.

CRISTOBAL.

The local bowlers took two out of three games from the Corozal team on Saturday night. Scores:

	Corozal.		Cristobal.
Dalton.....	148 157 162	Barret.....	191 137....
Souders.....	161 116 149	Rosteck.....	183 159 163
Peterson.....	143 209 134	Collins.....	170 172 155
Sims.....	148 128....	Bullard.....	180 126 170
Coonly.....	189 211 172	Louch.....	148 146 183
Bordt.....	146.....	Burns, T.....	156.....

Total..... 789 821 763 872 740 827

During the week ending October 12, the following high scores were made by local bowlers: Tenpins—Buser, 213; Bullard, 213; Barret, 202, 203; T. Burns, 200, 209; Louch, 203. Duckpins—Barrett, 101, 106, 116, 104, 102, 104; Marques, 104, 113, 103, 100, 110; W. Burn, 107; Farrell, 103; Farr, 104; Smith, 104; Weston, 102; Carpenter, 104; Hess, 101, 100; Herrington, 100.

On Thursday, October 10, the following program was given at the "smoker" held in honor of Mr. E. J. Schulte, the new assistant secretary: Selections by the 10th Regiment orchestra; introduction of Mr. Edward J. Schulte; selections by 10th Regiment orchestra; army calisthenics by a squad from the 10th Regiment; characteristic song and dance by Mr. R. J. Stapleton; xylophone solo, by Mr. White of the 10th Regiment; Two solos, "My Hero" and "Rose in the Bud," by Mr. W. G. Ross; Scotch specialties, by Mr. Cullen; parallel bar exercises, Messrs. Hughs and Schulte; solo, "In the Garden of My Dreams" by Mr. Mosher; solos, "Dixie" and "When I Get You Alone Tonight," by Mr. Cullen; wrestling, (1) Messrs. Heine and Huber, Græco-Roman; (2), Messrs Hughs and Schulte, catch-as-catch-can; (3), Second bout, Messrs. Heine and Huber; Barbadian dialect, sketch and song, by Messrs Robitoy, Cogan and Otis; selections by the 10th Regiment orchestra.

Saturday night, October 19, the Corozal basketball team will play the Cristobal team at Cristobal.

PORTO BELLO.

Moving picture exhibitions will, until further notice, continue to be held on Fridays.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, October 12, 1912. All heights are in feet above mean sea level.

DAY AND DATE.	STATION.

OFFICIAL CIRCULARS.

Monday, November 4, a Holiday.

CULEBRA, C. Z., October 14, 1912.

CIRCULAR No. 461:

As the anniversary of the independence of the Republic of Panama falls on Sunday this year, Monday, the 4th of November, is, by authority of Act 11 of the Laws of the Canal Zone, hereby declared a public holiday, and, as far as practicable, all public business will be suspended on that day.

GEO. W. GOETHALS, Chairman.

Time Used by Engineers and Conductors for Examination for Qualified Grade.

CULEBRA, C. Z., October 12, 1912.

CIRCULAR No. 348-C.

Hereafter, the time used by engineers and conductors in preparing themselves for examination for promotion to the qualified grade will be without pay, except that such men as successfully pass the required examination will be paid for not to exceed three days' time spent in learning the road and taking the examination.

GEO. W. GOETHALS, Chairman, Isthmian Canal Commission, President, Panama Railroad Company.

Commissary Books for Cash.

CULEBRA, C. Z., October 8, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

Owing to the fact that arrangements have been made to sell commissary coupon books for cash at all commissaries, except at Gorgona, there is no longer any necessity of cash sales by I. C. C. issuing clerks. Therefore, any authority heretofore issued (not including cash sales at Gorgona shops) for the sale of commissary coupon books for cash by I. C. C. issuing clerks is hereby withdrawn.

GEO. W. GOETHALS, Chairman.

Steamship Reservations.

CULEBRA, C. Z., October 9, 1912.

TO ALL CONCERNED:

There seems to be an erroneous impression among employees that when transportation is requested on the United Fruit Company line, stateroom reservation is arranged by this office.

In order to avoid any misunderstanding on this point, employees are informed that they must arrange their own reservations on the United Fruit Company line, either by letter or telephone, direct with the agent in Colon. If desired, reservations may be arranged by employees in advance of the issuance by this office of the official request. Employees are urged, however, to notify the office of the United Fruit Company immediately of any change in sailing date or cancellation of a reservation.

GEO. W. GOETHALS, Chairman.

Information Concerning Crippled Employees.

CULEBRA, C. Z., October 9, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is found that the information recently furnished concerning crippled in your respective departments and divisions is not sufficient.

Please furnish complete information on printed forms, a supply of which is being sent you, and a copy of which is submitted below. These forms may be filled out by the men themselves, if desired, but should be carefully checked and typewritten before being sent to this office. Please send one original and two copies for each man reported on. The department and division should be stamped in with a rubber stamp, as many of these men do not know the names of their departments and divisions.

GEO. W. GOETHALS, Chairman.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 2 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston, at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, OCTOBER 23, 1912.

No. 9.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of September is published in full in this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Hospital Farm for the Disabled and Insane.

The Chairman has approved the report of the committee, consisting of Maj. R. E. Noble, Capt. R. E. Wood, and Mr. C. A. McIlvaine, appointed to investigate the matter of establishing a hospital farm for the care of permanently disabled employes and of the insane. The Canal Commission and the Panama Railroad Company, are now giving employment to 24 disabled persons on the gold roll, and 212 on the silver roll. The following statements shows the number married and single, and the classes of work at which they are employed:

	Gold roll.	Silver roll.
Married.....	13	121
Single.....	11	91
Total.....	24	212

CLASS OF EMPLOYMENT.

	Gold roll.	Silver roll.
Switchmen.....	..	114
Watchmen.....	1	39
Laborers.....	..	16
Foremen.....	5	3
Carpenters.....	1	3
Miscellaneous.....	17	37
Total.....	24	212

The number of insane at Ancon asylum on October 22 was 306.

The committee, in its report, favored, as the best plan of caring for the chronically ill and crippled employes, and the insane, the establishment of a farm, where the cultivation of bananas, plantains, yams, and other native vegetables can be carried on. It is also believed that it would be a good plan

to combine with this farm, the dairy, poultry farm, and piggery, now maintained by Ancon Hospital. These activities would afford varied employment to the prospective inmates, ranging from ordinary labor for the physically fitted among the insane, to light tasks for the crippled. The committee favors Corozal as the best site for such a farm. There are several hundred acres of comparatively open land at that point, and the survey prepared by the expert from the United States Department of Agriculture, shows that the soil in that locality is good. The present Canal Commission buildings at Corozal are ample to house all the disabled and insane; moreover, the town has good railroad service, and, in addition, there is a wagon road to Panama. Furthermore, it is probable that a wagon road will be built within the next year, or two, to Ancon and Balboa.

The committee was of the opinion that the insane asylum, now at Ancon, should be transferred to the new site, as soon as Canal construction has advanced to the point when the employes' quarters can be vacated, and those of the crippled employes who desire it can be transferred at the same time. In case a reduction of force makes it necessary to care for some of the disabled before the houses at Corozal will be available, the committee suggested that two or three labor camps be moved to the site of the farm for temporary quarters, and in this way, the services of the men can be utilized in the preliminary work at the farm.

Admitting that it was difficult at this time to give more than a bare outline of the scheme of administration at the proposed farm, the committee believed, however, there should be a doctor in charge of the insane, as at present, he to determine those of the patients capable of performing labor. It was further agreed that the superintendent of the farm should be one with a knowledge of tropical agriculture, and that he should be employed from the outset, in order to plan matters properly. The committee favored the furnishing of quarters to the disabled, including a limited number of married quarters to those having families, and that they should be paid a wage scale of five, seven, and 10 cents an hour, dependent on the tasks they are called upon to perform. It was believed, also, that it would be more advantageous to have Ancon cemetery moved to a site adjoining the farm.

The Chairman, in approving the report of the committee, requests the Chief Sanitary Officer to give the matter of moving the cemetery to the site recommended by the committee, together with other details, his prompt consideration, in order that the planting of fruit trees may be taken in hand as soon as possible, and stated that as soon as a competent superintendent is procured and the farm is planned in a general way, a considerable number of employes, who are

crippled, but who are still capable of performing a certain amount of labor, can be detailed to start the work.

Changes in Fire and Police Departments.

Owing to a curtailment in the allotment of funds to the Division of Fire Protection for the fiscal year 1912-13, due to a smaller Congressional appropriation, a reduction in force of seven paid members has been necessary. Under the new arrangement, which is now in effect, the status of the personnel at the different stations will be, as follows:

Ancon—Tivoli station—One assistant fire chief, one captain, one lieutenant, and six firemen. Increase of three firemen.

Ancon—Hospital station—Closed and positions of captain and lieutenant abolished.

Balboa—The one paid fireman, formerly at this point, has been removed.

Corozal—One fireman. No reduction.

Miraflores—The one paid fireman, formerly at this point, has been removed.

Pedro Miguel—One fireman. No reduction.

Paraiso—One fireman. No reduction.

Culebra—One lieutenant and one fireman. Force reduced by one captain and two firemen.

Empire—One captain, one lieutenant, and three firemen. No reduction.

Las Cascadas—One fireman. No reduction.

Gorgona—One captain, one lieutenant, and two firemen. Force reduced by one fireman.

Gatun—One captain, one lieutenant, and three firemen. Force reduced by one fireman.

Cristobal—Office force, one chief, one clerk, one lineman, and one messenger; station force, one captain, one lieutenant, one fire engineer, one motor engineer, one electrician, and 11 firemen. Force reduced by one fireman.

Toro Point—The one paid fireman, formerly at this point, has been removed.

Porto Bello—The one paid fireman, formerly at this point, has been removed.

The total reduction in the fire department personnel is seven, consisting of one captain, and six firemen. The changes were effected by the transfer of men from one station to another, and the reductions have been accomplished through the voluntary resignations of firemen having enough accumulated leave, and by transfers to other departments.

Reductions have been made at points where conditions would best permit. Thus, the reduction in the force at Culebra was made, because of the removal of buildings there during the past year or two on account of the slides; and the reduction at Gatun was made, because of the approaching completion of the work west of the locks.

The abolishing of the one-man stations at Balboa, Miraflores, Porto Bello, and Toro Point, turns over the matter of fire protection to the volunteer companies in those settlements. The hose carts with which these stations are equipped, will be ready for use at all

CANAL WORK IN SEPTEMBER.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., October 12, 1912.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of September, 1912:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry.....	Cubic yards...	1,025	922,712	200,551	1,244,588
Work excavation, wet.....	Cubic yards...	497,122		458,059	955,181
Total work excavation.....	Cubic yards...	498,147	922,712	658,610	2,079,469
Plant excavation, dry.....	Cubic yards...		12,344	748	13,092
Plant excavation, wet.....	Cubic yards...			31,879	31,879
Total plant excavation.....	Cubic yards...		12,344	32,627	44,971
Total Canal excavation.....	Cubic yards...	498,147	935,056	691,237	2,124,440
Material placed in dams.....	Cubic yards...	246,906		31,585	278,551
Concrete placed in locks and dams.....	Cubic yards...	4,250		49,161	53,411
Explosives used.....	Tons (Gross)...	36.95	102.36	67.08	206.40
Rock drilled.....	Feet.....	33,442	312,997	98,914	450,353
Tracks removed.....	Miles.....		6.08		6.08
New tracks laid.....	Miles.....	2.56	9.92	3.16	15.64
Rock crushed.....	Cubic yards...			41,379	41,379
Cement used.....	Barrels.....	7,379	101	50,238	57,718
New roads built.....	Miles.....				
Water mains laid.....	Feet.....	4,080	2,210		6,290
Sewers laid.....	Feet.....	397			397
Open drains and ditches dug.....	Feet.....	40,195	45,995	1,767	87,953
Average daily force.....	4,609	6,602	7,503	18,714
Average rainfall.....	Inches.....	10.03	13.41	10.39	12.13

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineers and the erection subdivision of this office, the inspection of this work being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF INSTALLATION OF RISING STEM GATE VALVES, AND ERECTION OF SPILLWAY GATES AND CAISSONS.

The work of preparing rising stem gate valve chambers and installation of valves, and erection of Spillway gates, has progressed satisfactorily during the month.

No work has been done as yet on the erection of the caissons.

LOCK GATES AND PROTECTIVE DEVICES.

Up to the 20th of September, a total of 57,556 tons of steel plates and shapes was accepted at the rolling mills. In the above tonnage is included 1,414 tons on replace orders, and 207 tons for spare parts, making a total of 55,935 tons rolled on the original order for 92 leaves. A total of 45,396 tons of riveted structural steel has been shipped from the Rankin shops, or about 91 per cent of the total contract weight of this class. The tonnage of lock gate material erected in the various locks to October 1, 1912, without regard to its being fully reamed or riveted, was 26,902 tons, out of a total of 58,000 tons, or about 46 per cent. Of this, 2,115 tons, or about 3½ per cent, were erected during the month of September. The number of field rivets driven was 1,571,402, or about 26 per cent of the total, of which 195,514, or about 3½ per cent, were driven in

September. The tonnage erected was about 12½ per cent more than in the preceding month, and the number of rivets driven was about eight per cent less than in the preceding month.

LOCK GATE ERECTION.

Gatun—Work is in progress on 40 leaves, this being the entire number to be erected at this point. The average progress is about, as follows: Erection, 56 per cent complete; reaming, 40 per cent complete; riveting, 35 per cent complete; finishing work, 18 per cent complete.

Pedro Miguel—Work is in progress on the

entire 24 leaves, which are to be erected at this point. The average progress is about, as follows: Erection, 77 per cent complete; reaming, 52 per cent complete; riveting, 48 per cent complete. No leaves are finished.

Miraflores—Work is in progress on 12 out of the total of 28 leaves to be erected at this point. The average progress is, as follows: Erection, 4½ per cent complete.

LOCK GATE RECESS COVERS.

Of the total of 36 recess covers at Gatun, all of which are erected, 11 remain to be aligned and grouted. At Pedro Miguel, out of a total of 20, five remain to be aligned and grouted. At Miraflores, of the 24 recess covers, 12 have been erected, and the riveting on 10 has been practically completed.

BABBITTING OF HOLLOW QUOINS.

As stated in the report for the previous month, the babbitting of all hollow quoins at Gatun and Pedro Miguel has been completed, and the work inspected and accepted. The hollow quoins for six leaves at Miraflores have been aligned and babbitted and accepted as satisfactory.

CHAIN FENDERS.

All the material for the sample fender machines to be installed in pits Nos. 812 and 813 in the upper approach walls of the Gatun locks has been delivered, with the exception of the piping, operating valves, and mechanism for operating the limit switch. The work on the mechanism for this limit switch is well under way, but no shipments have been made to date. In regard to the hawsepipe, 13 castings were in various stages of completion at the works of the contractor, shipment having been made of 10 hawsepipes for Gatun Locks, and 12 for Pedro Miguel Lock. In the erection of this material on the Isthmus, the installation of the machine proper in pit No.

813 (Gatun) was accomplished during the month. The piping, pump, and water supply tank in connection with this machine still remain to be installed. The erection of this machine began August 26, 1912. Owing to some difficulty encountered in unwatering pit No. 812 (Gatun,) the erection of the second machine has been somewhat delayed. All the main parts of the machine are at the pit site in readiness for erection.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection of the operating machinery and electrical equipment. Up to the present time, this force has inspected material under 60 contracts. The majority of the contractors are behind in their rate of delivery, but it appears that they are augmenting this rate, and that, in general, the final delivery will be in accordance with the contracts. The machines received on the Isthmus are being installed as rapidly as possible after receipt of same. The erection force is hampered by the fact that the parts for the machines are not delivered successively, which requires spreading the installation over a large number of machines.

The following tabulations are given as a summary of the work:

RISING STEM GATE VALVES.

	Gatun—56		Pedro Miguel—24

ELECTRICAL WORK—ATLANTIC DIVISION.

Conductor rails, insulators, brackets, and cover plates were installed on 728 feet of curved track and 2,067 feet of straight track, making a total to date of 3,565 lineal feet. Of this, 1,477 lineal feet were laid with copper conductor bar, and 2,088 lineal feet with steel conductor bar.

Dies, made from designs of the First Division, were tried out at Gorgona on a small sample lot of conductor slot brackets, and a rate of five brackets per minute was estab-

lished, which should bring the cost of straightening and handling to one cent per bracket, or less, demonstrating that the process is decidedly economical compared to approximately 21 cents for planing and 13 cents per bracket for milling. Arrangements have been made to ship the balance of the brackets to the Empire shops, where they will be corrected by the use of these dies.

A miter gate anchor casting has been fitted with a wooden dummy of the miter gate moving machine strut and a length of flexible conduit, in order that data may be obtained on which to base a proper selection of cable for use at this point, in addition to gaining an idea of the life of the flexible conduit when subjected to bending.

Two hundred feet of 2-inch conduit were installed in miter gate recess covers Nos. 29, 33, 37, and 38. Temporary light and power circuits have been maintained and extended to serve for the erection of machinery and mixing concrete.

ELECTRICAL WORK—PACIFIC DIVISION.

On account of no track being available for bonding, no electrical work was done in the Pacific Division during the month.

EMERGENCY DAMS.

Inspection has been in progress in the United States at nine localities, and 916 tons of material were accepted during the month. Up to the end of the month, a total of 5,239 tons have been fabricated and accepted. About 360 tons of material have been delivered on the Isthmus during the month, and about 916 tons have been erected. Up to the end of the month, a total of 3,555 tons have been delivered and 1,181 tons have been erected. Work has been in progress on one dam.

AIDS TO NAVIGATION.

During the month, work has been in progress erecting range towers Nos. 3, 5, and 7 in the Gatun Lake section; preparing caisson foundation for range tower No. 1, Gatun Lake section; erecting beacons Nos. 7 and 8 in the Pacific Division; erecting electric light line, and making the necessary surveys and reconnaissances.

The following is the condition of the work on September 30: Ten range towers of the Atlantic and Pacific Division type, and three range towers of the Gatun Lake section type, have been completed, except for placing certain fittings and the permanent lights. One range tower of the Gatun Lake section type is up to a height of 12 feet, and its foundation completed. One foundation for Atlantic and Pacific Division type of tower is completed, and one caisson foundation for same type of tower has been sunk to within 16 feet of its final position. Two skeleton tower beacons for the Pacific Division, and their foundations, are completed, except for installing the lights.

The caisson for the west breakwater light has been completed up to a height of 25 feet.

Fifty-five reinforced concrete beacons have been cast in readiness for setting up. There were also cast and completed one hundred and seventeen 48 by 48 by 26-inch concrete sinkers for gas buoys, and one hundred and three 24 by 24 by 18-inch concrete sinkers for spar buoys.

Work was begun on the erection of an electric light line about two and one-half miles long from the Aguadulce pumping station to

range No. 1-2 and beacons Nos. 5 and 7, Pacific Division.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month, excavation for the locks' backfill was carried on by two steamshovels in the borrow pit south of Gatun station.

Backfill—Backfilling behind the side and center walls of the locks was continued. The quantity placed during the month aggregated 71,302 cubic yards. The total placed to October 1, 1912, amounted to 1,846,966 cubic yards.

Receiving and issuing material—The receipts of sand exceeded the consumption by 885 cubic yards; the receipts of cement exceeded the consumption by 10,333½ barrels; the issues of rock amounted to 4,472 cubic yards, no rock being received.

Mixing and placing plants—Plant No. 1 and the portable mixers were kept in satisfactory operation during the month.

Concrete work—During the month, a total of 3,162 cubic yards of concrete was placed, distributed, as follows: Upper lock, 1,319 cubic yards; middle lock, 837 cubic yards; lower lock, 1,006 cubic yards.

A recalculation of the amount of concrete to be placed, owing to the greater depth of foundations in the approach walls, shows a total of 2,050,000 cubic yards in Gatun Locks. On this basis at the end of the month, the concrete work was 92.87 per cent completed. Of the amount placed during the month, 1,236 cubic yards were reinforced. The bucket measurement exceeded the place measurement by 372 cubic yards.

OPERATION OF THE PERMANENT CONCRETE CONSTRUCTION PLANTS.

Length of working day (hours).....	9.00
Average number of hours per day worked per strand of cableway laying concrete (actual working time).....	4.29
Average number of mixers per day.....	2.00
Average hourly output per mixer (actual working time) cubic yards.....	60.38
Average amount of concrete laid per hour, per strand of cableway (actual working time) cubic yards.....	22.55
Concrete laid (cubic yards) cableways.....	2,278
Concrete laid (cubic yards) derricks.....	1,236
Concrete laid (cubic yards) portable mixers.....	20

Total amount of concrete laid (cubic yards) 3,534

GATUN DAM.

Construction during the month increased the total fill, as determined by cross section of the material in place, by 246,966 cubic yards, making the total amount in place 20,482,351 cubic yards. An arbitrary reduction of 65,000 cubic yards has been made for slow consolidation in those sections of the Dam not covered by monthly cross section. Of this, 57,500 cubic yards has been charged against dry fill and 7,500 cubic yards against wet fill. On October 1, the Dam was 93.5 per cent completed.

Hydraulic fill—Dredging operations increased the hydraulic fill by 62,666 cubic yards, making the total hydraulic fill in place 10,124,082 cubic yards.

Dry fill—The material received from steamshovels, amounting to 184,300 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place 10,358,269 cubic yards.

GATUN SPILLWAY.

Hydroelectric plant—During the month, 850 cubic yards of rock were removed by hand and crane in preparing foundations, increasing the

total excavation for this purpose to 93,699 cubic yards.

Concrete—The work of placing concrete was continued, the amount placed during the month aggregating 1,088 cubic yards. The concrete work for the Spillway was 91.54 per cent completed.

Backfill—There was no backfilling done during the month, the total remaining 16,495 cubic yards.

Excavation—During the month, 175 cubic yards of rock were removed by hand in preparing foundations in the Spillway, making the total excavation 1,591,261 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging from the Ocean to Mindi—Five dredges removed 324,466 cubic yards of earth and 47,836 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 39,183 cubic yards of coral from between docks Nos. 16 and 17, Panama Railroad Company's Cristobal terminal docks.

On September 30, forty feet of water could be carried from zero to zero plus 2,100 feet; 35 feet to mile post four, plus, 3,500 feet; 30 feet to mile post five, plus 2,200 feet; and 20 feet to mile post six, plus 1,900 feet. The drill boat *Terrier* drilled 3,239 feet, using 23,350 pounds of dynamite, and shot 7,240 cubic yards of earth and 18,698 cubic yards of rock to minus 45 feet mean sealevel.

Dredging approach to Gatun Locks—Two dredges removed 109,798 cubic yards of earth and 15,022 cubic yards of rock from the Canal prism.

Porto Bello—During the month, 8,711 cubic yards of rock were shipped to Toro Point for use in the construction of the breakwater.

Rock transportation service—In connection with this service, plant steamed 1,880 miles, handled 96 barges, and carried 1,939 passengers.

West breakwater, Colon—Due to the lack of piling, the single track trestle was not extended during the month, the total length to October 1 being 11,267 lineal feet. There were unloaded 8,711 cubic yards of Porto Bello rock, of which 4,253 cubic yards were handled by cranes and 4,458 cubic yards by the derrick barges, making the total to October 1, 91,854 cubic yards.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the Colon street improvements.

Central Division.

During the month of September, the total amount of material excavated by the Central Division was 935,056 cubic yards, of which 164,742 cubic yards were classified as earth and 770,314 cubic yards as rock. The total of 935,056 cubic yards was removed by steamshovels. Of the total, 909,856 cubic yards were primary excavation in the Canal prism, 12,856 cubic yards from Obispo Diversion, 7,912 cubic yards from track cut-off at Station 1651, and 4,432 cubic yards from track cut-off at Plantation road.

The daily average number of steamshovels at work during the month was 32.71, and the total number of shovel days was 785, as compared with 34.11 at work during the month of August with 921 shovel days.

For comparison with the work done by steamshovels during the corresponding month

of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	C. Y. per shovel day
		Rock.	Earth.		
1911: Cu. Yds.		Cu. Yds.	Cu. Yds.		
Sept. . .	1,339,437	1,075,211	264,226	42.00	5.1,275.65
1912: Sept. . .	935,056	770,314	164,742	32.71	4.1,015.26

Rainfall at Empire: 1911, 5.46 ins.; 1912, 13.78 ins.

The above table shows the average output per shovel to be 20.41 per cent less in September, 1912, than in the corresponding month of 1911.

The total amount of material excavated from the Culebra section of the Central Division in September, 1912—935,056 cubic yards, was the lowest record in that section for the month of September since September, 1907, when only 753,468 cubic yards were removed.

The total estimated amount of material (dry excavation) to be removed in the Central Division, according to revised estimate of July 1, 1912, was 106,116,221 cubic yards; and, up to October 1, 1912, a total of 97,767,235 cubic yards had been removed, leaving 8,348,986 cubic yards yet to be removed in order to complete all dry excavation in the Central Division. From these figures, it will be seen that 92.13 per cent of all excavation in the Central Division had been accomplished up to the close of the month of September, and the amount to be removed was 7.87 per cent.

Considering the two sections which compose the Central Division, the excavation completed, and that yet to be completed at the close of September operations, was, as follows:

CULEBRA SECTION.		Cu. Yds.
Completed.....	85,382,570	
To be completed.....	8,348,986	
CHAGRES SECTION.		Cu. Yds.
Completed.....	12,384,655	

From the above figures, it will be seen that the Culebra section, locally known as "Culebra Cut", is 91.09 per cent completed, with 8.91 per cent to be completed. The Chagres section is completed so far as dry excavation is concerned, but it is estimated that about 300,000 cubic yards of wet excavation will have to be removed in this section.

During the month, 41,434 cubic yards of material were dumped in the embankment for the new roadbed of the relocation of the Panama railroad, increasing the total amount used for this purpose to 4,399,526 cubic yards.

During the month, no material was furnished to the Atlantic Division for use in the construction of Gatun Dam, the total amount remaining at 5,374,310 cubic yards.

There were furnished during the month to the Panama railroad for the breakwater in Colon 12,221 cubic yards, the total amount to date furnished for this purpose being 89,133 cubic yards.

During the month of September, 299 lineal feet of double track trestle were driven for the Naos Island breakwater, making a total to date of 2,317 lineal feet of double track trestle driven for this purpose. There were 24,020 cubic yards of material dumped during the month, a total of 848,965 cubic yards having been dumped to date. The total distance constructed to date is 16,483 lineal feet. There still remains to be driven about 204 lineal feet.

The daily average number of laborers at work in the whole division during the month

was 6,034, while the average number of gold men working was 568.

Pacific Division.

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation during the month amounted to 150,561 cubic yards, of which 98,809 cubic yards were classified as earth and 51,752 cubic yards as rock.

Filling and embankment—During the month of September, 13,615 cubic yards of dry filling were added to the prism of Pedro Miguel west dam, increasing the total amount of material in place at the end of the month to 624,687 cubic yards. The backfill at Pedro Miguel was increased by 17,296 cubic yards, the total quantity in place at the close of the month being 710,722 cubic yards.

At Miraflores, the dry filling in the toes of the west dam was increased by 17,970 cubic yards, making the total quantities of dry and hydraulic filling in place at the end of the month 1,342,554 cubic yards, and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 51,834 cubic yards, increasing the total amount in place at the end of the month to 835,097 cubic yards.

Pedro Miguel Lock—During the month, excavation was continued in the Canal prism, south of the locks, in the vicinity of the guide wall extension, opening up a new drainage channel to divert the drainage from Culebra Cut away from the foundation work of guide wall extension. Two steamshovels were engaged in this work. Backfilling of east and west lock walls and filling in of lower approach wall were continued. One steamshovel completed the excavation for the northwest wing wall.

Concrete work—The total amount of concrete and large stone laid at Pedro Miguel was 3,039 cubic yards, as compared with 6,413 cubic yards during August. The concrete was placed, as follows: Twenty-five cubic yards in the northeast wing wall, 948 cubic yards in the northwest wing wall, 402 cubic yards in the east wall, 102 cubic yards in the center wall, 210 cubic yards in the west wall, 466 cubic yards in the floors, 105 cubic yards in the southeast wing wall, 618 cubic yards in the south center guide wall, 52 cubic yards around ducts in tunnel "A," and 111 cubic yards around ducts in tunnel "C."

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours).....	8.00
Average number of hours per day worked laying concrete and large stone (actual working time).....	5.22
Average number of mixers per day.....	2.71
Average hourly output per mixer, actual working time (cubic yards).....	8.95
Large rock laid (cubic yards).....	3,039.00
Concrete laid (cubic yards).....	3,039.00

Total concrete laid (cubic yards) 3,039.00

Auxiliary plant consisted of four one-half cubic yard mixers, daily average number being 2.71. Concrete placed by mixers discharging directly into forms.

Miraflores Locks—Dry excavation was continued in the Canal prism, south of the locks, using an average of 10 steamshovels, the spoil being used for backfill of locks, for filling the west dam, and for filling swamps. One steamshovel was used to excavate the section of high ground crossing the north approach wall site; also, for a portion of the northeast wing wall area. Work of excavating for the spillway dam and junction with the lock wall was carried on during the month, both by hydraulic method and by hand. The construction of the north approach wall and the northwest wing wall was continued.

In order to facilitate the work in the forebay district, the dikes for preventing high river water from entering the locks were removed. A trestle is being driven for the construction of a new dike, which will permit excavation of the Canal by dredges to extend about 3,000 feet further north than the dike which at present separates the wet and dry excavation south of Miraflores. The intervening area is being drilled and shot to grade in the dry. The amount of iron placed in the masonry amounted to 1,436,729 pounds.

Concrete work—The total amount of concrete and large stone laid at Miraflores was 46,122 cubic yards, as compared with 75,388 cubic yards during August. The concrete was placed, as follows: Three thousand seven hundred and twenty-three cubic yards in north center guide wall, 3,101 cubic yards in east wall, 13,605 cubic yards in west wall, 12,588 cubic yards in center wall, 513 cubic yards in the floors, 2,354 cubic yards in the southeast wing wall, 10,144 cubic yards in south center guide wall, 51 cubic yards around ducts in tunnel "A," five cubic yards around ducts in tunnel "B," and 38 cubic yards around ducts in tunnel "C."

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	5.92	6.66
Average number of mixers per day	6.29	7.92
Average hourly output per mixer, actual working time (cubic yards)	29.57	22.19
Average amount of concrete and large stone laid per hour per berm or chamber crane (actual working time) (cubic yards)	43.52
Large rock laid (cubic yards)	30,226.00	15,954.00
Concrete laid (cubic yards)	30,226.00	15,954.00
Total concrete laid (cu. yds.)	30,226.00	15,954.00

Permanent plant consisted of four berm cranes and four chamber cranes. Auxiliary plant consisted of two 2-cubic yard mixers, two 1-cubic yard mixers, and seven $\frac{1}{2}$ -cubic yard mixers; average number per day being 1.83, 1.12, and 4.91, respectively. The output was placed by both permanent and auxiliary plants, the latter consisting of locomotive cranes and derricks; also, a number of $\frac{1}{2}$ -cubic yard mixers discharged directly into forms.

DISTRICT NO. 2—DREDGING, BALBOA SHOPS, AND SHIPWAYS.

The following is a statement of the output of the six dredges which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE	Type.	WORK.		PLANT.		Total.	Remarks
		Earth	Rock	Earth	Rock		
		Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.		
Cardenas	Dipper	1,600	8,625	2,000	200	12,425	Scow measurement
Corozal	Ladder	58,500	46,800	105,300	Scow measurement
Marmot	Ladder	66,097	66,097	Scow measurement
Badger	Ladder	4,900	4,900	Scow measurement
Mole	Ladder	10,350	7,020	17,370	Scow measurement
Culebra	Suction	148,387	148,387	Scow measurement
Total		289,834	62,145	2,000	354,179	
Hydraulic excavation		120,337*	15,422	200	135,759	Place measurement
Grand total		410,171	62,145	17,422	200	489,938	

*117,337 cubic yards excavated from Canal prism, south of Miraflores lock site; 3,000 cubic yards excavated from site of Miraflores spillway dam.

Chamé sand excavation—Approximately 39,385 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa sand bins.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, and

oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.	
Length of working day (hours)	8.00
Average number of hours per day (actual working time)	6.30
Average number of cubic yards crushed per hour per working day	191.57
Average number of cubic yards crushed per working hour	256.87
Total output for the month (cubic yards)	41,379

Quartermaster's Department.

LABOR.

Labor—The force has continued about the same. The McClintic-Marshall Construction Company has increased its force very materially. There have been a number of calls for 10-cent laborers, but the shortage during the month has not been acute.

Buildings—Two type-14 houses at Culebra have been taken down, and work is to be started on the demolition of another building of this type. The Young Men's Christian Association building at Culebra, and two French cottages, were demolished during the month, all of the above having become necessary on account of slides.

Quarters—There has been an increase of over 400 bachelors in gold quarters and over 400 West Indians in silver quarters. There has been considerable congestion in bachelor quarters at the Pacific end, and also in the Gatun district.

Material and supplies—The total value of material received during the month was \$885,054.85. Supplies were delivered by 34 steamers, the total weight of cargo, exclusive of lumber and piling being 14,868 tons.

Subsistence Department.

The operation of the European laborers' messes, colored laborers' kitchens, and line hotels showed a net profit of \$2,896.11. The operation of the Hotel Tivoli showed a net profit of \$99.35. There was a net loss on penitentiary restaurants, tugs, and dredges of \$25.08, making the net profit on subsistence operations for the month \$2,970.38.

Department of Civil Administration.

During the month, one criminal case was disposed of in the Supreme Court; 31 civil and 39 criminal cases in the Circuit Courts; and 42 civil and 599 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for September amounted to \$369,094.81, and the fees to \$1,765.75. Receipts from stamp and card sales and newspaper postage aggregated \$6,906.49.

vessels cleared from the port of Ancon; and 17 vessels entered at and a like number cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 593, of whom 544 were men and 49 women. Twenty nations, or 47 separate states and dependencies were represented. The total number of arrests for the month was an increase of 71, as compared with the month of August. Eight convicts were committed to the penitentiary and 10 were discharged, leaving 135 convicts in confinement at the close of the month. The cost of guarding and subsisting the convicts was \$2,702.15, and the value of their work on the Canal Zone roads was \$2,260.15.

DIVISION OF FIRE PROTECTION.

Five fires were reported in the Canal Zone during the month. The damage to private property was \$40.

DIVISION OF PUBLIC WORKS.

In the city of Panama, the average daily consumption of water was 1,562,266 gallons, and in Colon, 1,074,184 gallons. The usual inspection and maintenance work in this division was performed during the month.

DIVISION OF SCHOOLS.

The schools were not in session during the month.

Department of Sanitation.

The total number of deaths from all causes among employes was 39. These were divided, as follows: From disease 27, and from violence 12, giving the annual average per thousand of 6.36 and 2.83, respectively, on the basis of the number of employes estimated by the Department of Sanitation. The annual average death rate per thousand among employes for the month of September, 1911, was 14.43.

The annual average death rate per thousand in the Canal Zone, and in the cities of Colon and Panama, including both employes and nonemployes was 22.42. This rate is based upon a population in the Canal Zone of 62,810, according to the census of February, 1912, and a population in Panama and Colon of 47,172, and 20,232, respectively, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of September, 1911, was 21.56.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes, was: For whites, 4.92; for blacks, 6.81; giving a general average for disease of 6.36. For the same month during 1910, the annual average death rate per thousand from disease among whites was 3.58, blacks, 9.46, giving a general average of 7.89; and for the same month during 1911, whites 5.95; blacks 12.24, giving a general average of 10.63.

Among employes during the month, deaths from the principal diseases were, as follows: Dysentery, bacillary, one; malaria fever, E. A., two; lobar pneumonia, two; tuberculosis, eight, leaving 14 deaths from all other diseases, and 12 deaths from external violence.

No cases of yellow fever, smallpox, or plague originated on, or were brought to the Isthmus during the month.

Respectfully,

GEO. W. GOETHALS,
Chairman.

The total collection of revenues made by the division was \$24,721.10, and the collection on account of court fines, costs, and fees, \$2,773.41. During the month, a total of \$111,786 was deposited in postal savings accounts, and a total of \$91,999 was withdrawn.

Twenty-eight vessels entered at and 26

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Arrangements have been made with the Panama railroad and the Central and South American Telegraph Company, whereby special telephone wires, operators, and messengers will be employed by the Y. M. C. A., to furnish election returns direct to the various clubhouses, immediately upon their receipt at the cable office. Special programs, mock elections, etc., will be furnished for the amusement of spectators during the interim between the receipt of returns.

The schedule of moving pictures for the week of October 28 to November 2 is, as follows: Monday, Empire; Tuesday, Culebra; Wednesday, Corozal; Thursday, Gatun; Friday, Gorgona; Saturday, Cristobal.

COROZAL.

The local handicap pool tournament is about two-thirds over, and Messrs. Patrick, Souder, and Staggs are in the lead.

An old-fashioned Halloween social is scheduled for Thursday night, October 31.

The Gatun basketball team will play Corozal on Saturday evening, October 26, at Corozal.

The Empire bowling team will play the Corozal team on the local alleys, on Saturday, October 26. The result of last Saturday's games was: Culebra, 2; Corozal, 1.

EMPIRE.

The tournament games bowled on Saturday, October 19, between Empire and Cristobal, on the Empire alleys, resulted in Empire losing two games. The scores were, as follows:

Empire..... 857..... 886..... 778
Cristobal..... 865..... 778..... 875

Mr. D. H. McCollough won the October handicap pool tournament. Twenty men entered.

On Saturday, October 19, the members of the boys' department, to the number of 15, were taken on an outing to Old Panama. Mr. Russell was in charge.

GORGONA.

The Gorgona chorus has been organized, and will soon be ready to give special concerts.

A special program in politics has been arranged for the following parties: Independent, Republican, Democratic, Socialist, and Progressive. The different parties are headed by committees; each have elected a local commission, and on election day, Gorgona will vote on the several candidates.

The gymnasium classes meet Tuesday and Thursday nights at 7.45 o'clock. Every one is invited.

GATUN.

The San Blas trip, applications for which have been received at the clubhouse, will not be taken, no boat being available.

Of the 416 members of the Gatun clubhouse, 60 are employees of the McClintic-Marshall Company. A special effort is being put forth to induce more employees of this company to join the association.

Y. M. C. A. souvenir books are being sold at the desk at \$1 each.

A political campaign will be conducted in Gatun, beginning October 21. Party conventions will be held, and national and local candidates named. The election takes place on November 5.

A firm of bowling alley manufacturers has donated a loving cup to the Gatun association, as a prize for the pool team which recently won the all-Isthmian tournament.

Louis DePoorter won first prize in the "Lock City" billiard tournament, and will receive a handsome gold medal. Chas. C. G. Wurster will be given a gold medal for second prize, and J. T. Neely, a silver medal for third prize. Mr. DePoorter won the prize also, of a cue for the high run of the tournament.

The following men have signed up for the handicap "Pocket billiard tournament": Coleman, 60; Townsley, 50; Cheeks, 60; Dewey, 80; Wurster, 75; Gamble, 50; Miller, 60; Johnson, 60; Bellringer, 60; Eggleston, 60; and Dennis, 50.

CRISTOBAL.

During the past week, the volleyball men have been on the floor two nights with an attendance of 25.

The basketball game between Cristobal and Corozal was played on the Cristobal floor. The men played in the game are as follows:

Corozal..... Cristobal.
L. C. Wright..... right forward..... Mathues
Ed. Roberts..... left forward..... M. Schwallenberg
Chadbourne..... center..... Howe
R. S. Porter..... right guard..... Cousineau
Reed Morris..... left guard..... Hughes
Morton relieved Howe, and H. Schwallenberg relieved M. Schwallenberg in the second half.

Score: Corozal, 13; Cristobal, 11.

Field goals—Wright, 2; Roberts, 5; Chadbourne, 2;

Mathues, 2; Howe, 2; . One goal was made for Cristobal accidentally by Porter of Corozal.

Free throws—Wright, 2; Howe, 1.

Cristobal claimed two field goals which were disallowed; also, one foul. Game finished under protest.

The highest score in tenspins for the week was made by W. Burn—222.

On Wednesday, October 16, Mr. Walter Shutes engaged seven of the local chess players in a simultaneous match, winning eight games and losing one, as follows:

	Won.	Lost
Alper.....	1.....	0
Rattiner.....	0.....	1
DuBois.....	0.....	1
Cleall.....	0.....	1
Parker.....	0.....	1
Patterson.....	0.....	2
Gill.....	0.....	1

PORTO BELLO.

Under the supervision of the ladies, plans are being formed to celebrate Halloween in a fitting manner. Mrs. Cornelison, Mrs. Smith, Mrs. Cleveland, and Miss Moon are in charge of the committees.

The "Hook worm" was the theme for consideration at the discussion club at its last meeting. Dr. Gibson was in charge. At the meeting, Thursday, November 3, the subject will be "How shall users of the Panama Canal be taxed?"

An informal song service was held on Saturday evening, October 19. The program consisted of popular songs, together with vocal solos by Messrs. Ross and Dickson.

Rainfall from October 1 to 19, 1912, Inclusive.

Obituary.

Thomas Stannage, an employee, at Pedro Miguel, of the First Division of the Chairman's Office, died in Ancon Hospital on October 14, after a month's illness. He was 45 years of age, married, and had been employed on the Isthmus one day.

Red Cross Finances.

The financial statement of the Canal Zone chapter, American National Red Cross, for the month of September, 1912 is, as follows:

RECEIPTS.	
September 1, On hand.....	\$2,006.36
18, Returned by ex-employee of loan made November 29, 1911.....	150.00
Total receipts.....	\$2,156.36
DISBURSEMENTS.	
September 6, Postage.....	\$ 2.00
6, Relief of patient in Colon Hospital, deported to Jamaica.....	7.00
18, Meals furnished destitute man at Cristobal.....	25.50
20, Relief of destitute missionary, Colon.....	60.00
30, Relief of wife of ex-employee who is ill in Ancon Hospital.....	20.00
Total disbursements.....	\$ 114.50
September 30, Balance on hand.....	\$2,041.86
JOHN L. PHILLIPS, Treasurer.	
Approved:	
WM. L. SIBERT, Vice-Chairman.	

United Spanish War Veterans.

A special meeting of Chagres Camp, No. 1, United Spanish War Veterans, will be held at the Empire lodge hall, on Sunday, October 27, at 3 p. m., for the purpose of making arrangements to meet the Congressional Committee when it comes. Congressman Cragg will be here, and it is desired to honor him on account of his work in behalf of the veterans. Remarks for the good of the order will be made, and refreshments will be served. A large attendance is requested.

OFFICIAL CIRCULAR.

Acting Superintendent of Telegraph and Telephone.

PANAMA RAILROAD COMPANY.
COLON, R. P., October 15, 1912.

CIRCULAR No. 171:

Heads of Departments—Effective this date, Mr. C. J. Geldes will act as superintendent of telegraph and telephone during the absence of Mr. C. L. Bleakley, on leave.

J. A. SMITH, General Superintendent.

Misdirected Letters.

ANCON, C. Z., October 23, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressee:

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the two weeks ending October 19:

Ancon, October 5, from New York, with 126,349 bags cement, for Pacific Division; 150 barrels cement, for Panama Railroad Company; 900 kegs wire nails, 150 barrels fire clay, for stock.

Carrillo, October 6, from New York, with 72 cases elevators, for superintendent of erection; 34 barrels galvanized conduit, for Mechanical Division; 6 cases electrical material, for Panama Railroad Company; 190 coils Manila rope, 10 cases hardware, for stock.

Sachsenwald, October 7, from Antwerp, with 22 cases valve machinery for superintendent of erection.

Demara, October 6, from Bellingham, Washington, with 179 pieces piling, 954 bales hay, for stock.

Alexandrian, October 6, from Liverpool, with 200 barrels carbolic acid, for stock.

Santa Marta, October 7, from New York, with 102 cases soap, 3 cases sheet brass, for stock; 185 packages track material for superintendent of erection.

Atenas, October 10, from New Orleans, with 286 pieces piling, 1,370 pieces lumber, 98 sacks feed, 15 cases neatfoot oil, for stock; 689 pieces lumber, for Mechanical Division; 9,600 sacks cement plaster, for Panama Railroad Company.

Advance, October 11, from New York, with 25 barrels fluorspar gravel, 31 pieces car knuckles, 77 bundles castings, 33 pieces locomotive tires, 10 cases dry cell's, for Mechanical Division; 13 crates marble, for Panama Railroad Company; 34 cases drugs and sundries, for Sanitary Department; 40 cases electrical material, 63 cases insulators, 27 packages steel, for superintendent of erection; 16 reels wire rope, for Panama Railroad Company; 20 cases ranges and parts, 100 sacks wooden plugs, 109 cases bolts and washers, 20 kegs horseshoes, 40 kegs wire nails, 400 kegs bolts, 53 pieces oak lumber, 21 reels wire rope, 10 barrels castings, 300 pieces iron pipe, for stock; and a miscellaneous cargo, the whole consisting of 1,566 packages, weighing 180 tons.

Bongor, October 11, from Baltimore, with 282 cases blasting caps, 19 drums gas engine oil, 4,834 pieces sewer pipe, 550 bundles splice bars, 100 cases turpentine, 250 kegs white zinc, 5,574 pieces wrought iron pipe, 1,158 bundles wrought iron pipe, 18 pieces sheet steel, 601 pieces steel bars, 60 bundles steel bars, for stock; 644 bundles steel bars, for Division of Fortifications; 1,264 bundles steel bars, for Pacific Division; 435 pieces beams and girders, for Panama Railroad Company; 402 crates track castings, 154 cases gate machines, 200 cases track machinery, 183 cases structural steel, for superintendent of erection.

Turrialba, October 13, from New York, with 18 cases ink and mulage, 13 cases paint, 10 cases packing, 23 cases wire cloth, 135 kegs nuts, for stock; 12 barrels

graphite paint, 70 packages castings, 184 packages track material, for superintendent of erection; 4 crates plumbing material, for Panama Railroad Company.

Prinz August Wilhelm, October 14, from New York, with 5 cases stationary, for stock.

Cristobal, October 15, from New York with 177,293 bags cement, 16 cases boiler coverings, 27 pieces castings, for superintendent of erection; 80 pieces steel channels, Panama Railroad Company; 70 packages pipe-fittings, 20 cases valves, 10 cases hardware, for stock.

Panama, October 15, from New York, with 6 cases elevator car material, 19 reels wire, for Panama Railroad Company; 15 cases lamps, 12 cases lanterns, 10 cases rubber hose, 8 cases grindstones, 11 cases magnesia covering, 61 crates galvanized pails, 15 cases mining machinery, 10 cases belt dressing, 8 reels wire rope, 8 bales rakes, for stock; and a miscellaneous cargo, the whole consisting of 300 packages, weighing 50 tons.

Metapan, October 16, from New York, with 252 bundles steel bars, for stock; 20 cases motors, for superintendent of erection.

Parissima, October 18, from New Orleans, with 178 tons pig iron, 3,325 pieces lumber, for Mechanical Division; 50 barrels plaster paris, for Panama Railroad Company; 96 packages push cars, 20 cases paint, 354 pieces piling, 1,308 pieces lumber, for stock.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Hotel Tivoli, Ancon, C. Z., Sunday, October 27, at 8 p. m. The program follows:

1. March—*King of the Air*.....Everlof
2. Excerpts from *The Pink Lady*.....Curry
3. Waltz—*Imagined Dream*.....Rosas
4. Overture—*Le Pre aux Champs*.....Herold
5. Intermezzo—*Indian Summer*.....Moret
6. (a)—*Il onnespise*.....Dvorak
- (b)—*Three Little Songs from Carmen*.....Bizet
7. Potpourri of popular songs.....Harris
8. —*La Paloma*.....Vendier
9. March—*Yankee Doodle*.....Kaine

CHARLES E. JENNINGS, Musical Director.

The next concert will be given at Gatun, November 3, at 5 p. m.

COMMISSARY DEPARTMENT.

Cold Storage Prices.

The following changes have been made in the prices of cold storage supplies:

Eggs fresh, reduced to 35 cents per dozen, or 18 cents to the half dozen.

Birds fresh, advanced to 15 cents per pound.

Halibut fresh, advanced to 15 cents per pound.

Oysters in quart kegs advanced to 50 cents a keg.

Bacon, breakfast, whole piece, advanced to 25 cents a pound.

Bacon, breakfast, sliced, advanced to 26 cents a pound.

Celery, reduced to 5 cents a head.

Apples, reduced to 4 cents a pound.

Lemons reduced to 24 cents a dozen.

Jersey sweet potatoes, cantaloupes, grapes, watermelons, and peaches, out of stock.

Sale of Surveying Instruments, Compasses, and Ship's Log.

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., October 21, 1912.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, C. Z., until 2 o'clock p. m., November 9, 1912, when they will be opened in the presence of attending bidders, for any and all surveying instruments, compasses, and ship's log now on hand in the storehouse for obsolete material. These instruments may be seen on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m., on application to this office. The right is reserved to reject any or all bids or any combination of bids. Bids must be sealed and plainly marked: "Proposal to purchase Surveying Instruments," and addressed to the Depot Quartermaster, Mount Hope, C. Z.

CHARLES L. PARKER,

Acting Depot Quartermaster.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

LOST—Large coral cameo, plain gold mounting, between Y. M. C. A. clubhouse, Cristobal, and Colon Hospital, on Sunday evening, October 20. Reward, if returned to Colon Hospital office.

FOUND—Pocketbook containing money and metal check. Owner may have same by applying to G. A. E. Barnes, office of McClintic-Marshall Company, Pedro Miguel.

MOVEMENT OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 2 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending October 19:

Arrivals—October 13, *Santa Rita*, from San Francisco; October 15, *Quito*, from Guayaquil, and intermediate points; October 15, *Peru*, from Guayaquil; October 16, *Maniara*, from Callao; October 17, *Chile*, from Guayaquil; October 19, *City of Para*, from San Francisco; October 19, *Manari*, from intermediate points.

Departures—October 13, *Guatemala*, to Callao; October 13, *Manari*, to Buenaventura; October 14, *Portland*, to San Francisco; October 15, *Ucayali*, to Callao; October 15, *Asen*, to Valparaiso; October 15, *Santa Rita*, to San Francisco; October 19, *Barracouta*, to San Francisco; October 19, *City of Panama*, to San Francisco.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication, or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

New Bridge at Monte Lirio in Use.

The new railroad bridge across the Gatun River at Monte Lirio was placed in regular service on October 26. The permanent bridge is of three spans, using some of the 103-foot girders from the demolished Barbacoas bridge of the old main line, across the Chagres River near San Pablo, and is supported on concrete buttresses and piers. Its center span is to be a bascule. Delivery of the lifting mechanism has been greatly delayed by the contractor, but when it arrives, its installation may be effected without interference to traffic.

Additional Bachelor Accommodations at Gatun.

Owing to the increase in the number of Americans employed by the gate and emergency dam contractors at Gatun, the accommodations for bachelor employees have been entirely exhausted, and it has been necessary as a temporary expedient, to assign four men to a room in several of the Type-5 houses. This situation will be relieved by the conversion of some labor camps into bachelor quarters, and by moving families occupying nonhousekeeping quarters into housekeeping quarters. The number of bachelor employees quartered at Gatun on Saturday, October 26, was 715, of which 482 were Canal Commission employees, and 233, men employed by the contractors.

Public Telegraph Office in Colon Station.

The public telegraph office for Colon and Cristobal has been moved from the general office building of the Panama Railroad Company to the Colon passenger station, in which it is conveniently located in the first-class waiting room, next to the entrance gates. The office was opened on October 22, and is operated in connection with a bureau of general information concerning Cristobal and Colon, the railway and steamship schedules, and accommodations on the Isthmus

for the traveler. The rate for telegraph messages between any points on the Panama railroad is twenty-five cents for 10 words, or less, and two cents for each word above 10, for unrepeat messages; the address and signature are counted as part of the body of the message. The hours at which the office is open on week days, are from 8 to 11.25 a. m., and from 1.30 to 6 p. m.; and on Sundays and holidays, from 9 to 11 a. m., and from 2 to 4 p. m.

Small Slide on Gold Hill.

The recent heavy rains have started a small slide of material from the south shoulder of Gold Hill. The mud flowed down into the Cut and covered some of the construction tracks. The quantity of material involved is small, amounting to about 5,000 cubic yards.

Award on Structural Steel for Permanent Shops.

Award has been made to the United States Steel Products Company for furnishing and erecting in place structural steelwork, amounting to approximately 7,000,000 pounds, required in the construction of the following permanent shop buildings at Balboa:

Building No.	Type.
1.	Machine, erecting, and tool shops.
2.	Forge shop.
3.	Steel storage shed.
4.	Boiler and ship fitters' shop.
5.	General storehouse.
6.	Paint shop.
7.	Car shop.
8.	Planing mill.
9.	Galvanizing building.
10.	Lumber and equipment shed.
11.	Pattern storage building.
12.	Foundry.
13.	Coke shed.
14.	Boiler house.
15.	Roundhouse.
16.	Gas house

Circular No. 730, under which the bids were opened, not only called for the erection of the structural steelwork in place, but, in the case of the machine, erecting, and tool shops, forge shop, steel storage shed, boiler and ship fitters' shop, galvanizing building, and foundry, included erection of the crane rails. Two separate proposals were called for, as follows:

Bid A—Price for furnishing and erecting all of the structural steel work in place, including erection of the crane rails.

Bid B—Price for furnishing a portion of the structural steelwork, delivered, unloaded, and stored at the building site by the contractor, but erected and field painted by the Canal Commission.

The purpose of the two bids was, that while all of the above work would be awarded to one contractor, the award to be based upon the price per pound in Bid A, conditions might prevent the completion of the foundations for the two bays and the crane runway extension in the machine, erecting, and tool shops, in time for the contractor to com-

plete the erection of the steelwork for those sections of the structures, including crane rails, in which event, the erection would be performed by the Canal Commission, and payment on material not erected by the contractor, based on Bid B.

The United States Steel Products Company was the lowest responsible bidder in both instances, and its offer was more favorable as to time of completion. Its price per pound for the structural steel under Bid A, was three and six-tenths cents, and under Bid B, two and three-fourths cents, the total contract representing a value of about \$410,000. The company proposes to begin erection on May 1, 1913, and to complete the work on October 1 of the same year.

All the material for the buildings mentioned above is to be furnished and erected complete by the contractor, with the exception of metal screens, roofing and siding, masonry plates, anchor bolts, and anchor angles, which will be supplied and set up by the Canal Commission. All of the foundations will be built by the Commission also. A general description of the permanent facilities at the Atlantic and Pacific entrances to the Canal will be found on another page of this issue of THE CANAL RECORD.

Structural Steel for Gatun Hydroelectric Station.

In response to invitations under circular No. 736, bids were opened in Washington on October 12 for furnishing the structural steel required for the Gatun hydroelectric station in the following amounts:

Gatehouse.	Pounds
1. Structural steel.....	29,850
2. Grating*.....	25,780
3. Stairways*.....	2,660
4. Miscellaneous steel*.....	22,800
5. Stop logs*.....	20,550
Total.....	101,640
Station building.	Pounds
6. Building columns.....	128,140
7. Gallery columns.....	13,880
8. First floor steel.....	3,690
9. First gallery steel.....	23,415
10. Second gallery steel.....	68,490
11. Roof trusses.....	162,700
12. Purlins.....	136,660
13. Wall trusses.....	34,020
14. Crane runways.....	57,580
Total.....	628,575
Grand total.....	730,215

*To be erected by the Canal Commission.

The bid of the United States Steel Products Company for fabrication only of all of the above items was \$25,400, with delivery complete in 250 days.

The bid of the same company for delivery and erection of the steelwork on item 1, and items 6 to 14, and fabrication of the steel on items 2 to 5, inclusive, was \$35,300, delivery of all material on the Isthmus to be made in 250 days, and the erection to be made in 45 days thereafter.

The bid of the Ritter-Conley Company of Pittsburgh was for fabrication only; amount,

(Continued.)

The time of delivery was considered as a very important factor, inasmuch as the plant and equipment for the station are either under contract, or already on the Isthmus. The date of delivery specified in the bids of the United States Steel Products Company was regarded as unsatisfactory, and representations were made to that effect. Attention was called to the damage of one-tenth of one per cent a day set forth in circular No. 736, which would be offered for early delivery. A reply to this was received stating that delivery would be anticipated as much as possible, and that the unusual length of time for making delivery was due to a congestion in the steel mills. The United States Steel Products Company, the lowest bidder, has been awarded the contract.

The concrete work in the Spillway of Gatun Dam is over 92 per cent completed, 207,441 cubic yards, out of a total of 225,000, having been placed at the close of work on October 26. A statement of the amount laid each working day last week, and of the total in place, follows:

Lieut.-Col. T. C. Dickson, Capt. R. E. Wood, and Mr. H. S. Farish, have been appointed a committee in connection with the appraisal of Marion and Bucyrus steam-lovels to be offered for sale.

On the night of the national election in the United States, November 5, the Panama railroad will run passenger trains on the regular Saturday night schedule, in order to afford employees along the line opportunity to visit points at which the returns from the election will be received. The returns will

The Ancon lodge, Knights of Pythias, has made arrangements to receive election returns at Ancon Hall, on the evening of November 5.

Six of the eight new electric cargo-handling cranes erected on the old steel wharf at Balboa have been completed and are giving service. The other two will be ready for use in a few days. The official test of these machines has not yet been held. Two of the old cranes, placed out of commission when the lumber wharf was demolished, will be set up on the steel wharf.

Over 93 per cent of the concrete for the locks is in place, the amount at the close of work on October 26, being 4,070,166 cubic yards, out of a total of approximately 4,352,563. A total of 14,235 cubic yards of concrete was laid in the locks during the week ending October 26.

Over 92 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on October 26 being 1,901,138 cubic yards, out of a total of 2,050,000. A statement of the amount of concrete placed in the locks each working day of the week ending October 26, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

PEDRO MIGUEL LOCK.

MISSIONARY CONVENTION.

Representatives of Organizations of Church Women Meet at Empire.

A missionary convention was held at Empire on Friday afternoon, October 25, with delegates present from each organization of women in the Canal Zone engaged in church work. The ladies' auxiliary of the Empire Christian League, at whose invitation the women convened, had prepared a varied and interesting program, giving liberal space to the methods of missionary work of the different churches, and the delegates listened to the papers and addresses with interest. The chapel was tastefully decorated for the occasion with palms, potted plants, and a profusion of bright flowers.

Mrs. A. A. Nellis, the president of the auxiliary, presided. The spirit of the convention was emphasized by the presence of four women actively engaged in missionary work. These were Mrs. Harry Compton, missionary of the Methodist Episcopal church of Panama, and head of the missionary school of that city; Mrs. Stephen Witt of Gatun, Baptist missionary; Mrs. Sobey, widow of the late Rev. J. H. Sobey, for many years missionary in Costa Rica and Panama; and Miss Annie Coope, a worker among the Indians in South and Central America, and the only missionary who has penetrated the San Blas country. The program, which has already been published in THE CANAL RECORD, included papers on the teaching of missions in the Sunday schools, missionary work in South America, the women's auxiliary of the Episcopal church, an exercise illustrating some of the features of the Hindoo religion, and piano and vocal solos by the young girls of the auxiliary. Mrs. Carl H. Elliott, of the Cristobal Union church led the devotional exercise. Mrs. H. A. A. Smith of Empire welcomed the delegation, and the response was made by Mrs. Fortney of Gatun.

Agreeable to the request from the presiding officer, Mrs. Frederick Mears of Christ Church Women's Guild gave an informal résumé of the program, classified under the title of "The spirit of the convention." General impressions gathered were: The spirit of work for others, the elevation of womanhood by the Christian religion; the opportunities for character building during temporary residence in the Canal Zone; the organization and scientific administration of the missionary work of the women in the Episcopal church; the duty of Sunday school leaders and teachers to teach missions to the young under their charge, the intolerance of the Eastern religion, as brought out in the exercise presented by Mrs. Goolsby, assisted by the Misses Marion Blake, Phyllis Kelly, Juanita Pearson, and Beatrice Catto; and the "Personal" missionary effort possible to all women at home as well as abroad.

Following the program, refreshments were served by the Empire auxiliary.

The interest in the convention was such that plans were spoken of for a second missionary meeting of like character, two, or more, organizations to combine in entertaining.

Religious meetings have been held at different times in the Canal Zone since 1907, but the Empire convention is the first meeting of women's organization of this character.

Friday, November 1, is the fifth annual meeting day of the Women's Guild of St. Luke's Church, Ancón. There will be a service

with corporate communion, and an address by the chaplain in the chapel at 10 a. m., and the annual meeting, with an election of officers, at the residence of Mrs. R. E. Noble, at 3.30 p. m. Regular meetings of the guild will be resumed according to the decision of this meeting.

Canal Zone Pythian Exhibit.

The Canal Zone exhibit at the Pythian Bazaar and States Exposition, held at Baltimore from October 1 to 12, was awarded the first prize for the most interesting display. The prize consists of a set of swords for a lodge altar. The bazaar and exposition was held in the Fifth Regiment Armory, under the auspices of the Grand Lodge of Maryland, with the cooperation of the grand lodges of the different states. Its object was to raise a fund for the erection of a new building in memory of Justus Henry Rathbone, the founder of the order. The Canal Zone exhibit was placed in a large enclosure, occupying one-fourth of the space in the hall, and a lecture, illustrated with stereopticon views, was held in a room set aside for the purpose. Features of the exhibit were: A model of Pedro Miguel Locks, contributed by the Government at Washington, model of Gatun Locks, Dam, and Spillway; relief map of the Canal Zone, the Canal Zone Red Cross, showing work done by the chapter, with views of the Red Cross fire relief camp at Colon, in March, 1911; display of pennants and collection of views, showing the activities of the Canal Zone clubhouses; Canal Zone public schools, specimens of work done by the pupils, models of the equipment course of studies and manual; native hut, full size, with cayuco paddles, tom-toms, pottery, tiger skins, alligator hides, iguana, birds, fiber, fiber bags and beadwork; enlarged photographic views of the cableways and Lidgetwood unloaders at work on the Canal; a display of ivory nuts, with views of the various processes of their manufacture into buttons; specimens of hardwoods and views of hardwood timber lands on the Bayano River; cocoa beans, with the methods of preparing them for the market; and panoramic views of Panama and the Canal Zone. In addition, there were miscellaneous collections of petrified woods, fossil-bearing rock, specimens of stones, earth, shells, and wood taken from the Canal, pearls from Pearl Islands, various books and pamphlets on the Canal and Panama, annual reports, and bound volumes of THE CANAL RECORD. The Canal Zone Pythian exhibition committee was composed of members from each of the eight local lodges, with C. O. Jones, of Gatun, as chairman. Their personal representatives in Baltimore were A. V. Dayton of Cristobal, and J. F. Stevenson of Gatun.

Twenty-four Rodger ballast dump cars have been transferred from the Atlantic Division to the Panama Railroad Company.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, engineers, and chauffeurs will be held by the Board of Local Inspectors at the Administration Building, Ancón, on Wednesday, November 6, 1912. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancón, forms of application, and information respecting the filling out of the same, not later

than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8 a. m., with papers in proper form. In addition, each applicant for chauffeurs' licenses must appear with an automobile and demonstrate ability to operate it.

Ancón Crusher.

The following is a statement of rock crushed at Ancón quarry during the week ending October 19:

DATE.	Hours worked.	Cubic yards.
October 14.....	7.20	2,956
October 15.....	6.55	2,112
October 16.....	7.55	2,858
October 17.....	7.55	2,400
October 18.....	6.55	2,432
October 19.....	7.00	2,109
Total.....	44.00	14,867

Tenpin League Individual Averages.

The individual averages in the Isthmian tenpin league, as of October 12, were, as follows:

Place.	Name.	Team.	Games.	Av.
1	Hodges.....	Gatun.....	6	191
2	Coonly.....	Corozal.....	6	187
3	Gustavson.....	Empire.....	6	181-1

Tug Service to Porto Bello and Toro Point.

Following is the schedule of Atlantic Division tugs in the service between Dock 13 and Porto Bello, and Dock 13 and Toro Point.

PORTO BELLO.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays.—Leave Dock 13 at 5 p. m., arrive Porto Bello 10 p. m., returning, leave Porto Bello 11 p. m., arrive Dock 13 at 3 a. m.

Saturdays.—Leave Dock 13 at 9 a. m., arrive Porto Bello 11 a. m., returning, leave Porto Bello 2 p. m., arrive pier No. 4, Colon, 4 p. m.

Every Saturday, except the first Saturday after the 20th of each month. *Sailing No. 1.*—Leave Dock 13 at 2 p. m., arrive Porto Bello 4 p. m., returning, leave Porto Bello at 4 p. m., arrive at pier No. 4, Colon, 6 p. m. *Sailing No. 2.*—Leave Dock 13 at 6 p. m., arrive Porto Bello 11 p. m., returning, leave Porto Bello 12 midnight, arrive Dock 13 at 4 a. m.

Sundays, immediately following the 20th of each month, ONLY.—Leave Porto Bello 6 a. m., arrive Dock 13 at 8 a. m.

TORO POINT.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays. *Sailing No. 1.*—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2.*—Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m.

Special, Wednesdays, ONLY.—Leave Dock 13 at 12 noon, arrive Toro Point 12.30 p. m., returning, leave Toro Point 12.30 p. m., arrive Dock 13 at 1 p. m.

Saturdays. *Sailing No. 1.*—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2.*—Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5.30 p. m., arrive Dock 13 at 6 p. m.

Sundays. *Sailing No. 1.*—Leave Dock 13 at 9.30 a. m., arrive Toro Point 10 a. m.; returning, leave Toro Point at 10.30 a. m., arrive Dock 13 at 11 a. m. *Sailing No. 2.*—Leave Dock 13 at 1.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5 p. m., arrive Dock 13 at 5.30 p. m.

YEAR IN THE CLUBHOUSES.

Gain in Membership and Revenues during Fiscal Year 1911-12.

On June 30, 1912, clubhouses were in operation at the following points: Corozal, Culebra, Empire, Gorgona, Gatun, and Cristobal, in the Canal Zone, and at Porto Bello, 17 miles along the coast.

The gold force consisted of one superintendent, seven secretaries, four assistant secretaries, one clerk, ten night clerks, six bowling alley attendants, six poolroom attendants, and seven barbers.

NEW EQUIPMENT.

During the year, bowling alleys, locker rooms, shower baths, and a barber shop were added to the Corozal clubhouse at a cost of about \$5,000, thereby greatly increasing the efficiency of the work at that point.

MEMBERSHIP.

	1911-12	1910-11
Total membership, end of fiscal year	2,092	1,872
Average monthly membership	1,944	1,947
Largest membership, any given month	2,092	2,121
Smallest membership, for any given month	1,784	1,712

Fifty-eight per cent of the gold employees living in clubhouse towns were members at the end of the fiscal year.

ENTERTAINMENTS.

	1911-12	1910-11
Number of companies engaged from the United States	7	5
Number of entertainments given	85	65
Total attendance	20,865	13,828
Number of entertainments given by local talent and moving pictures	406	277
Total attendance	96,072	56,708

Amateur oratorio societies, operatic troupes, glee clubs, mixed choruses, vaudeville, and black face sketches were organized during the past year through the efforts of the members, cooperating with the secretaries. Many of these organizations appeared at the various towns along the line.

The weekly moving picture exhibitions have become about the most popular form of entertainment in the Canal Zone. A man is employed to give his entire time to these exhibitions. Reels are ordered direct from the United States and a careful selection is made, which includes occasional educational features.

BOWLING, BILLIARDS, AND POOL.

Special tournaments were organized among the clubhouses during the year. Gold, silver, and bronze medals were awarded the winners, and the attendance was large. There were 104,954 games bowled, as against 88,895 for the previous year; 278,739 games of pool and billiards were played, as against 217,710 for the previous year.

PHYSICAL WORK AND ATHLETICS.

Trained physical directors have continued the policy of giving to employees the various forms of exercise most beneficial to their health. There was an attendance of 15,199 at gymnasium classes during the year. A pentathlon meet was held at Empire on February 22, for the purpose of developing all-around athletics. A great deal of interest was developed in the Health League, organized for spreading useful knowledge as to the proper care of the body. The interasso-

ciation basketball and indoor baseball leagues were organized as usual.

RELIGIOUS MEETINGS.

The policy of holding religious meetings and song services, at such times as not to interfere with the organized religious work in the Zone, was continued. The average attendance at 214 meetings was 50, and the average attendance at Bible and discussion clubs was 52.

EDUCATIONAL WORK.

A great deal of interest was manifested in the study of Spanish, classes being held in six clubhouses. The work of the literary and debating societies was of real educational value to the members and a source of pleasure to those whom they entertained. Libraries range from 600 to 1,400 volumes, according to the town, from which 42,195 books were withdrawn for home reading during the year, as compared with 30,857 for the previous year. The reading rooms are supplied with the leading newspapers and periodicals of the day.

REFRESHMENT COUNTERS.

Soft drinks, ice cream, light lunches, etc., are served on the verandas of the clubhouses. The total income from this direction during the past fiscal year was \$49,398.05, as compared with \$36,421.08 for the previous year.

COMMITTEES.

Various committees are appointed from time to time by the secretaries as occasion demands. There are committees on bowling, pool, and billiards, membership, entertainments, etc. Important work was done by the visitations of the sick committee, who made 3,844 calls on hospital patients during the year.

BOYS' DEPARTMENT.

Boys from 10 to 16 years of age are allowed special privileges in the clubhouses. The secretaries endeavor to arrange several outings during the year, and so far as possible guide the activities of the boys into safe and helpful channels. The total membership on June 30, was 146.

FINANCES.

	1911-12.	1910-11.
Disbursements from Commission funds	\$ 50,565.61	\$51,193.90
Disbursements from clubhouse funds	114,732.02	81,510.51
Receipts for the year	118,390.56	91,723.76
Net balance, June 30	16,803.74	11,945.20

The financial management is in the hands of an advisory committee appointed by the Chairman and Chief Engineer, consisting of Mr. H. A. A. Smith, Examiner of Accounts, Mr. Joseph Bucklin Bishop Secretary of the Commission, Major H. A. Brown, Chaplain, U. S. A., and Mr. A. B. Dickson, Superintendent of Clubhouses. The general supervision of each clubhouse is in the hands of an Executive Council appointed by the International Committee of the Y. M. C. A.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Gatun, C. Z., on Sunday, November 3, at 5 p. m. The program follows:

1. March—*Spirit of Independence*.....Holzman
2. Selection—*The Red Widow*.....Gehest
3. Intermezzo—*Indian Summer*.....Moret
4. Overture—*Le Pre aux Clercs*.....Herold
5. Popular song—*Climb a Tree With Me*.....Harris
6. Waltz—*Impassioned Dream*.....Rosas
7. (a).....*Humoresque*.....Dvorak
7. (b).....*La Paloma*.....Vladier
8. Popular medley—*Harris' Hits*.....Clark
9. March—*King of the Air*.....Everlof

CHAS. E. JENNINGS, Musical Director.
The next concert will be given at Corozal, November 10, at 5 p. m.

TABOGA SANITARIUM.

Past Few Months Show Decrease in Number of Patients Admitted.

The number of patients admitted to Taboga Sanitarium for convalescence during the three months, following the close of the fiscal year 1912, was less than the number during any similar period since January 1, 1908. The American occupation of the sanitarium began in September, 1905. From July 1 to October 1, 1912, the daily average number of employees present as free patients was 45.057. The daily average of pay patients during that time was 22. A record of the number of patients received at the sanitarium during the calendar years since 1905, follows:

Year.	Daily average of employees	Number of employees.	Number of non-employees.	Total patients.
*1906		1,271	228	1,499
1907	38.45	2,020	393	2,413
1908	54.26	2,873	711	3,584
1909	59.78	2,706	657	3,363
1910	66.32	3,191	761	3,952
1911	58.92	3,002	723	3,725
†1912	47.39	1,955	914	2,869
Total		17,018	4,387	21,405

*No record for February, 1906.

†January 1 to September 30.

The reduction in the number of free patients has been due to a decrease of cases requiring recuperation at a sanitarium, in conjunction with greater strictness on the part of hospital physicians in interpreting requirements, in the interest of economy.

A spray pump has been furnished the sanitarium for treating with larvacide several spots at which water seeps from the hills above, and it is hoped practically to eliminate mosquitoes from the grounds of the institution. The drainage was effective for the topography, but breeding has been discovered in several puddles of adventitious origin. Among the species of mosquito which the sanitary inspectors have found at Taboga, there has never been an *anopheles*, of which, several subspecies are the secondary hosts in the transmission of malaria. The *stegomyia*, or yellow fever mosquito, is frequent, but there is no record of yellow fever on the island during the American occupation. By far the most usual mosquito at Taboga is the harmless black *culex*, which is found along all seacoasts of tropical and temperate countries.

Copper guards have been placed on the pillars supporting the sanitarium storehouse to prevent the passage of insects and rats. On top of each concrete base, not less than two feet above ground, was placed a pan, made of a rectangular sheet of copper, bent slightly downward in all directions and turned up at the edges, with the joints soldered. The wooden pillars rest on this. The pan extending about a foot on all sides forms a projection over which rats cannot climb, while crude oil around the edges, prevents the passage of insects. The steps of the storehouse were set on a separate base, with a space of several inches between them and the building. Since the adoption of these protective devices no rats or crawling insects have been seen in the storehouse.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

PERMANENT PROJECTS.

Description of Future Facilities at Atlantic and Pacific Entrances.

The permanent facilities at the Atlantic and Pacific entrances to the Canal will include the following projects:

PIERS.

The piers for commercial use at Balboa will be built at right angles to the axis of the Canal, with their ends about 2,650 feet from the center line of the Canal channel. They will be about 1,000 feet long, and 200 feet wide, with 300-foot slips between, and with landings for small boats at the head of each slip for the full width between piers. The construction of one pier only will be undertaken at first. The old French steel wharf, about 1,000 feet long, will be retained for some time in the future, for commercial purposes.

Two wharves and one pier are under construction at Cristobal, behind a mole and breakwater, built out from shore toward the Canal channel, and paralleling the boundary line between Canal Zone and Panamanian waters. An article on these docks, including their superstructures and cargo-handling appliances, was published in *THE CANAL RECORD* of October 16, 1912. Primarily, these docks are to meet the commercial requirements of the Panama railroad, but should there be enough traffic after the Canal is completed to justify it, four other piers, each about 1,000 feet long, and 209 feet wide, with 300-foot slips between, will be constructed.

DRYDOCKS.

The main drydock will be situated at Balboa, and will be capable of accommodating any vessel that can pass through the Canal locks. It will have a usable length of 1,000 feet, a depth over the keel blocks of 35 feet at mean sealevel, and an entrance width of 110 feet. The entrance will be closed by miter gates, similar to those used in the locks. The drydock will have a rock foundation, and its sides will be lined with concrete. Its equipment will include a 40-ton locomotive crane, with a travel on both sides.

For vessels of smaller type, an auxiliary drydock will be built at Balboa, in lieu of the marine railways originally contemplated. It will have a usable length of 350 feet, a width at entrance of 71 feet, and a depth over the keel blocks of 13½ feet at mean sealevel. It will be provided with a floating caisson. The 40-ton locomotive crane on the main drydock will be utilized for this dock also. The work of providing space for these drydocks, as well as for the new shops, is now under way, and requires the excavation of about 300,000 cubic yards of material from the northwest face of Sosa Hill. The excavated material is used in filling the site for the shops and terminal yard.

On the Atlantic side, it is proposed to retain the old French drydock at Mount Hope, which has a usable length of 300 feet, a width at entrance of 50 feet, and a depth over the sill of 13 feet at mean sealevel. It was the opinion of the board in charge of the dock projects, that the commercial requirements in sight would not warrant the construction of a drydock at Cristobal capable of accommodating large vessels, in view of the building of a drydock at Balboa, to which any large vessel on the Atlantic side could be taken and returned, in case it was found necessary to dock it for repairs.

COALING PLANTS.

The plans contemplate furnishing vessels

with fuel, fresh water, and supplies of all kinds. The main coaling plant will be situated on the north end of the island, opposite dock No. 11, Cristobal. It will be capable of handling and storing 200,000 tons of coal, with a possible increase of 50 per cent. One hundred thousand tons of the total normal storage is subaqueous. The plant will have railroad connection with the mainland over a bridge of the bascule type, which will cross the French canal at a point about half a mile south of the Mount Hope drydock. The preliminary work on this plant has been begun by the Panama railroad.

A subsidiary coaling plant will be situated at Balboa, at the outer end of the southeast approach wall of the drydock, having a frontage of 500 feet thereon, adapted for discharging vessels. This plant will be capable of handling and storing 100,000 tons of coal, with a possible increase of 50 per cent. Fifty thousand tons of the total normal storage is subaqueous.

FUEL OIL SUPPLY.

In addition to coal, facilities will be provided at Cristobal and Balboa for supplying shipping, and the Canal works, with fuel oil. In line with this plan, four steel tanks of 40,000 barrels capacity each, have been contracted for recently in the United States. A brief description of these tanks was published in *THE CANAL RECORD* of October 9, 1912.

SHOPS.

The main repair shops will be built at Balboa, and are designed to maintain the following equipment:

1. Lock, spillway, and power plant machinery. 2. Water and land equipment retained for the maintenance of the Canal. 3. Rolling stock and equipment of the Panama railroad. 4. Mechanical apparatus connected with the coaling plants, fortifications, cold storage plant, wireless stations, etc. 5. The making of repairs, etc., required by commercial vessels, and by private individuals and corporations. 6. The making of such repairs as may be required by vessels of the United States Navy.

The approximate floor area of the principal shop buildings will be, as follows:

Building.	Area. (Sq. Ft.)
Machine, erecting, and tool shop.....	68,400
Forge shop.....	32,400
Steel storage shed.....	18,080
Boiler and shipfitters' shop.....	46,800
General storehouse.....	96,000
Paint shop.....	12,760
Car shop.....	38,800
Planing mill, carpenter, and pattern shop.....	49,000
Galvanizing shop.....	5,620
Lumber and equipment store shed.....	67,060
Steel, iron, and brass foundry.....	37,600
Coke shed.....	3,070
Boiler house.....	2,500
Pattern storage building.....	14,400
Round house.....	24,000
Office building.....	9,500

Total..... 525,990

In addition to the above, a number of subsidiary buildings will be erected. All of the structures will be of permanent construction, with steel frames. The sides and ends will be left open for ventilation and light, protection from sun and rain being afforded by overhanging sheds.

The main metal working shops, including machine, erecting and tool shops, the forge and pipe shop, and the boiler and shipfitters' shop, together with the shed for the storage of steel, will be placed end on between the drydock and repair wharf. The general storehouse, foundry, woodworking shops, subsidi-

ary buildings, and office building, will be built parallel to the line of the drydock and water front, northeast of the main shops. Two lines of railroad tracks will extend past each end of the main metal working shops, and one track through their center. The main shops will be provided with overhead traveling cranes, the crane runways being extended through each end of the buildings over the railroad tracks. As far as possible, the present machinery will be utilized in the new shops. All of it will be electric driven, including both individual and group drive.

It is proposed to retain the drydock shops, for making repairs on the Atlantic side, until sufficient experience is had to determine the extent and character of repair facilities necessary.

FLOATING EQUIPMENT.

For the handling of the lock gate leaves, as well as for other Canal requirements, and commercial and general wrecking purposes, one, or two, powerful floating cranes will be purchased. For handling vessels of the largest size at Cristobal and Balboa, two high power harbor tugs will be provided, and for the transportation of coal, fuel oil, and fresh water alongside of vessels, a sufficient number of barges and lighters will be placed in service. The steel barges, now in use by the Canal Commission, can be used to good advantage, after the necessary modifications have been made, in the barge and lighter service. A tender for passengers and mail will be furnished at each terminus also, provided the business justifies it.

Canal Zone Rifle Club Shoot.

The second monthly shoot of the Canal Zone Rifle Club for the Garlington medal was held at Pedro Miguel on Sunday, October 27, eleven men contesting. The day was very unfavorable to good shooting, but the scores were five per cent higher in average than at the previous meeting. Mr. Blaisdell of Pedro Miguel won the match, with a score of 85, the best record made so far in this competition.

Qualification shooting at 1,000 yards for the expert course, Class C, War Department course, best out of 50, held on October 13 and 27, resulted, as follows:

Marksman.	Score.
Kennedy.....	43
Blaisdell.....	43
Ferris.....	42
Greene.....	41
Walraven.....	41
Haynes.....	40
John.....	38
Taylor.....	35

The club has qualified to date eight experts, five sharpshooters, and six marksmen, out of a membership of 25.

Obituary.

Walter Frost a citizen of the United States, employed in the Department of Construction and Engineering at Paraisc, died in Ancon Hospital on October 24, after a month's illness. He was 23 years of age, single, and had been on the Isthmus two years, coming here from Venezuela, where he was born. He is survived by his mother, Mrs. Julia Frost, living at Cristobal.

The death of R. E. Bliss, father of Messrs. Gerald and Glen Bliss of Culebra, and Mrs. C. P. Hoffman of Ancon, occurred on October 28, at his home in Sherman, N. Y. Three other children, all daughters, residing in the United States, survive him.

RED CROSS CHRISTMAS SEALS.

A Total of 100,000 for Canal Zone Distribution This Year.

The annual consignment of Red Cross Christmas seals has been received by the Canal Zone Chapter, and the stamps are now on sale. They may be purchased from the offices of the district quarter masters in each village, and at the Commission clubhouses. The National Society was so impressed by the success of the local chapter in the sale of these stamps, last year, when 45,757 were disposed of, that it has increased the allotment to 100,000. To dispose of this number will require hard work by the Red Cross members and the generous cooperation of the public. The stamps sell for one cent each, and the entire proceeds are devoted to the work of carrying on the campaign against tuberculosis. Only 12½ per cent of the proceeds from the sale in the Canal Zone is sent to the National treasury, the balance being used for the benefit of those on the Isthmus suffering from the dread disease. Cases assisted from the former sales are cited, one being that of an American, who left the Isthmus in a serious condition. He is now in a sanitarium, and his condition is greatly improved. Several silver employees have been assisted, including a janitor who has been in the service for many years, and, who, with his family on his hands, was practically destitute.

In 1911, a woman's auxiliary for the sale of these stamps was organized, with Mrs. C. A. Devol, as chairman. Mrs. Devol was assisted by the women's organizations throughout the Canal Zone, and it sold 30,000 stamps. It is proposed to raise this number to 50,000 for the auxiliary department of the Red Cross effort this year. In order that the effort may be successful, it is desired that each organization place an order with the auxiliary chairman at Culebra as early as possible, for as many stamps as can be disposed of. A liberal purchase of these seals is urged, as the major portion of the money received from their sale will be used for Canal Zone relief cases. Communications requesting general information may be addressed to A. B. Dickson, Secretary, Canal Zone Red Cross Culebra, C. Z.

Diplomatic and Consular Corps.

The following corrections should be noted in the list of the Diplomatic and Consular Corps accredited to the Government of the Republic of Panama, published in THE CANAL RECORD of October 16:

CHILE.

Panama—Antonio B. Agacio, Charge d'Affaires and Consul General. Juan Ehrman, Consul.
Colon—Ernesto Jaramillo Aviles, Consul.

Supplies for the Canal.

The following steamers, with supplies from the Isthmian Canal Commission, arrived at the ports of Balboa, Cristobal, and Colon during the week ending October 26:

City of Para, October 19, from San Francisco, with 41 bales dredge sleeves, for Atlantic Division.
Clyde, October 20, from New York, with 188 packages track material, for superintendent of erection.

OFFICIAL CIRCULARS.

Chief Accountant, Central Division.

EMPIRE, C. Z., October 21, 1912.

CENTRAL DIVISION CIRCULAR No. 339:

Effective this date, Mr. R. K. Booth is appointed chief accountant, Central Division, vice Mr. W. M. McCoy, resigned.

D. D. GAILLARD, Division Engineer.

Discontinuance of Pay Certificate Car.

EMPIRE, C. Z., October 21, 1912.

CENTRAL DIVISION CIRCULAR No. 340:

Effective with the November pay period, the Central Division pay certificate car, which is now run with the pay train, will be discontinued. It will be necessary, therefore, for Central Division employees to secure their pay certificates from the different timekeeping offices, from the men sent out from such offices to deliver pay certificates on the work, or from the different yard offices.

D. D. GAILLARD, Division Engineer.

Assistant Chief of Police and Prisons.

DEPARTMENT OF CIVIL ADMINISTRATION.

DIVISION OF POLICE AND PRISONS.

ANCON, C. Z., October 15, 1912.

GENERAL ORDER No. 1773:

Inspector Andrew G. Belknap, Zone police, is, with the approval of the Head of Department of Civil Administration, appointed assistant chief of Division of Police and Prisons, effective October 15, 1912.

He will be obeyed and respected accordingly.

C. W. BARBER,

Chief of Division of Police and Prisons.

Sailing of Steamships "Advance" and "Ancon."

TO HEADS OF DEPARTMENTS AND DIVISIONS:

On account of necessary repairs, the steamship *Advance* will be unable to leave New York, as per published schedule, on October 26, and the date of sailing is not known at this time.

The steamship *Ancon* will leave New York on October 28, and will sail from Cristobal on or about November 10.

Information is desired from those employees who have engaged passage for themselves or families on the steamship *Advance*, scheduled to sail from Cristobal on November 7, whether they wish their reservations changed to the *Ancon*, sailing about November 10.

By direction of the Chairman,

C. L. McILVAINE, Chief Clerk.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week of November 4 to 9 will be, as follows: Monday, Gatun; Tuesday, Empire; Wednesday, Gorgona; Thursday, Cristobal; Friday, Culebra; Saturday, Corozal.

The annual all-Isthmian tenpin tournament will be held at Gatun, on Monday, November 4. Representatives from all the clubhouses in the Zone will compete. Gold and silver medals will be given as prizes. The public is cordially invited to witness the tournament.

Employees are invited to spend election night at the clubhouses. Special programs have been prepared, and election returns will be thrown on a screen. Considerable rivalry is manifested among the members of the various local political parties, and the mock elections promise to be closely contested.

The standing of the basketball league on October 28, was, as follows:

Team.	Won.	Lost.	P. C.
Corozal.....	3	0	1.000
Empire.....	2	0	1.000
Gorgona.....	1	2	.333
Gatun.....	0	2	.000
Cristobal.....	0	2	.000

The standing of the teams in the bowling tournament on October 28 was, as follows:

Team.	Won.	Lost.	P. C.
Gatun.....	8	4	.666
Cristobal.....	7	5	.583
Empire.....	7	5	.583
Culebra.....	6	6	.500
Gorgona.....	4	8	.333
Corozal.....	4	8	.333

COROZAL.

Saturday night, November 2, Gorgona will play basketball with Corozal on the latter's floor.

The results of the Gatun-Corozal game on Saturday, October 26, were: Corozal 25, Gatun 12. The teams were lined up, as follows:

Corozal.	Position.	Gatun.
Wright.....	Forward	Fitzpatrick
Roberts.....	Forward	Whiston
Chadbourne.....	Center	Neely
Porter.....	Guard	Huber
Morris.....	Guard	Conley

The Empire bowlers won two out of three games from Corozal, on the local alleys, on Saturday night, October 26. Corozal bowls at Gatun Saturday night, November 2.

The Spanish class received its first regular lesson on Friday night. Eighteen men have joined to date.

"Open house" will be held on the night of Hallowe'en, Thursday, October 31. There will be a program and refreshments.

CULEBRA.

A convention of the "Married Progressive party" was held on October 23. Mr. Don Beaman was chosen chairman. The following candidates for the mock municipal election were chosen: Alcalde, Gerald D. Bliss; watch dog of the treasury, E. W. Palmer; dog catcher, E. E. Hayes; district judge, C. A. McIlvaine; superintendent of schools, Mrs. A. B. Dickson; poor food inspector, H. C. Smith; water commissioner, Wm H. Bolan; city engineer, F. G. Clark; chief of police, F. T. Dougherty; prosecuting attorney, Bernard Beckerlgge; overseer of the poor, N. W. Pronger; board of aldermen, W. J. Connelly, Mrs. J. M. Hepler, Mrs. D. H. Beaman; board of councilmen, Frank R.

Woodman, G. A. Jones, D. E. Hill and G. R. Ramsey. The platform was read and adopted.

The convention of the Independent Party was held on Monday night, October 28.

A torch light procession will be held on Friday night, November 1, headed by a band. A rally will follow, at which speeches will be made by the candidates. All are invited.

A program is being arranged for Tuesday night, November 5, to be held in the second story of the schoolhouse. A special telephone wire will be installed for the purpose of receiving election returns, special moving pictures have been arranged for, and a mock election will be held for both presidential and municipal officers. Other features will be added, and refreshments will be served. Everybody in Culebra is invited to attend.

In the match game of bowling on Saturday evening, October 26, Gatun won two out of three games with the local men.

EMPIRE.

On Saturday, November 2, Empire will play at Gatun.

During the past week, the four leading political parties of Empire have organized and at a joint ratification meeting, held Tuesday night, October 29, the parties presented their platforms and candidates. The election will take place on Tuesday, November 5. Polls will be open from 7 a. m. to 8 p. m. at the Empire clubhouse. Ladies are invited to take part in the election.

The boys' outing for Saturday, November 2, will be to the Las Cascadas plantation.

The basketball game between Empire and Gorgona, played at Empire, on Saturday, October 26, was won by Empire. Score: Empire 21, Gorgona 16. The lineup was, as follows:

Gorgona.		Empire.
Sterns.....	right forward	Rowan
Londes.....	left forward	King and Sawyer
Christenson.....	center	Hepler
Carpenter.....	right guard	Greening
Helly.....	left guard	Miller

GORGONA.

On Monday night, October 21, a big political rally was held at which all candidates for the mock election were introduced.

There was a big political parade of all parties on the night of the 29th. The Tenth Infantry band furnished music.

A Hallowe'en social will be held on Thursday evening, October 31. Everybody is invited.

GATUN.

On Monday evening, October 21, representatives of the various political parties met at the clubhouse and organized a general committee of arrangements to conduct a political campaign and election in Gatun, under the auspices of the Y. M. C. A. On Tuesday evening, October 22, the Republican and Progressive parties, held their national and city conventions. On Wednesday evening, October 23, the Democratic party held its convention. The Socialists' convention was held on the evening of October 28. The election will be held on November 5. The following nominations have been made for mayor of Gatun: Republican, Maj. Geo. M. Hoffman; Democratic, W. B. Childers; Progressive, Dr. F. G. Farmer; Socialist, Geo. A. Barte.

The following men have entered the pocket billiard tournament for which gold and silver medals will be given as prizes: Messrs. Dewey, Wurster, Miller, Cheeks, Bailey, Coleman, Courter, Quinn, Eggleston,

Bellringer, Townsley, Kerruish, Meise, Dennis, Gamble, Myers, Betha, Luckey.

The Sunshine Society will give a Hallowe'en social at the clubhouse on Thursday evening, October 31.

On October 27, the membership of the Gatun Y. M. C. A. reached the high water mark of 435. A campaign for 500 members is under consideration.

A cordial invitation is extended to all those who find it inconvenient to attend the evening gymnasium classes, to join the class which meets twice a week at 5.20 p. m.

CRISTOBAL.

On Saturday night, the local bowlers took two out of three games from the Gorgona team by the following scores:

Gorgona.			Cristobal.		
King.....	126	156 155	Barrett.....	139	170 130
Shires.....	103.		Strong.....	146	143 175

Pineapples, each.....	12½

*Indicates reduction from last list.

**Indicates 5 cents allowed for return of bottle.

†Indicates advance on last list.

††Fowls weigh each about, as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock next lightest weight is supplied and refund note sent for difference.

?Sold only from commissaries; no orders taken for delivery.

Sale of Y. M. C. A. Piano.

OFFICE OF THE CHIEF QUARTERMASTER.

CULEBRA, C. Z., October 28, 1912.

Sealed proposals will be received at this office until 3 p. m. Wednesday, November 6, 1912, and then opened, for the purchase of a piano now at the Y. M. C. A. at Goreona. Piano can be inspected at the Y. M. C. A. at Goreona. Envelopes containing proposals should be marked "Proposal for purchase of piano" and addressed to Col. C. A. DEVOL, Chief Quartermaster, Culebra, Canal Zone. The Government reserves the right to accept or reject any or all bids.

C. A. DEVOL, Chief Quartermaster.

Sale of Public Buildings.

OFFICE OF THE CHIEF QUARTERMASTER.

CULEBRA, C. Z., October 28, 1912.

Sealed proposals will be received at this office until 3 p. m. Saturday November 2, 1912, and then opened, for the purchase of the following Isthmian Canal Commission buildings: Old French laborers' barracks Nos. 174 and 175 at Chagres Camp. Proposals must be accompanied by certified check, post-office money order, or cash for five per centum (5%) of amount bid. Envelopes containing proposals should be marked "Proposals for purchase of buildings," and addressed to Col. C. A. DEVOL, Chief Quartermaster, Culebra, Canal Zone. Buildings must be removed within thirty (30) days from date of sale. Successful bidders will be granted the Commission freight rate over the Panama railroad on material recovered from these buildings. The Government reserves the right to accept or reject any or all bids. For further information apply to District Quartermaster, Las Cascadas, Canal Zone.

C. A. DEVOL, Chief Quartermaster.

Sale of Surveying Instruments, Compasses, and Ship's Log.

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., October 21, 1912.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, C. Z., until 2 p. m., November 9, 1912, when they will be opened in the presence of attending bidders, for any and all surveying instruments, compasses, and ship's log now on hand in the storehouse for obsolete material. These instruments may be seen on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m., on application to this office. The right is reserved to reject any or all bids or any combination of bids. Bids must be sealed and plainly marked: "Proposal to purchase Surveying Instruments," and addressed to the Depot Quartermaster, Mount Hope, C. Z.

CHARLES L. PARKER,
Acting Depot Quartermaster.

MOVEMENT OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 4 p. m.

Royal Mail steamers for New York on alternate Tuesdays, at 2 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston, and Santiago de Cuba, at 2 p. m., on sailing dates.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m. for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending October 26:

Arrivals—October 21, *U. S. S. Colorado*, from Nicaragua; October 21, *Pachitea*, from Callao; October 24, *Guatemala*, from Guayaquil; October 23, *Palena* from Valparaiso; October 25, *Tricolor*, from San Francisco.

Departures—October 21, *Quito*, to Guayaquil and intermediate ports; October 21, *Mantaro*, to Callao; October 21, *Chile* to Guayaquil; October 22, *Peru* to Guayaquil; October 25, *Manari*, to Buena-ventura and intermediate ports; October 25, *U. S. S. Colorado*, to Nicaragua.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, NOVEMBER 6, 1912.

No. 11.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication, or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Bound Volumes of "The Canal Record."

A limited number of bound copies of Volume 5 of THE CANAL RECORD will soon be ready for distribution for official purposes. These volumes will be marked *For Official Use Only—Property of the I. C. C.* Heads of departments are requested to advise the Secretary of the Commission at Ancon of the number of these volumes that they will require for use in their departments, citing the names of the persons to whom they should be issued.

Conclusion of Hydraulic Operations in Pacific Division.

Hydraulic excavation in the Pacific Division will be completed about December 1, 1912, when the plant will be shut down and dismantled. For some time past operations have been in the Canal channel, south of Miraflores Locks, and have about reached the point where the cost of excavating by this method would probably exceed the cost by steamshovels. A good bottom has been obtained for shovel work on the east side of the channel below the dam, and from there the shovels will be in position to make favorable progress.

Excavation by the hydraulic method was begun in September, 1910, and the equipment was first used in filling the core of the west dam at Miraflores, the monitors at that time working in the lower lock site at Miraflores. The hydraulic fill of the dam was completed on December 4, 1911, and amounted to 625,048 cubic yards. Prior to this time, the zone of operations had been moved further south into the channel section, and, when the fill of the dam was completed, the material disintegrated by the monitors and pumped out by the dredge pumps was carried to the nearby tidal swamps. A total of about 110 acres of swamp land had been reclaimed to November 1, 1912. The total excavation accomplished by the hydraulic plant from the beginning of operations to November 1, 1912, aggregates 1,723,800 cubic yards. During the

fiscal year ending June 30, 1912, the total cost of handling the material, earth and rock, by the hydraulic method, was \$0.5564 a cubic yard.

Trestle on Naos Island Dike Completed.

On Wednesday, November 6, the last piles were driven in the trestle for the Naos Island dike, connecting Naos Island with the mainland at East Balboa. On that date, about one-half mile of trestle remained to be filled.

The dike is being constructed by the Central Division, and is primarily for the purpose of shutting off the swift current, which at flood tide, flows across the Canal channel in Panama Bay, nearly at right angles, and not only causes heavy deposits of silt, but also tends to carry vessels out of the channel westwardly. It will also be used to furnish rail connection between the islands and the mainland, thereby obviating the present necessity of transferring material to barge or lighter at Balboa. In addition, it will be wide enough throughout its length for a wagon road.

The dike, when completed, will be 3.29 miles long. In its construction, a pile trestle is first driven from which spoil from Culebra Cut is dumped. When the trestle is filled, the tracks are shifted laterally, and the dike widened and used as a dump. For the greater part of its length, the trestle is driven in blue mud, which feels greasy to the touch, and is composed of exceedingly fine particles. The work of extending the dike during the past two years has been attended with considerable difficulty, due to the weight of the stone filling dumped from the trestle. This sliding has been encountered on every foot of the last two years' work, and results in continual settlement of the stone filling for two or three months, when it gradually diminishes until it stops altogether.

The total vertical settlement in one section of the dike during the period from July 1, 1911 to June 30, 1912, aggregated 125 feet. Not one foot of trestle constructed during the past two years remains at present under the track for which it was intended, parts of the trestle sliding to one side, and parts to the other, in some cases moving laterally as much as 300 feet. The elevation of the top of the trestle is 14 feet above mean tide, and the average depth of water for the last mile of trestle constructed is about 15 feet at mean tide, giving a total height of trestle of about 29 feet above the original bottom.

When the rock filling is dumped, it begins to settle as soon as it attains a height of a few feet, pushing up from the bottom a parallel ridge of mud on each side of the trestle. By the time the rock fill has been completed to its full height, the center of each of these parallel ridges of mud is about 80 feet from the center of the track. Each of these ridges is separated from the ridge of stone filling, which caused

their upthrust, by a hollow of from 10 to 15 feet in width, the bottom of which has remained practically undisturbed, showing that the settlement of the stone filling and upthrust of the mud bottom take place on opposite sides of a nodal line and involve considerable underground lateral motion.

The settlement almost invariably takes place at or just before low water, and is usually greatest at time of extreme low water of spring tides, owing to the fact that at such times the total pressure on the base of the mound of riprap filling is much greater than at high tide. At extreme high water, only about four feet of the dike, and that the narrowest portion, is above water, whereas at extreme low water, 24 feet of the total height of the dike lie above the water level.

In one section of the work, an accurate record was kept of the quantity of stone necessary to bring the fill up to the full height, namely, 29 feet above the original bottom, and it was found that the actual quantity of stone required was about 10 times the theoretical quantity had the bottom been solid and unyielding. Although the amount of stone filling required has been greatly in excess of the original estimate, yet owing to the quantity of material available for the work, the cost as a whole has been moderate, when compared with other ocean works of a similar character, built on a better bottom. The total cost of the dike up to June 30, 1912, was \$186,396.79, or about \$13 a lineal foot.

Excavation and Lock Masonry Costs.

Excavation in the Canal prism by steamshovels during the fiscal year ending June 30, 1912, was cheapest in the Central Division, averaging \$0.5101 per cubic yard. In the Atlantic Division the cost was \$0.5952 a cubic yard, as compared with \$0.6010 during the previous year; and in the Pacific Division \$0.7527, against \$0.6960 for the fiscal year 1910-11.

In dredging, the costs were higher than for the previous year, and for channel excavation, the Pacific Division showed lower than the Atlantic Division. The Pacific Division did not include any arbitrary for plant, the total cost of which was absorbed previously, but in its territory, increase in depth is attended with additional expense, because of the great tidal variations.

There was a total of 1,443,570 cubic yards of masonry laid in the locks and spillways during 1911-12, as compared with 1,741,908 cubic yards the preceding year. The unit costs for this work were: Gatun Locks, \$7.7552 a cubic yard; Gatun Spillway, \$7.0988; Pedro Miguel Lock, \$6.4640; Miraflores Locks, \$4.7675. With a decrease in quantity laid in Gatun Locks of 512,315 cubic yards, the cost of plain concrete showed an increase of \$0.5398 a cubic yard, as compared with the previous year. At Pedro Miguel, with a decrease in the amount laid of 363,609 cubic

PANAMA WATER SUPPLY.

High Pressure Afforded by New Main—Removal of Filters from Miraflores.

When the 20-inch main from the Rio Grande reservoir was placed in service in August, there was an immediate increase in pressure in the pipes throughout Ancon and Panama. Before the main was connected, the water pressure in Panama ranged between 10 and 25 pounds; it occasionally went as high as 40 pounds, but the average was about 15. Since the new main was placed in service, the pressure has seldom gone below 30 pounds, and from midnight until morning it goes as high as 70 pounds. With the additional force superinduced by the high pressure reservoir on Ancon Hill, which is connected with the Panama mains at every alarm of fire, the pressure in Panama recently went as high as 108 pounds. Calculating on a 2-foot throw from the hose nozzle for each pound of pressure in the pipes, the supply to Panama at present is considered ample for fire protection. It is better than it had been at any time since the inauguration of the water service on July 4, 1905.

The additional pressure has resulted in increased water consumption. In the month of June, 1912, the consumption of water in Panama amounted to about 39,000,000 gallons. In August, following the inauguration of the 20-inch main, the quantity consumed aggregated approximately 53,000,000 gallons; in November it was about 49,000,000 gallons. This increase of from ten to twelve million gallons a month is attributed mostly to the increased pressure in the mains.

Since the new main was put in service, the pumping plant at Miraflores, supplying water from Cocoli Lake, auxiliary to the Rio Grande supply, has been closed down. It had been supplying the main to Ancon and Panama, through a 10-inch pipe, with 71 per cent of the water supplied by the Rio Grande main. During the fiscal year ending June 30, 1912, Cocoli Reservoir furnished 871,045,000 gallons of water and Rio Grande Reservoir supplied 1,184,681,370 gallons. The surface of Cocoli Reservoir is normally at 43 feet above sealevel, and it will ultimately be inundated by Miraflores Lake, which will rise to elevation plus 55 feet. Cocoli Lake was formed by the waters of the Cocoli River, backing up against the west dam at Miraflores, and was not originally intended for a reservoir, but was used when the supply from the Rio Grande became inadequate.

The Cocoli pumping plant was equipped with two 3-stage, centrifugal pumps, each with a capacity of 1,500 gallons a minute against a head of 300 feet, driven by 200-horsepower, 3-phase, 25-cycle motors. The plant will ultimately be abolished, but its disposition has not been decided on at present. It was put in temporary service for a short time after its closing down, in order to supply high pressure water to a monitor for excavating on the site of the Miraflores spillway.

The closing of the plant placed the two filters, each of a capacity of 500,000 gallons per day, out of service, and it has been decided to install them in the filtration plant at Ancon. Those at the latter plant have a rated capacity of 1,500,000 gallons a day, but during the past two months the daily average amount of water passed through them was 2,234,500 gallons, or about 50 per cent in excess of their

rated capacity. This made it necessary to wash the filters three times a day, and, in addition, the alum did not have time to become thoroughly mixed with the water and form the precipitates which are necessary to eliminate the bacteria and suspended particles from the effluent. When the filters from Miraflores are installed at Ancon the total rated capacity will be 2,500,000 gallons a day. One will be put within the present building, and the other under an adjacent shed.

A committee, consisting of Messrs. T. L. Clear, chairman, M. E. Gilmore, W. J. Spalding, Ad. Faure and W. N. Windes, has been appointed to determine the basis for charges to be made against the Republic of Panama on account of the installation of the new Rio Grande main, the auxiliary pumping plant at Mindi, and the projected Colon waterworks. The first meeting of the committee was held on November 6.

An Omission.

The name of Col. W. C. Gorgas was inadvertently omitted from the list of members of the advisory committee of the Zone Clubhouses in the general article on clubhouses, published in the CANAL RECORD of October 30, 1912.

Ancon Crusher.

United Spanish War Veterans.

Chagres Camp, No. 1, U. S. W. V., will hold its regular meeting in the I. C. C. lodge hall at Empire on Sunday, November 10, at 3 p. m.

Tug Service to Porto Bello and Toro Point.

Following is the schedule of Atlantic Division tugs in the service between Dock 13 and Porto Bello, and Dock 13 and Toro Point:

PORTO BELLO.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays—Leave Dock 13 at 5 p. m., arrive Porto Bello 10 p. m., returning, leave Porto Bello 11 p. m., arrive Dock 13 at 3 a. m.

Saturdays—Leave Dock 13 at 9 a. m., arrive Porto Bello 11 a. m., returning, leave Porto Bello 2 p. m., arrive pier No. 4, Colon, 4 p. m.

Every Saturday, except the first Saturday after the 20th of each month. Sailing No. 1—Leave Dock 13 at 2 p. m., arrive Porto Bello 4 p. m., returning, leave Porto Bello at 4 p. m., arrive at pier No. 4, Colon, 6 p. m. *Sailing No. 2*—Leave Dock 13 at 6 p. m., arrive Porto Bello 11 p. m., returning, leave Porto Bello 12 midnight, arrive Dock 13 at 4 a. m.

Sundays, immediately following the 20th of each month, ONLY—Leave Porto Bello 6 a. m., arrive Dock 13 at 8 a. m.

TORO POINT.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays. Sailing No. 1—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2*—Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m.

Special. Wednesdays, ONLY—Leave Dock 13 at 12 noon, arrive Toro Point 12.30 p. m., returning, leave Toro Point 12.30 p. m., arrive Dock 13 at 1 p. m.

Saturdays. Sailing No. 1—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2*—Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5.30 p. m., arrive Dock 13 at 6 p. m.

Sundays. Sailing No. 1—Leave Dock 13 at 9.30 a. m., arrive Toro Point 10 a. m.; returning, leave Toro Point at 10.30 a. m., arrive Dock 13 at 11 a. m. *Sailing No. 2*—Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5 p. m., arrive Dock 13 at 5.30 p. m.

A PROCLAMATION

By the President of the United States of America
—Panama-Pacific International Exposition.

Whereas, in conformity with the conditions and requirements of the joint resolution of Congress approved February 15, 1911, "Authorizing the President to invite foreign countries to participate in the Panama-Pacific International Exposition in 1915, at San Francisco, California," satisfactory proof has been presented to me that a suitable site has been selected for the said exposition and that the sum of not less than fifteen million dollars will be available to enable the Panama-Pacific International Exposition Company, a corporation organized and existing under and by virtue of the laws of the State of California, for the purpose of inaugurating, carrying forward, and holding an exposition at the city of San Francisco, California, in the year 1915, to celebrate the completion and opening of the Panama Canal;

Now, therefore, I, William Howard Taft, President of the United States of America, by virtue of the authority vested in me by said joint resolution, do hereby declare and proclaim that such International Exposition will be opened in the year 1915, in the city of San Francisco, in the State of California. And, in the name of the Government and of the people of the United States of America, I do hereby invite all the nations of the earth to take part in the commemoration of an event of great interest and importance to the world by appointing representatives to the Panama-Pacific International Exposition and sending thereto such exhibits as will most fitly and fully illustrate their resources, their industries, and their progress in civilization.

In testimony whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington this second day of February, in the year of our [SEAL.] Lord, 1912, and of the Independence of the United States of America the one hundred and thirty-sixth.

WM. H. TAFT.

By the President:

P. C. KNOX,
Secretary of State.

[No. 1178.]

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 92 per cent completed, 207,753 cubic yards, out of a total of 225,000, having been placed at the close of work on November 2. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete laid.	Hours worked.	No. mixers used.
	Cu. Yds.		
October 28.....	60	8.00	1
October 29.....	52	6.75	1
October 30.....	72	8.00	1
October 31.....	72	7.75	1
November 1.....	28	2.67	1
November 2.....	28	2.75	1
Total.....	312	35.92	1
Previously reported...	207,441		
Grand total.....	207,753		

LOST—In Empire, October 26, black sealskin watch fob, and gold bowling medal inscribed "Gorgona, Canal Zone." Finder please return to F. G. Swanson, Gorgona.

GEOLOGY OF CULEBRA CUT.

Nature and Conduct of Slides Explained by Commission Geologist.

According to the report of the Commission geologist, the slides are attributable to two general causes:

(a) A primal cause, the weak and unstable geological condition of the rocks through which the Cut passes, attributable only to nature; and:

(b) The oversteepness and height of the slopes, the blasting, and other work attributable only to man.

In the main, the weakness, and, therefore, the sliding tendency of the rocks is due to peculiar local geological conditions. The presence of fossil oysters, corals, gastropods, and remains of other marine animals in the sedimentary rocks found at intervals across the Isthmus, is evidence that the Atlantic and Pacific oceans were in connection over the present land barrier during Tertiary time. During that period, islands of older rocks, like the present islands of Panama Bay, showed at intervals above the shallow ocean which existed where the Isthmian land now stands.

These oldest rocks consist of (a) recrystallized conglomerates and breccias, as found at Bas Obispo, and, locally, near the Pacific. These are overlain by (b) agglomerate lava flows and tuffs, as between Empire Bridge and Las Cascadas. The next younger rocks, (c) are the light colored tuffs of Pedro Miguel, Miraflores, Diablo Ridge, and the lower slopes of Ancon Hill. Later than these are (d) the dark, soft shales and marly clays found from one-fourth mile south of Empire Bridge to the Miraflores locks. Probably, equivalent to these dark shales are the argillites and argillaceous sandstones of Lion Hill, Gatun, Mount Hope, etc. The upper part of the Gatun formation seems to be equivalent to the Bohio conglomerates. Deposited later than (d) are the greenish volcanic clays, unstratified in character, and with red oxidized beds representing land conditions of deposition. This formation contains lava flows; also, lignitic shale beds, showing fossil ferns, and other vegetation, which is confirmatory evidence that while they were being formed above sealevel, swamp conditions prevailed locally. The youngest series of bedded rocks (e) have a basal bed of coral limestone, overlying which, are yellowish weathering consolidated clays, a bed of limy conglomerate, and the youngest beds of limy argillite. All of the Isthmian sedimentary rocks are cut by intrusions of basic lava, mostly basalt, and by plugs of meta-breccia, pushed up cold by some of the lava intrusions. The lavas and breccias are strong, but most of the sedimentary rocks of Culebra Cut are uncrystallized, loosely cemented, sheared, and cut by fissures and faults, so they are very weak and unstable. Through their interstices and joint and fault planes, they absorb a large amount of the heavy tropical rains, which further weakens them, and which increases their tendency to deform and slide.

There are four distinct types of slide, classified by the geologist, as follows:

- (a) Structural breaks and deformations resulting in slides.
 - (b) Normal or gravity slides.
 - (c) Fault zone slides.
 - (d) Weathering and surface erosion.
- The structural break and deformation slides are the most troublesome and most

important. Their first manifestations are cracks or fissures, approximately parallel to the side of the Cut, and from a few to a hundred yards, or more, back from it, and from each other. Each fissure is usually traceable on the surface for several hundred yards, and each gradually widens with time. The next stage of this type of slide is the tilting of the large blocks, toward the Canal, usually accompanied by upward bulging of the bottom of the Cut, opposite the moving block. For a few weeks, or even for a year, or more, this tilting, settling, and bulging may continue before the real slide comes. This last stage consists in the collapse of the basal part of a moving block, due to the pressure of its upper part, and to the weakening effects of the deforming and shearing movement that it has undergone. When this stage is reached, the block rapidly disintegrates, and, in a few hours, or a few days, it becomes a gravity slide of mud and rock debris piling up at the bottom of the Cut.

The causes of this type of slide are the weakness of the rocks, and the height and steepness of the slopes. These conditions induce deformation, or almost imperceptible flow movement of the high banks toward the excavation, with consequent cracking and shearing of the slope material, and bulging at the bottom of the Cut, all of which tends to further weaken the rocks until finally they collapse.

Normal, or gravity slides, occur where the Cut intersects beds of porous material lying on top of relatively impervious clay, shale beds, or dense lava masses. Water sinking freely through the upper bed is retarded in its descent by the impervious material, and thus causes a muddy, slippery zone to form along the contact between the pervious upper and impervious lower layers. If the latter dip toward the Canal, or if there is much lateral pressure from higher ground, the material above the zone of contact is almost sure to slide. The Cucaracha and Paraiso slides are of this type, but like most slides of this kind, they are now practically dead. This type of slide, it is predicted, will not, from now on, in the progress of the work, be of relatively large size or importance.

The fault zone slides are occasioned primarily by sheared and weakened zones in the rocks, due to fault displacements. Where fault planes are intersected by the plane of the Canal slope, large masses of rock in the acute angle between the two planes generally fall out into the excavation; or where the fault plane dips, the overhanging rocks—"hanging wall" of the plane—often crush down into the excavation. The most notable fault zone slides are the La Pita slide, and that about 600 feet north of La Pita, which, on August 20, 1912, in a few minutes, let down about 300,000 cubic yards of material and carried away a hundred yards of the East Diversion.

The heavy tropical rains erode and trench the slopes and wash the weathered surface material into the Cut. Weathering and disintegration of most of the rocks of Culebra Cut is very rapid, because the iron and magnesia compounds, which they contain, are readily oxidized on exposure to the atmosphere. The new oxides formed take up more room than the old product, and the change of volume thus brought about causes the rock to crumble and fall to pieces. These rocks also contain some soluble limy cementing material, which, when leached out by surface waters, helps along the disintegrating

process. The loose surface product, which results from this rapid weathering, is swept from the slopes by the heavy tropical rains, and thus fresh surfaces are left exposed for further weathering action. Of course, the material washed into the Cut in this way has no perceptible hindrance on present excavation; still, the geologist estimates that it would add about 65,000 cubic yards per year to the sediment accumulating in the bottom of the Canal. At 25 cents per cubic yard for removal by dredging, this would swell the upkeep charges by \$16,250 per year. Slopes that are clothed with a carpet of vegetation are relatively free from erosion, hence tropical vegetation will be encouraged to cover the slopes of the Canal with its abundant growth, that washing by tropical rains may be minimized.

The geologist believes that the rock conditions along the Canal will limit the slides within certain fairly definite bounds, and that when the slopes have been reduced to the proper angle, the slide problem will be practically solved. This angle will vary from almost perpendicular in the case of the strong lavas, to one on five for the weaker rocks, or even one on ten in a few extreme cases, where deformation and faulting have been pronounced. Almost the only remedy of practical importance in the slide problem is to lessen the weight of the high, weak slopes from the top, so as to reduce the tendency to slide, and to prevent, if possible, breaks and deforming movements. Slopes which have not moved will stand at a much steeper angle than those of the same material, which have been sheared, cracked, and bulged by deforming movements. The geologist points out in his report that the first estimate for the excavation of Culebra Cut designed slopes that were much too steep for the weak nature of most of the material through which the Canal was to be excavated, but, that though slides of considerable magnitude are yet to occur, the sliding period will eventually be brought to a close, and that the ultimate completion and successful operation of the Canal cannot possibly be in any danger from slides.

Sale of Red Cross Seals in 1911.

Statistics of the sale of Red Cross seals for 1911, showing in detail the results obtained by 85 agents in different parts of the country, have been compiled, and are published on Page 27 of the *Red Cross Bulletin* for October, 1912. The total number of seals sold aggregated 33,425,759.

Comparisons show that the Canal Zone society led all other societies in the percentage of allotment sold. The standing of a few of the leading agencies is given below:

AGENCY.	Seals sold 1911.	P. C. of allotment sold	Gain over 1910.
Canal Zone.....	43,571	80	37,401
Wilmington, N. C.....	63,317	79	13,615
Stamford, Ct.....	22,731	74	12,731
Norfolk, Va.....	147,400	73	32,400
Washington, D. C.....	277,292	73	21,792

Last year the Canal Zone allotment was 50,000. This year the national society has increased the allotment to 100,000.

Of the above number, the ladies' auxiliary, under Mrs. Devol, has taken a block of 30,000, and W. F. Bennyhoff of Cristobal has already sold 7,000.

Appeal is made to all Americans to support this work liberally.

PROTECTION FROM FLOODING.

Dike at Gamboa Strengthened, Because of Rise of Gatun Lake.

The rise of Gatun Lake has caused the waters of the Chagres River to back up as far as Palo Grande, about three miles above the point at which the river reaches the line of the Canal, and to rise correspondingly against the dike which protects Culebra Cut, at its north end, against flooding. The bottom of the finished portion of the Cut is 39 feet above

of the river, in order to avoid the imminent break and washing.

The present problem affecting the dike at Gamboa is the influence of the backwater, under local geographical conditions, in the event of floods. So far, it has seemed to have very little influence toward checking the moderate rises which have occurred since the closing of the Spillway gates. The amount of rises at Gamboa has been about 70 per cent of the rise at Vigia, the uppermost station on the river.

north of the dike intersects a loop of the river, an island was formed between the two points of intersection. At high water, the island would be practically in the middle of the river, and its effect in causing backflows and eddies against the dike is a matter of speculation.

The situation relative to the dike is further complicated by the narrowness of the river's passage below Gorgona. Opposite the site of the former village at Mamei, and again at San Pablo, the Canal and river merge into one channel 1,000 feet wide, between high banks.

SKETCH A—GAMBOA DIKE, SHOWING ITS RELATION TO THE CANAL PRISM AND CHAGRES RIVER.

sealevel; the normal low water level of the Chagres at Gamboa dike was at elevation 44, but since the closing of the sluice gates in the Spillway dam at Gatun, the surface of the water has risen as high as elevation 55.6. This is 16.3 feet above the bottom of the completed channel, and 17.4 feet below the top of the dike, as it has stood for several years.

In consequence of this rise and the uncertainty of the influence of the backwater during probable floods of the river, the dike is being raised about five feet and widened an average of about 50 feet by dumping clay on the side toward the Cut. Its new elevation of plus 78.2 will afford a leeway of approximately 22½ feet during floods for rises. Records have not been kept of the river stages at the dike, but the heights there are considered as two feet lower than at the Gamboa river gaging station, three-fourths mile up-stream. Only once during the American occupation has the river been higher than 78.2 feet at the station. This was in December, 1906, when the crest of a flood reached 81.6 feet. The flood of November 19, 1909, rose to 72.6 feet at the station. It came so close to the top of the dike, which was then at 71 feet above sealevel, that sluice gates were opened to fill the Cut with water to the level

This is approximately the same ratio which has been observed for several years.

Between Gamboa gaging station and the dike, the river channel is as narrow as 800 feet, with high, steep banks. It is possible that a heavy flow, jamming here on the backwater, would result in a high rise locally.

Below San Pablo is the wide expanse of lake. The problem is the behavior of flood water before it reaches the lake proper. The sluice gates in the Spillway of Gatun Dam are capable of letting out double the rate of normal rainy season flow from tributaries to the lake, but as the lake could not be lowered more

SKETCH B—AVERAGE CROSS SECTION, SHOWING ADDITION TO PRESENT DIKE AT GAMBOA.

Opposite the dike, the completed Canal channel leading to the north affords additional outlet for the Chagres, but since the river crosses the Canal at an angle of about 60 degrees, the abruptness of the turn makes a factor of uncertainty. As the Canal directly

than a foot in 24 hours, opening the sluice gates would have slight effect on a sudden river flood. The crest of a rise normally reaches Gamboa about five hours after it has passed Vigia, from which it is reported by telephone to the hydrographic office.

A typical cross section of the dike, with the addition, is shown in the accompanying sketch B. Sketch A is a map of the vicinity, showing the north end of Culebra Cut, the dike as extended, and the immediate channel of the Chagres River. In addition to the main dike across the Canal, reinforcement has been made by dumping at places on the west side, at which, the elevation of the ground was less than 78.2 feet above sealevel. The track of the Panama railroad, crossing the Canal on top of the original dike, will not be disturbed. About 800 feet south of the Gamboa dike

is a similar barrier, which has protected the Cut from flooding through the old channel of the diverted Obispo River, the valley of which is crossed and generally followed by the northern half of the Cut. This dike has also been raised and strengthened. Inasmuch as the diversion channel empties into the Obispo channel at this point, and almost at right angles, the dike has been ripped with rock on the water side, to protect it from the torrents which flow from the diversion after heavy rains. The dikes, as reinforced, are indicated by the shaded portions of the map.

SOCIAL LIFE OF THE ZONE.

Organizations in Ancon.

The Ancon Study Club has continued the study of Shakespeare's plays, and will follow the course with a study of the modern American drama. A special program will be given at the meeting on Friday, November 8, which will be held at the home of Mrs. White, Tivoli Hill. The work of the library has been steadily increasing, the issuance of books to nonmembers during the past month having increased over that of any previous month since the organization of the club.

A bridge club was organized in Ancon on November 2. The organization is limited to 16 persons, and is composed of six married couples and four young members of Ancon families. The club will meet at the homes of members on Saturday evenings.

The Camp Fire Girls Movement.

The Camp Fire Girls movement in the Canal Zone was started in August, 1912, by the organization in Gatun of a camp fire, composed of nine girls, under the guardianship of Mrs. William L. Sibert. The meetings of the Gatun camp fire are held at the home of the guardian on Monday afternoons. They are of informal character, and in favorable weather, the afternoon is spent in playing outdoor games, with light refreshments at the close of the meeting. Once a month the council fire, or ceremonial meeting, is held, at which time, the girls wear the ceremonial dress of khaki with bead decorations, including such honor beads as have been won by the performance of certain specific duties, in accordance with the rules of the camp fire. The work of the camp fire is divided into seven divisions, health craft, home craft, nature lore (woodcraft), camp craft, handcraft, and patriotism. A feature of the organization is the gymnasium class, which meets at the Commission clubhouse on Saturday afternoons, working under the instruction of the physical director of the clubhouse. This department has been enlarged to admit a limited number of nonmembers.

At Gorgona, the movement was started about two months ago, and while the local camp has not been organized, a gymnasium class of 20 has been started. The class meets at the clubhouse on Saturday evenings, working under the direction of the physical director. This class includes the junior girls, and a number of young married women, but will be limited to 25.

A number of friends gave a dinner at the Hotel Washington, on Wednesday evening, October 30, to Mr. Geo. H. Ruggles, on the eve of his departure for the United States. Among those present were: M. E. Gilmore,

Dan Wright, J. J. Reidy, M. Lavery, W. J. Owen, Chas. Wright, and Alfred Schaff, all six year men.

Mock Elections in the Canal Zone.

In the Canal Zone villages at which Commission clubhouses are located, mock campaigns were held by the Americans during a few weeks preceding November 5. Inasmuch as citizens of Panama are the only residents in the Canal Zone who have the suffrage, the elections by Americans are of interest chiefly as manifestations of political desire for expression on the part of those temporarily disfranchised.

The basis of election was in most cases municipal, though the parties and issues, so-called and loosely defined, were in many cases curiously mixed with those of the recent national campaign in the United States. In Cristobal, a preliminary meeting of all Americans decided to separate into the Isthmian Canal Commission and Panama railroad parties. An insurgent element at the meeting demanded recognition as a third party, and gained it after riotous demonstrations and expressions on the rights of man. In Culebra, the division was complicated by the long-standing rivalry between married men and bachelors, the latter claiming to be the only possible independent and progressive element. At Gorgona, Empire and Gatun, the lines of cleavage were set by national politics, though the campaigning was almost wholly with regard to municipal offices.

The tickets usually bore nominations for mayor, aldermen, town clerk, and the other leading officials in the average organization of an American town. Interspersed among these were nominees for dog catcher and, in one village, for the nonpolitical position of "Town grouch."

Platforms dealt almost entirely with local conditions, except for borrowed rhetoric expended on the issues in the United States. In only a few instances were there expressions of sincere political thought, such as demands for better lighting and for weekday privileges at the Commission clubhouses on Sundays. The Commission hotels and the commissary stores afforded material for many reform planks, nearly all of which were expressions of crude humor. While generalizations demanded political and social equality and industrial freedom, there were practically no protests against the so-called paternalism of the Canal Zone government, and the privileges afforded officials. The Panama railroad was denounced as a "Monopolistic corporation," apparently for the progressive ring of the words, as no practical reform of rates was suggested. A number of whimsical, yet desirable social reforms were suggested,

such as a hall of music on a remote hill for the use of amateurs.

Campaigning consisted principally of displays of cartoons and announcements on bulletins and billboards, the flying of streamers, and processions with torches, transparencies, and bands. Rallies were held in the evenings, at which speeches were made by candidates and other partisans. From the playful nature of the proceedings, no serious discussions were expected, or tolerated for long; heckling and sharp retorts made the substance of most orations.

The results of the balloting are of slight consequence; the officials chosen will have no powers, duties or emoluments of office, and the memory of the campaigns will abide only as that of a prolonged and strenuous social event. But as a celebration of political customs and a pleasurable exercise of practices liable to atrophy, the mock elections are the most distinctly American celebrations which Canal Zone residents can enjoy. There is no event more reminiscent of home.

Results at Cristobal Mock Election.

The candidates on the "Bull Moose" ticket were elected in the mock election, held at the Cristobal clubhouse on Tuesday evening for the residents of Cristobal and Colon Beach. The official results were, as follows:

NATIONAL TICKET.

Republican—William Howard Taft, 33; James S. Sherman, 23.

Democratic—Woodrow Wilson, 200; Thomas R. Marshall, 178.

Progressive—Theodore Roosevelt, 224; Hiram Johnson, 194.

Socialist—Eugene V. Debs, 26; Emil Seidel, 24.

Socialist Labor—Reimer, 5; Gillhaus, 5.

Prohibition—E. W. Chafin, 1.

LOCAL TICKET.

P. R. R. Party—Ross Wallace, 135; R. H. Wardlaw, 148; "Bill" Dawson, 151; A. K. Stone, 181; John Burke, 141; Lieut. F. Mears, 150; C. J. Snapp, 121; P. T. Murphy, 146; W. H. Kromer, 129.

I. C. C. Party—Col. Eugene T. Wilson, 133; W. E. Burrell, 108; W. T. Harrison, 102; J. W. Barrett, 115; Max Lehman, 98; Miss Elizabeth McCormack, 149; Jim Daley, 116; Dr. Claude Pierce, 122.

"Bull Moose" Party—J. A. Smith, 273; H. B. Furlong, 261; R. R. Watson, 269; J. A. Linville, 250; D. W. McCormack, 253; T. M. Jordan, 269; C. M. Bullard, 248; Joe Lawrence, 251; A. S. Chambers, 259.

The vote for or against woman suffrage, state and national, stood 204 for, and 75 against.

Pacific Division Sand Service.

A report of sand cars loaded and shipped from Balboa during the month of October, follows:

DESTINATION.	Number cars.	Cubic yards.
Pacific Division.....	1,960	35,596
Atlantic Division.....	8	190
Central Division.....	26	390
Mechanical Division.....	1	25
Quartermaster's Department.....	2	50
Civil Administration.....	1	25
Fortifications.....	249	*5,863
First Division.....	21	347
Lighthouse Division.....	2	46
Panama railroad.....	7	175
Department of Sanitation.....	1	25
Panama Tramways Company.....	5	115
Miscellaneous.....	8	200
Total.....	2,291	43,047

*Includes two barge loads.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing of the teams in the Isthmian tenpin league on November 4 was, as follows:

Team.	Won.	Lost.	P. C.
Cristobal.....	10	5	.666
Empire.....	10	5	.666
Gatun.....	10	5	.666
Culebra.....	6	9	.400
Corozal.....	5	10	.333
Gorgona.....	4	11	.266

The standing of the teams in the basketball league on November 4 was, as follows:

Team.	Won.	Lost.	P. C.
Corozal.....	4	0	1.000
Empire.....	3	0	1.000
Gorgona.....	1	3	.250
Gatun.....	0	3	.000
Cristobal.....	0	2	.000

COROZAL.

The local handicap pool tournament will close on Saturday night, November 9.

The Corozal basketball five won the game with Gorgona on the Corozal floor, Saturday, November 2. Score, 17 to 14. The Corozal team will play at Empire on Saturday, November 9.

The Spanish class has an average attendance of 18. Three hundred people were at the Hallowe'en entertainment on Thursday evening, October 31. The program consisted of moving pictures, illustrated songs by G. K. Weston, violin solo by W. W. Wright, piano accompaniment by Miss Penman, ocarina solo by E. E. Tanner, reading by Ralph Wilson, vocal solo by Mrs. A. P. Boyd. Refreshments were served.

CULEBRA.

The next moving picture exhibition will be held on Saturday night, November 9. It is desired to call attention to the fact that members are admitted free of charge to these entertainments, but to adults who are not members, a fee of 25 cents is charged, and to all children a fee of 15 cents.

Mr. Benj. A. Armstrong has been appointed secretary at the Culebra clubhouse.

EMPIRE.

Two Isthmian bowling tournament games were bowled on the Empire alleys on Saturday night, November 2, between Gorgona and Empire; and Cristobal and Culebra, with the following results:

Empire.....	825	839	863
Gorgona.....	816	828	826
Cristobal.....	791	794	886
Culebra.....	755	738	823

The prize offered for the highest score in tenpins during October was won by Mr. Edwards. Score, 232.

The four classes in Spanish continue to attract the members, the average attendance being 25.

The recent billiard tournament was won by Mr. Fullman, after a spirited contest with Mr. Wood. There were twelve entries in this tournament, and the interest was such that another tournament will be started at once.

The Empire clubhouse has invited the other clubhouses to join the Empire association in an invitation tenpin tournament to be held on Thanksgiving Day.

According to the last census report, 71 per cent of the gold employes residing in Empire were members of the Empire Y. M. C. A.

GATUN.

The record for membership receipts at the Gatun clubhouse for a single month was broken in October,

when the total amount received in cash and deduction slips was \$627.

"Open house" was observed at the clubhouse on Monday, November 4. Pool and billiards were played without charge. Moving pictures were shown in the evening.

Gatun won the first and third, and Corozal, the second game of bowling in a match held on Saturday evening, November 2. The scores were, as follows:

Gatun.	Corozal.
Swallow.....	166 192 173
O'Meara.....	154 145 170
Rabbitt.....	136 137 152
Barte.....	180 160 153
Ootli.....	151 122 192
Peterson.....	156 151 138
Dalton.....	171 166 124
Ziller.....	151 151 134
Souder.....	142 163 135
Coonly.....	154 144 141

Total..... 787 756 840 774 775 672

Empire defeated Gatun in a very interesting game of basketball on Saturday evening, November 2. Scores: Empire, 33; Gatun, 19. Referee, Sartor; umpire, Oskin; timer, Fomon.

Red Cross stamps are on sale at the office of the secretary.

A beginners' class in Spanish, for ladies, was started on Tuesday afternoon, November 5.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, November 2, 1912. All heights are in feet above mean sealevel.

WEATHER CONDITIONS, CANAL ZONE, OCTOBER, 1912.

The rainfall for the month was heavy on both the Atlantic and Pacific coasts, but deficient at a number of stations in the interior. It was above the monthly average at eleven stations and below at seven. The total at Balboa was the greatest October rainfall of record at that station, and in only one year has it been exceeded at Ancon. The departure from the normal ranged from plus 6.97 inches at Ancon to minus 3.64 inches at Rio Grande.

The average air temperature was normal at each station, but the mean atmospheric pressure was below normal. On the Atlantic side the mean cloudiness and total wind movement were the greatest of record for October, but elsewhere these conditions were normal, or below.

There was a light fall of hail during a shower at Pedro Miguel on the afternoon of the 24th. Average conditions of foginess prevailed during the month. The greatest number occurred at Bas Obispo, where there were 30 days with fog. For all stations reporting fogs 50 per cent were dissipated by 6.30 a. m.; 89 per cent by 7.30 a. m., and 99 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

STATIONS.	Temperature.					Precipitation.			Wind.			
	Press're (reduced to mean of 24 hours.)	Mean.	Maximum.	Minimum.	Date.	Total inches.	Station average.	Number of rainy days.	Total movement (in miles.)	Prevailing direction.	Max. velocity (in miles.)	Date.

OFFICIAL CIRCULARS.

Information on 120-Trip Tickets.

CULEBRA, C. Z., November 1, 1912.

CIRCULAR No. 221-B.

In the future the following instructions will be stamped on the back of 120-trip tickets issued by this office to employes for use on official business:

"Employes using 120-trip tickets must indicate on back of each coupon used the division in which employed, name of immediate superior, and business which necessitates the trip."

Effective at once, all employes using 120-trip tickets must furnish the information indicated above on the back of each coupon used, using the following form and numbering the items from 1 to 3, as shown:

1. Central Division.
2. John Doe.
3. Inspecting material at Pedro Miguel.

The first two items may be filled out in advance on 20 or 30 tickets, leaving only item 3 to be filled out at time of use.

GEO. W. GOETHALS, Chairman.

Purchase of Half-rate Mileage Books.

CULEBRA, C. Z., November 1, 1912.

CIRCULAR No. 420-D:

In the future, half-rate mileage books must be purchased at least fifteen minutes before passenger trains are scheduled to arrive at stations.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Corozal, C. Z., Sunday, November 10, at 4.30 p. m. The program follows:

1. March—Chicago Tribune.....Chambers
2. Selection—Robin Hood.....de Koven
3. Intermezzo—Indian Summer.....Moret
4. Overture—Le Pre aux Clercs.....Herold
5. Song for cornet—The Rosary (By request).....Nevin

6. Popular song—Take me Back to your Garden of Love.....Osborne
7. Waltz—Impassioned Dream.....Rosas
8. Potpourri of popular songs.....Harris
9. March—King of the Air.....Everlof

CHARLES E. JENNINGS, Musical Director.

The next concert will be given at Empire, November 17, at 6 p. m.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending November 13, 1912, (75th meridian time):

DATE.	Low	High	Low	High	Low

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Balboa, Cristobal, and Colon during the week ending November 2:

Tricolor, October 26, from Aberdeen, Washington, with 33 pieces spud timbers, for Atlantic Division; three pieces spud timbers, for Pacific Division; 3,137-381 feet, B. M., Douglas fir lumber, 2,027 bales alfalfa hay, for stock.

Raum, October 27, from Mobile, with 18,159 pieces cross-ties, for stock.

Sixiola, October 27, from New York, with 41 cases electrical material, for superintendent of erection; 60 cases varnish, 40 coils rope, 30 barrels rosin, 21 cases fuse, for stock.

Colon, October 27, from New York, with 99 packages windows, doors, etc., for Panama Railroad Company; 44 cases drugs and sundries for Sanitary Department; 39 crates building paper, for Fortifications Division; 150 pieces malleable iron castings, 20 barrels journal bearings, for Mechanical Division; 47 cases steel bars, 139 bundles galvanized sheets, 119 bales cotton waste, 200 pieces steel plate, 25 crates pipe, 100 cases lanterns, 25 bundles shovels, 35 cases pick handles, 68 cases caustic soda, 323 pieces iron plates, 29 crates wrenches, for stock, and a miscellaneous cargo, the whole consisting of 1,845 pieces, weighing 340 tons.

Prinz Joachim, October 29, from New York, with 48 cases emergency dam material, for superintendent of erection.

Almirante, October 30, from New York, with 33 cases miscellaneous material, 1,502 sacks oats, for stock.
Atenas, October 31, from New Orleans, with 1,400 bags cement plaster, for Panama Railroad Company; 810 bales prairie hay, 15 cases lampblack, 133 pieces piling, for stock.

Luchana, October 31, from Baltimore, with 1,395 tons structural material for locks, for superintendent of erection; 465 tons structural material for Panama Railroad Company; 500 car wheels, for Mechanical Division; 500 pieces sewer pipe, 260 cases blasting caps, 447 pieces black pipe, for stock.

Mackinaw, November 2, from San Francisco, with 6,000 cases Trojan powder, for stock.

The following ships arrived at, or departed from, the port of Balboa during the week ending November 2: Arrivals—October 27, *Astec*, from San Francisco; October 28, *Mexico*, from Valparaiso; October 29, *Ecuador*, from Guayaquil; October 31, *Urubamba*, from Callao; November 2, *Mackinaw*, from San Francisco; November 2, *Panama*, from England.

Departures—October 28, *Pachitea*, to Callao; October 29, *Palena*, to Valparaiso; November 1, *Guatemala*, to Guayaquil.

MOVEMENT OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers for New York on alternate Tuesdays, at 2 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m. for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

Sale of Surveying Instruments, Compasses, and Ship's Log.

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., October 21, 1912.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, C. Z., until 2 p. m., November 9, 1912, when they will be opened in the presence of attending bidders, for any and all surveying instruments, compasses, and ship's log now on hand in the storehouse for obsolete material. These instruments may be seen on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m., on application to this office. The right is reserved to reject any or all bids or any combination of bids. Bids must be sealed and plainly marked: "Proposal to purchase Surveying Instruments," and addressed to the Depot Quartermaster, Mount Hope, C. Z.

CHARLES L. PARKER,
Acting Depot Quartermaster.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, NOVEMBER 13, 1912.

No. 12.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication, or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Upper Approach Wall at Gatun Locks.

The cellular approach wall at the upper end of Gatun Locks has been brought to full height throughout its length of 783 feet beyond the end of the solid center wall proper, and about one-third of the forms for the decking have been placed, but no concrete will be laid in them until after the wall has stopped settling. The wall is founded on concrete piles, and has been settling at the rate of approximately an inch a month ever since March, 1912, at which time it was half completed. The movement has been slightly more noticeable since the rise of the lake has subjected all of the surrounding area to depression. This settling, which was regarded by the engineers as inevitable, from the adjacent topography, has taken place evenly. The steel work of the towing and return tracks is being placed, and will be concreted in as the decking is laid.

Canal Work in October.

The grand total of Canal excavation to November 1 was 182,991,045 cubic yards, leaving to be excavated 29,235,955 cubic yards, or a little less than one-sixth of the entire amount necessary for the completed Canal. The total excavation for the month of October was 2,584,823 cubic yards, as compared with 2,331,678 cubic yards in October, 1911, and 2,884,382 cubic yards in October, 1910.

The dry excavation amounted to 1,406,051 cubic yards, and was entirely by steamshovels. The dredges and monitors removed 1,178,772 cubic yards. The progress in the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 680,461 cubic yards. Of this total, 1,700 cubic yards consisted of dry excavation at Gatun Locks, and the remainder was wet excavation—572,783 cubic yards from the Atlantic entrance, and 105,978 cubic yards dredged at Gatun Locks.

The total excavation in the Central Division was 1,119,847 cubic yards, which

includes 6,427 cubic yards in the Culebra Cut section charged to "plant" excavation. The output for October in the Central Division showed an increase over September of 184,791 cubic yards.

In the Pacific Division, the total excavation was 784,515 cubic yards, 219,959 cubic yards of which consisted of dry excavation in the prism between Pedro Miguel and Miraflores locks, and south of Miraflores Locks; 49,181 cubic yards on account of the Balboa terminals, and the remainder from the locks and spillway sites. Of the 500,011 cubic yards of wet excavation, 493,115 cubic yards were from the channel, including 88,963 cubic yards removed by monitors, while 6,896 cubic yards were taken out at the Miraflores locks and dam.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.

Mean rainfall along Canal (ten stations) 14.01 inches. By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as a prism, diversions, or locks, etc. that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as

prism, diversions, or locks, etc., It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

New Tourist Season Steamship Service.

The Peninsular and Occidental Steamship Company, which maintains a regular service between New York, Miami, and Key West, Florida, and Havana, Cuba, has arranged for a series of eight fortnightly sailings to the Isthmus during the coming dry season. A new steamship, the *Evangeline*, which is especially equipped for tropical travel, will be placed in this service, and, according to present plans, will leave Key West on its first voyage on January 7. The sailing time to the Isthmus will be about 70 hours. Two days will be spent here, and, on the return trip, a two-day stop will be made at Jamaica, and a short stop at Havana.

Release Refused to Nicaraguan Prisoners.

The Supreme Court of the Canal Zone has refused the writ of *habeas corpus* instituted to deliver from the custody of the Canal Zone Government the persons of Gen. Luis Mena, and Col. Daniel Mena, his son, leaders in the recent Nicaraguan revolution, who were taken prisoners by the United States forces and brought to the Canal Zone, where Gen. Mena has been receiving medical treatment at Ancon Hospital. The court based its decision on the grounds that the imprisonment of the petitioners was upon the order of the President of the United States and within his constitutional authority in dealing with the foreign affairs of the Government.

School Attendance Larger Than Last Year.

Eleven hundred and fifty-seven pupils were enrolled in the white schools of the Canal Zone at the close of October, an increase of 157 over the enrollment for the opening week of school, and 81 more than the total enrollment for October of last year.

The new white school for first, second and third grades at Corozal, was opened on October 28, with 27 pupils, 19 of which had been attending school at Ancon since the beginning of the term. The white school at Toro Point for primary grades was opened on October 14, with 10 pupils. The upper grade room in the Culebra white school has been discontinued, and the children in the fifth, sixth, seventh, and eighth grades are being sent to Empire by brake.

Eighteen colored schools are maintained, the same number as last year. The total enrollment at the close of October was 1,042, an

SOCIAL LIFE OF THE ZONE.

Gatun Sunshine Society's Charity Ball.

The Gatun Sunshine Society held a charity ball on All Hallowe'en in the local clubhouse, at which the sum of \$145 was cleared. Since its organization in 1908, the Sunshine Society has raised \$1,101.15, which has been devoted to the Gatun dormitory in the Arthur Home for Blind Babies at Summit, N. J. The dormitory has been furnished throughout, including a supply of linens sufficient for several years. The present membership of the society is 36. The meetings are held on the first Wednesday in each month in the Commission chapel.

Carnival at Gorgona.

A carnival will be held at the clubhouse in Gorgona on Saturday evening, November 16, the proceeds from which will be used in carrying out, on an extensive scale, what will probably be the last Christmas celebration in that village. The program for the carnival festivities include a parade, fireworks, a "Mid-way," and a dance in the clubhouse hall. The train schedule on Saturday nights is especially suited for those living at other Canal Zone towns who would like to attend. About three years ago, a similar carnival was held in the interest of the Red Cross fund, when the gross receipts amounted to over \$400. It is desired to make this occasion a still greater success, in order that the Christmas arrangements may be carried out fully.

Meetings of Ancon Study Club.

In future, the meetings of the Ancon Study Club will be held at the home of Mrs. Mark White, in the Tivoli section. The change is made, because the club library, containing encyclopedia and reference books, is in her home. The meetings are at 3 o'clock, and study begins promptly on the hour.

Woman's Guild of St. Luke's Chapel.

At the annual meeting of the Woman's Guild of St. Luke's Hospital chapel, two changes in the by-laws were made, as follows: First, to increase the number of officers by the addition of a second vice-president. Second, to reduce the number of meetings to one each month. This meeting will be held on the first Tuesday in each month at the home of one of the members, by invitation. The committees for the month will be appointed at this time, and all business will be transacted. The disbursements for the year amounted to over \$200, which were expended for charity, in gifts and offerings, and in meeting the expenses of the guild. For the sale of Red Cross Christmas stamps, Mrs. Charles W. Barber was appointed chairman. The officers elected were: President, Miss Beattie, first vice-president, Mrs. Charles F. Mason; second vice-president, Mrs. Henry A. Brown; secretary, Miss Kate Feuille; treasurer, Mrs. C. W. Barber. The November meeting was held on Tuesday afternoon, November 5, at the home of Mrs. H. A. Gudger.

American Veterans of Foreign Service.

The American Veterans of Foreign Service will meet in their post rooms, building No. 1, Cristobal, at 8.30 p. m., on Saturday, November 16. A special program has been arranged for the "Smoker," which will follow the regular business session. A cordial in-

itation is extended to all eligibles to attend this meeting, also, to the veterans of the Blue and the Gray.

PERSONAL.

The Honorable Henry L. Stimson, Secretary of War, and party, sailed for the Isthmus on the United Fruit Company's steamer *Zacapa* on Wednesday, November 13. He will remain until the 26th inst., returning to New York on that date, on the Panama railroad steamship *Colon*.

The following members of the House Committee on Appropriations sailed from New York on the steamship *Cristobal* on Friday, November 8, and are due to arrive at Cristobal on Friday, November 15: Representatives John J. Fitzgerald of New York, chairman of the committee, accompanied by his wife and two children; Charles L. Bartlett of Georgia, accompanied by Mrs. Bartlett; Edward L. Taylor, Jr. of Ohio, accompanied by Mrs. Taylor; Edward W. Saunders of Virginia, accompanied by his wife and two children; Swagar Sherley of Kentucky. Among other members of the party are Representatives James R. Mann of Illinois, accompanied by Mrs. Mann; Henry M. Goldfogle of New York, and John J. Gardner of New Jersey.

Col. Tom M. Cooke returned from his leave of absence, accompanied by Mrs. Cooke, on the United Fruit Company's steamer *Turrialba*, which arrived at Colon on Sunday, November 10.

Capt. Courtland Nixon returned from his annual leave on the *Panama*, which docked at Cristobal, Friday, November 8.

Trial of Charles W. Boxer.

Charles W. Boxer, charged with embezzling the funds of a local secret order, was returned to the Isthmus in the custody of an officer on November 5, from San Francisco, in which city he was apprehended. He was arraigned in the circuit court at Ancon on Monday, November 11, where his case was continued until Monday, November 18.

Fatal Accident at Pedro Miguel Lock.

James Tyrell, an employee of the McClintic-Marshall Construction Company at Pedro Miguel, fell from a scaffold on the lock wall at 10.30 a. m., Tuesday, and was instantly killed. He pitched directly into the opening of a floor culvert in the lock chamber, breaking his neck in the fall.

Obituary.

Joshua W. Kendall, who left the service of the Canal Commission in November, 1911, after a service extending over five years, died in Washington, D. C., on Wednesday, October 23. He was 45 years of age, a widower, and is survived by his two daughters.

I. B. of S. S. and D. M.

Local No. 19, International Brotherhood of Steamshovel and Dredge Men will hold its regular monthly meeting at the Hotel Metropole, Panama, on Sunday, November 17, at 1 p. m. All members are requested to attend.

J. I. MAJOR,
Secretary and Treasurer.

EMPIRE, C. Z., November 12, 1912.

LOST—In passenger station at Colon, in the morning of November 5, a pair of nose eye glasses with chain for ear attachment. Finder will please return to Mrs. J. T. Stanner, Bas Obispo.

STEAMSHOVEL RECORDS.

Work of Central Division Machines During the Month of October.

During the month of October, the total amount of material excavated in the Central Division was 1,119,847 cubic yards, of which 153,010 cubic yards were classified as earth, and 966,837 cubic yards as rock. The total of 1,119,847 cubic yards was removed by steamshovels.

The high record for the month was made by shovel No. 212, working 26 days in the Culebra district, which excavated 46,379 cubic yards of rock.

The second best record for the month was made by shovel No. 262, working 27 days in the Empire district, which excavated 46,117 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 124, working 27 days in the Culebra district, which excavated 16,732 cubic yards of rock, and 3,500 cubic yards of earth, a total of 20,232 cubic yards.

Shovel No. 212, working in the Culebra district, made a high record for one day by excavating 2,660 cubic yards of rock on October 22.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month, and for one day, are shown in the following table:

BEST RECORDS FOR THE MONTH.

CULEBRA DISTRICT.

SHOVEL No.	CUBIC YARDS.			No. of days at work.
	Earth.	Rock.	Total.	
212.....	46,379	46,379	26

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, engineers, and chauffeurs will be held by the Board of Local Inspectors at the Administration Building, Ancon, on Wednesday, November 20, 1912. All applicants for licenses as chauffeurs must procure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8 a. m., with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability to properly operate an automobile, and must have the machine with them.

LOST—In Panama, in the vicinity of Santa Ana Plaza, on Sunday afternoon, November 3, a Canal medal, forming a watch fob. Reward is offered on return to A. B. Stewart, P. O. box 108, Gorgona.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

MONTHLY TOTALS BY CUBIC YARDS OF EXCAVATION AND LOCK AND DAM CONSTRUCTION.

[All figures are of work useful for the complete Canal.]

2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 2680, 2681, 2682, 2683, 2684, 2685, 2686, 2687, 2688, 2689, 2690, 2691, 2692, 2693, 2694, 2695, 2696, 2697, 2698, 2699, 2700, 2701, 2702, 2703, 2704, 2705, 2706, 2707, 2708, 2709, 2710, 2711, 2712, 2713, 2714, 2715, 2716, 2717, 2718, 2719, 2720, 2721, 2722, 2723, 2724, 2725, 2726, 2727, 2728, 2729, 2730, 2731, 2732, 2733, 2734, 2735, 2736, 2737, 2738, 2739, 2740, 2741, 2742, 2743, 2744, 2745, 2746, 2747, 2748, 2749, 2750, 2751, 2752, 2753, 2754, 2755, 2756, 2757, 2758, 2759, 2760, 2761, 2762, 2763, 2764, 2765, 2766, 2767, 2768, 2769, 2770, 2771, 2772, 2773, 2774, 2775, 2776, 2777, 2778, 2779, 2780, 2781, 2782, 2783, 2784, 2785, 2786, 2787, 2788, 2789, 2790, 2791, 2792, 2793, 2794, 2795, 2796, 2797, 2798, 2799, 2800, 2801, 2802, 2803, 2804, 2805, 2806, 2807, 2808, 2809, 2810, 2811, 2812, 2813, 2814, 2815, 2816, 2817, 2818, 2819, 2820, 2821, 2822, 2823, 2824, 2825, 2826, 2827, 2828, 2829, 2830, 2831, 2832, 2833, 2834, 2835, 2836, 2837, 2838, 2839, 2840, 2841, 2842, 2843, 2844, 2845, 2846, 2847, 2848, 2849, 2850, 2851, 2852, 2853, 2854, 2855, 2856, 2857, 2858, 2859, 2860, 2861, 2862, 2863, 2864, 2865, 2866, 2867, 2868, 2869, 2870, 2871, 2872, 2873, 2874, 2875, 2876, 2877, 2878, 2879, 2880, 2881, 2882, 2883, 2884, 2885, 2886, 2887, 2888, 2889, 2890, 2891, 2892, 2893, 2894, 2895, 2896, 2897, 2898, 2899, 2900, 2901, 2902, 2903, 2904, 2905, 2906, 2907, 2908, 2909, 2910, 2911, 2912, 2913, 2914, 2915, 2916, 2917, 2918, 2919, 2920, 2921, 2922, 2923, 2924, 2925, 2926, 2927, 2928, 2929, 2930, 2931, 2932, 2933, 2934, 2935, 2936, 2937, 2938, 2939, 2940, 2941, 2942, 2943, 2944, 2945, 2946, 2947, 2948, 2949, 2950, 2951, 2952, 2953, 2954, 2955, 2956, 2957, 2958, 2959, 2960, 2961, 2962, 2963, 2964, 2965, 2966, 2967, 2968, 2969, 2970, 2971, 2972, 2973, 2974, 2975, 2976, 2977, 2978, 2979, 2980, 2981, 2982, 2983, 2984, 2985, 2986, 2987, 2988, 2989, 2990, 2991, 2992, 2993, 2994, 2995, 2996, 2997, 2998, 2999, 3000, 3001, 3002, 3003, 3004, 3005, 3006, 3007, 3008, 3009, 3010, 3011, 3012, 3013, 3014, 3015, 3016, 3017, 3018, 3019, 3020, 3021, 3022, 3023, 3024, 3025, 3026, 3027, 3028, 3029, 3030, 3031, 3032, 3033, 3034, 3035, 3036, 3037, 3038, 3039, 3040, 3041, 3042, 3043, 3044, 3045, 3046, 3047, 3048, 3049, 3050, 3051, 3052, 3053, 3054, 3055, 3056, 3057, 3058, 3059, 3060, 3061, 3062, 3063, 3064, 3065, 3066, 3067, 3068, 3069, 3070, 3071, 3072, 3073, 3074, 3075, 3076, 3077, 3078, 3079, 3080, 3081, 3082, 3083, 3084, 3085, 3086, 3087, 3088, 3089, 3090, 3091, 3092, 3093, 3094, 3095, 3096, 3097, 3098, 3099, 3100, 3101, 3102, 3103, 3104, 3105, 3106, 3107, 3108, 3109, 3110, 3111, 3112, 3113, 3114, 3115, 3116, 3117, 3118, 3119, 3120, 3121, 3122, 3123, 3124, 3125, 3126, 3127, 3128, 3129, 3130, 3131, 3132, 3133, 3134, 3135, 3136, 3137, 3138, 3139, 3140, 3141, 3142, 3143, 3144, 3145, 3146, 3147, 3148, 3149, 3150, 3151, 3152, 3153, 3154, 3155, 3156, 3157, 3158, 3159, 3160, 3161, 3162, 3163, 3164, 3165, 3166, 3167, 3168, 3169, 3170, 3171, 3172, 3173, 3174, 3175, 3176, 3177, 3178, 3179, 3180, 3181, 3182, 3183, 3184, 3185, 3186, 3187, 3188, 3189, 3190, 3191, 3192, 3193, 3194, 3195, 3196, 3197, 3198, 3199, 3200, 3201, 3202, 3203, 3204, 3205, 3206, 3207, 3208, 3209, 3210, 3211, 3212, 3213, 3214, 3215, 3216, 3217, 3218, 3219, 3220, 3221, 3222, 3223, 3224, 3225, 3226, 3227, 3228, 3229, 3230, 3231, 3232, 3233, 3234, 3235, 3236, 3237, 3238, 3239, 3240, 3241, 3242, 3243, 3244, 3245, 3246, 3247, 3248, 3249, 3250, 3251, 3252, 3253, 3254, 3255, 3256, 3257, 3258, 3259, 3260, 3261, 3262, 3263, 3264, 3265, 3266, 3267, 3268, 3269, 3270, 3271, 3272, 3273, 3274, 3275, 3276, 3277, 3278, 3279, 3280, 3281, 3282, 3283, 3284, P. R. R. SIGNAL SYSTEM.

Interpretation of New Scheme of Interlocking, Automatic, and Train Order Signals.

Under the new scheme of signaling on the Panama railroad all signals will be of the semaphore type, and all arms will work in the upper right hand quadrant. The disc signals between Tower "R" and Matachin Junction, and the lower quadrant signals on the Isthmian Canal Commission tracks, and those between Gorgona and bridge No. 57½, will remain in service, however, until these tracks are abandoned.

In the new scheme of signaling there are but three classes, consisting of interlocking, automatic, and train order signals. The automatic and interlocking signals are electrically connected in automatic territory. The train order signals are always controlled manually by the telegraph operator on duty at the cabin or station.

LOCATIONS.

All automatic and interlocking signals carry their arms about 24 feet above the rail, and are located on the right hand side of the track as viewed by an approaching train. This always presents the red side of the blade to the vision of the train crew.

Diversions from this general rule consist

their station work while getting orders, and without any part of the train passing the "31" order arm when in its stop position. Frijoles, Monte Lirio, and Gatun will be equipped with train order signals of this kind. They will be electrically operated, but controlled manually by the operator on duty.

ASPECTS.

Collectively, all three classes of signals are capable of giving but five aspects. These are known as: 1. Stop. 2. Proceed at limited speed. 3. Proceed at normal speed. 4. Proceed at safely reduced speed. 5. "19" orders.

"Stop" aspects can be given by all signals which display red arms with square ends. The "Stop" aspect is the basis on which the element of safety rests, and must be obeyed in all cases. The "Stop" aspect is given with the arm in the horizontal position. The night indication consists of one red light on one-arm poles, two or more red lights, arranged vertically, on interlocked home signals, having more than one arm, or a red light above a yellow light on train order signals.

"Limited speed" is given with the arm inclined upward at an angle of 45 degrees. Automatic signals, semiautomatic one arm home signals, and the semiautomatic top arm of an interlocked home signal having more

in this position denotes stop, wait two minutes (or longer,) send a flagman forward, and if the signal does not assume one of its proceed positions while waiting, to follow the flag at a safe speed and distance to the next proceed aspect. On double track, an automatic in its stop position requires a dead stop of 30 seconds. The train can then proceed at "Limited speed" until they pick up a proceed aspect. The top arm on a train order signal when in its stop position can only be passed with a clearance card from the operator on duty. Home signals at stop can only be passed by receiving a proceed hand signal from the interlocking signalman with a yellow flag, or a yellow lantern.

"Limited speed" is a speed at which the engineman can stop his train within the range of vision.

"Normal speed" is that speed usually assumed by all trains when running in accordance with the book of rules, the time table, and special instructions governing the speed of trains through that territory.

"Safely reduced speed" is a slow, safe speed required in taking crossovers, or other turnouts.

"19" orders are signified by the lower arm of the train order signal. The engineman, when observing this, sounds five short blasts of

INTERLOCKING SIGNALS.

in the use of dwarf signals at interlocking plants, when the general layout makes a dwarf signal advisable, and the application of a cantilever attachment to a high signal when local conditions prevent its location on the right hand side of the track it governs.

The cantilever is a dead mast or "doll" fixed to the signal pole and supporting a stationary blue light by night. When displayed from the left of a signal it designates that the signal had to be located on the left hand side of the track it governs. When the cantilever is displayed from the right hand side of the signal pole it denotes there is an existing track between the signal and the track it governs, and that the signal does not control movements on the track between the main and the signal. A signal located to the right of two or more tracks that does not display a cantilever, governs trains on all tracks in that direction.

Train order signals are located at cabins and display two arms for either direction. When train order signals are in use at a station, the scheme will be changed by erecting two poles, each about 350 feet in advance of the station building. Each of these poles will display two arms for trains in that direction only, and will allow passenger trains to do

than one arm, are capable of giving a "Limited speed" aspect. The night indication is one yellow light, or one yellow light above one or two red lights.

"Normal speed" can be given by all signals, excepting the dwarf and the lower arms on an interlocked home signal. The arm is inclined to a vertical position and its center line is parallel with the center line of the signal mast. The night indication is one green light, a green light above one or two red lights, or, as with the train order signal, two green lights arranged vertically.

"Proceed at safely reduced speed" can be given only by a dwarf signal, or one of the lower arms on an interlocked home signal having more than one arm. The arm in both cases is brought up to its vertical or 90-degree position. The night indications are either one green light (on the dwarf,) a green light below one red, a green between two reds, or a green below two red lights.

DEFINITIONS.

The "Stop" aspect means to stop before any part of the train passes the signal. After the stop is made there is then ample time to determine the class of the signal and ascertain the legitimate method by which to again proceed. An automatic signal on single track

the whistle to notify the crew on the rear end.

There is nothing in the scheme of signaling which interferes with the necessity of proper train orders or the observance of Rule 99.

AUTOMATIC SIGNALS.

Automatic signals are controlled automatically, as their name indicates. A continuous track circuit is a prime element of control, and this is supplemented by a line circuit carried on the telegraph poles. Automatic signals offer protection against broken rails, open switches, rails, or frogs removed, cars beyond the fouling point, and disconnected derails. Head and rear end protection on single track, and rear end protection on double track, is assured through the proper observance of aspects and obedience to the rules. Typical arrangement of automatic signals is made by placing two signals on either end of a passing track, and an outlying signal about 3,000 feet from the switch to govern approaching trains from either direction. Protection between stations is carried on by erecting one or more pairs of opposing signals, according to the distance between the two passing tracks. Where stations are near each other, approach signals are left out, and one pair of opposing signals installed. The object in placing two signals at either end of a

passing track is to impart information to trains about to enter the main track at that point, concerning the condition of track in advance, as well as in the rear. These two automatic signals perform this function in addition to their regular duties for trains running along on the main track.

At crossovers and nonimportant sidings, small miniature signals, enclosed in cast iron cases, are installed to impart information to trains about to enter the main track. These are called switch indicators, and signify whether or not a train may proceed. Indicators will also be installed in all interlocking towers, in order that the signalman may know

current passes from the track battery along one rail to the relay, through the relay, energizing same and picking up its armature. The current then returns on opposite rail to battery. This holds the signal normally at its "Proceed at normal speed" position. The presence of a train with its numerous wheels and axles offers a path of less resistance than that offered through the 4-ohm track relay. The train in this manner shunts out the track battery, deenergizing the track relay, and allowing the armature to open. The local signal battery is then interrupted, and, as soon as this interruption takes place, current is taken from the slot arm on the signal and the signal itself

in the same manner described when a train is occupying a track circuit. These switch boxes complete their electrical connection when points or derails are thrown out of their normal positions. Protection against open switches is given in this manner. Two or three cells of gravity battery furnish current for the track circuit. These cells are equipped with a special 4-pound amalgamated circular zinc and pan bottom type of battery copper.

The lower compartment of each signal case contains 16 primary cells, connected in series, and having 400-ampere hour capacity. This battery operates the signal, and furnishes current to the polarized control for the next signals in the rear, as well as indicators, or other special circuits, that may originate at that point. Number 10, B. & S. gage copper clad wire, with three braid, weatherproof insulation, is used for overhead wires on single track installation, and No. 10 hard drawn copper is used for all line circuits on double track.

The automatic signal is of a type called "Style B." The direct current motor operates on 10 volts. Power is carried to the up and down rod through a series of reduction gears, and this mechanical connection is maintained only when the slot arms are energized by current from the proper circuit. One motor moves the signal arm from 0 to 45 degrees, as well as from 45 to 90 degrees, as both slot arms are connected to the up and down rod by a rack and pinion. Mechanisms are equipped with Veeder counters, which register all upward movements of the slot arm.

A signal called "Style T" is used for all semiautomatic home signals. This signal is of the top post type, being clamped directly to the existing home signal pole. Its internal mechanism is similar to the "Style B," except it is less rugged and occupies a smaller case. Battery for this type of signal is placed in a separate shelter near the base of the pole. The doors on all signal cases fit against hemp

AUTOMATIC BLOCK SIGNALS.

the condition of the track, both in the rear, and in advance, when passing a train from siding to the main. The spacing and general arrangement of automatic signals is sufficiently flexible to allow them to be changed over to alternating current control, should the Panama railroad be electrified at some future date.

No distant signals are used at interlocking plants; the first automatic signal in advance taking care of this function. In fact, this scheme of distant signals is carried out further than similar installations in the United States, for, on the Panama railroad, the term "Distant signal" has been abandoned, and trains will be brought up to all stop aspects under "Limited speed," regardless of the class of signal, the arm of which occupies the stop position. The train running on the main line is further protected by pipe connected derails on all important sidings, these being mechanically operated from switch stand. These derails are equipped with a switch box, which will put the signals on either side of them to "Stop," should the derail be disconnected and out of service. Derails on a passing track, or siding, act as a permanent landmark for all trains using this track, and show the exact fouling point. They prevent trains from creeping up beyond the fouling point, and also compel the brakeman to go to the switch stand, where he can observe the switch indicators, before the train can foul the track circuit of the main line. Track circuits average 3,000 feet in length. They are separated with insulated rail joints. All track joints are bonded with two No. 6, B. & S. gage copper clad bond wires. These bond wires are connected to the rail by a tinned channel pin, the wire fitting into a groove in the side of the pin and making a perfect electrical contact when driven tightly into a 9/32-inch hole.

When no train is on the track circuit, the

then assumes the stop position by gravity. All electrical connections are designed on the closed circuit scheme, which places the signal to "Stop" in case of any electrical failures. The mechanical arrangement is also designed on the same basis, so, should there be any mechanical disconnection in the signal mechanism, the signal will assume a stop position by gravity. This is assisted by the upper quadrant spectacle, which allows a proper

TRAIN ORDER SIGNALS.

distribution of weight on the spectacle castings, in such a manner, that the blade itself will go to its stop position, should all connections be removed. These arrangements make all failures on the safe side, and eliminate all probabilities of that dangerous condition known as "False clear failure."

Derails, main line, and crossover switches, are equipped with switch boxes, which places a short circuit on the track battery and acts

packing, and are under tension when closed and locked. All cases are properly ventilated to secure proper circulation of air.

Relays, switch indicators, and lightning arresters are sheltered in iron cases of special design, supported either on posts with separate concrete foundations, or applied to the side of the existing poles. Track batteries are placed in cast iron boxes having a capacity of six cells. After wires are run into

any iron case, all apertures are filled with paraffine wax to exclude insects.

Lamps are of the improved semaphore type, Railway Signal Association standard. They are equipped with four day burners and prismatic reflectors. All colored glass are solid color, moulded to exact shape, and then polished. These are held in place by soft rubber clips under the retaining rings.

The first section of automatic signals to be put in service will be between Corozal and Tower "R," the installation on this section being completed. The second section will embrace the territory between Gatun and Cai-

mito; the balance of the installation will be made as rapidly as conditions will permit.

The Panama railroad will issue a revised edition of the Book of Rules at an early date. All rules governing the operation of signals will be treated in a concise manner and fully explained by colored cuts in this book. For the present, trains will operate under automatic signals as outlined in the book of signal instructions.

The work of installation is under the supervision of W. H. Fenley, Signal Engineer, Panama Railroad Company.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing of the teams in the bowling league on Monday, November 11 was, as follows:

Team.	Won	Lost	P. C.
Gatun.....	13	5	.722
Empire.....	12	6	.666
Cristobal.....	10	8	.555
Culebra.....	7	11	.388
Gorgona.....	6	12	.333
Corozal.....	6	12	.333

The standing of the teams in the basketball tournament on Monday, November 11 was, as follows:

Team.	Won	Lost	P. C.
Empire.....	4	0	1.000
Corozal.....	4	1	.800
Gorgona.....	2	3	.400
Gatun.....	0	3	.000
Cristobal.....	0	3	.000

Considerable interest was manifested in the mock elections held at the clubhouses on election night. It is estimated that over 3,000 people came out for the purpose of voting, receiving the returns from the United States, and listening to the program provided.

The mock election for national candidates resulted, as follows:

	Cristobal.	Gatun.	Gorgona.	Empire.	Culebra.	Corozal.	Totals.
Roosevelt.....	224	102	115	428	71	87	1,027
Wilson.....	200	212	101	111	77	81	782
Debs.....	26	50	285	20	12	47	440
Taft.....	33	33	10	17	7	6	106
Chaffin.....	2	2	4	62	1		69

The mock elections for mayors in the various villages resulted, as follows:

Corozal—Mrs. F. Rawley, Suffragette, 76; W. P. Holmes, Progressive, 48; W. L. Thompson, Democrat, 33; M. W. Ruggles, Socialist, 51; J. A. McCullough, Republican, 9.

Culebra—Bliss, Married Progressive, 166; Cooke, Independent Progressive, 154.

Empire—Gorham, Progressive, 232; Wertz, Republican—Democrat, 64; Sawtelle, Socialist, 39.

Gorgona—Morrison, Socialist, 295; Tom Ryan, Independent Democrat, 151; B. M. Robinson, Progressive, 99.

Gatun—W. B. Childers, Democrat, 212; Maj. G. M. Hoffman, Republican, 63; G. A. Barte, Socialist, 61; Dr. A. G. Farmer, Progressive, 54.

Cristobal—J. A. Smith, Progressive, 273; Ross Wallace, P. R. R. 135; E. P. Wilson, I. C. C., 133.

COROZAL.

Over 300 people were at the clubhouse on Tuesday night, November 5, to hear the election returns, and to take part in the mock election. The program consisted of reading of the Corozal local party platforms, speeches by the candidates for offices, and casting of ballots. Besides the returns, there were many stereopticon slides, consisting of views of the Isthmus, etc. On Friday evening, November 15, there will be an installation of the newly elected officers, and a reception for the Corozal bachelors at the clubhouse.

Cristobal will bowl at Corozal on Saturday night, November 16.

The first number of the "Forum" will take place at the clubhouse on Sunday evening, November 17. Mr. F. A. Gause will deliver an address, and special music will be furnished by the Tropical Male Quartet.

CULEBRA.

At the mock election held in the schoolhouse on Tuesday evening, November 5, polls were opened at 6 p. m., and closed at 9 p. m. Voting booths were erected on the lower veranda, and judges, challengers, clerks, and counters were kept busy until 10 o'clock, when it was found that the "Married Progressive" party had elected their candidate for alcalde by a majority of

12 votes, Mr. Bliss polling 166 and Mr. Cooke 154. The officials-elect were equally divided between the two parties, both sides electing eight, with two ties. Moving pictures were shown, seven reels being provided, and slides giving election returns from the United States, as well as locally, were thrown on the screen. Music was furnished by Gray's orchestra during the entire evening, and the Culebra Male Quartet, consisting of Messrs. Ross, Dickson, Case, and Lieut. Achers, sang political songs. Refreshments were served during the evening.

The new bowling alleys and poolroom were opened on Tuesday night, November 12.

EMPIRE.

Empire and Culebra bowled the tournament games on the Empire alleys on Friday, November 8, Empire winning two out of three games. Scores:

Empire.....	717	872	869
Culebra.....	830	803	776

The basketball game between Empire and Corozal, played at Empire on Saturday, November 9, was an unusually close contest. At the end of the game, the score was tied, each team having six points to its credit. In the five minute play-off, the Empire team made five baskets, winning the game by 16 to 6. Empire has won four games and lost none. Mr. Sartor was referee.

A chess match was held on Saturday night, November 9, when Mr. Shutes of Cristobal played Messrs Pulsifer, Sherrard, Knight, Warner, Dubois, McClure, Rose, Beeman, Caldwell, Halfhill, and Hobbs. Mr. Shutes won seven and one-half games and lost three and one-half games. Those winning were Messrs. Pulsifer, Knight, and Beeman. Mr. Rose tied.

The following men have entered the November pool tournament: Messrs. Newbold, Lidaner, Huson, Gray, Pearson, Jackson, Davies, Edwards, Sawtelle, Gustavson, Mullane, Swab, Donnelly, Entriken, Kosier, Toone, Miller, Bergstrom, Earle, and King. The handball tournament will be started this week. Ten men have entered already.

The entertainment held on election night was attended by an audience of over 400. The program consisted of solos, quartets, duets, and moving pictures. Five hundred and eighty people voted in the local election, the "Bull Moose" party winning by a large majority, both for the national and local candidates.

GORGONA.

A concert will be given by the Gorgona chorus on Sunday, November 24.

Five hundred and ninety-two votes were cast at the mock election held Tuesday, November 5. The standing of the parties were, as follows: Socialists, first; Independents, second; Democrats, third; and Progressives, fourth.

A wrestling class has been organized to meet once a week. The boys' gymnasium classes are growing.

Gorgona took two out of three games in bowling on Saturday night. Scores:

Gorgona.....	817	750	765
Corozal.....	793	865	706

Gorgona won the basketball game on Saturday from Cristobal. The score was 25 to 14 in favor of Gorgona. The referee was Mr. Carr of Empire.

The sacred concert that was planned for November 17, is postponed until November 24.

GATUN.

In a match game of bowling played on the Gatun alleys, on Saturday, November 9, between Cristobal and Gatun, the latter took three straight games. Gatun, therefore, for the present, leads the Isthmian tenpin tournament.

The new pool cues have arrived from the United States and are now on sale at the desk.

The membership of the Gatun clubhouse has now reached high water mark, namely 455.

Subscriptions for magazines and newspapers will be sent in during the next few days, to cover the period

from January 1, 1912, to January 1, 1913. Any suggestions will be considered.

Moving pictures will be shown on Saturday night, November 16.

CRISTOBAL.

On Friday night, November 15, "Open house" will be held. Entertainment and refreshments will be furnished. Everybody welcome.

On Saturday night, November 16, the Gatun basketball team will play the local team.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the two weeks ending November 9:

DATE.	Hours worked.	Cubic yards.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Empire, C. Z., on Sunday, November 17, at 6 p. m. The program follows:

1. March—*Chicago Tribune*..... Chambers
2. Selection—*Bohemian Girl* (By request)..... Balfe
3.(a) *Visions*..... Hayes
-(b) *Narcissus* (By request)..... Nevin
4. Overture—*Le Pre aux Clercs*..... Herold
5. Popular song—*Climb a Tree With Me*..... Harris
6. Selection—*The Spring Maid* (By request) Reinhardt
7. Waltz—*Impassioned Dream*..... Rosas
8. Medley of popular songs..... Harris
9. March—*Spirit of Independence*..... Holzman

CHARLES E. JENNINGS, Musical Director.

The next concert will be given at Hotel Tivoli, Ancon, on Sunday, November 24, at 8 p. m.

OFFICIAL CIRCULARS.

Thanksgiving Day.

CULEBRA, C. Z., November 6, 1912.

CIRCULAR No. 462:

Thanksgiving Day, Thursday, November 28, 1912, will be observed as a holiday in the Canal Zone, and as far as practicable, all public business will be suspended on that day.

GEO. W. GOETHALS, *Chairman.*

Cessation of Work on November 2, in Honor of the Late Vice-President.

CULEBRA, C. Z., November 6, 1912.

CIRCULAR No. 463:

Under authority of the President's proclamation, of which, advice was received on the morning of November 2, work was stopped at 11 a. m. for the remainder of the day, in honor of our late Vice-President, whose funeral occurred on that date.

Employees paid on an annual or monthly basis will be allowed time for that period under the same rules governing payment for Sunday time. For other employees, time will be carried the same as for an ordinary working day and payment made only for services rendered.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Ratings and Rates of Pay.

CULEBRA, C. Z., November 9, 1912.

CIRCULAR No. 229-Y:

In addition to the present authorized rating of chainmen at \$30 a month, the following rates of pay are hereby authorized:

Chainmen, (Special).....\$37.50 per month.
Foremen, (Chainmen)..... 45.00 per month.

The men now employed as foremen (chainmen) at \$50 a month may be continued at that rating until their services are terminated. In the future, no foremen (chainmen) will be promoted to a rate of pay in excess of \$45 a month.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Reduced Rate on United Fruit Company's Steamers.

CULEBRA, C. Z., November 9, 1912.

CIRCULAR No. 175-1:

Effective November 15, 1912, the reduced rate of \$40 granted I. C. C. employees on the United Fruit Company's line from Colon to New Orleans will apply only to direct steamers. Employees desiring to travel on coastwise steamers will be charged the regular tariff rate of \$50.

GEO. W. GOETHALS, *Chairman*

Charges for Special Handling of Shipments by Panama Railroad Steamship Company.

CULEBRA, C. Z., November 11, 1912.

CIRCULAR No. 186-F:

It is sometimes necessary for the Panama railroad steamship line to hire special equipment to load on steamers such shipments as large launches, etcetera. When employees are granted the reduced rate on such shipments they will be required to pay, in addition to the freight rate, any charges for such special handling.

GEO. W. GOETHALS,
*Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.*

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Colon, Cristobal, and Balboa during the week ending November 9:

Carrillo, November 3, from New York, with 97 cases electrical material, 49 reels cable, 44 cases iron wrenches, 44 cases wrench boards, for superintendent of erection.

Ancon, November 4, from New York, with 67 cases books, 32 reels wire rope, 434 bundles shovels, 400 kegs lead, and 154,285 bags cement, for stock; 578 bundles steel bars, for Pacific Division; 17 boxes water gate posts, for superintendent of erection; 10,100 pieces tile blocks, for Panama Railroad Company; 532 bundles steel bars, for Division of Fortifications; and a miscellaneous cargo, the whole consisting of 166,925 packages, weighing 8,045 tons.

Odenwald, November 5, from Hamburg, with 30 cases lock valves, for superintendent of erection.

Santa Marta, November 6, from New York, with 20 reels cable, for superintendent of erection; 50 cases soap, 215 coils rope, for stock.

Pennsylvania, November 6, from San Francisco, with 544 pieces sugar pine lumber, for stock.

Prinz Eitel Friedrich, November 6, from New York, with 267 kegs rivets, 75 bundles coil springs, for stock.

Parismina, November 7, from New Orleans, with 1,565 barrels brick, Panama Railroad Company; 570

pieces yellow pine lumber, 615 drums, for Mechanical Division; 500 cases oils, 110 pieces piling, 332 pieces yellow pine lumber, 1,897 bales hay, for stock.

Panama, November 8, from New York, with 53 boxes sales books, 300 kegs paint, 1,170 kegs wire nails, 12 cases harness soap, 12 barrels chipped soap, for stock; 200 rolls wire fence, for Sanitary Department; 82 barrels insulators, 32 boxes water gate parts, for superintendent of erection; 21 cases brass tubes, for Pacific Division; and a miscellaneous cargo, the whole consisting of 2,280 packages, weighing 152 tons.

COMMISSARY DEPARTMENT.

The commissaries are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others 8 a. m. to 1 p. m., and 3 to 7 p. m.

Cold Storage Prices.

The following changes have been made in the prices of cold storage supplies:

Pork, loin chops, or roast, advanced to 20 cents a pound.
Buttermilk, out of stock.
Beets, reduced to three cents a pound.
Cucumbers, advanced to eight cents a pound.
Carrots, reduced to three cents a pound.
Tomatoes, out of stock.
Plums, out of stock.
Pineapples, out of stock.

Misdirected Letters.

ANCON, C. Z., November 13, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be procured upon request of the addressee:

80 Plant and equipment to be absorbed in construction costs after Sept. 30, 1912.								\$1,967,049.52	
Total expenditures, Pacific Division								\$35,205,487.97	
81 Lighting and buoying canal		\$28,589.00			\$150,228.54			\$178,817.54	
Total expenditures, constr. and eng'ng								\$159,773,150.09	

Item 39—Central Division Dredging Excavation Prism, preliminary surveys.

Item 41—Represents operation of cement gun used in facing walls of the cut.

Item 59—Pacific Division, Miraflores Dam, Hydraulic Filling. Expenditures represent cost of pipe lines, flumes, etc. 661,048 cubic yards have been deposited in the dams from dredges and hydraulic excavation in lock chambers and in prism below the locks. The expense thereof has been charged to excavation.

Items 75, 76 and 77—Pacific Division, Laboca Locks and Dams. This expense was incurred prior to the adoption of Miraflores as the site for the lower locks and dam at the Pacific entrance of the canal.

Item 78—Naos Island Breakwater. Though shown under Pacific Division, the breakwater is being constructed entirely by the Central Division with material from the cut. Only the excess cost of dumping here as compared with regular dumps is charged to this item.

Items 36, 42, and 80—The expenditures for Plant and equipment are absorbed in the construction costs on the basis of estimated cost of the plant and estimated quantities of work to be done. The amounts shown under these items represent the balances which are to be absorbed into construction costs after September 30, 1912.

General—When excavated material is used for filling, such as dams, back-filling, etc., the cost of dumping only is charged to the item benefited, other expenses being charged to Excavation.

DAM CONSTRUCTION.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, NOVEMBER 20, 1912.

No. 13.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication, or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of October is published in full in this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Dredge No. 85 in Pacific Harbor.

Pipeline suction dredge No. 85, which was dismantled and transferred from the south side of Gatun Dam to the Pacific entrance, began excavating in the inner harbor basin, west of the site of the proposed piers, on November 18. The first section of the hull was laid on the Balboa shipways for reassembling on August 9; the dredge was launched on September 30, and on October 26, steam was raised and the machinery turned over. Since that date the new superstructure was completed, and a few days' delay was occasioned by the laying of the 2,200-foot pipeline through which it is discharging. The spoil from its excavation is to be used in filling a swamp along the Curundú River, bounded by Diablo Hill, the main line of the Panama railroad, the Balboa branch of the railroad, and the yards in the rear of the new piers.

Guard Gates at Pedro Miguel Lock Swung.

On Friday, November 15, the operating mechanism was finally adjusted, and on the following day, Saturday, November 16, the upper guard gates in the east chamber of the Pedro Miguel lock, Nos. 50 and 51, fifty-four feet eight inches high, were successfully swung. The operation of the gates from the closed to the open position occupied less than two minutes. The gates were set in motion by an operating switch thrown by the little son of Congressman John J. Fitzgerald, who accompanied his parents to the Isthmus. It is expected that the two guard gates in the west chamber, Nos. 52 and 53, will be completed and in readiness for testing within another month.

The adjustment of the wood sills and miter posts on the upper guard gates remains to

be done, and the painting; also, the erection of the foot walks and movable handrails and the mechanism for operating same.

The miter gate operating machinery was installed on the leaves in the east chamber on the 9th and 13th instant, respectively.

As soon as the leaves have been tested for watertightness, both gates will be closed, so that in case a freshet occurs of such magnitude as to overtop the temporary dam now across the north end of Culebra Cut at Gamboa, allowing the water to rush through the Cut and extend as far as the Pedro Miguel locks, the upper guard gates will serve as a barrier and prevent the flooding of these locks.

During the past two months, the white force of workmen in the employ of the contractors for the lock gates has been largely increased to expedite the work on these gates.

Washout on Cristobal Terminal Breakwater Fill.

High winds have prevailed on the Atlantic Coast during the past week. On Thursday and Friday, there was an unusually heavy sea in Limon Bay, which broke against the breakwater at the Cristobal terminal dock with such force as to carry away the fill for a distance of about 200 feet, and a width of from 8 to 12 feet. The trestle, extending out beyond the present fill for a distance of several hundred feet, which was subjected to the brunt of the waves, was thrown out of alignment, and the caps and railroad track were almost entirely swept off. Dumping, to fill in the section washed out, has already been begun.

Completion of Wet Excavation at Gatun Locks.

The pipeline suction dredge, which has been excavating in the lagoon at the lower end of Gatun Locks, for the foundations of the flare and approach walls, has pumped the lagoon practically dry, and now rests on the ground, fifty-five feet below the level of the sea. In the latter stages of the excavation, the dipper dredge Chagres was withdrawn, and pipeline suction dredge No. 4 was taken out for work in the entrance channel, its place in the lagoon being taken by No. 83, which is equally effective for pumping. The evacuation of the lagoon discloses that the excavation has been unexpectedly complete, reaching a part of the bases for the walls, and cleaning out parts of the two approaches well below the level of the sill at the end of the lower lock, at elevation 44 to 50. A quantity of mud is being sluiced from the sill, at the foot of the coffer dam protecting the locks, and from the locks to a sump, by the dredge which pumps it out. For the sluicing, water is supplied from the Gatun system, at a pressure of 150 pounds to the square inch. With the pumping out of the lagoon, a great many fish were disclosed, the larger of which, with a 7-foot alligator, were trapped from the sea, while it is believed that smaller fish may have been drawn in through the 16-inch centrifugal

pump, by which the elevation of the water in the lagoon was regulated.

Four piledrivers are to be erected at the base of the lower end of the center wall, and will drive untreated piles for supporting the approach wall. A hopper, with flume, has been set up on the backfill of the east wall of the lower lock, and concrete for part of the east flare wall will be supplied through it by one of the duplex cableways, and narrow gage locomotives drawing dump cars.

Prevention Against Flooding at Pedro Miguel Lock.

A board, consisting of Messrs. John M. G. Watt, Henry Goldmark, and M. W. Tenny, appointed to investigate and recommend the most suitable method of keeping the lock chambers at Pedro Miguel unwatered to the bottom of the side wall culverts, has reported, in substance, as follows:

The west chamber and side wall culverts, the board believes, are amply protected against floods by an earth dam built on the chain fender sill in the lower approach to the lock, the crest of which is at elevation 20 feet above mean sealevel. The outlet from the culvert in the middle wall, through which the drainage from the Central Division is carried, has recently been strengthened to its junction with this dam, as has also the bulkhead at the outlet from the center wall to the east chamber.

The board recommends that the east chamber be protected by a similar dam to be built below the chain fender, the crest of which should be at the same elevation as the present dam. While under ordinary conditions, the east chamber will be at all times free of water, high water in the Pedro Miguel River, or Rio Grande, if concurring with the spring tides, will be quite likely to flood the chamber. Similar conditions are also likely at this season of the year, as the result of heavy rains over the watersheds of the above streams. In view of the serious delay that might be occasioned in the erection of the lock gates, through flooding, as well as the installation of the valves in the side walls, and the machine work in the upper operating gates of the lock, which is to be begun shortly, the committee recommends that the construction of this dam be started at once.

A statement, showing the number of times the chambers of the Pedro Miguel lock have been flooded during the present year, and the highest elevation reached by the water in each instance, follows:

WEST CHAMBER.		HEIGHT.
DATE.		Feet.
May 13 to May 16, 1912		plus 14 50
August 19 to August 25, 1912		plus 17 50
September 16 to October 2, 1912		plus 20 00
October 23 to October 28, 1912		plus 19 00
EAST CHAMBER.		
September 27 to October 4, 1912		plus 20 00
October 23 to October 30, 1912		plus 19 00

During the night of September 16, the wooden flume on the west side of the center

NOTES OF PROGRESS.

(Continued.)

wall broke, flooding the west chamber, and from October 2 to October 10, the elevation of the water in the chamber varied between plus 11 and plus 15 feet.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 92 per cent completed, 208,390 cubic yards, out of a total of 225,000, having been placed at the close of work on November

16. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete laid.	Hours worked.	No. mixers used.
	Cu. Yds.		
November 11.....	42	6.25	1
November 12.....	72	8.00	1
November 13.....	72	7.75	1
November 14.....	62	8.00	1
November 15.....	48	4.75	1
November 16.....	56	6.00	1
Total.....	352	40.75	1
Previously reported...	208,038		
Grand total.....	208,390		

CONCRETE WORK IN THE LOCKS.

Over 94 per cent of the concrete for the locks is in place, the amount at the close of work on November 16 being 4,106,183 cubic yards, out of a total of approximately 4,352,563. A total of 10,014 cubic yards of concrete was laid in the locks during the week ending November 16.

GATUN LOCKS.

Over 92 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on November 16 being 1,904,108 cubic yards, out of a total of 2,050,000. A statement of the amount of concrete placed in the locks each working day of the week ending November 16, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed	Hours worked	No. of mixers	Concrete placed	Hours worked.	No. of mixers

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 99 per cent completed, 889,763 cubic yards, out of a total of 889,827, bucket measurement, having been placed at the close of work on November 16. The record for each of the working days of last week, follows:

DATE.	AUXILIARY PLANT.						Mixed by hand	Large stone.	Total.
	2-cubic yard mixers.			1-cubic yard mixers.

SOCIAL LIFE OF THE ZONE.

Club Notes—Miscellaneous Events.

The Masonic Club of Pedro Miguel held its semiannual card party in the social hall on Saturday evening, November 16. This event was given in compliment to the members of the families of the club members.

The "Five Hundred" Club, the woman's card club at Pedro Miguel, met at the home of Mrs. Downs on Wednesday evening, November 13. This is the only organization of women in the village. It is composed principally of members of the Pedro Miguel Woman's Club, which was disbanded in 1911.

The Ancon Study Club has completed the reading of five of Shakespeare's plays, and will continue this work for the present. The meetings are well attended. The library is patronized by nonmembers, as well as members of the club. Nonmembers may take books out upon application to the librarian without charge. Books thus taken are signed for, and the borrower is charged for the price of the book, in case of failure to return same.

The Empire Woman's Club held a meeting at the Commission clubhouse on Tuesday afternoon, November 19.

The annual Hallowe'en party, under the auspices of the Cristobal Sunday school, was held on November 1. The juniors, or those under 12 years old, were entertained in the chapel, and older pupils were entertained in the lodge room in building No. 1.

On Saturday evening, November 16, an entertainment was held in the parish house of St. Ferdinand's Church, Empire. This was a jubilee occasion to celebrate the completion of improvements and repairs to the building. There will be a Christmas bazaar in the parish house on December 13, 14, and 15.

Church Notes.

The present studies of the Gatun Mission study circle consists of lessons from the book, "Western Women in Eastern Lands." The outline for the coming year has been made, and orders placed for study books in foreign and domestic mission fields. For the former, "China's New Day" will be used, and for the latter, "Mormonism—The Islam of America" will be studied. An additional order for 20 books has been placed with a New York firm, which will be the nucleus of a missionary library. The Gatun circle has expressed a wish to hold a second missionary convention, following the line of that held at

Empire on October 25. A date will be decided upon later, to be fixed, probably, in April.

The Ladies' Aid Society in connection with the Cristobal Union Church has elected Mrs. Charles Butters president for the present term. At the meeting of the society on November 12, an address was made by Miss Annie Coope on her work among the Carib Indians of Venezuela. There were about 30 women present.

The Cristobal Sunday school has exceeded its own record in the matter of enrollment and attendance. On Sunday, November 10, there was an attendance of 169, the largest in the history of the school. Owing to the congestion in the church, the officers have removed a number of the Sunday school classes to the District Court room. These pupils meet in the church for the opening exercises, and adjourn to the court room for their lesson class work. Mrs. Jarboe is the superintendent for this section of the work.

In connection with the social extension work of the church, the boys' handicraft classes, and the class in English for Chinamen and physical culture, are meeting three times a week, with an attendance of about 20 at each session. This was an experimental effort introduced a few months ago, and has met with success.

Thanksgiving Day will be celebrated at the Baptist church in Colon on November 28, at 7 p. m., and on the same evening, a special service will be held in the Baptist church at New Gatun. The Rev. J. H. Wise, the superintendent of the Baptist mission, will speak.

PERSONAL.

Mr. John M. G. Watt, Assistant Division Engineer in the Pacific Division, has resigned, effective Wednesday, November 20, and will sail for New Orleans on the United Fruit Company's steamer *Atenas*, which is due to leave Colon on November 28.

Mr. A. S. Zinn, accompanied by his wife and son, returned from leave of absence on the *Allianca*, which arrived at Cristobal on Thursday, November 14.

Arrival of the Secretary of War, and Party.

The Honorable Henry L. Stimson, Secretary of War, accompanied by Mrs. Stimson, and Miss Helen Taft, daughter of the President, arrived on the United Fruit Company's steamer *Zacapa*, which docked at Colon on Wednesday afternoon, November 20.

Sigma Nu Fraternity.

Members of the Sigma Nu fraternity, resident on the Isthmus, are invited to a dinner to be given at the University Club on Saturday, November 23. Any who are not in touch with their society in Panama are requested to write or telephone to Mr. René Granger, Gatun.

Boxer Sentenced.

Charles W. Boxer was arraigned in the Circuit Court at Ancon on November 18, on the charge of embezzlement. He pleaded guilty, and was sentenced by Justice Jackson to a term of one year in the Canal Zone penitentiary.

Sailing of the "Cristobal."

The sailing date for the steamer *Cristobal* has been set for Thursday, November 21, at 3 p. m., from pier No. 11, Cristobal.

CANAL WORK IN OCTOBER.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., November 12, 1912.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of October, 1912:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry.....	Cubic yards..	1,701	1,113,420	251,001	1,395,644
Work excavation, wet.....	Cubic yards..	678,761		488,786	1,167,547
Total work excavation.....	Cubic yards..	680,461	1,113,420	773,290	2,567,171
Plant excavation, dry.....	Cubic yards..		6,427		6,427
Plant excavation, wet.....	Cubic yards..			11,225	11,225
Total plant excavation.....	Cubic yards..		6,427	11,225	17,652
Total Canal excavation.....	Cubic yards..	680,461	1,119,847	784,515	2,584,823
Material placed in dams.....	Cubic yards..	258,004		73,532	332,531
Concrete placed in locks and dams.....	Cubic yards..	4,809		61,417	66,286
Explosives used.....	Tons (Gross)...	73.48	150.63	106.29	330.40
Rock drilled.....	Feet.....	27,137	509,534	118,807	555,528
Tracks removed.....	Miles.....		7.35		7.35
New tracks laid.....	Miles.....	2.36	13.32	6.47	22.15
Rock crushed.....	Cubic yards.....			61,604	61,604
Cement used.....	Barrels.....	10,257	1	62,744	73,002
New roads built.....	Miles.....				
Water mains laid.....	Feet.....	1,145	256		1,401
Sewers laid.....	Feet.....	866	845		1,711
Open drains and ditches dug.....	Feet.....	12,415	56,218	3,463	72,096
Average daily force.....		4,602	6,730	7,824	19,156
Average rainfall.....	Inches.....	16.08	13.49	13.12	14.01

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineers and the erection subdivision of this office, the inspection of this work being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF INSTALLATION OF RISING STEM GATE VALVES, ERECTION OF SPILLWAY GATES AND CAISSONS, AND ASSEMBLY OF HYDRO-ELECTRIC DRAFT TUBES AT GATUN.

The work of preparing rising stem gate valve chambers and installation of valves, and erection of Spillway gates, has progressed satisfactorily during the month.

No work has yet been done on the erection of the caissons.

Some work has been done on assembly and riveting of draft tubes for the hydroelectric station.

LOCK GATES AND PROTECTIVE DEVICES.

Up to the 20th of October, a total of 59,537 tons of steel plates and shapes had been accepted at the rolling mills. In the above tonnage is included 1,414 tons on replace orders, and 1,338 tons for spare parts, making a total of 56,785 tons rolled on the original order for 92 leaves. A total of 47,040 tons of riveted structural steel has been shipped from the Rankin shops, or about 92 per cent of the total contract weight of this class. The total tonnage of lock gate material erected to November 1, 1912, in the different locks, without regard to its being fully reamed or riveted, was 31,328 tons, out of a total of 58,000 tons, or about 54 per cent. Of this, 4,098 tons, or about seven per cent of the

total, were erected during the month of October. The number of field rivets driven was 1,895,470, or about 35 per cent of the total, of which 325,859 rivets, or about six per cent of the total, were driven during October. The tonnage erected was about 94 per cent greater, and the number of rivets driven 65 per cent greater, than the corresponding quantities for the preceding month. The status of the work in the several locks may be summarized, as follows:

Gatun—Work is in progress on all the leaves, 40 in number. The status of the work is, as follows: Erection, 66 per cent completed;

reaming, 60 per cent completed; riveting, 48 per cent completed; finishing, 10 per cent completed.

Pedro Miguel—Work is in progress on the entire 24 leaves. The status of the work is, as follows: Erection, 77 per cent completed; reaming, 61 per cent completed; riveting, 55 per cent completed. No gates are finished.

Miraflores—Work is in progress on eight, out of a total of 28 leaves, the status being, as follows: Erection, 15 per cent completed; reaming, 10 per cent completed; riveting, 16 per cent completed. No gates are finished.

LOCK GATE RECESS COVERS.

At Gatun, all covers are in place, except for the castings, while at Pedro Miguel two remain to be aligned and grouted. At Miraflores, 16 covers have been delivered, out of a total of 24. Twelve were erected and riveted, but not aligned and grouted.

CHAIN FENDERS.

All material for the first chain fender, No. 812-813, except a part of the piping, was shipped on October 20. The material for all hawsepipe castings has been shipped. The two operating pumps for the sample chain fender have been received on the Isthmus, but not the motors. The piping was to have been shipped complete by October 30. The erection of the first chain fender was continued, the erection of machine No. 813 being entirely completed, and that of No. 812 completed, with the exception of a few minor parts. The auxiliary equipment, including the piping, pumps, electrical apparatus, etc., has not been erected. The chain for this fender has been completely put in place.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection of the oper-

ating machinery and electrical equipment. As stated in last month's report, the contractors are generally behindhand in their rate of delivery. During the month, a conference was held at the office of one of the principal contractors, and it is anticipated that the rate of delivery will increase. The rate of installing the machines keeps pace with the receipt of the various parts, but necessarily some parts cannot be installed until certain others have been received. This results in a great many machines being partially installed. The force on electrical work is not being recruited as fast as the proposed schedule, on account of the late deliveries of the electrical material. The following tabulations are given as a summary of the work.

RIISING SIEM GATE VALVES.

ELECTRICAL WORK—ATLANTIC DIVISION.

Conductor rails, insulators, brackets, and cover plates were installed on 3,150 feet of straight track, and 434 feet of curved track, a total of 3,584 feet, making a total to date of 7,109 feet. Of this, 3,910 feet have been equipped with steel conductor bar, and 3,199 feet with copper conductor bar. All brackets for cover plates for the conductor slot have been corrected in dies at the Empire shops and have been returned to the lock site. Progress has been made in pulling cable into the conduit system, a total of 26,563 feet having been pulled to date. The cable pulling work has been handicapped somewhat by non-receipt of the multiple conductor control cable. All of the cable that has been pulled in the east side wall of the upper lock has been covered with tile in the manholes. Repairs and changes required on the temporary light and power system have been made as required during the month.

ELECTRICAL WORK—PACIFIC DIVISION.

A total of 43,956 duct feet of vitrified tile conduit has been cleaned and strung with

fish wire, preparatory to pulling cable; 3,542 duct feet of fibre conduit have been installed in the north approach wall. At Pedro Miguel, the temporary light and power system has been maintained, altered, and extended as required by the progress of the work. At Miraflores, transformers have been installed, and a portion of the wiring done for supplying temporary light and power for the erection operations of the First Division.

EMERGENCY DAMS.

Inspection has been in progress in the United States at five localities, and 520 tons of material were accepted during the month. Up to the end of the month, a total of 5,759 tons has been fabricated and accepted. About seven tons of material have been delivered on the Isthmus during the month, and about 556 tons erected. Up to the end of the month, a total of 3,562 tons had been delivered, and 1,737 tons erected. Work has been in progress on one dam.

AIDS TO NAVIGATION.

During the month, work on the erection of range towers Nos. 7, 9, and 11 in the Gatun Lake section was in progress; also, the erection of beacon No. 5, Pacific Division, the erection of electric light line, and making the necessary surveys and reconnaissances. The following was the condition of the work on October 31:

Ten range towers of the Atlantic and Pacific Division type, and five range towers of the Gatun Lake section type, have been completed, except for placing certain fittings and the permanent lights. The excavation for one range tower of the Gatun Lake section type is completed, and 50 per cent of the material is on the site. One foundation for the Atlantic and Pacific Division type of tower has been completed, and one caisson foundation for same type of tower has been sunk to bed rock. Three skeleton tower beacons for the Pacific Division, and their foundations, have been completed, except for installing the lights. The caisson for the west breakwaterlight has been completed up to a height of 25 feet, and has been sunk at the inner end of Limon Bay in 20 feet of water, where it will remain temporarily until its riprap foundation at the outer end of the west breakwater has been completed. Fifty-five reinforced concrete beacons have been cast in readiness for setting up. There were also cast and completed one hundred and nineteen 48 by 48 by 26-inch concrete sinkers for gas buoys, and one hundred and five 24 by 24 by 18-inch concrete sinkers for spar buoys. Seventeen concrete foundations for the electric light line from the Aguadulce pumping station on range No. 1-2, and beacons Nos. 5 and 7, Pacific Division, were in place; 18 "dead men" were set, and 14 poles were erected.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month, excavation for the locks backfill was carried on by one steamshovel.

Backfill—Backfilling behind the side and center walls of the locks was continued, the quantity placed during the month aggregating 16,794 cubic yards. The total placed to November 1, 1912, amounted to 1,853,084 cubic yards. The work is now 90.27 per cent completed.

Receiving and issuing material—The issues of sand exceeded the receipts by 1,534 cubic

yards. The issues of rock amounted to 3,446 cubic yards, no rock being received. There were 8,318 barrels of cement issued; none was received.

Mixing and placing plants—Plant No. 1 and the portable mixer were kept in satisfactory operation during the month.

Concrete work—A total of 3,252 cubic yards of concrete was placed. On November 1, the concrete work to be done by this division was 92.52 per cent completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.	
Length of working day (hours).....	9.00
Average number of hours per day worked per strand of cableway laying concrete (actual working time).....	2.23
Average number of mixers per day.....	1.81
Average hourly output per mixer (actual working time) cubic yards.....	27.48
Average amount of concrete laid per hour, per strand of cableway (actual working time) cubic yards.....	12.49
Concrete laid (cubic yards) cableways.....	2,881
Concrete laid (cubic yards) derricks.....	17
Concrete laid (cubic yards) portable mixers.....	127
Concrete laid (cubic yards) hand mixers.....	227

Total amount of concrete laid (cubic yards) 3,252

GATUN DAM.

Construction during the month increased the total fill, as determined by cross section of the material in place deposited during the month, by 258,999 cubic yards, making the total amount in place 20,741,350 cubic yards. On November 1, the Dam was 95.6 per cent completed.

Hydraulic fill—There was no increase made in the hydraulic fill, the total in place remaining at 10,124,082 cubic yards.

Dry fill—Allowing an arbitrary reduction of 50,000 cubic yards to cover slow consolidation in slopes not cross sectioned, the material received from steamshovels, amounting to 258,999 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place 10,617,268 cubic yards. Cross section of the month's dry fill shows a loss of $1\frac{1}{4}$ per cent from car measurement.

Hydroelectric plant—During the month, 1,700 cubic yards of earth and rock were removed by hand and crane in the preparation of foundations, making a total excavation of 95,399 cubic yards. Twelve cubic yards of concrete were placed, making the total to date 208 cubic yards.

GATUN SPILLWAY.

Backfill—There was no backfilling done behind the Spillway walls, the total on October 31 remaining at 16,495 cubic yards.

Concrete—A total of 1,617 cubic yards of concrete, of which 314 cubic yards were reinforced, was laid during the month. Concrete work for the Spillway was 92.31 per cent completed.

Excavation—There was no excavation done during the month, the total remaining at 1,591,261 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging from the ocean to Mindi—Seven dredges removed 519,555 cubic yards of earth and 53,228 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 34,248 cubic yards of coral from between docks Nos. 16 and 17, Panama Railroad Company's Cristobal terminal docks. On October 31, 1912, forty feet of water could be carried from zero to zero plus 2,100 feet, 35 feet to mile post 4 plus 3,600 feet, 30 feet to mile post 5 plus 2,200 feet, 20 feet to mile post 6 plus 1,900 feet, 10 feet to mile post 6 plus 2,800 feet. The *Terrier* drilled 4,753 feet, used 31,585 pounds of dynamite, and shot

14,700 cubic yards of earth and 38,752 cubic yards of rock to minus 45 feet mean sealevel.

Dredging in approach to Gatun Locks—Three dredges removed 90,116 cubic yards of earth and 15,862 cubic yards of rock from the Canal prism.

West breakwater, Colon—During the month, 167 feet of single track trestle were built. On November 1, the trestle had been extended 11,434 feet, leaving 66 feet still to be constructed. There were 14,313 cubic yards of Porto Bello rock unloaded, of which 7,730 cubic yards were handled by cranes, 6,358 cubic yards by the derrick barges, and 225 cubic yards from self-dumping scow No. 118, making a total amount unloaded to November 1st, 106,167 cubic yards.

MUNICIPAL ENGINEERING.

New Colon waterworks—The construction of the power house and filter building was commenced during the month. The work accomplished consisted of the laying of 1,200 feet of siding, the assembling of various pieces of construction equipment, and the construction of the storehouse, office, blacksmith shop, and mixing platform. The main outfall, intercepting manhole, was completed, and the excavation for the pump sumps, extending throughout the length of the power house, was commenced.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the Colon street improvements.

Central Division.

During the month, the total amount of material excavated by the Central Division was 1,119,847 cubic yards, of which 153,010 cubic yards were classified as earth and 966,837 cubic yards as rock. The total amount was removed by steamshovels. Of this total, 1,113,420 cubic yards were primary excavation in the Canal prism, 4,427 cubic yards from track cut-off at Station 1655, and 2,000 cubic yards from track cut-off at Station 1663.

The daily average number of steamshovels at work was 35.52, and the total number of shovel days was 959, as compared with 32.71 shovels at work, and 785 shovel days in September. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work	W. kg. days.	Av. yards per shovel day
		Rock.	Earth.			
1911:						
Oct.....	Cu. Yds. 1,309,752	Cu. Yds. 1,124,974	Cu. Yds. 784,778	41.46	6	1,215.00
1912:						
Oct.....	1,119,847	966,837	153,010	35.52	7	1,166.58

Rainfall at Empire: 1911, 14.97 ins.; 1912, 12.44 ins.

The above table shows the average output per shovel to be 3.99 per cent less in October, 1912, than in the corresponding month of 1911.

The total amount of material excavated from the Culebra section in October, 1912—1,119,847 cubic yards—was the lowest record in that section for the month of October since 1907; in October of that year only 860,126 cubic yards were removed.

The total estimated amount of material (dry excavation) to be removed in the Central Division, according to revised estimate made July 1, 1912, was 106,116,221 cubic yards,

and up to November 1, 1912, 98,887,082 cubic yards had been removed, leaving 7,229,139 cubic yards to be removed, in order to complete all dry excavation in the Central Division. From these figures, it will be seen that 93.19 per cent of all excavation in this division was completed on October 31, 1912, and that 6.81 per cent remained to be removed. At the close of October operations, the status of the excavation in the two sections which compose this division was, as follows:

CULEBRA SECTION.		Cu. Yds.
Completed.....	86,502,417	
To be completed.....	7,229,139	
CHAGRES SECTION.		Cu. Yds.
Completed.....	12,384,655	

From the above figures, it will be seen that Culebra Cut is 92.29 per cent completed, with 7.71 per cent to be completed. The Chagres section is completed, so far as dry excavation is concerned, but it is estimated that about 300,000 cubic yards of wet excavation will have to be made in this section.

Work performed for the Pacific Division during the month included the removal of 9,333 cubic yards of rock by steamshovels, the drilling of 3,113 lineal feet of holes, the use of 6,750 pounds of dynamite in blasting; all done in connection with the Miraflores spillway. In addition, miscellaneous service, such as transportation of spoil, dumping, etc., was performed.

During the month, 48,448 cubic yards of material were dumped on the embankment for the new roadbed of the relocation of the Panama railroad, increasing the total amount used for this purpose to 4,447,974 cubic yards.

For use in the construction of the Gatun Dam, 12,293 cubic yards of rock were furnished to the Atlantic Division, making the total amount of material furnished for this purpose 5,386,603 cubic yards.

There were also furnished during the month to the Panama Railroad Company, for the Colon breakwater, 8,767 cubic yards, the total amount furnished to November 1 for this purpose being 97,900 cubic yards.

During the month of October, there were 182 lineal feet of double track trestle driven for the Naos Island breakwater, making a total of 2,499 lineal feet of double track trestle driven, with 169 lineal feet to be driven for this breakwater. During the month, 21,270 cubic yards of material were dumped from the trestle, making the total amount dumped on November 1st, 870,235 cubic yards.

The daily average number of laborers at work in this division during the month was 6,200, while the average number of gold men working was 530.

Pacific Division.

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Pedro Miguel Lock—During the month, excavation was continued in the Canal prism, south of the locks, and in the foundation for the lower guide wall. Backfilling of the two side walls and north approach wall was continued. The concrete work consisted of construction of the north wing walls and the south end of the operating tunnels in the guide wall. The total amount of concrete and large stone laid at Pedro Miguel was 6,627 cubic yards, as compared with 3,039 cubic yards during September. The concrete was placed, as follows: One thousand five hundred and forty-four cubic yards in the northeast wing wall, 3,991 cubic yards in the northwest

wing wall, 157 cubic yards in the east wall, 37 cubic yards in the center wall, 225 cubic yards in the west wall, 105 cubic yards in the floors, 346 cubic yards in the south center guide wall, 93 cubic yards around ducts in tunnel "A," and 89 cubic yards around ducts in tunnel "C."

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours).....	8.00
Average number of hours per day worked laying concrete and large stone (actual working time).....	7.23
Average number of mixers per day.....	2.93
Average hourly output per mixer, actual working time (cubic yards).....	11.17
Large rock laid (cubic yards).....	
Concrete laid (cubic yards).....	6,627.00

Total concrete laid (cubic yards)..... 6,627.00

Daily average of 2.93 one-half cubic yard mixers, output of which was placed by hand and by mixers discharging directly into forms.

Miraflores Locks—Dry excavation was continued in the Canal prism, south of the locks, the material being used for backfilling of the locks and filling on the west dam. The work of excavating the spillway was continued, both by hydraulic method and locomotive crane. Concrete work consisted of construction of the north approach wall and extension of the west wall and lower approach wall. The amount of iron placed in the masonry amounted to 582,145 pounds. The total amount of concrete and large stone laid at Miraflores was 54,790 cubic yards, as compared with 46,122 cubic yards during September. The concrete was placed, as follows: Four thousand seventy-five cubic yards in the north center guide wall, 2,731 cubic yards in the east wall, 18,608 cubic yards in the center wall, 14,545 cubic yards in the west wall, 1,599 cubic yards in the southeast wing wall, 9,768 cubic yards in the south center guide wall, 3,302 cubic yards in the floors, 79 cubic yards around ducts in Area "A," six cubic yards around ducts in Area "B," and 76 cubic yards around ducts in Area "C."

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours) 8.00 & 12.00.....	8.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time).....	4.10	6.59
Average number of mixers per day.....	6.50	7.75
Average hourly output per mixer, actual working time (cubic yards).....	41.50	18.20
Average amount of concrete and large stone laid per hour per berm or chamber crane (actual working time) (cubic yards).....	45.72	
Large rock laid (cubic yards).....		
Concrete laid (cubic yards).....	31,414.00	23,473.00
Total concrete laid (cu. yds.).....	31,414.00	23,473.00

Two chamber cranes on 12-hour day throughout the month.

Permanent plant consisted of four berm cranes and four chamber cranes.

Auxiliary plant consisted of two 2-cubic yard, two 1-cubic yard and six ½-cubic yard mixers, averaging 7.75 per day. Auxiliary placing plant consisted of five locomotive cranes and derricks, averaging 2.68 per day.

Excavation—The total excavation during the month amounted to 235,323 cubic yards, of which 181,740 cubic yards were classified as rock and 53,583 cubic yards as earth.

Filling and embankment—During the month, 16,267 cubic yards of dry filling were added to the prism of the Pedro Miguel west dam, increasing the total amount of material in place at the end of the month to 640,954 cubic yards. The backfill at Pedro Miguel was increased by 29,956 cubic yards, the total

quantity in place at the close of the month being 740,678 cubic yards.

At Miraflores, the dry filling in the toes of the west dam was increased by 57,265 cubic yards, making the total quantities of dry and hydraulic filling in place at the end of the month 1,399,819 cubic yards and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 71,110 cubic yards, the total amount in place at the close of the month being 906,207 cubic yards.

DISTRICT NO. 2—DREDGING, BALBOA SHOPS, AND SHIPWAYS.

The following is a statement of the output of the six dredges, which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.		PLANT		Total.	Remarks
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	
Cardenas.....	Dipper.....		19,625			19,625	Place measurement
Corozal.....	Ladder.....	43,804	43,805			87,609	Place measurement
Marmot.....	Ladder.....	1,796	8,771			10,567	Place measurement
Badger.....	Ladder.....	32,928		11,225		44,153	Place measurement
Mole.....	Ladder.....	5,920	1,700			7,620	Scow measurement
Culebra.....	Suction.....	188,414		31,907		220,321	Scow measurement
Total.....		272,862	73,901	43,132		389,895	
Hydraulic excavation.....		95,859*				95,859	Place measurement
Grand total.....		368,721	73,901	43,132		485,754	

*89,963 cubic yards excavated from Canal prism, south of Miraflores lock site; 6,896 cubic yards excavated from site of Miraflores spillway dam.

Chamé sand excavation—Approximately 41,986 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa sand bins.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

Reservoirs, water mains, sewers, and oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours).....	8.00
Average number of hours per day (actual working time).....	7.02
Average number of cubic yards crushed per hour per working day.....	251.25
Average number of cubic yards crushed per working hour.....	301.89
Total output for the month (cubic yards).....	61,064

Quartermaster's Department.

Labor—The demand for unskilled labor was greater than the supply. On October 30, there were 39,382 men working in all departments and divisions of the Commission and the Panama Railroad Company, and for the lock gate and emergency dam contractors. This is the highest total on record since the inception of the work. The next highest total was in March, 1910, when the force report showed 38,676 men at work.

Buildings—Work on the alterations to the Hotel Tivoli was practically completed at the end of the month. The reconstruction of buildings moved to Corozal was almost completed. The traveling gangs of carpenters were largely reduced at the end of the month.

Quarters—There has been a great congestion in gold bachelor quarters, particularly in Gatun, Pedro Miguel, and Corozal. The census shows 500 more gold bachelors in quarters than on July 1 of this year. The great demand for married quarters still continues. On the first of November, there were 762 applications for married quarters on file in the various districts, 62 more than the previous month. The number of laborers in barracks remained about the same, there being a decrease in the European laborers, and a slight increase in colored laborers.

Material and supplies—A shortage in ties

caused considerable inconvenience. Ten thousand second hand ties were recovered from the work and reissued. These, together with a shipment of 18,000 which arrived at the end of the month, relieved the situation. The total value of material received was \$1,128,288.12. This material came forward in 32 steamers, the total weight of cargo, exclusive of lumber, piling, and ties, being 25,375 tons.

Subsistence Department.

The operation of European laborers' messes, colored laborers' kitchens, and line hotels resulted in a net profit of \$5,106.08. The Hotel Tivoli showed a net profit of \$214.46. Penitentiary, restaurants, tugs, and barges showed

a net profit of \$46.04. The total net profit on subsistence operations was \$5,366.58.

Department of Civil Administration.

COURTS.

During the month, one civil case was disposed of in the Supreme Court; 53 civil, and 40 criminal cases in the Circuit Courts; and 73 civil, and 562 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for the month amounted to \$393,947.40, and the fees to \$1,856.68. Receipts from stamp and card sales and newspaper postage aggregated \$7,329.79. The total collection of revenues made was \$15,891.21, and the collection on account of court fines, costs, and fees \$2,615.80. During the month, a total of \$120,763 was deposited in postal savings accounts, a total of \$111,696 being withdrawn.

Twenty-three vessels entered at, and the same number cleared, from the port of Ancon; 21 vessels entered at the port of Cristobal, and 22 vessels cleared from that port.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 539, of whom 481 were men and 58 women. Twenty-two nations, or 42 separate states and dependencies, were represented. Eleven convicts were committed to the penitentiary and 13 were discharged, leaving 133 convicts in confinement at the close of the month. The cost of guarding and subsisting the convicts was \$2,631, and the value of their work on the Canal Zone roads was \$2,515.40.

DIVISION OF FIRE PROTECTION.

Five fires were reported in the Canal Zone during the month. The damage to private property was \$4.50.

DIVISION OF PUBLIC WORKS.

In the city of Panama, the average daily consumption of water was 1,605,443 gallons, and in Colon, 1,035,800 gallons. The usual

inspection and maintenance work in this division was performed.

DIVISION OF SCHOOLS.

New white schools were established at Toro Point and Corozal. The consolidated high school, formerly located at Gatun, was moved to Ancon, and subsidiary high schools were maintained at Gatun and Empire for first and second year pupils living near those towns. On the opening day of school there were 909 pupils enrolled in the white, and 555 in the colored schools. For the month, the average enrollment in the white schools was 1,071.1, and in the colored schools 863.2. Of the numbers belonging, the white schools showed an average daily attendance of 96.3 per cent, and the colored schools 86.7 per cent. At the close of the month, there were employed in the white schools 46 teachers, and in the colored schools 29 teachers.

Department of Sanitation.

The total number of deaths from all causes among employes was 38, divided, as follows: From disease 28, and from violence 10, giving an annual average per thousand of 6.71 and 2.39, respectively. The annual death rate per thousand among employes for the month of October, 1911, was 11.08.

The annual death rate per thousand in the Canal Zone, and in the cities of Colon and Panama, including both employes and non-employes, was 23.08. This rate is based upon a population in the Canal Zone of 62,810, according to the census of February, 1912, and populations in Panama and Colon of 47,172 and 20,232, respectively, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of October, 1911, was 21.35.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: Whites 3.84; blacks 7.66, giving a general average for disease of 6.71. For the same month during 1910, the annual average death rate per thousand from disease among whites was 4.51; blacks 5.98, giving a general average of 5.58; and for the same month during 1911, whites 4.87; blacks 10.56, giving a general average of 9.15.

Among employes during the month, deaths from the principal diseases were, as follows: Cirrhosis of liver, one; lobar pneumonia, four; malaria fever, E. A., one; tuberculosis, eight, leaving 14 deaths from all other diseases, and 10 deaths from external violence. No cases of yellow fever, smallpox, or plague originated on, or were brought to the Isthmus during the month.

Respectfully,
GEO. W. GOETHALS,
Chairman.

Missing Men.

Any one having information regarding the whereabouts of Enrique Lizarraga, who is supposed to be on the Isthmus, and Robert W. Kintz, who left the service of the Canal Commission in 1908, is requested to communicate with the American Legation, Panama.

Society of the Chagres.

CRISTOBAL, C. Z., November 18, 1912.

White American employes of the Isthmian Canal Commission and Panama Railroad Company who are entitled to the Roosevelt Canal medal and two service bars, or in other words, who have been in the service on the Isthmus for six years or more, are eligible to membership in the Society of the Chagres.

There are now more than 390 members of the society, and it is desired to enroll every eligible prior to the

annual meeting, which will take place on the third Saturday in January, 1913.

The Year Book for 1912 is now in course of preparation and will contain, in addition to other items of interest, the biographies of those who have joined since the last publication of the volume. It will be necessary for those eligibles, who desire their names and biographies included, to become members prior to December 1, of this year, as the copy will be sent to the printer on that date.

To join, write to the undersigned, giving full name, date of entering the service on the Isthmus, department in which employed, Isthmian address, United States address, and enclose post-office money order for six dollars to cover dues and emblem.

W. F. SHIPLEY, Secretary-Treasurer.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at the Hotel Tivoli, Ancon, C. Z., on Sunday, November 24, at 8 p. m. The program follows:

1. March—Our Leader..... Dale
2. Selection—The Spring Maid..... Reinhardt
3. (a) Intermezzo—La Danseuse..... von Blon
- (b)Visions..... Hayes
4. Overture—Poet and Peasant..... Suppe

Kennedy, Miss Mary	Wight, L. Allen
Kershaw, J. B.	Williams, Louis E.

Married.

ANDERSON-ZETLER—On Sunday evening, November 17, in the Union Church, Cristobal, Miss Emily Louise Zetler of Philadelphia, Pa., to Captain Charles James Anderson of Brooklyn, N. Y., the Rev. Carl H. Elliott officiating. Canal Zone residence, Cristobal.

Sale of Surveying Instruments, Compasses, and Ship's Log.

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., November 19, 1912.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, C. Z., until 2 p. m., December 7, 1912, when they will be opened in the presence of attending bidders, for any or all surveying instruments, compasses, and ship's log now on hand in the storehouse for obsolete material. These instruments may be seen on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m., on application at this office. The right is reserved to reject any or all bids, or any combination of bids. Bids must be sealed and plainly marked: "Proposal to purchase surveying instruments," addressed to the Depot Quartermaster, Mount Hope, Canal Zone.

C. NIXON,
Depot Quartermaster.

Sale of Public Buildings at Nombre de Dios.

OFFICE OF THE CHIEF QUARTERMASTER,

CULEBRA, C. Z., November 14, 1912.

Sealed proposals will be received at this office until 3 p. m., Saturday, December 14, 1912, and then opened, for the purchase of any or all buildings, including plumbing, owned by the Commission at Nombre de Dios. List of buildings and full information will be furnished upon application to any district quartermaster, or at this office. Proposals must be accompanied by five percentum (5%) of amount bid. The Government reserves the right to accept or reject any or all bids. Envelopes containing proposals should be endorsed "Proposal for purchase of buildings," and addressed to Col. C. A. DEVOL, Chief Quartermaster, Culebra, C. Z.

OFFICIAL CIRCULAR.

Material Dumped Along the Line of the Panama Railroad.

CULEBRA, C. Z., November 15, 1912.

TO HEADS OF DEPARTMENTS AND DIVISIONS:

Complaint has been made by the Panama Railroad Company that material is being dumped along the operated line in such a manner that it lies against the rails, causing short circuit in signal installations.

This complaint has particular reference to sand and rock used by the municipal engineering forces of the Commission, but instructions should be issued to all concerned to see that in the future no material is dumped along the operated line in such a manner as to interfere with the operation of the Panama railroad trains.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

COMMISSARY DEPARTMENT.

Cold Storage Prices.

The following changes have been made in the prices of cold storage supplies:

Pate de foie gras, out of stock.
Eggs, fresh, advanced to 38 cents a dozen; 19 cents by the half dozen.
Butter, creamery special, reduced to 36 cents a pound.

Rainfall from November 1 to 16, 1912, Inclusive.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The following entertainment course has been decided on for the coming season in the clubhouses: Miss Gay Zenola MacLaren; The Apollo Concert Company; The Edith Harris Scott Company; The DeKoven Male Quartet; Metropolitan Concert Company. The first of these artists to appear will be Miss MacLaren, who will arrive on the Isthmus about December 15, and will present an entirely new repertoire. Other dates will be announced later.

A "Forum" has been organized for the purpose of presenting to the public a series of talks on topics of vital interest. Among those who have promised to assist in this venture are Col. C. A. Devol, Mr. M. H. Thatcher, Judge Thomas E. Brown, Prof. F. A. Gause, Mr. J. A. Smith, Mr. W. B. Childers, Dr. A. J. Orenstein, Mr. C. C. Carr, and Mr. S. P. Verner. Dr. Edward T. Devine, secretary of the Charity Organization Society of New York City, who expects to visit the Isthmus next January, will also be one of the speakers. With each of these talks, there will be given a substantial musical program of from four to six numbers. The programs in detail will be published by the secretaries of the various clubhouses from time to time. The first of these events was given at Corozal on Sunday evening, November 17.

The moving picture schedule for the week November 25 to 30, will be, as follows: Monday, Culebra; Tuesday, Corozal; Wednesday, Empire; Thursday, Gorgona; Friday, Gatun; Saturday, Cristobal.

The standing of the teams in the tenpin tournament on November 16 was, as follows:

Team.	Won.	Lost.	P. C.
Gatun.....	14	7	.666
Empire.....	14	7	.666
Cristobal.....	12	9	.571
Culebra.....	7	11	.388
Corozal.....	7	14	.333
Gorgona.....	6	12	.333

The standing of the teams in the basketball league on November 16 was, as follows:

Team.	Won.	Lost.	P. C.
Empire.....	4	0	1.000
Corozal.....	4	1	.800
Gorgona.....	2	3	.400
Gatun.....	1	3	.250
Cristobal.....	0	4	.000

COROZAL.

The Cristobal bowling team won two out of three games at Corozal on Saturday night, November 16. Scores were, as follows:

Corozal.....	873	849	.688
Cristobal.....	910	836	.847

The first in a series of talks under the auspices of the "Forum" was given on Sunday night, November 17. There was an attendance of nearly 100. The following program was carried out: "Still, Still with Thee," quartet, Messrs. Ross, Dickson, Case, and Acher; bass solo, "The Palms" by Lieutenant Acher; "Just a Song at Twilight" by the quartet; bass solo "The Perfect Day" by Mr. Case; tenor solo "Hold Thou my Hand" by Mr. Ross; address, "Literature and Life" by Prof. F. A. Gause, superintendent of schools; quartet, "The Rose of Sharon."

The next "Forum" program will be given on December 1. The speaker will be Mr. W. B. Childers of Gatun, and music will be furnished by a mixed quartet, composed of Mrs. Boyd, Mrs. Faure, Mr. Ross, and Mr. Case.

The "Suffragette" reception, which was to have been held Friday night, November 15, has been indefinitely postponed.

CULEBRA.

On Tuesday night, November 12, the new poolroom and bowling alleys were opened. Capt. R. E. Wood rolled the first ball. Over 100 men visited the new quarters. The Empire team bowled the Culebra team and were defeated two out of three games by the following scores:

Empire.	Culebra.
Pinney.....	123 139 124
Henry.....	185 169 174
Warr.....	151 132 127
Goolsby.....	121 108 194
Gustavson.....	166 137 166
Case.....	144 178 116
Mengel.....	158 155 161
Cushing.....	163 200 183
Anderson.....	169 157 106
Dougherty.....	145 161 138

Total... 746 685 785 779 851 704

Refreshments were served during the evening.

It is desired to call attention to the fact that the membership dues in the Culebra association remain as heretofore, namely, \$10 for annual ticket, \$6 for semi-annual, and \$4 for quarterly. The privileges are for members. The upkeep of equipment, reading room, and library, etc., is paid for from membership receipts. Members are admitted free to all entertainments which are held in the schoolhouse. The reading room and library are on the second floor in the annex over

the Chief Quartermaster's office. Now is the opportune time to join.

EMPIRE.

The Empire and Gatun teams bowled at Empire on Saturday, November 16. Both teams procured the highest team scores that have been bowled so far in the league. Empire won two out of three games with a team average for three games of 923. The Gatun team's average for three games was 910. Scores were, as follows:

Empire.	Gatun.
Gustavson.....	189 190 191
Potter.....	216 186 169
Edwards.....	186 197 149
Pearson.....	188 164 185
Huson.....	189 189 179
Swallow.....	171 190 203
Omeara.....	214 170 178
Rabbitt.....	173 195 212
Hodges.....	164 177 164
Barte.....	192 152
Oettli.....	173

Total..... 968 926 873 916 884 930

Eighteen men have entered the handball tournament so far. The handball court will be repainted at once and the schedule started.

In the November handicap pool tournament there are 20 entries.

The first Y. M. C. A. "Forum" at Empire will be given on Sunday evening, November 24. Prof. Gause, of the Division of Schools, will speak on "Literature and Life." The musical part of the program will be a mixed quartet, composed of Mrs. Faure, Mrs. Boyd, Mr. Case, and Mr. Ross; also, solos by members of the quartet. The public is invited.

GORGONA.

The following are the high scores in bowling for the week: Keppler, 203; Stewart, 216; Denst, 213. The following are the two leading teams in the ragtime bowling tournament: Sims and Keppler, first, 1,123; Stewart and Calloway, second, 1,051.

The Gorgona chorus will give a special entertainment on Sunday evening, November 24. The special music, with a special address by Rev. Nellis, will constitute a Thanksgiving service. Everyone is invited to attend. Service begins at 7 p. m.

A glee club is preparing to give special entertainments.

A Christmas benefit carnival was held on Saturday evening, November 16, consisting of 17 different shows. A special Christmas for the Gorgona people is being planned.

The Empire basketball team will play at Gorgona on Saturday evening, November 23.

GATUN.

George W. Huttlemeyer has resigned as bowling attendant. He will leave for the United States in a few days. John J. Luckey has been appointed night office assistant.

The first meeting of the Y. M. C. A. "Forum" will be held at Gatun on Thursday evening, November 21. Mr. Frank A. Gause will speak on "Literature and Life". A mixed quartet, consisting of Mrs. A. P. Boyd, soprano; Mrs. L. L. Faure, alto; Mr. Ross, tenor, and Mr. Case, bass, will sing the "Sextet from Lucia," and several other selections. Members and friends are cordially invited. Meetings of the "Forum" will occur bimonthly, and will consist of an address and a musical feature.

An "Every day in the year club" for the study of certain portions of the New Testament has been organized, with a membership of 12. Copies of "Association Men" are furnished to members.

The Democratic club of Gatun and the Gatun Socialist club were organized recently. The Democrats, having been victorious at the recent election, are planning to celebrate their victory with an appropriate social function.

Members may join the Spanish class at any time. Class nights, Wednesday and Friday.

Two rowing machines have been ordered for the gymnasium classes.

Red Cross seals are on sale at the desk. Mr. DePoorter, Mr. Wurster, and Mr. Neely were presented with medals recently, as winners of the "Lock City" 3-cushioned billiard tournament.

The standing of the boys' athletic contest is, as follows: Meis, 1,062; Cummings, 998; Jewey, 880; Session, 846; Quinn, 833; Waid, 789; Gray, 762; Bethea, 624; Griffith, 593; Billet, 554; Loulan, 540; Appleton, 455; Carkeet, 452; Kerr, 374; Witt, 328; Sibert, 264; Bath, 104; Graham, 82.

CRISTOBAL.

Tuesday night, the "Bull Moose" party of Cristobal and Colon Beach gave a concert and dance in honor of their victory in the local mock election. There was an attendance of about 400.

On Friday night, "Open house" was inaugurated. Mr. E. L. Mosher sang several solos, accompanied by Mr. H. S. Glick on the piano. The attendance was 300. The next "Open house" night will be on Friday, November 22. All men are welcome. Members are especially invited to come and bring their friends.

Saturday night, November 16, the Gatun basketball team defeated the Cristobal basketball team by the score of 25 to 15. In the first half, Cristobal was ahead by a score of 12 to 6, but in the second half its team work was poor, and Gatun scored repeatedly.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers for New York on alternate Tuesdays, at 2 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m. for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

The following ships arrived, or departed from, the port of Balboa, during the week ending November 16: Arrivals—November 10, *San José*, from San Francisco; November 11, *Chile*, from Guayaquil; November 11, *Quito*, from Guayaquil and intermediate ports; November 12, *Ucayali*, from Callao; November 13, *Lukenbach*, from San Francisco; November 13, *Guatemala*, from Callao; November 14, *Santa Maria*, from San Francisco.

Departures—November 9, *Manari*, to Buenaventura; November 11, *Huallaga*, to Callao; November 11, *Limari*, to Valparaiso; November 13, *Peru*, to Guayaquil; November 14, *Peru*, to San Francisco; November 15, *Mackinaw*, to San Francisco.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Canal Models and Lectures to Tourists.

The models of the Canal locks and the relief maps of the Canal that have heretofore been at the Administration Building in Culebra, where they have been used in illustrating a lecture delivered to tourists, are being moved to Ancon. They will be installed in the furniture storehouse about two hundred yards north of the Tivoli Hotel. The new lecture room will have seats for 175 people.

Hotel Books for Cash.

The list of places at which commissary books are sold for cash will be found in THE RECORD of October 2. To it has been added Gorgona commissary. This with relation to the circular on cash sale of hotel books, published elsewhere in this issue.

Balboa Drydock Gate Contract.

The contract for the manufacture and erection of two 56-foot gate leaves and anchorages complete for the new drydock at Balboa has been awarded to the McClintic-Marshall Construction Company, the only firm that submitted a bid. It calls for the manufacture of the leaves, the assembly of one of them at the company's shops, and the erection of the gate complete in 425 days for \$110,000.

Bas Obispo-Balboa Labor Train.

A morning and evening labor train was placed in service between Bas Obispo and Balboa on November 1. It leaves Bas Obispo at 5.35 a. m., and arrives at Balboa at 6.20 a. m.; leaves Balboa at 5.05 p. m., and arrives at Bas Obispo at 5.50 p. m. This train is for the accommodation of gold employees only, and no one is permitted to ride without a pass signed by the division engineer of the Central Division.

Telephone Changes.

The Isthmian Telephone Company, which operates a long distance commercial telephone business over the Panama Railroad Company's system, under a contract effective August 14, 1911, has been assigned a direct circuit for its sole use. Heretofore, the telephone company has had the use of the railroad

company's wires, but calls on account of official business of the Canal Commission took precedence over commercial messages. The Isthmian company has announced a change in rates to intermediate points in the Canal Zone, effective November 15. There will be no change in the rates between Panama and Balboa, or Colon and Cristobal, but the rate to all other Canal Zone points over Panama railroad wires will be 20 cents, United States currency. The rates to these points formerly varied from 10 cents from Panama to Empire, to 45 cents from Panama to Gatun.

Gravel Instead of Concrete Paving at Gatun Locks.

For completing the surface of the dry fill, between the towing and return tracks, on top of the lock walls at Gatun, gravel is to be substituted for concrete, originally specified. This is, because the fill will settle and consolidate, which would cause concrete paving to crack. After the fill has settled it will be practicable to pave the gravel with concrete, if desired. The gravel will be laid three inches deep, over a space 13 feet wide on each wall, and as long, approximately, as the walls proper. The 2,000 cubic yards required will be supplied from the stock pile of gravel dredged from the Chagres River at Gamboa. The work of placing has been nearly completed on the east side wall of the upper lock.

Panama Railroad Baggage Contract.

The contract for handling baggage on Panama railroad trains for a period of five years has been awarded by the Panama Railroad Company to Messrs. Luis F. Estenoz, Jr., and P. T. Arosemena of Colon. Five bids were received in response to advertisement, as follows:

J. C. Angel of Colon, whose bid was in the form of a reciprocal arrangement, and who submitted no cash offer for the concession.

John H. A. Davis of Cristobal, whose bid was \$200 per annum.

E. B. Thornton of Empire, whose bid was \$300 per annum.

Albert Lindo, of Panama, who offered \$600 for the privilege for the first year; \$840 for the second; \$1,080 for the third; \$1,200 for the fourth; and \$1,500 for the fifth.

Estenoz and Arosemena, whose bid was \$1,512 per annum, or a total of \$7,560 for the 5-year period. The award was made to the last named firm, as the highest responsible bidder.

Work of Lidgerwood Unloaders in October.

During the month of October, 1912, the following Lidgerwood trains and cars were unloaded by the Central Division:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa.	4	1,374	27,480
Miraflores.	2	521	10,420
Gamboa.	3*	799	16,779
Total.	9	2,694	54,679

*One unloader worked six days.

STATUS OF CANAL WORK.

New Estimate of Work Done and to Be Done on November 1.

A supplementary estimate of work that must be done before the canal is completed has been made as of November 1; and a tabular statement of the various items is published herewith. The original estimate is that of December, 1908, and, according as new facts have developed in the work, this has been revised from time to time. There has been an increase in excavation since 1908 of over 36 million cubic yards; a decrease in the amount of fill for dams, a slight increase in the amount of concrete required for the locks.

EXCAVATION.

The changes in the amount of excavation on various parts of the canal are shown by the following table:

DIVISIONS.	1909				1910				1911				1912

Of the total of 211,351,000 there remained to be excavated on November 1 only 28,391,000.—In the Atlantic Division 6,714,000 cubic yards; Central Division, 7,549,000 cubic yards; Pacific Division, 14,128,000.

The gradual increase in the estimated excavation in the Atlantic Division is due to the silting of the sea level channel between Limon Bay and Gatun Locks. This has been greater than was anticipated, and the addition of about 5½ million yards since 1908 is due to this cause, and to about 600,000 yards more of

(Continued on page 111.)

NOTES OF PROGRESS.

(Continued.)

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 92 per cent completed, 208,708 cubic yards, out of a total of 225,600, having been placed at the close of work on November 23. A statement of the amount laid each working day last week, and of the total in place, follows:

Resignation of Mr. S. B. Williamson.

Mr. S. B. Williamson has resigned his position as Division Engineer of the Pacific Division and will leave for the United States on December 12. He will enter the service of J. G. White and Co. Ltd. of London, international engineers and contractors, as Principal Assistant Engineer with headquarters in London. His work will be to direct construction in all parts of the world, except the United States and its possessions.

Mr. Williamson entered the canal service in May 1907, having been called here by Col. Goethals to become division engineer of the Pacific Locks and Dams. Upon the reorganization in 1908, he was made Division Engineer of the Pacific Division, and in that capacity has had charge of the construction of the locks at Pedro Miguel and Miraflores, involving the placing of 2,400,000 cubic yards of concrete; dry excavation amounting to 6,900,000 cubic yards; dredging at the Pacific entrance, amounting to 39,300,000 cubic yards; construction of terminal docks at the Pacific entrance; and municipal work in Panama city and the Canal Zone south of Culebra. His engineering work on the Isthmus has included the design and specifications of the concrete handling, stone crushing, and sand handling plants of the Pacific Division, and their installation; reinforced concrete reservoir and other municipal engineering; and the design of the Pacific terminal wharves and piers, with about 5,000 linear feet of docking space.

Before coming to Panama, Mr. Williamson

had been engaged from 1886 to 1890 on railroad work in the northwestern part of the United States, and for the following two years was in general engineering and construction work in southern cities. In 1892 he entered the service of the United States Government on engineering and construction work connected with the navigation of the Tennessee River and remained there until 1900, with the exception of a few months in the Army during the Spanish-American War in 1898. His work included dredging and the construction of training dams near Chattanooga, Tenn., and Florence, Ala., the construction of the Colbert Shoals Lock at Riverton, Ala., and the operation and care of the Muscle

Shoals Canal, which covers about 20 miles and has eleven locks. In 1900 he was transferred to Newport, R. I. as Assistant Engineer in charge of the fortification work in that district, including the design and construction of 18 gun batteries, and the maintenance of all completed forts. During four years of his service on the Tennessee River, and three years at Newport, he was associated with Col. Goethals. In 1904 he became engineer of the Expanded Metal Engineering Company of New York, but after one year opened an office in Baltimore as consulting engineer. During these years his work was principally in designs and estimates for reinforced concrete buildings.

CONCRETE WORK IN THE LOCKS.

On November 1 a revised estimate of the concrete to be placed in the locks was made, and the amount determined upon, 4,446,530 cubic yards is 93,967 yards greater than that heretofore published. On this new basis, over 93 per cent of the total had been laid at the close of work on November 23, the amount in place being 4,120,533 cubic yards.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on November 23 being 1,905,500 cubic yards, out of a total of 2,043,730. A statement of the amount of concrete placed in the locks each working day of the week ending November 23, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

[illegible]

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 98 per cent completed, 892,001 cubic yards, out of a total of 903,000, bucket measurement, having been placed at the closed of work on November 23. The record for each of the working days of last week, follows:

DATE.	AUXILIARY PLANT.							Mixed by hand	Large stone.	Total.

STATUS OF CANAL WORK.

(Continued from page 109.)

dredging excavation at Gatun Locks than was estimated.

In the Central Division the increase of 16,600,000 cubic yards is due almost entirely to the development of the slides in Culebra Cut, and their gradual increase as the work advanced is indicated in the above table.

An increase of 12 million cubic yards in the dredging estimated for the Pacific Division is due, about seven million yards to the dredg-

ing necessary for the Balboa terminal basin and docks, and the balance to dredging made necessary to maintain the channel from silting, and to hydraulic excavation by monitors at Miraflores. The increase in the dry excavation is due to an addition of 1,400,000 cubic yards in the Balboa terminals, and the balance in the channel and locks.

ITEMIZED STATEMENT OF WORK DONE AND TO BE DONE

The following statement shows by items the work already accomplished and how much remained to be done on November 1:

A PROCLAMATION.

By the President of the United States—
Panama Canal Toll Rates.

I, William Howard Taft, President of the United States of America, by virtue of the power and authority vested in me by the Act of Congress, approved August 24, 1912, to provide for the opening, maintenance, protection and operation of the Panama Canal and the sanitation and government of the Canal Zone, do hereby prescribe and proclaim the following rates of toll to be paid by vessels using the Panama Canal:

1. On merchant vessels carrying passengers or cargo, \$1.20 per net vessel ton—each 100 cubic feet—of actual earning capacity.
2. On vessels in ballast without passengers or cargo 40 per cent less than the rate of tolls for vessels with passengers or cargo.
3. Upon naval vessels, other than transports, colliers, hospital ships and supply ships, 50 cents per displacement ton.
4. Upon army and navy transports, colliers, hospital ships and supply ships \$1.20 per net ton, the vessels to be measured by the same rules as are employed in determining the net tonnage of merchant vessels.

The Secretary of War will prepare and prescribe such rules for the measurement of vessels and such regulations as may be necessary and proper to carry this proclamation into full force and effect.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington this
13th day of November in the year
[SEAL.] of our Lord 1912 and of the independence of the United States the

137th.

By the President: WM. H. TAFT.

P. C. KNOX,

Secretary of State.

[No. 1225.]

Unlawful Target Practice.

The Chief of Police of the Canal Zone calls attention to the fact that persons have been using mile post markers, sign boards, glass discs in signals, etc., along the Panama railroad line as targets for rifles or revolvers. In the future every effort will be made to prevent such practice and to prosecute those caught committing the offense.

WATER FROM GATUN LAKE.

Tunnel to Pass Supply of Water to Colon System—Decomposition in the Lake.

Operations began on November 14 for driving a tunnel through the divide between Gatun Lake and the watershed of Brazos Brook reservoir, to conduct an auxiliary supply of water for Colon and Cristobal. The tunnel, six by six feet in cross section, will be driven with its bottom 75 feet above sealevel, which is four feet below the minimum level of the lake under operating conditions, and the water will be passed through a 20-inch main under the head existing between the surface of the lake and the reservoir. The top of the spillway of the reservoir is 49.4 feet above sealevel, and the intakes of the pipe through which the water passes to the filters and pumps is at elevation 32 feet. The point at which the tunnel is to be constructed is about three miles above the dam of Brazos Brook reservoir, and about a mile and a half from the Panama railroad, at Quebrancha siding as it crosses the lake on the relocated line.

The project of cutting a tunnel into the lake, below its surface, was open to objection because of the possibility that water might seep along such a cut and be a waste and menace. The nature of the divide was determined by a number of borings. Beneath a surface covering of earth and shale, the divide is a ridge of solid blue argillaceous sandstone, of such density that water poured into the drill holes showed little absorption. At either end of the tunnel an approach will be made through an open cut; on the lake side tunneling will begin where the sandstone is found to extend above the high water level of the lake; on the reservoir side, the cut will be continued until a 12-foot face of the sandstone is exposed. The portals will be sealed with concrete around the main, and it is possible that the main through the length of the tunnel will be imbedded in concrete, for strength and protection against rusting. The height of the saddle at the point above the tunnel is 187 feet above sealevel; tunnel and approaches together will be about 600 feet in length. The flow of water through the tunnel will be controlled by three methods; by stop planks over the intake; by sluice gates in the gatehouse; and by 20-inch valves in the mains.

Two other projects were considered for transferring the water from the lake to the reservoir without cutting a tunnel below the surface of the lake. One involved laying a main over the lowest saddle between the watersheds, which is at elevation 150 feet, approximately, and pumping the water over. The other contemplated a tunnel with its bottom five feet above high water level of the lake, and the construction of a siphon system. The estimated cost of the siphon system was placed at \$25,500, with an operating expense of about \$100 per month. The estimated cost of the tunnel and main as adopted, is \$16,700, with no operating charges.

The construction of the tunnel will insure a maximum supply of water to Colon and Cristobal amounting to 12,000,000 gallons daily. Following the past dry season, the water in the Brazos Brook reservoir was supplemented by pumping from the Mindi River, and by hauling water in lighters from the Agua Clara supply at Gatun. The quantity supplied from sources outside the Brazos Brook watershed amounted to about 114 750,000 gallons.

Excavation was begun for the construction

of the new filtration plant at Mount Hope, as a part of the project for increasing the supply of water to Colon and Cristobal. This is to be modern in every respect and will be provided with a special system of spray aeration, for treating the water from Gatun Lake. In its rise the lake has spread over approximately 80 square miles, beyond the 21 square miles which it covered when its normal surface was 14 feet above sea level. The water surface is now about 100 square miles; when the lake has attained its maximum elevation of 87 feet above sealevel its surface will be 167.4 square miles. In its spread it inundates a territory covered with timber or dense vegetation, or swamp. The vegetation has been decaying, and the stagnant backwaters are dark and tainted with the various orders of putrefaction. In some instances the water has become so exhausted of oxygen as to kill quantities of fish, the decaying bodies of which add to the taint. At the spillway of Gatun Dam, where the water is passing over the uncompleted portion of the ogee, at elevation + 50 feet, it has a strong and repulsive smell, mostly of hydrogen sulphide. This sulphide is present to such extent that, liberated from the spray in gaseous form, it attacks the paint on nearby ironwork and buildings. A stiff breeze across the spillway toward Gatun will make the fumes perceptible in the village, as much as a mile away.

The lower strata of water in the lake, as in lakes in temperate countries, become exhausted of dissolved oxygen. The living organisms, plants and animals, use some of it in respiration, but by far the most is consumed in the decomposition of organic matter. The amount and rate of exhaustion of dissolved oxygen at the bottom of a lake depend on the quantity of organic matter, the temperature of the water, and the volume of water below the thermocline. All three of these factors are present in Gatun Lake to a relatively high degree.

They are all present, however, to a high degree in the reservoirs in use over the Canal Zone. The prolonged and heavy rains furnish a large and deep stratum of water, richly laden with oxygen. After the part "turnover," occasioned in the setting up of vertical currents by the inflow of large quantities of cooler stream water at the beginning of the rainy season, the top stratum does not present conditions of stagnation. The stagnant water lies in the lower strata, out of contact with dissolved oxygen.

The oxygen-bearing stratum of water in the Carabali reservoir reaches a depth of eight feet in the middle of the rainy season; in the Cocoli reservoir it is seven feet deep; in Comacho reservoir, 16 feet; in Brazos Brook reservoir, 14 feet, and in the Rio Grande reservoir, 15 feet. The tunnel into Gatun Lake will have its intake within a normal ten feet of the surface.

Conditions within Gatun Lake will be much like those of Cocoli reservoir, which was formed by impounding the waters of the Cocoli River behind the west dam at Miraflores Locks, inundating a considerable area of vegetation. During the seasons of 1910-1911, and part of 1912, there have been opportunities to observe any disagreeable evidence of decomposition, in conjunction with stagnation, occurring at Cocoli reservoir. Except at times of "turnover" the water consumed has been free of taint worth consideration, while

analyses showed the upper stratum to have been free from objectionable matter.

Water now flowing over the spillway at Gatun Dam is impregnated with the decomposition of organic matter, made evident in the drift which is passing over the ogee. But under the normal flow at locks and spillway, when the Canal is in operation, and with the supply of fresh water from the Chagres and other streams tributary to the lake, the surface stratum will become less objectionable. The potability, however, of the lake water will not be dependent on this possibility. The system of aeration and filtration to be installed at Mount Hope has been devised to make potable even the stagnant and malodorous waters of the lake, were that necessary; while automatic regulation of the headgates at the tunnel will make the Gatun Lake water secondary and auxiliary to the supply in Brazos Brook reservoir. The former will be used only when the latter runs low.

Rainfall from November 1 to 23, 1912, Inclusive.

NEW LAND NEAR BALBOA.

Swamp East of Proposed New Piers to be Reclaimed by Hydraulic Filling.

The spoil discharged by pipeline suction dredge No. 85, which is excavating for the approach to the proposed new piers of the inner harbor at Balboa, is being used in the reclamation of the swamp immediately east of the site of the railroad yard which will be constructed along the inner ends of the piers. The yard will occupy a large part of the fill made for the east toe of the abandoned Sosa Dam, while the greater part of the west toe, on which the present sand track runs, will be excavated for the construction of the piers. The swamp to be reclaimed extends along the east toe of the dam from the Balboa branch of the Panama railroad, by which it is bounded on the south, to Diablo Hill, and is bounded on the north and east by the main line of the railroad and the Balboa wye. It covers an

area of 400 acres and about 5,000,000 cubic yards of material will be used in raising the surface to reference 15. Its surface is now at about 7 feet above mean sealevel, so that a part of the swamp is subject to tidal inundation. The extent of flooding by tides is interfered with by the toes of Sosa Dam, as water can flow in only through the gaps left for the passage of the Curundu River and the Hondo River, both of which flow across the swamp.

The Curundu enters the swamp through a trestle near the south end of the Balboa wye, from a drainage channel direct through the dry filling being carried on within the triangle east of the wye. Beginning at the trestle a drainage ditch will be cut to the west, for a straight distance of 2,200 feet, subtending meanders of the Curundu, into which the channel will discharge about 1,500 feet from the point at which it will debouch into the harbor. This ditch will be 5 feet wide at bottom,

which will be 5 feet below sealevel, and with a slope of banks as steep as the material will allow.

About 350 feet from the trestle, this main ditch will be joined at right angles from the north by a ditch 5 feet wide at bottom, with elevation at zero, which is to extend from near the point at which the Hondo river crosses the Panama railroad, along the railroad for several hundred feet, thence to the west to a stretch of 1,500 feet direct to the main drain. The length of this ditch will be about 2,200 feet.

The drains will be protected by timber dikes with spillways at desirable intervals to allow the flow of spoil-laden water pumped into the swamp. Their construction will require about 30,000 cubic yards of excavation, at an estimated cost of \$22,500. An orange-peel crane, mounted on skids, will begin work shortly on the main drain, and its excavation will be supplemented by task work.

RECLAIMING LAND AT PACIFIC ENTRANCE.

Area bounded by railroad tracks and dock system is to be filled. Direction of the Canal is between north and northwest.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, engineers, and chauffeurs will be held by the Board of Local Inspectors at the Administration Building, Ancon, on Wednesday, December 4, 1912. All applicants for licenses as chauffeurs must procure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination.

All applicants for examination must be present at the Administration Building at 8 a. m., with papers in proper form. In addition, each applicant for chauffeur's license must appear with an automobile and demonstrate ability to operate it.

Obituary.

John J. Purcell, an employe of the Mechanical Division living at Gorgona, was killed on November 19, by falling from the rear

end of a Lidgerwood unloader on the Panama railroad relocation dump No. 6. He was 44 years of age, married and had been on the Isthmus nearly five years, coming here from Pennsylvania. He is survived by his wife living at Gorgona.

Marshall Wells, Manager of the Bayano River Lumber Company, living on the Bayano River, died in Ancon Hospital on November 12. He was 60 years of age, married, and had been on the Isthmus a year and a half.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The autumn meeting of the Executive Board of the Canal Zone Federation of Women's Clubs was held at the Hotel Tivoli, on Friday afternoon, November 22. Among the reports of the officers was one in regard to the Federation's ward, Elysium James, now in the Perkins Institute for the Blind, in Boston. The boy is reported to be doing well in his work and as happy in his life. The Federation library is now in use in the Cristobal Union Sunday school where it has been for the past year. The collection of pictures in on exhibition in Empire school building. Correspondence with regard to the library should be addressed to Mrs. Carl H. Elliott, Cristobal, and in regard to the pictures, to Mrs. M. E. Smith, Empire. The last of the consignment of Federation pins has been sold; any one wishing to purchase pins is requested to notify the treasurer, Mrs. J. E. Westberg, Empire, with whom arrangements may be made for ordering pins. The Federation history is completed and will be submitted to a committee consisting of the recording secretary, Mrs. Carl H. Elliott, of Cristobal, Mrs. A. O. Herman, of Gorgona, and Mrs. H. R. Trask, of Culebra. It will be presented by this committee at the annual meeting. It was decided to hold the annual meeting at the Tivoli Hotel, in January, the date to be fixed later. The meeting will be, as usual, an all-day session; a business meeting in the morning and program in the afternoon, followed by a reception. Mrs. Thomas Edwin Brown, Jr., was appointed chairman of the committee on arrangements. She will appoint sub-committees for the different departments of work. It is desired to bring together at this meeting all Canal Zone club women, and to this end an invitation is herewith extended to all those women on the Isthmus who were members of the federated Canal Zone clubs in the years 1907 and 1909. The meeting will be made attractive to these charter members of clubs and of the federation. No further invitation is required and it is desired that such club women as come under the head above designated send their names to Mrs. Thomas E. Brown, Jr., Cristobal, in order that arrangements may be made for their transportation and entertainment as guests of the Federation. The year book of the Cristobal Women's Club has been issued and the programs are being carried out according to its schedule. The meetings of November have been as follows: November 6, general meeting, subject "Central America", talk by Mr. Lee; November 13, home department meeting, subject: "System in the Home," papers by Mrs. Carl H. Elliott and Mrs. Frederick Mears, piano solo by Miss Leyland; November 20, art and literature department, subject, "Wedgwood and Royal Doulton," paper by Mrs. William Penley, vocal solo by Miss Margaret Smith.

The Gatun Woman's Club held its meeting on Tuesday afternoon, November 26, at the home of Mrs. Charles H. Stoddard. The program was under the home department. The following chairmen of the departments have been appointed: Mrs. J. H. Stevenson, home; Mrs. Hanna, philanthropy; Mrs. Stoddard, art and literature; and Mrs. Gabler, education. The president, Mrs. E. J. Neville, is in charge of the current

events class which is held in connection with the business meeting on the first Thursday in each month. The next meeting of the club will be held at the home of Mrs. Hanna.

A meeting of the Empire Women's Club was held at the Commission clubhouse on Tuesday afternoon, November 19. The question of work for the current year was discussed, and it was decided to divide the club into three departments; history and current events, with Mrs. D. L. Prather as chairman; art and literature, with Mrs. H. E. Smith, as chairman; and home, with Mrs. J. E. Westberg as chairman. The meetings will be held in the Commission clubhouse on the first and third Thursdays in each month. On December 5, the program will be under the history and current events committee. The subject to be taken by this committee is, "Panama and the Panama Canal." Members are requested to be prepared to give a five minute talk on some phase of the Canal work. At each meeting roll call will be responded to with a short item on current events. The program on Thursday, December 19, will be business and current events. The first meeting in January will be under the home and philanthropy department. Further details of the meetings for the remainder of the year will be given later.

PERSONAL.

The Hon. Henry L. Stimson, Secretary of War, accompanied by Mrs. Stimson, Miss Helen Taft, Dr. Lewis A. Stimson, Felix Frankfurter, law officer of the Bureau of Insular Affairs, and Capt. John McA. Palmer, of the General Staff, U. S. A., left on the *Colon* on Tuesday night for New York via Key West. While on the Isthmus, Secretary Stimson and his party inspected all phases of the Canal work, the locks and dam at Gatun, the locks and dams at Pedro Miguel and Miraflores, and the fortifications at both entrances. At Pedro Miguel he witnessed the operation of one of the gate valves in the lock water supply culverts, and both at Gatun and Pedro Miguel he saw leaves of the lock gates operated.

Mr. W. G. Comber returned to the Isthmus on the *Atenas* on November 21, from his vacation in the United States and Europe.

Mr. H. O. Cole, Resident Engineer of the Pacific Division, accompanied by his wife and daughter, returned to the Isthmus on the *Colon* on November 20.

Mr. C. E. Weidman returned from his vacation on the *Atenas*, arriving at Colon on November 21.

Thanksgiving in the Churches.

The Canal Zone churches celebrated Thanksgiving Day, on Sunday November 24. At St. Luke's Hospital chapel the service was at 10 a. m. The Rev. Henry A. Brown preached and the offertory anthem was sung by Miss Lucille Morley. At Empire the service was held in the Commission chapel with the Rev. A. A. Nellis as preacher, at 10 a. m.; and at Culebra the service was in the evening at 7.30 o'clock. At the Gorgona clubhouse a service was held in the evening when the music was furnished by the Gorgona chorus.

At St. Mary's church, Empire, there will be a service on Thanksgiving Day at 10.45 a. m. The Rev. H. R. Carson will preach. The offering at this service will be for the aged and infirm clergy fund of the Episcopal church in the United States.

On Sunday, November 17, the harvest

thanksgiving was celebrated in the West Indian churches of the Isthmus, in accordance with the custom in the church throughout the British Islands. Special services were held in Christ Church, Colon Beach, at the Baptist churches in Colon, at St. Paul's church, Panama, and at the mission churches in Empire, Las Cascadas, and Bas Obispo. The churches were decorated with fruits, flowers and vegetables. There was special music, and in each instance the offering was large; the largest being that presented at St. Paul's which amounted to \$100. These offerings are used in connection with the work of the local missions.

Thanksgiving services will be held in the chapel at Paraiso on Wednesday evening, November 27, and on Thanksgiving night at the social hall at Pedro Miguel.

Changes have been made in the personnel of the Wesleyan church clergy on the Isthmus; the Rev. E. G. Cooke, for many years resident pastor in charge of the church of Colon, has left to take up mission work in Florida, and the Rev. H. Britton King of Panama, has removed to Colon where he is residing in the parsonage in the church and school building.

The Woman's Altar Guild of St. Luke's Hospital chapel will meet at the home of Mrs. Frank Feuille, Ancon Hill, on Tuesday, December 3 at 3 p. m. This will be the only meeting in the month, and it is purposed to arrange for the Christmas gifts and charities at this time.

Church Notes.

The Ladies' Aid Society of the Cristobal Union Church held its second meeting for the season on the second Tuesday in November. The program consisted of congregational singing, devotional exercises and a report of the delegates to the Empire Missionary Convention in October. The feature of the afternoon was an address on practical work among the Indians of Central America, by Miss Annie Coop. The collection taken at the close of the meeting was given to Miss Coop to aid her in her work. The next meeting of this society will be held at the Union Church on Tuesday afternoon, December 10. The society extends an invitation to all women interested in mission study to be present. The subject of the program will be Korea.

Red Cross Christmas Seals.

The sale of Red Cross Christmas seals is advancing satisfactorily, as shown by a canvass made last week. Remittances have been made from several of the districts, showing that the allotments of 5,000 have been readily disposed of. At the carnival at Gorgona on Saturday evening, November 16, the Red Cross booth sold 2,900 seals; from Colon 7,000 seals have been reported sold. During the past two weeks, interest in this department of Red Cross effort has been stimulated by the exhibition of a series of moving pictures showing specific results achieved in the tenebrament districts in large cities and the relief of those suffering from tuberculosis, from the proceeds of the sale of Red Cross seals. Eighty-seven and one-half per cent of the proceeds of the sales is retained in the chapter and applied to local relief of those suffering from tuberculosis. If, therefore, the entire allotment to the Isthmus, 1,000,000 is sold, the sum of \$875 will be kept by the Canal Zone chapter for that purpose.

Marines Back Home.

The U. S. S. *Buffalo* arrived at Panama Road on November 25, and after three days in quarantine will discharge her passengers, 700 men of the United States Marine Corps, on Thanksgiving Day. The detachment is under command of Lieut.-Col. Pendleton, and includes the 3d Battalion under Major Smedley D. Butler now stationed at Camp Elliott. The 3d Battalion left Panama for Nicaragua August 11, and took part in the chief battles and skirmishes against the Nicaraguan revolutionists.

Canal Zone Rifle Club.

On Sunday, November 24, the Canal Zone Rifle Club held the first of a series of shoots to determine the individual rifle champion shot of the club. Only two ranges were shot, 300 and 600 yards. Mr. McLellan of Corozal was the high score man and now leads by four points in the competition. The following scores were made:

Name.	Three hundred	Six hundred	Total.
J. C. McLellan.....	43	47	90
Jas. Blaisdell.....	42	44	86
G. C. Ferris.....	42	44	86
J. N. Haynes.....	42	44	86
J. Bernson.....	40	45	85
F. W. Walraven.....	45	39	84
J. H. Kane.....	39	41	83
A. Kennedy.....	42	40	82
Max Boggs.....	39	42	81
W. L. Greene.....	41	39	80
J. L. Hoffman.....	39	40	79
W. W. John.....	42	31	73

The next shoot will be at the 1,000 yard range, and will be a stiff test of the abilities of each rifleman.

The winner of the Garlington medal shoot on November 10 was Mr. Walraven of Las Cascadas with a score of 84, W. W. John of Ancon being second with 80.

Master Masons.

All Master Masons in good standing are cordially invited to participate in forming Canal Zone Lodge A. F. & A. M. under dispensation from Grand Master of the State of Massachusetts, at Ancon lodge hall, on Saturday November 30, 1912 at 8.30 p. m.

Independent Order of Panamanian Kangaroos.

The regular monthly meeting of the Kangaroos will be held at Empire, Sunday, December 1, 1912, at 12 noon.

This order was recently consolidated into one court, with temporary headquarters at Empire.

All dues should be paid to Mr. E. W. Stollberg, Comptroller, Empire, Canal Zone.

Misdirected Letters.

ANCON, C. Z., November 27, 1912.

EMPIRE.

There was an attendance of 175 at the first meeting of The Forum on Sunday night, November 24. There was music by the mixed quartet composed of Mrs. Faure, Mrs. Boyd, Mr. Ross and Mr. Case; solos by members of the quartet. The address was by F. A. Gause who took for his subject "Literature and Life." The next meeting of The Forum will be on December 8.

Harry Pearson won the November handicap pool tournament. There were twenty men entered. A new set of ivory cue balls has arrived from the States.

The Culebra chess team composed of Messrs. Wilson, Vogel, Warner, McClure, Rose, Shropshire, and Dubois played the Empire team on Saturday night. November 24 at Empire. The Empire team won nine and one-half games, the Culebra team winning six and one-half games. The Empire team was composed of Messrs. Pulsifer, Smith, Knight, Sherrard, Caldwell, Goolsby, Verner, and Newbold.

The first meeting of those interested in the class for "First Aid to the Injured" will be held on Friday night, November 29. All interested are invited to join.

The first game of the handball tournament was played on Friday, November 23, between Mr. Kuntz and Mr. Diedrick. The latter won by the score of 21 to 14. The next games will be played Friday, November 29.

GORGONA.

Over three hundred people attended the motion picture show on Tuesday evening. The next show will be on Thanksgiving, when there will be open house at the Y. M. C. A. Pictures in the afternoon at 2.30 and again in the evening at 7.45 p. m. and special music will compose the program.

Three hundred and fifty people attended the Thanksgiving service on Sunday evening, November 24. There was an address by Mr. Verner, subject, "The Man That Came Back." The chorus gave its first recital and sang the following songs: "Now the Day is Over," "Holy Spirit," "For the Beauty of the Earth," "Largo by Handel; and "The Heaven's Declaring," from "Creation."

Sunday, December 1, at 7 p. m., after the band concert, The Forum will be opened. Mr. F. A. Gause will deliver an address on "Life and Literature." Special music will be furnished.

The Ragtime Tournament is nearly completed. A handicap tournament will be started on December 1st, based on the games rolled between November 1 to 23. Special prizes will be given. High score for singles in the ragtime tournament are Dense 597 and Sims 578. *Doubles*—Sims and Keppler, 1,123, and Calloway and J. Stewart, 1,051.

Gorgona was defeated in basketball on Saturday evening by Empire, 31 to 21. The players were—*Gorgona*—Ridge, Morrison, Christian, Stevens, Carpenter. *Empire*—Sawyer, Rowan, Hepler, Greening, Milbe.

Gatun will play at Gorgona on November 30.

Plans are being made for the coming Christmas entertainment and it promises to be one of the best ever held.

GATUN.

Gatun defeated Corozal in an interesting game of

basketball at Gatun on Saturday, November 23. Score—first half, Gatun 13, Corozal 2; final, Gatun 27, Corozal 3. The line up follows:

27, Corozal 5. The line up follows.	
Gatun.	Corozal.
Huber	R. F. Wright
Whiston	L. F. Roberts
Purchase	C. Morris
Fitzpatrick	R. G. Porter
Conley	L. G. McCathern & Knealy
Goals: Gatun—Whiston 6, (3 field, 3 foul) Purchase, 4 (field), Huber 1, (field), Corozal—Morris 1, (field), Roberts 1, (foul). Fouls: Gatun—Huber 1, Fitzpatrick 4. Corozal—Roberts 3, Morris 2, Porter 3, McCathern 1. Referee, Sartor. Umpire, Neely. Time-keeper, Forman. Scorers; Webb, Gatun; Dwelle, Corozal. Attendance, 200.	

By taking all three games of tenpins from Gorgona on Saturday night, November 23, Gatun again takes first place in the Isthmian tournament. The scores were, as follows:

Gatun.	Gorgona.
Swallow.....	187 170 187
Omeara.....	187 173 168
Rabbitt.....	175 154 140

888 838 827

835 760 775

The first meeting of the Forum held on Wednesday evening, November 21, was a decided success. In addition to the lecture by Mr. F. A. Gause, vocal quartette and solo numbers were given. There were 180 in attendance. The speaker for the next meeting will be Mr. W. Benton Childers, Superintendent of the McClintic-Marshall Company.

An inauguration ceremony will be held at the clubhouse on Saturday evening, November 30, when the various candidates recently elected to political offices in Gatun will be inducted into office. The Tenth Infantry Orchestra will furnish music. Everybody in Gatun is cordially invited to attend.

Following is the standing of the men's athletic contest:

Martinoff, 995; Loulan 822; Straub 685; Jendres 508; Flynn, 337; Miller, 296; Baeder, 280; Mitchell, 240; Daniels, 215; Ourand, 181; Albright, 161; Huber, 146; Atkinson, 129; Jensen, 123; McMahon, 116; Ogilvie, 100; Porter, 86; Dillon, 85; Carpenter, 84; Dickson, 66; Harper, 64; Tutthill, 64; Corson, 55; Curry, 50; Noble, 21; Fomon, 20.

Following is the standing of the boys' athletic contest: Meis, 1,169; Cummings, 1,107; Jervey, 1,066; Sisson, 947; Quinn, 921; Waid, 870; Gray, 850; Bethea, 717; Griffith, 714; Billett, 681; Loulan, 651; Neville, 587; R. Appelton, 560; Carkeet, 452; Witt, 433; Kerr, 374; Sibert, 264; Bath, 222; DePoorter, 132; Graham, 82; Walsh, 185.

CRISTOBAL.

At the moving picture show on Wednesday night, November 20 there was an attendance of 185. The next show at Cristobal will be on Saturday, November 30.

The following regulation was made by the local council at the meeting November 20: Children under 15 years of age will be excluded from the second floor after 5 p. m. on all occasions unless accompanied by adults. This regulation is not to conflict, however, with the rules of the boys' department.

Thursday being Thanksgiving, the pool and billiard room will be open for free pool from 8 a. m. until 6 p. m. and the bowling alleys from 8 a. m. until 11 a. m. and from 1 to 5 p. m.

"Open house" will be held again on Friday from 8 until 11 p. m. The mixed quartet will furnish special music. All men are cordially invited to come.

Saturday night the home basketball team plays at Empire.

Handball may be played on Monday and Thursday nights.

On Saturday night the Empire bowling team took two out of three games from the local team with the following scores:

Empire.	Cristobal.
Gustavson.....	189 148 154
Potter.....	175 173 184
Edwards.....	177 180 150
Pearson.....	153 159 182
Huson.....	166 183 182
Barrett.....	192 142 194
Burns, T.....	126 141
Buser.....	137
Collins.....	154 157 172
Bullard.....	193 170 172
Louch.....	161 210 177

Total.... 860 843 852

826 816 856

On Thursday night, November 21 the "married folks" duckpin tournament was held. A Thanksgiving turkey was given as first prize and a chicken as second.

The next "married folks" tournament will be held on December 21. At that time, one game each of duckpins, candlepins and tenpins will be rolled.

Band Concert.

A concert will be given by the Isthmian Canal Commission band at Gorgona, C. Z., on Sunday, December 1, at 6 p. m.

The next concert will be given at Pedro Miguel December 8, at 4.30 p. m.

COMMISSARY DEPARTMENT.

The commissaries are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others 8 a. m. to 1 p. m., and 3 to 7 p. m.

No material changes have been made in the prices of cold storage commodities sold at the Commissary stores since the publication of the price list last week.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Colon and Cristobal, during the two weeks ending November 23:

Haakon VII, November 10, from St. Marys, Ga., with 1,406 pieces piling for stock; 6,223 cross-ties for Panama Railroad Company; 10,878 pieces yellow pine lumber for Mechanical Division.

Turrialba, November 10, from New York with 60 cases electrical material for superintendent of erection.

Snesdal, November 12, from Baltimore, with 461 cases brick machinery, 54 packages spillway machinery, 197 crates castings (racks), 26 cases castings (haws-pipe) for superintendent of erection; 467 pieces steel plates, 12,000 cases dynamite, for stock; 91 tons pig iron, 850 car wheels, for Mechanical Division; 188 bundles steel bars, for Pacific Division; 900 bundles steel bars, for Atlantic Division; 225 bundles steel bars, for Division of Fortifications; 353 packages steel emergency dams.

Madapan, November 14, from New York, with 150 cases paper, for stock; 57 crates copper sheets, for Division of Fortifications; 24 crates electrical material, for superintendent of erection.

Grib, November 14, from Mobile, with 19,000 cross-ties, for stock.

Abangarez, November 15, from New Orleans, with 1,387 bales hay, 269 bales rice straw, 286 pieces piling, 20 drums cylinder oil, 240 cases cup grease, 160 cases gear grease, for stock; 183 pieces yellow pine lumber, 13 packages electrical supplies, for Mechanical Division; 647 barrels paving brick, 12 crates concrete machinery, for Panama Railroad Company.

Cristobal, November 15, from New York, with 151,480 bags cement for stock.

Allianca, November 15, from New York, with 551 crates tile slabs, 26 cases plaster ornaments, 16,500 pieces tile, hollow, for Panama Railroad Company; 41 reels cable, 162 cases electrical machinery, for superintendent of erection; 25 crates ranges, 50 cases lubricating oil, 25 crates galvanized buckets, 300 cases turpentine, 100 barrels alum, 10 reels rope, 12 cases writing paper, for stock; 487 barrels pyrethum powder, 100 cases pyrethum powder, for Sanitary Department; and a miscellaneous cargo, the whole consisting of 18,680 pieces, weighing 525 tons.

Tines, November 17, from New York with 30 barrels rosin, stock; 3,400 pieces hollow tile, Panama Railroad Company; 24 cases solder, superintendent of erection.

Thames, November 18, from New York, with 33 cases rubber hose, for stock.

Zacapa, November 20, from New York, with 30 barrels rosin, 48 bundles wheelbarrow parts, 1,590 pieces steel pipe, 436 bundles steel pipe, for stock; 13 cases cable, for Mechanical Division, 25 cases electrical material, for superintendent of erection; 6 cases machinery, 2 pieces machinery for Pacific Division.

Trebia, November 20, from New York, with 205 drums gasoline, 470 cases gasoline, 144 blasting caps, for stock; 16,000 bags cement, for Division of Fortifications; 20,000 bags cement, for Atlantic Division; 82,387 bags cement for Pacific Division.

Colon, November 20, from New York, with 15 cases envelopes, 85 cases printing paper, 80 cases brake shoes, 38 drums lime, 300 pigs lead, 334 bundles steel bars, 16 kegs chisels, 100 cases bronze wire cloth, 19 cases rubber hose, 400 bales shovels, 74 pieces railroad switches, for stock; 37 cases rubber packing, 45 cases cable splicing sleeves, for superintendent of erection; 36 crates stove pipe, 60 cases brake shoes, for Mechanical Division; 20 cases tables, 7 crates tables, for Panama Railroad Company, and a miscellaneous cargo, the whole consisting of 2,231 pieces, weighing 212 tons.

Atenas, November 21 from New Orleans, with 348 barrels, paving brick, for Panama Railroad Company; 5 packages hoisting machinery, for Division of Fortifications; 1,585 pieces yellow pine lumber, for Mechanical Division; 883 pieces yellow pine, 522 bales rice straw, 70 cases paint, 32 crates stove pipe, 3,643 pieces cross-ties, 161 pieces piling, for stock.

OFFICIAL CIRCULARS.

Hotel Coupon Books for Cash.

CULEBRA, C. Z., November 21, 1912.

CIRCULAR No. 256-H:

Effective December 1, 1912, hotel coupon books will be sold for cash at all commissaries where the cash sale of commissary coupon books has been installed.

Effective December 1, 1912, the sale of hotel books for cash by I. C. C. issuing clerks, except by the issuing clerk of the Quartermaster's Department, Culebra, will be discontinued.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Acting Division Engineer Atlantic Division.

CULEBRA, C. Z., November 21, 1912.

CIRCULAR No. 464:

During the absence on leave of Lieutenant Colonel Wm. L. Sibert, beginning this date, Major Chester Harding is designated as Acting Division Engineer of the Atlantic Division.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Acting Superintendent of Erection.

CULEBRA, C. Z., November 20, 1912.

To ALL CONCERNED:

Effective November 21, 1912, during the absence on leave of Mr. Ernest E. Lee, Superintendent of Erection, Mr. F. C. Clark will be in charge of Erection of the Electrical and Mechanical Engineer Sub-division, First Division, as Acting Superintendent of Erection, and I will devote some time to special features of the work.

EDW. SCHILDHAUER,

Electrical and Mechanical Engineer.

Approved: II. F. HODGES,

Assistant Chief Engineer.

Sale at Public Auction.

OFFICE OF THE CHIEF QUARTERMASTER.

CULEBRA, C. Z., November 25, 1912.

There will be sold at public auction, by the District Quartermaster at Ancon, Canal Zone, at his office, at 2 p. m., Wednesday, December 4, 1912, to the highest bidder for cash the following Isthmian Canal Commission property:

1 38 cal. Colts revolver	1 Hand bag
Army model, with 16	1 Rain coat
cartridges	1 Hammock
2 Shirts, woolen	1 Umbrella
5 Mosquito bars	1 Alcohol lamp
3 Pairs spurs	1 Coffee pot
1 Pair riding pants	1 Tea Kettle
1 Pair pants	1 Receipt book
1 Pair shoes	1 Copy election laws
1 Pair puttees	1 Spanish dictionary
1 Pair leggings	1 Oil cloth
1 Suit case, fiber	

The Government reserves the right to accept or reject any or all bids.

For further information apply to the District Quartermaster, Ancon, C. Z.

R. E. WOOD,
Assistant Chief Quartermaster.

Sale of Public Buildings at Nombre de Dios.

OFFICE OF THE CHIEF QUARTERMASTER.

CULEBRA, C. Z., November 14, 1912.

Sealed proposals will be received at this office until 3 p. m., Saturday, December 14, 1912, and then opened, for the purchase of any or all buildings, including plumbing, owned by the Commission at Nombre de Dios. List of buildings and full information will be furnished upon application to any district quartermaster, or at this office. Proposals must be accompanied by five percentum (5%) of amount bid. The Government reserves the right to accept or reject any or all bids. Envelopes containing proposals should be endorsed "Proposal for purchase of buildings," and addressed to Col. C. A. Devol, Chief Quartermaster, Culebra, C. Z.

Sale of Surveying Instruments, Compasses, and Ship's Log.

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., November 19, 1912.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, C. Z., until 2 p. m., December 7, 1912, when they will be opened in the presence of attending bidders, for any or all surveying instruments, compasses, and ship's log now on hand in the storehouse for obsolete material. These instruments may be seen on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m., on application at this office. The right is reserved to reject any or all bids, or any combination of bids. Bids must be sealed and plainly marked: "Proposal to purchase surveying instruments," addressed to the Depot Quartermaster, Mount Hope, Canal Zone.

C. NIXON,
Depot Quartermaster.

Married.

SNIDER LONG—On Thursday morning, November 21, in the Union Church, Cristobal, Miss Lucille Leona Long, of San Antonio, Texas, to Mr. Lyman Edgar Snider, of Tyroon Pa. The Rev. Carl H. Elliott, officiating. Isthmian residence, Porto Bello.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers from New York on alternate Tuesdays, at 2 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston, and Santiago de Cuba, at 2 p. m. on sailing dates.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m. for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.

The following ships arrived at, or departed from the port of Balboa during the week ending November 23:

Arrivals—November 17, *Manari*, from Buenaventura; November 18, *City of Sidney*, from San Francisco; November 20, *Mantaro*, from Callao; November 20, *Aysen*, from Valparaiso; November 20, *Seward*, from San Francisco; November 22, *Oberon*, from San Francisco.

Departures—November 17, *Ucayali*, to Callao; November 17, *Santa Maria*, to San Francisco; November 18, *Guatemala*, to Guayaquil; November 19, *Pennsylvania*, to San Francisco; November 19, *Salvor*, to San Francisco; November 20, *Quito*, to Guayaquil; November 21, *San Jose*, to San Francisco; November 23, *Manari*, to Buenaventura.

LOST—Bunch of keys, on November 20, somewhere on Panama railroad line between Colon and Panama. Finder will please return to any Panama railroad agent and receive reward.

LOST—In the Commissary at Pedro Miguel, on November 19, a pocket book containing a bunch of keys and some small change in silver. Finder will please return to House 86-C, Pedro Miguel, and receive reward.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, DECEMBER 4, 1912.

No. 15.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Erecting the Lock Gates.

Erecting lock gates is much like constructing an office building according to the modern style. The framework of steel girders is the background, and then comes the fixing of the steel covering, just as the stone or brick veneering is attached to an office building. On this account the work is in various stages of completion at one time—one gate may be completed, another half done, and others not yet begun. At present the erectors are working on all but four of the 40 leaves at Pedro Miguel, and on 12 of those at Miraflores. There are 92 leaves to the 46 gates on all of the Canal locks, and work is advancing on 70 of these. There are 18 leaves at Miraflores locks on which no erecting work has yet been done.

At various stages of the gate erection, various parts of the work have given the appearance of being the most difficult. At first it was believed that the erecting would present the greatest obstacle to completion on contract time, but this has been overcome, and the erecting is now going on satisfactorily. Then the reaming of rivet holes and the driving of the 5,750,000 rivets required were looked upon as the greatest obstacle, but this also has been practically overcome. Now the real crux of the situation lies in the finishing of the gates, that is the swinging into place, planing of the edges so that the leaves will fit watertight, and similar work. This part of the problem is being worked out satisfactorily.

The gate contractors now have a force of over three thousand men at work, over four hundred of whom are white, and skilled mechanics.

Gatun Lake and The Spillway.

Gatun lake reached its highest level on November 29, when the surface was 56.28 feet above sea level. Two days before, the sluice gates in the bottom of the concrete dam across the Spillway of Gatun Dam were opened, in order to draw the level of the lake down below elevation 50, and yet so great were the freshets of that week, due to heavy rains in the upper Chagres valley, that the water

steadily rose 1.1 feet until after the crest of the freshet had passed.

The level of the lake is being reduced in order that work may be finished on the concrete dam of the spillway. This dam consists of a concrete barrier, whose final height will be at 69 feet above sea level, and a series of crest gates erected upon it. The gates move up and down between concrete piers. There are two abutments and 13 piers, and therefore 14 waste ways. Prior to October 19 the concrete in the central section had been carried to +50 and that of the end sections to +69; since this date, construction has been confined to the end sections while the water passed over the central section. The work now before the spillway builders is to complete the central section to elevation 69 and to carry all the crest piers and abutments to the final height of 115 feet 6 inches during the first three months of the dry season. About 17,000 cubic yards of concrete must be placed.

After the concrete work is finished the crest gates and the machinery to operate them must be installed. The temporary sluice gates in the bottom of the concrete dam will be filled with concrete, and all the regulating of the lake surface will be done by operating the gates on the crest of the dam.

Heavy Freshet on Chagres River.

The Chagres River was swollen on November 28, Thanksgiving Day, with the largest rise which has occurred in it since that of December 3-4, 1910. Both freshets attained almost the same heights, as follows:

STATION.	Dec., 1910.	Nov., 1912.	Low Water
Vieja	150.9	150.0	125.0
Alhajuela	108.7	108.4	91.0
Gamboa	64.6	62.45	44.0

*Now dependent on Gatun Lake.

It is noticeable that during the recent freshet the rise at Gamboa was not as great, in proportion to that at the stations upstream, as was the case in the freshet of December, 1910. This is attributed to the backwater from Gatun Lake, which stood 11.2 feet above the old low water level at Gamboa, on November 28. The effect of the backwater in case of freshets has been a problem in connection with the dike across the north end of Culebra Cut, and the showing during the recent freshet is regarded as reassuring.

West Breakwater at Atlantic Entrance.

The outermost bent of the trestle for the west breakwater at Colon is to be driven at a point 11,763 feet from the beginning, which is at Toro Point lighthouse, on December 6. The trestle is double-tracked for about 11,000 feet, with the last several hundred feet single-track. The core of dry fill from the borrow pits at Toro Point has been completed, while nine-tenths of the dredge spoil is in place; and about one-seventh of

the armor of hard Porto Bello rock has been placed since the first bargeload was brought from the quarry on August 23, 1911. The output from the quarry has not kept pace with the demand and the facilities for placing it; only one of the two derrick barges equipped for placing armor on the breakwater has been in use. No. 1 will go to the Mount Hope marine shop for overhauling within a few days, its place at the breakwater being taken by No. 2; the former will be out of the shop within a month, after which it is expected that both barges will be kept busy. Their work will be supplemented by the use of a heavy locomotive crane, made from one of the steamshovels formerly in use in the Toro Point borrow pit. In the conversion of the steamshovel, the original boom was supplanted by one 65 feet in length specially constructed at Gorgona Shops. This crane will be used on a middle track, for placing heavy rock beyond the reach of the derrick barges, which work from the lee side of the trestle. All of the parts for the crane have been fabricated, and the assembling is being done at the Toro Point machine shop.

To the extent to which its position allows it, the breakwater has been proving a strong barrier against the heavy waves which roll in from the Caribbean. During heavy seas about the twentieth of November the seaward track shifted slightly at one point, but there has been no indication of real insecurity.

Sale of Surplus and Obsolete Supplies.

A catalogue of surplus material and obsolete equipment from the service of the Isthmian Canal Commission and the Panama Railroad, is being prepared at the Commission printing plant at Mount Hope. These goods are offered for sale. For the purposes of cataloguing, they are divided into twenty-eight classes, as follows:

1. Porto Bello rock crushing plant and spare parts.
2. Truck trailers and equipment.
3. Steam shovels and parts.
4. Locomotives, tank cars and flat cars, 42" gage.
5. Locomotives, steam, 5-foot gage.
6. Cranes.
7. Steam shovels and parts.
8. Unloaders, and parts.
9. Plows, ballast.
10. Rock channelers and parts.
11. Rock drills, rock drill parts and well drill parts.
12. Concrete mixer, trolley parts and on trolley trucks.
13. Boilers, engines and pumps.
14. Injectors, inspirators and parts.
15. Oil cups lubricators and lubricator parts.
16. Pop and safety valves and parts.
17. Shop tools, machinery and miscellaneous equipment.
18. Hand tools.
19. Rubber valves.
20. Electrical material.
21. Light and heavy hardware.
22. Concrete mixer, trolley parts and on trolley trucks.
23. Corral supplies.
24. Hotel and household supplies.
25. Steel, iron and tin lined cans.
26. Bridge parts.
27. Bar iron.
28. Hardware tools.

Intending bidders can obtain copies of circular advertising the above mentioned

LEASING LANDS AT TERMINALS.

Areas Available to Private Parties, and Conditions for Granting Privileges.

The committee consisting of Col. H. F. Hodges, chairman, Mr. H. H. Rousseau, Mr. Frank Feuille, and Mr. J. A. Smith, appointed by the Chairman and Chief Engineer to consider the general subject of leasing lands in the vicinity of the Cristobal and Balboa terminals to private parties, for commercial, industrial, and residential purposes, has reported that, in general, any lands belonging to the United States, or to the Panama Railroad Company, which are not needed for governmental purposes, may be considered as subject to lease or license to private parties, in so far as legal power exists to make such leases or licenses. At present, the only authority for the leasing of public lands in the Canal Zone is that found in the Act of Congress, approved February 27, 1909, which empowers the President to lease lands to actual settlers for agricultural purposes. Town sites are expressly exempted from this authority.

The lands owned by the United States at the terminals of the Canal are not available for agricultural purposes, and, in most cases, are situated in town sites now in existence, or to be established. Consequently, no lease can be given for such lands on behalf of the United States. Although no leases can be made by the Isthmian Canal Commission for lands belonging to the United States at the terminals, licenses may be granted for the use of such lands. The license is nothing more than a revocable privilege, and creates no contractual relations between the licensee and the Government; and no claim for improvements can lawfully be set up against the Government by the licensee in the event of his having to vacate the lands.

The Panama Railroad Company is not debarred by law from leasing its lands, and may continue to do so, exercising the privilege of an individual or corporation to lease lands belonging to it.

Lands at Cristobal, belonging to the United States and the Panama Railroad Company, which are at present considered open for leasing are those not needed for public purposes, and include the area comprised between the Panama railroad and the west bank of the French canal, from Mount Hope to Mindi; an area to the west of the Panama railroad as it enters Colon, fronting on Folks River and Puerto Escondido, extending as far north as Mount Hope, a part of which is involved in litigation; beyond this area, one along the East Diversion, running indefinitely toward Gatun, also in litigation; any portion of the Panama Railroad Company's holdings on the west shore of Limon Bay, and south of an east and west line drawn through the mouth of the Sweetwater River, excepting a relatively small area involved in litigation, and extending to Kinney's Point; an area at the south end of Limon Bay, between the American and French canal channels, excepting the part within one-half mile of the west bank of the former; all of Manzanillo Island; and the island lying across the French canal from Cristobal, from opposite Mount Hope to its north end, opposite Dock 13.

On the Pacific side, the final arrangements of the town site, military camps, and other Governmental requirements at Balboa have not been determined. Pending such settlement, the committee recommends that no

areas having water frontage on the Canal bank be leased, inasmuch as to do so, even granting a moderate widening of the Canal, would be to risk obstructing the channel by vessels claiming right of way to and from certain private wharves. The site shortly to be created by reclaiming the swamp, bounded by Diablo Hill, the main line of the Panama railroad, Ancon Hill, and the permanent piers, will have no water frontage and may become available for leasing purposes. In case the water front of the Balboa dump is not needed for Governmental purposes, it would be well adapted to improvement by private enterprise, and licenses might be granted, with the provision that they shall not interfere with the use of the interior area of the dump for such Governmental purposes as might be desired. The condition near Balboa is complicated by the proposed acquisition of certain holdings in the vicinity.

The form of leases issued by the Panama Railroad Company, the committee recommends, may follow the present form, with such modifications as the special conditions of each case may require. No leases can be issued on the terminal areas belonging to the United States, because of the restriction to agricultural uses, but revocable licenses may be issued for lands available.

No iron clad form of license is recommended, because of the variety of conditions to be met. The committee recommends, however, that each licensee should embody a clause requiring the licensee to vacate the land on notice from the authorities, and to remove any improvements he may have placed thereon, at his own expense; and a clause to the effect that the license shall not be construed as excepting the licensee from the payment of lawful taxes that may be assessed against improvements placed by him upon the land.

In the Canal Zone, the water front, up to the high water mark, is owned by the United States, even when the abutting land is owned by private parties. There is no authority in any executive or administrative officer at present to lease any of the water areas at the terminals of the Canal. The granting of such authority must emanate from Congress.

All waterfronts available for lease are unimproved at present, and no Congressional authority exists for the expenditure of public moneys for the improvement of lands leased by the Government to private parties. Under existing conditions, it is doubtful whether a private enterprise would hazard the expense of making the improvements. The Panama Railroad Company is not debarred from making such improvements on its property, but the committee believes that undertaking them on a large scale is not at present advisable. An application for lease, with the making of improvements as a condition, might be accepted by the company, should it promise suitable return for the investment.

As to the manner of awarding licenses to bidders, it is noted that the Government lands cannot be leased, and if licenses are issued it would be impracticable to let them to the highest bidder, inasmuch as no contractual relation exists between the Government and the licensee. It recommends that leases of Panama railroad property should be granted, as in the past, to the highest bidder.

In conclusion, the committee believes that before any satisfactory plans can be made for encouraging private enterprise to improve or develop the terminals, Congress should enact

legislation giving authority to grant leases for public lands, other than those to be devoted to agricultural purposes, and outlining a policy as to making improvements with public funds as a condition for such leases, and as to the manner in which leases may be granted.

Conditions at Camp Otis.

The arrival of 102 recruits for the Tenth Infantry, U. S. A., at Las Cascadas, on November 15, from the United States, on the *Cristobal*, has filled the quarters at Camp Otis to full capacity. During the past year the barracks have been enlarged and altered in order to afford more room for the men, a post exchange has been built, and various small buildings have been acquired from the Isthmian Canal Commission to augment accommodations, but at all times the camp has been cramped. A quartermaster's storehouse is under construction near the regimental headquarters. This construction, as well as the laying of concrete walks, which is advanced continuously, is done by the men of the regiment, so that the only cost is for materials.

For formations, the regiment is also restricted. Each company has cleared for itself, from relatively level stretches of nearby jungle, a space about 125 yards square, for company formations, and drills in close order. No regimental or battalion formations are held, except muster and line of march along the highway, for practice marches. The regimental detachment has been formed from members of the companies and given separate quarters. The regiment will take up marches, and reconnoissance after the close of the school season on November 30. The dry season will be welcomed, as the mustiness of clothes and quarters prevalent during the rainy season has been increased by the crowded quarters. The health of the command has been very good since its arrival on the Isthmus. During the past year there were four desertions. Two of the men were apprehended.

A telephone system has been constructed at the camp, for the benefit of the garrison and those who desire to communicate with members of the regiment by telephone. Two trunk lines connect the local with the exchange at Empire, and all officers and men can now be reached by telephone.

Sanitation of Guayaquil.

Col. W. C. Gorgas, Maj. Robert E. Noble, Mr. Joseph A. LePrince, Dr. A. E. Mayner, and Mr. Joseph McGuigan leave today for Guayaquil, where they will make a preliminary estimate of the amount of work and money required to place that city in sanitary condition. The estimate is made at the request of the Government of Ecuador, with the object of having the port in sanitary condition by the time the Panama Canal is opened to commerce. Guayaquil has been for many years infected with yellow fever, and recently bubonic plague has also taken a foothold there. Its sanitation is regarded as highly important at this time, because it might become a menace to the whole world when the shipping of all nations comes into contact with vessels from Ecuador, upon the opening of the Canal.

FOUND—On Colon Beach, key ring containing four keys, two for Corbin lock, marked DF 9 and two for Eagle lock, one of which is marked LOCKE 3-R. Owner may recover same by applying at the Panama railroad Chief Dispatcher's office at Colon.

GATUN LAKE.

Transformation Made by One Rainy Season in Chagres Valley.

Gatun Lake has already a commercial value, although the surface of the water is still thirty feet below its final height. A man in Gatun has fitted out a large launch on which he conducts sightseeing parties for a round trip from Gatun to Gorgona each Sunday; the lighthouse service uses the lake in construction work; three gasoline launches at Gorgona, and twice as many canoes propelled by paddles or rigged with sails are making venturesome trips on the wind-swept surface; and natives from far back in the bush are bringing their products to market in cayucos that, instead of following the old river courses, are gliding over fields that were cultivated only a few months ago.

A series of freshets last week raised the surface of the lake to 56 feet above sea level, only 31 feet short of its final height; but the sluice gates in the Spillway are open now, and the surface is gradually falling to about 48 feet, where it will be held until the Spillway Dam is finished and the final filling of the lake begins next May. Even at the 48-foot level, however, the water has backed up in the Chagres valley and forms a large lake, much like one of those in the glacial regions of northern United States, with arms extending in every direction into the channels of old streams, and a score of islands breaking its surface.

Seen from the division office at Gatun, the lake stretches southward until it is lost in the mist that hangs over the hills. In the short intervals of sunlight that occur in a rainy season day in this part of the Isthmus, these hills, the water, and the sky seem only varying shades of blue, and they fuse into one another giving an effect of great distance. Yet this shore line is only a few miles away, and does not mark the end of the lake, but the point where the hills begin to close in toward the old river channel. One must leave the office building, and go to the edge of the hill, at the point where the railroad turns up the Gatun valley, to appreciate how large an arm of the lake this drowned river course forms. The water has backed up here, and in the Trinidad valley, until these streams would float a steamship for many miles inland; while every little creek that formerly poured into the Chagres has become a water highway through the woods.

One of these, the Frijoles River, is used by the men on lighthouse construction as a means of reaching a railroad station. The lighthouse builders are working on the west shore of the lake opposite the location of the old village of Tabernilla, and once a week they return to their home station. A two-mile pull across the open water, and then the canoes enter the channel of the river, and wind about between parallel rows of trees and bamboo clumps, the channel gradually becoming narrower, until there is just room for the working of the paddles. Last week four canoe loads of the men came up the river at sunset, when the myriad tints in the sky were reflected in the water, and the drops from the paddles glowed pink. Laughing and singing, they drove the canoes through the winding channel, and one who saw them coming up the tree-bordered lane might have thought them an incarnation of an old print

of the conquistadores on a voyage of discovery.

The lighthouse builders are making good use of the lake; for on it they tow sand and all other material to the very spots where the range lights are being erected. During the freshets of last week the little tow launch had difficulty in pushing its two barges up the Canal, so swift was the current in the channel. The first official trip on the lake was made by this branch of the service, when Col. H. F. Hodges accompanied the lighthouse engineer, Mr. W. F. Beyer, on a tour of inspection during the first week in October.

Strangers to the Canal work do not understand why the trees have not been cut in the area which the lake covers. It is simply a question of cost. The ship channel, from 1,000 to 500 feet broad, and the great anchorage basin at Gatun, have been cleared, and no further clearing is required for navigation. The lake will have an area of 164 square miles, and to clear this would require an expenditure of about \$2,000,000. A tree smothered when its roots are covered with water, and already the thousands of trees that have been flooded are beginning to die. Very little hardwood remains in the lake area, because this section of the country has been "lumbered over" several times since the 16th century. What with decay, insect attack, and wave motion, it is probable that within a decade the soft wood trees, that now stand so naked and ghostlike above the water, will have been uprooted and will have floated downstream.

Leaving the cleared channel, a light draft boat may even now float over the sites of the old lake region villages, which are marked by clumps of palms, orange, lemon, and mango trees, while here and there on some knoll one sees rows of the foundation piers of old buildings. It was to these that a recent article in an American magazine referred as the tombstones of "old French cemeteries."

At Tabernilla the tops of orange and lemon trees are sticking out of the water, so that a cayuco may be run through the branches, while its occupants pick the fruit. In the courses of the old streams, one may tie up to the limb of a tree and pick orchids. In fact, orchid hunting in the lake area is quite devoid of trouble; it would be possible to load a cayuco with the plants at many points along the Gatun and Trinidad rivers.

Along these rivers, too, many snakes are seen basking on the limbs of overhanging trees, or gliding daintily from limb to limb; while the lake itself seems rife with tiny fish an inch or two long. Running alongside the old Culebra Cut dump at Tabernilla, one gets an idea of how fast the vegetation grows in Panama, for where rock and earth were being dumped three or four years ago, bushes and trees are growing five or six feet high.

One effect of the rise of the water has been to shake the scepticism of the bush dwellers, who until recently could not be made to believe that it would be necessary for them to leave the area to be flooded by the lake. Following the channel of the Canal, and scanning the shores on either side, one sees only half a dozen huts between Gamboa and Gatun, and these are perched high up above the line of the final surface of the lake. The settlers were all reimbursed by the Government for their holdings, or improvements, many months ago and generally they have moved a mile or more back from the lake, where they have

built their huts, or into the townsites set aside for that purpose.

Altogether the impression one gets today from a trip on Gatun Lake is that in the near future it will be renowned as one of the most beautiful places on the beaten tracks of travel.

Rainfall from November 1 to 30, 1912, Inclusive.

BUSY TOURIST SEASON.

Unprecedented Traffic Indicated by Scheduled Regular and Special Sailings.

The scheduled sailings of steamers from the United States, and the accommodations booked on them to date, indicate that during the coming dry season the Isthmus will be visited by an unprecedented number of tourists. The regular services of the United Fruit Company, which has semi-weekly sailings from both New York and New Orleans, of the Hamburg-American Line, and the Panama Railroad Steamship Line, each with a weekly service between New York and the Isthmus, and of the Royal Mail Steam Packet Company, with fortnightly sailings between New York and Colon, will be continued, and in some cases augmented, while at least thirty special steamers will sail with parties of tourists for the Isthmus between January 1 and April 15, 1913. Some of these will be chartered vessels, carrying business or social organizations on excursions; the majority will be vessels operated by steamship lines, temporarily diverted to cruising the Caribbean.

The United Fruit Company will shortly place in service between New York and Colon three new steamers, each of approximately 8,000 tons register, which will be the largest of its fleet, and equipped with distinctive features for tropical cruising. Sailing from New Orleans on November 30, the *Saramacca* will be added to the service between that port and Colon. The company has arranged to date two chartered cruises, the first to arrive at Colon on February 12 from New York, under the direction of the Deffa Tours, while the second, sailing from New Orleans, will arrive at Colon on February 24, bearing a society of brewers from Cincinnati.

The Hamburg-American Line will send its *Moltke*, of 12,335 tons, on cruises leaving New York on January 4 and 23, February 25, and March 29, while the *Victoria Luise*, 16,500 tons, will sail from the same port on January 15, February 8, March 11, and April 10. The line will conduct two cruises from New Orleans on the *Kronprinzessin Cecilie*, 8,700 tons, sailing on January 23 and February 10.

The Royal Mail Steam Packet Company will conduct a special cruise, jointly from Southampton and New York, on the *Arcadian* and the *Oruba*. The former will sail from England to the West Indies, proceeding to New York without visiting the Isthmus, but tourists will be transferred at New York to the *Oruba*, which will sail from that port on December 21 for Colon, via Kingston. It will sail from Colon on January 7, for Southampton, making an extended tour along upper South America and

the Lesser Antilles before setting for the Canary Islands and Mediterranean ports.

The White Star Line, the Red Cross Line, the North German Lloyd, and the Peninsular and Occidental Steamship Company, which do not maintain regular services to Panama, will operate vessels as indicated in the appended schedule. The White Star Line which sent the *Laurentic*, 14,892 tons, on this cruise last season, will this year send the *Megantic*, 14,878 tons, in addition. The Red Cross liner *Stephano*, 3,500 tons, which made one Caribbean tour last season, will make two of the same sort during January and February. The North German Lloyd, which has never sent a passenger vessel to Colon, will institute a service through the Spanish Main with its *Grosser Kurfuerst*, 13,102 tons, making three cruises. The liner will sail from New York on January 16, February 20, and March 27. Wessels Brothers and von Gontard of Colon are the Isthmian agents for the North German Lloyd, while W. Andrews and Company of Colon are agents for the White Star Line, and the Red Cross Line and the Peninsular and Occidental Steamship Company are represented through the offices of the Panama Railroad Company.

The new bi-weekly service of the Peninsular and Occidental Steamship Company between Key West and Colon, was noted in THE CANAL RECORD of November 13, 1912. Key West is the nearest port in the United States to the Isthmus, the route to Colon being between 1,000 and 1,100 nautical miles in length. The *Evangeline*, 5,650 tons, will make the trip to Colon in about 70 hours and will carry mail.

Approximate arrivals of special steamers at Colon during the coming dry season, as scheduled to date, will be as follows:

Steamer.	Line.	Date.
<i>Oruba</i>	R. M.....	January 7
<i>Evangeline</i>	P. & O.....	January 10
<i>Moltke</i>	H. A.....	January 13
<i>Laurentic</i>	W. S.....	January 19
<i>Stephano</i>	R. C.....	January 20
<i>Evangeline</i>	P. & O.....	January 24

Sale of Cargo of Steamship "Newport."

Sale of cargo recovered from the floated steamship *Newport* began at the "American wharf" in Panama on November 30. The goods offered for sale are in fair condition, and embrace a wide variety of objects, such as rope, wire, cloth, patent medicines, liquors, machetes, ironwork, condiments, lamps, and crockery; while a considerable amount of valuable cloth is yet to be brought by lighter from the vessel. The sale is being conducted by the firm of Koehler and Kemp, average-adjusters, of New York, attending to the interests of the Pacific Mail Steamship Company and the various underwriters. A large part of the cargo was bought in lump on December 2 by the Chicago House Wrecking Company, through its local representative, who is engaged in the recovery of French scrap under contract with the Isthmian Canal Commission.

The salvage steamer *Salvor*, which began work on the *Newport* on September 9, and succeeded in raising it on November 10, lay by a week for further assistance in righting the vessel and cleaning out the hold. The difficulty of salving the cargo, impregnated with water and slime, was enhanced by the presence of consignments of potassium cyanide, the fumes of which overcame a number of the laborers. The *Salvor* sailed from Balboa on November 19, for Esquimalt.

Obituary.

Mrs. Luvie Lohman, wife of Charles F. Lohman of Paraiso, died in Ancon Hospital on November 26. She was 36 years of age and had been on the Isthmus three years. She is survived by her husband living at Paraiso.

Sidney Earl Jones of the U. S. S. *Buffalo* died in Ancon Hospital on November 28. He was 24 years of age, single, and is survived by his mother, Mrs. Allen Howes, living in Forest City, Iowa.

Missing Men.

Any one having information regarding the whereabouts of Charles H. Fagan, who is supposed to be on the Isthmus of Panama, is requested to communicate with the American Consul General, Panama.

Any one having the present address of Ernest E. Harris, formerly employed as a foreman at Gatun, is requested to communicate with Frank Hanna, Rosedale, Kansas.

The immigration report of the Quarantine officer at the Port of Colon for November shows that 3,686 persons entered the port during the month, of whom 1,574 were cabin and 2,032 steerage passengers. Of the total 2,102 were men, 813 women, 359 children, and 412 unclassified. Among them were 107 United States troops. Practically all of the cabin passengers were tourists.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The Rev. Aquila Lucas, field secretary of the International Sunday School Association, arrived in Colon on November 24, to work in the interest of the schools in the Isthmian Sunday School Association. He is spending two weeks on the Isthmus and will visit the Sunday schools in Cristobal, Gatun, Gorgona, Bas Obispo, Las Cascadas, Empire, Paraiso, and Pedro Miguel. This is his sixth annual visit to the American Sunday schools in the Canal Zone, the object being to keep the schools in touch with the progress of the movement throughout the world.

The Rt. Rev. Albion W. Knight, D. D., Bishop of Cuba, will arrive on the Isthmus from Havana, on January 8, on his annual visitation to the Panama mission of the Episcopal Church. Bishop Knight's first visit to the mission was in June, 1908.

The Christian Mission, a religious sect which originated in Barbados and established a branch on the Isthmus and in the Canal Zone in 1906, is erecting a church building in the new fill, east of E Street, Colon. It will be dedicated on Christmas Day. In connection with the church, there will be a mission house for the superintendent and his family, and a schoolroom. The cost of the buildings is estimated at \$2,000, which is being raised locally. The present headquarters of the mission are in a rented building on Bolivar Street, and consist of church and schoolroom combined, and rooms for the superintendent and his family. The Christian Mission has a membership in the Canal Zone of about 500. The American missionary connected with the sect, Miss Annie Coop, is on the Isthmus and is giving talks before the various missionary societies. On December 6, she will speak before the Gatun mission study class at the Baptist parsonage, and on December 20, she will be at Empire with the Ladies' Auxiliary.

Christmas Bazaars.

The Women's Guild of St. Mary's Church, Empire, will hold the Christmas bazaar in the Commission clubhouse on December 11.

A Christmas bazaar will be held by the members of Christ Church, Colon Beach, on December 14. Through the courtesy of the Governor of Colon, the girls' public school building will be used for the occasion. There will be four booths, representing the United States, the Republic of Panama, the West Indies, and Central America. The proceeds of this bazaar will be used for the renovation of the interior of the church building.

Christmas With the Lepers.

Christmas presents would be very much appreciated by the patients of the Palo Seco Leper Asylum. It is suggested that those who desire to help make the patients contented and happy on that day consult with the Chief Sanitary Officer or with the Superintendent of the Asylum.

Master Masons.

Services over the remains of Benjamin F. Wood will be held in Union Church, Cristobal, at 12.30 p. m., Sunday, December 8, 1912. All Master Masons are invited to attend. Sojourner's Lodge, U. D. A. F. and A. M., will meet at 12.00 o'clock noon instead of 1.00 p. m., as previously announced.

FREDERIC NEWTON, Secretary.

COMMISSION CLUBHOUSES

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving pictures for the week of December 9 to 14, is as follows: Monday, Empire; Tuesday, Culebra; Wednesday, Corozal; Thursday, Gatun; Friday, Cristobal; Saturday, Gorgona.

The standing of the basketball league, December 2, was as follows:

	Won	Lost	P.C.
Empire.....	6	0	1000
Corozal.....	4	2	666
Gorgona.....	2	3	400
Gatun.....	2	4	333
Cristobal.....	0	5	000

The standing of the bowling tournament, December 2, was as follows:

	Won	Lost	P.C.
Empire.....	18	9	666
Gatun.....	17	10	629
Cristobal.....	16	11	593
Culebra.....	12	12	500
Corozal.....	9	18	333
Gorgona.....	6	18	250

COROZAL.

There was an attendance of 125 at the "Forum" held on Sunday evening, December 1. Music was furnished by the mixed quartet and an address was delivered by Mr. W. B. Childers of Gatun, who spoke on "Land, Labor and Capital."

On Saturday night, December 7, the Empire basketball team will play at Corozal. A large crowd is expected to see this game between the leaders in the league.

Gatun bowling team will bowl at Corozal on December 8.

The second course of Spanish lessons began on November 25, and a beginners' class was started on the same night. Classes meet Tuesday and Friday nights.

CULEBRA.

The first in the series of "The Forum" was held on Wednesday night, November 27. Music was furnished by the mixed quartet, and Prof. Frank A. Gause Superintendent of Schools, delivered an address on "Literature and Life." The next of the series will occur Friday night, December 13, in connection with an informal social to which all are invited. A musical program will be given and Mr. Childers of Gatun will give a short talk on "Labor and Capital." Light refreshments will be served.

In view of the fact that the bowling alleys are not available for use in the afternoon, Friday evenings, beginning at 8, have been set aside for the ladies and their partners.

The chess club is now playing at home and all devotees of the game are invited to make use of the tables provided for that purpose in the rear of the reading room.

The membership is increasing and it is requested that all those using the privileges will take out membership cards.

EMPIRE.

The invitation tennis bowling tournament held at Empire on Thanksgiving Day, in which teams from all the Commission clubhouses along the line participated, was one of the largest tournaments ever held on the Isthmus. There were 86 entries. The results were as follows:

	Singles.
Bullard, of Cristobal.....	213 237 197 —647
Hodges, of Gatun.....	192 268 185 —645
Huson, of Empire.....	180 191 212 —583

	Doubles.
Cristobal—Gibson.....	176 162 199
Barrett.....	192 162 188
Empire—Huson.....	167 221 153
Gustaveson.....	189 208 129
Cristobal—Collins.....	153 169 196
Bullard.....	208 147 155

High score for the day, 268, was made by Hodges, of Gatun.

The Empire bowling team won two out of three games from Corozal Saturday night, November 20; scores, Empire 958, 825, 895; Corozal 887, 825, 872. The second game of the three was won by Corozal on the roll-off.

The basketball game between Empire and Cristobal was won by Empire by the score of 36 to 12. Empire has won all the games played to date.

All men wishing to enter the December pool tournament should hand their names in before December 7.

On Thanksgiving evening, two teams played a masquerade game of basketball. The opposing forces were known as the Giants and the Barbarians, the former made up of Empire's regular basketball team and the latter dressed to represent Spaniards, Barbadians, Jamaicans and folks of other nations. A great deal of merriment occurred in the first half of the game; in the second half the players donned their regular playing costumes. The final score was: Giants, 36, Barbarians, 30.

GORGONA.

Thanksgiving Day was observed by "open house"

at the clubhouse. Motion pictures were shown in the afternoon and evening. Four hundred and twenty-five people attended the motion pictures shown in the evening.

A local bowling tournament opened Monday evening, December 2. Every man will be credited with the games won.

A \$2.50 cue will be given for the prize in the pool and billiard tournament this month.

One hundred and twenty-five people attended the opening number of "The Forum" Sunday evening, December 1, when Mr. Gause gave an address on "Literature and Life." On Sunday evening, December 8, Mr. Childers will deliver an address and the Tropical Male Quartet will furnish special music.

The Cristobal bowling team bowled at Gorgona Saturday evening; Gorgona lost all three games.

The Gatun basketball team played a practice game with Gorgona on Saturday evening, November 30, the regular game being cancelled because of absence of an official referee.

The Christmas Chorus is now practicing for the special entertainment. The regular chorus is now rehearsing the cantata, "The Seven Last Words of Christ."

GATUN.

An inauguration ceremony was held at the clubhouse on Saturday, November 30, when the Democratic candidates, who were successful at the recent political election, were inducted into office. Judge Sweek presided. The Mayor, W. B. Childers, made a brief speech. The Tenth Infantry Orchestra furnished the music.

Geo. F. Miller won a handsome fountain pen given as a prize for high single game on Thanksgiving Day.

The executive council met on Tuesday, November 26. W. C. Gayer presided.

The Educational Committee has decided to enlarge the scope of its work. In addition to the Spanish and shorthand classes, classes will be formed in any branch or study in which there are five members interested. A teacher now available offers the following branches: arithmetic, geometry, plane and solid, mathematics, algebra, English, English literature, physiology and hygiene, history, German, French, Latin. Violin and piano lessons can also be given.

The Culebra bowling team won three straight games from the local team on Saturday night, November 30.

CRISTOBAL.

On Wednesday night the orchestra from the *Prin Joachim* rendered a program of the late music. There was an attendance of 200.

Thursday, Thanksgiving Day, there was a large attendance at the building, and the pool and billiard tables as well as the bowling alleys were well patronized.

Friday night, "open house" was held for the second time during the past month. Free punch was served and a special musical program was rendered, as follows: Selection by mixed quartet, Mrs. Boyd, Mrs. Faure, Mr. Ross, Mr. Case; tenor solo, Mr. W. G. Ross; contralto solo, Mrs. Faure; bass solo, Mr. Case; selection by mixed quartet; tenor solo, Mr. E. L. Mosher.

There was an attendance of 160 at the moving picture show Saturday night.

There have been twelve men entered for a pool tournament, and six in a billiard tournament which will be started this week.

PORTO BELLO.

With a membership of twenty-one, the first aid class has averaged 14 in attendance each Tuesday night, under the leadership of J. L. Tolar. About January 1 the class will use the International Y. M. C. A. First Aid Examination papers for a test.

The discussion club will consider on Thursday night, December 5, "Lessons to be learned from the recent Presidential election." C. L. King was elected president of the club in place of C. C. McColley who was transferred to Culebra.

Marking the close of the pool tournament, Louis DePoorter of Gatun gave an exhibition in fancy pool shooting Saturday night, November 23. In the progressive pool match running for forty-five minutes and conducted by Mr. DePoorter, the following scores were made, Hill, 90; Reichert, 87; Thompson, 83; Bucklin, 79; Bent, 63; and Sherrard, 49. Mr. Hill also was first in the tournament and received a gold watch fob as prize; W. Jackson received a sterling silver watch fob for being second.

The membership contest has greatly increased the interest in the Sunday school. Mrs. C. K. Rogers is superintendent and Mrs. J. B. Van Voy, assistant superintendent.

A. C. Cornelison, who was for a number of years in charge of construction work at West Point, gave an illustrated address on West Point on Sunday night, December 1.

OFFICIAL CIRCULAR.

LABOR FORCE AND QUARTERS IN OCTOBER.

Rules for Computing the Service Required of Conductors and Engineers to be Eligible for Examination and Promotion.

CULEBRA, C. Z., November 27, 1912.

CIRCULAR No. 348-D:

The following rules will govern the method of computing the service required of conductors and engineers to be eligible for examination and promotion to the position of qualified conductor and engineer, to operate on the Panama railroad main line:

a. One month's service as conductor or engineer in qualified main line road service on any standard steam railroad operating under standard rules will count two and one-half points service.

b. One month's service as unqualified conductor or engineer with the I. C. C. or P. R. R. or one month's service as yard conductor or engineer on any standard railroad will count as two points service.

c. One month's service as fireman, brakeman or flagman on any standard railroad within the five years preceding employment on the Isthmus will count as one point service.

d. An applicant for promotion to the position of qualified conductor or engineer on the P. R. R. or I. C. C. must be of legal age, pass a physical examination and have had 50 points of service to his credit, as per either one or more of schedules A, B, or C above, and be familiar with the physical characteristics of the P. R. R. before being eligible for examination.

e. Any applicant who fails to pass a satisfactory examination will not be entitled to another trial within three months from the first examination, and, upon second failure, will be barred from any further examination. (This rule will be strictly observed.)

These rules supersede the rules previously adopted by the Panama Railroad Company and will not act retroactively to alter any decisions made under the old rules relative to seniority or examinations for qualified service. The length of service or unqualified engineers and conductors now on the seniority list will be recomputed under these rules, as of December 1, 1912, and suitable corrections will be made in the list.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Sale of Miscellaneous Property at Public Auction.

The storekeeper or the Medical Storehouse, Colon Hospital Grounds, Colon, will sell at his office, on Monday, December 16, 1912, at 1 p. m., to the highest bidder, for cash, a miscellaneous assortment of Isthmian Canal Commission property, some of which is second-hand, some new. This property consists mostly of furniture, clothing and household utensils and is subject to inspection by interested parties between the hours of 2 p. m. and 4 p. m., on all working days.

The Government reserves the right to accept or reject any or all bids.

For further information and a detailed list of the items to be offered for sale, apply by letter to the Medical Storekeeper, Cristobal, C. Z.

By direction of the Chief Sanitary Officer,
JOHN J. MORAN, Medical Storekeeper.

Sale of Public Buildings at Nombre de Dios.

OFFICE OF THE CHIEF QUARTERMASTER,
CULEBRA, C. Z., November 14, 1912.

Sealed proposals will be received at this office until 3 p. m., Saturday, December 14, 1912, and then opened, for the purchase of any or all buildings, including plumbing, owned by the Commission at Nombre de Dios. List of buildings and full information will be furnished upon application to any district quartermaster, or at this office. Proposals must be accompanied by five percentum (5%) of amount bid. The Government reserves the right to accept or reject any or all bids. Envelopes containing proposals should be endorsed "Proposal for purchase of buildings," and addressed to Col. C. A. DEVOL, Chief Quartermaster, Culebra, C. Z.

Sale of Surveying Instruments, Compasses, and Ship's Log.

OFFICE OF DEPOT QUARTERMASTER,
MOUNT HOPE, C. Z., November 19, 1912.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, C. Z., until 2 p. m., December 7, 1912, when they will be opened in the presence of attending bidders, for any or all surveying instruments, compasses, and ship's log now on hand in the storehouse for obsolete material. These instruments may be seen on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m., on application at this office. The right is reserved to reject any or all bids, or any combination of bids. Bids must be sealed and plainly marked: "Proposal to purchase surveying instruments," addressed to the Depot Quartermaster, Mount Hope, Canal Zone.
C. NIXON,
Depot Quartermaster.

On October 30, there were 39,382 employes actually at work on the Canal and the Panama railroad, and of that number 30,100 were Canal employes; 6,431 Panama railroad employes, and 2,851 employes principally of the emergency dam and gate contractors. The force, including the latter number, on October 30 was the largest recorded in the history of the work. The next largest was in March, 1910, when the report showed 38,676 men on the work. The gold force on the pay rolls of the Canal Commission, composed almost exclusively of white Americans, was 4,350. The force report of October 30, follows:

Included in the above also, are 34 families, and 371 bachelors, belonging to the gold force of contractors.

Bids for Structural Steel.

OFFICE OF THE GENERAL PURCHASING OFFICER.

WASHINGTON, D. C., November 22, 1912.

For the information of bidders, the Isthmian Canal Commission wishes to advise that it will be in the market in the near future for approximately one thousand

tons of structural steel work for the shed on the Cristobal Docks. It is trusted that this advance notice will enable bidders to submit prompt bids for early delivery when the invitation for proposals is issued.

F. C. BOGGS,
Major, Corps of Engineers, U. S. A.,
General Purchasing Officer.

COMMISSARY DEPARTMENT.

The Commissary stores are open during the following hours:

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, DECEMBER 11, 1912.

No. 16.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Largest Working Force.

Forty thousand one hundred and fifty nine persons were at work on the Canal and railroad at the close of November, the largest force in the Canal history. Of the total all excepting a few hundred women and children were men, and 5,816 were white Americans. This condition is due mainly to the employment of 3,499 men by the contractors on lock gates and similar work, and the development of the lock machinery erection under the Assistant Chief Engineer.

A comparison with the greatest force of past years follows:

Year.	Month.	Force.
1907	October	31,967
1908	April	33,170
1909	October	35,405
1910	March	38,676
1911	December	37,826
1912	November	40,159

Canal Work in November.

The grand total of Canal excavation to December 1 was 185,464,496 cubic yards, leaving to be excavated 27,039,642 cubic yards, or a little more than one-seventh of the entire amount necessary for the completed Canal. The total excavation for the month of November was 2,511,026 cubic yards, as compared with 2,599,922 cubic yards in November 1911; with 3,006,037 cubic yards in November 1910, and 2,458,152 cubic yards in November 1909.

The dry excavation amounted to 1,282,029 cubic yards, and was entirely by steamshovels. The dredges and monitors removed 1,228,997 cubic yards. The progress in the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 680,450 cubic yards. Of this total, 2,203 cubic yards consisted of dry excavation at Gatun Locks, and the remainder was wet excavation—670,247 cubic yards from the Atlantic entrance, and 8,000 cubic yards dredged at Gatun Locks.

The total excavation in the Central Division was 976,071 cubic yards, which includes 3,000 cubic yards in the Culebra Cut section charged to "plant" excavation. The

output for November in the Central Division showed a decrease from October of 143,776 cubic yards.

In the Pacific Division, the total excavation was 854,505 cubic yards, 237,578 cubic yards of which consisted of dry excavation in the prism between Pedro Miguel and Miraflores locks, and south of Miraflores Locks; 36,041 cubic yards on account of the Balboa terminals, and the remainder from the locks and spillway sites. Of the 550,750 cubic yards of wet excavation, 536,941 cubic yards were from the channel, and 13,809 cubic yards were taken out at the Balboa terminals.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
	Cu. Yds.	Cu. Yds.	Cu. Yds.
<i>Dry excavation—</i>			
Locks, dam and spillway	2,203		2,203
Mindi			
Terminal	2,203		2,203
Total	2,203		2,203
<i>Wet excavation—</i>			
Atlantic entrance	670,247		670,247
Locks, dam and spillway	8,000		8,000
Terminal			
Total	678,247		678,247
Total wet and dry excavation	680,450		680,450

CENTRAL DIVISION.

<i>Dry excavation—</i>			
Culebra Cut	945,319	3,000	948,319
Chagres section			
Ooispo Diversion	27,752		27,752

Pacific entrance	534,273	2,668	536,941
Miraflores Locks and Dam			
Balboa terminals	13,809		13,809
Total	548,082	2,668	550,750
Total wet and dry excavation	851,837	2,668	854,505

TOTAL CANAL EXCAVATION.

Dry excavation	1,279,029	3,000	1,282,029
Wet excavation	1,226,329	2,668	1,228,997
Total	2,505,358	5,668	2,511,026

MATERIAL	Atlantic	Pacific	Total
	Cu. Yds.	Cu. Yds.	Cu. Yds.
Concrete laid in locks	6,377	47,846	54,223
Concrete laid in dams and spillways	855		855
Fill placed in dams	184,485	64,145	248,630

Mean rainfall along Canal (ten stations) 10.70 inches.
By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as a prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied

by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Trans-Isthmian Electric Transmission Line.

Survey began last week for the location of towers to carry the electrical transmission line which will follow the relocated line of the Panama railroad from Cristobal to Balboa, connecting terminal sub-stations at those points. The line will be fed normally from the Gatun hydroelectric station, and will be tied into the permanent steam generating station at Miraflores. Energy will be transmitted along this line at a potential of 44,000 volts, in delta connection, and reduced at centers of distribution to the requisite potentials for the operation of machinery and for lighting.

Each tower is to be a track-span bridge, consisting of two side frames connected by a cross-bridge, all of skeleton steel construction. The bridge is to support duplicate three-phase lines, one on either side of the track, a ground wire strung from the top of each side-frame, messengers and cables for duplicate telephone trunks and for track signal circuits, and the necessary messengers and wires for a catenary trolley construction should the Panama railroad be electrified. The track-span bridges will be located from 200 to 300 feet apart, according to the curvature of the tracks. Under the specifications being prepared, preliminary to advertising for bids on furnishing materials for the line, 725 single-track and 100 double-track bridges will be required, with 2,000,000 feet of copper wire, No. 00, B. & S. gage, 6,500 three-unit suspension insulators, and 1,000 ground-plates. Inasmuch as the Commission has secured poor deliveries upon recent requirements of structural steel fabrications, in connection with unfavorable prices on both steel and copper in the United States market, foreign manufacturers will be invited to compete for furnishing materials for the transmission line.

Spillway Sluice Gates.

The waste weir of any mill dam represents the same method of controlling the water level of the pond as the great spillway of Gatun Dam will employ relative to Gatun Lake. The difference is chiefly that of size. In the ordinary mill pond one gate of a few square feet suffices; in Gatun Spillway there will be 14 gates, each closing a weir 45 feet long. The gates are 19 feet high, and weigh 43 tons.

These gates have been put together at Gatun and it is expected that the first of them will be installed this week, while the others will follow according as the spillway builders are ready for them. The gates will be hauled

STEAMSHOVEL RECORDS.

Work in Central Division in November.

During the month of November the total amount of material excavated in the Central Division was 976,071 cubic yards, of which 174,249 cubic yards were classified as earth, and 801,822 cubic yards as rock.

Of the total, 973,071 cubic yards were primary excavation in Canal prism, and 3,000 cubic yards were classified as plant excavation. The total of 976,071 cubic yards was removed by steamshovels.

The high record for the month was made by shovel No. 209, working 23½ days in the Empire district, which excavated 43,393 cubic yards of rock.

The second best record for the month was made by shovel No. 222, working 23 days in the Culebra district, which excavated 17,236 cubic yards of earth and 25,854 cubic yards of rock, a total of 43,090 cubic yards.

The best record for a shovel of the seventy-ton class was made by shovel No. 101, working 22 days in the Empire district, which excavated 27,752 cubic yards of earth.

Shovel No. 215, working in the Empire district, made a high record for one day by excavating 2,932 cubic yards of rock on November 27.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month and for one day are shown in the following table:

BEST RECORDS FOR THE MONTH.
CULEBRA DISTRICT.

SHOVEL No.	CUBIC YARDS.			No. of days at work.
	Earth.	Rock.	Total.	
222.....	17,236	25,854	43,090	23

Lost—U. S. flag, 13 stars, taken from the Empire fire station. Finder will please return to O. R. Lampson, Empire, and receive reward.

LABOR FORCE AND QUARTERS IN NOVEMBER.

The largest labor force of record for the Canal and railroad is that reported on November 27, a total of 40,159. Of these 36,660 employees were actually at work on the Canal and the Panama railroad and of that number 30,594 were Canal employees. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,475. The total Government force was as follows: Panama railroad force, 4,886; Panama railroad commissary force, 1,180. Total P. R. R., 6,066. I. C. C. force, 30,594; Grand total, 36,660. The remaining 3,499 were employed by contractors on Canal work. The statement for November 27 follows:

DEPARTMENT	SILVER EMPLOYEES.*													Total silver.	Total gold.	Grand total.
	Artisans.					European laborers.		West Indian laborers.								
	Monthly.	44 cents.	32 cents.	25 cents.	20 cents.	16 cents.	20 cents.	16 cents.	20 cents.	16 cents.	13 cents.	10 cents.	7 cents.

*All wages specified are in gold. †Includes two at 5 cents. ‡Includes three at 5 cents.

In addition, there were on the Isthmus on November 27th, 390 gold, and 2,970 silver employees of the McClintic-Marshall Construction Company; 59 gold, and 43 silver employees of the United Steel Products Company, and five gold, and 32 silver employees of the Chicago House Wrecking Company, a total of 454 gold, and 3,045 silver employees, not on the pay rolls of the Isthmian Canal Commission.

Passenger Elevator at Tivoli Hotel.

After the inspection and test of the elevator recently installed in the Tivoli Hotel, the testing engineer recommended that the feeder pressure be increased from 208 to 220 volts, by means of extra taps on the transformers; the conduit blocking the slack cable switch be moved and fastened securely in place; the cable operating the safety speed-limit device be tightened to remove considerable slack; the main cut-out switch be enclosed in an asbestos-lined box; the incandescent lamp in the car be moved up so as to place it in the proper position inside circular diffusing globe.

These changes were made, and the elevator has been put in satisfactory operation. It is of the Otis make, with a car five feet three inches by six feet nine inches in plan, with a capacity of 1,800 pounds, actuated by a 220 volt, 25 cycle, 7.5 horsepower alternating current motor. The car travels between the first and the third floor at the rate of 115 feet per minute.

Lands Available for Lease.

In the article "Leasing Lands at the Terminals," published in THE CANAL RECORD of December 4, the following statement was in error: "all of Manzanillo Island; and the island lying across the French canal from

Cristobal, from opposite Mount Hope to its north end, opposite Dock 13" are available for lease.

The committee did not report these lands as available. Manzanillo Island is owned almost entirely by the Panama Railroad Company, and only parts of it are available for lease; while the island opposite Mount Hope is in the lands reserved for Canal purposes.

Thirty vessels were inspected, eight fumigated, and 3,507 persons, of whom 510 were passengers, were examined by the Quarantine officers at the port of Ancon during the month of November.

PERSONAL.

Mr. Edward Schildhauer, accompanied by Mrs. Schildhauer, sailed for the United States on the Panama on December 8.

Maj. Smedley D. Butler, U. S. M. C., sailed on the Advance for the United States on December 3.

Dr. Wm. H. Bell, Surgeon, U. S. N., Superintendent of Colon Hospital from March 7, 1910, to December 3, 1912, sailed for the United States on December 3, accompanied by Mrs. Bell, to report for duty elsewhere.

GATUN DAM.

Hydraulic Fill Completed—Dry Fill Near Completion.

Gatun Dam is almost completed. A few thousand yards of earth remain to be dumped here and there upon it, and the lake side must be paved with rock; but the great bulk of the work is done. Eleven million cubic yards of earth and rock in the dry, and 10,729,000 of hydraulic fill have been piled up across the valley of the Chagres River at Gatun, and the dam has already begun to serve its purpose of forming a lake. The water is backed up to a depth of 50 feet, and it covers the bottom land of the valley and extends with spider-like arms into all the depressions in the hill-girt basin.

A stranger who stands on one of the hills on which the village of Gatun rests finds it difficult to imagine that the wind-tossed lake at his feet was not formed there by nature, and that the grass-grown ridge which stretches across the valley has not always been a part of the hills whose feet it joins. The impression is rather heightened than otherwise by the sight of trains running about on the broad surface of the dam.

Even one who has seen the dam grow from the first carload of earth dumped across the bed of the Chagres River finds it difficult to realize that only four years ago there was, a hundred feet beneath the present pile of rock and earth, a village with a hundred houses, a church, a dozen cantinas, and a half dozen Chinese shops. The river made a great bend there from one side of the valley to the other, and on its bank, under the east half of the present dam, was the old native village. To this place canoes from all points in the Chagres basin brought their produce, for Gatun was a market place. On market days the canoes began to arrive at daybreak, many of them coming from 30 miles up the river with their cargo of people, pigs, bananas, yams, chickens, and fruits. They would tie up along the bank and hold their little fair, much as in days long past the old Spaniards dealt for weeks at the great Porto Bello fair.

In THE CANAL RECORD of December 6, 1911, there was printed an historical sketch of the old village, and since then nothing has happened there, except the building of the dam. From the beginning of active canal work this has been regarded as a good site for a dam in case a canal with a high level were built. Gatun was first suggested as a site for a dam at the International Congress of surveys for an Inter-oceanic Canal held in Paris in May, 1879, when the Lesseps plan for a sealevel canal was adopted. It was considered later by the French when they turned from the sealevel to the lock plan, and was decided upon by the minority members of the Board of Consulting Engineers for the Panama Canal in January, 1906, as the proper site, because it afforded the most suitable foundation for both dam and locks.

Prior to this decision surveys had been made, and these were continued until the final report was made in 1908 on the foundations and on the materials available nearby for a suitable hydraulic fill. Clearing and the dumping of material were begun in 1907, and the hydraulic fill in March, 1909.

The plan that has been followed is to build two great ridges of earth and rock across the valley from east to west, parallel to one another and about 600 feet apart at the natural

level of the ground. Between these an impermeable core of water-borne sand and clay was deposited by suction dredge. Experiments made prior to the beginning of the hydraulic fill showed that material pumped over the ridges of earth and rock from both sides would be deposited from center to sides according to its weight, the fine, light clay and sand flowing to the center. This is what has happened, and Gatun Dam on the eve of completion is simply a solid mass of earth and rock, fine and closely packed at the center along the axis, and growing coarser as it approaches the sides.

The dry material in the parallel ridges was first deposited from trains run out on long trestles built over the bottomland. Gradually mounds were formed from which earth and rock could be dumped without the use of trestles. From 1907 to the present time, the dumping of material from Culebra Cut, the lock pits, Mindi, and borrow pits has not ceased and it has been subjected to the packing of the heavy trains running upon it and of the almost incessant rains that visit this part of the Isthmus, an average of 134 inches a year the past seven years. In consequence of this dual tamping process the fill has shown little shrinkage, less than 5 per cent in fact. Embankments in the States frequently shrink or settle 20 or 30 per cent, and the back fill of the locks at Gatun has shrunk 15 per cent.

March, 1909, to September, 1912 are the dates between which the hydraulic fill was made. During this time from one to four 20-inch suction dredges poured their streams of water heavy with clay and sand over the ridges, and the water draining off left the solidly packed core. This core was built up from the ground to a height of 95 feet by the water process, and then brought up to 105 feet by dumping of dense clay found in the borrow pits nearby.

Last week there were still a few parts of the water-borne fill exposed. It is a blue clay so waterproof that it is slow to dry out. This has flowed into every interstice in the ridges of rock and earth, until the whole mass at the center of the dam has become like a rubble wall, every rock of which is cemented to another. The argillaceous sandstone, or blue rock, found everywhere on the Isthmus, hard until exposed to air, is formed of such clay; and it is probable that in time the core of the dam itself will solidify into such rock.

The men who built the dam include Americans, Spaniards, Italians, Greeks, East Indian coolies, and West Indian negroes. They numbered 200 in 1907, 2,000 when the force was at its highest in 1911, and now that the work is practically done they have dwindled to about 300, of whom 150 are employed on the spillway. When the work was at its highest point, four suction dredges were at work and 100 trainloads of rock and earth were dumped in a day.

The dam, the essential feature of the high level canal, has been subjected to more adverse criticism than any other part of the work. It was believed at one time by some experts that the valley of Gatun was unsuited to hold so great a structure as this, one and a half miles long, 2,200 feet broad, and 105 feet high. All the investigations showed the fear unfounded; and now the dam itself proves this, for it is performing its work of holding back the water of the Chagres, and gives no evidence of weakness either in foundation or in any of its parts.

PANAMA RAILROAD COMPANY.

Resumé of Finances and Operations During Fiscal Year Ending June 30, 1912.

The net income of the Panama railroad and steamship line, after meeting the total cost of operation, together with fixed charges of \$39,954.12, and depreciation of rolling stock, floating and plant equipment, which amounted to \$232,489.20, was \$1,762,049.22 during the fiscal year ending June 30, 1912. This was an increase of \$50,968.83 over the net income during the preceding fiscal year, which was \$1,711,080.39.

The company's accounts were audited to June 30, 1912, by certified public accountants. At the end of the fiscal year the company had \$2,318,475.51 of available funds on deposit with its designated depositaries, and securities, purchased at a cost of \$1,500,000, held in a reserve fund established September 12, 1911, upon which there is now \$52,701.08 of accumulated interest to be further invested.

In accordance with the policy of the United States Government in relation to its property, the company discontinued on March 4, 1910, all marine and fire insurance. One of the accompanying conditions was that the company was to be reimbursed, through the Isthmian Canal Commission, for any losses such as had been previously covered by underwriters. Those losses, amounting to approximately \$300,000, remain unpaid, the interpretation of the law being in litigation.

The indebtedness of the railroad to the United States Government on account of advance for new equipment and construction, and retirement of first mortgage, 4½ per cent bonds, remains at \$3,247,332.11, as it was on June 30, 1911, the company having made no payment on account of principal or interest, in accordance with Congressional action.

The profits of the year were earned by the railroad, the steamship line having failed, as usual, and as anticipated under the conditions of its operations, to pay expenses. It yielded a deficit of \$305,742.85. Of this, \$70,057.29 was lost on the operations of the chartered steamer *Lewis Luckenbach* and \$21,739.20 on the chartered *San Mateo*. The amortization through twelve months of \$233,553.24, the total cost of repairs made to steamers in lieu of charter hire, amounted to \$207,488.88; the remainder, \$26,064.36, together with \$19,219.46, the net cost of the accident to the steamship *Allianca* on August 30, 1911, off Norfolk, which involved a general average not yet adjusted, will be carried in account to next year. The rental of additional wharfing space at Pier 52, North River, New York, caused an extra expenditure of \$13,071.88; and a loss of \$65,519.73 was attributed to increased cost of stevedoring and extra labor in handling cargo on New York piers. A decrease of 1,560 in the number of passengers carried by the steamship line caused a loss of \$16,158.99 in the revenue from that source. These losses were offset by an increase of 45,164 tons in cargo moved by the company's steamers, with a resulting additional revenue of \$96,389.90. On 134,967 net tons of cement carried to the Isthmus for the Isthmian Canal Commission, the charge was \$1.25 per ton, while the price paid to vessels of foreign registry employed to transport 161,494 gross tons was from \$1.84 to \$2.40 per ton of 2,240 pounds. Considerable loss is ascribed also

to failures on the part of Pacific co-carriers to make scheduled connections, causing the company's steamers occasionally to return light to New York.

The embarrassments of the steamship line previously mentioned were augmented by a strike among firemen, oilers, watertenders, sailors and petty officers near the close of the fiscal year. This threatened to tie up the line completely, and, as it was deemed inadvisable for a Government-owned line to employ strikebreakers, the ships, by the consent of the Government, were all manned for one round voyage by enlisted men from United States war vessels lying in New York harbor. Sailing dates were thereby protected and serious loss averted.

The development of direct coastwise traffic required accommodations in excess of the facilities at Balboa, resulting in serious complaints by Pacific co-carriers. The construction of a new concrete wharf at Balboa has since afforded only temporary relief, because of the collapse of the Isthmian Canal Commissions 1,000-foot lumber wharf.

RAILROAD.

On the railroad line the total revenue on freight traffic increased 19.25 per cent during the fiscal year. The gross revenue from passenger transportation increased 7.39 per cent, while the number of passengers carried increased 14.32 per cent. The discrepancy was due to a reduction of more than a hundred per cent in the company's through passenger rates, and to a reduction of the lump sum paid by the Isthmian Canal Commission for transportation of its employees on the Isthmus. Since October, 1910 this has been \$9,000 per month as contrasted with the former sum of \$11,009 per month.

Freight amounting to 1,871,076 tons was transported over the railroad, in the following percentage proportions:

	Per cent.
Through commercial freight.....	36.80
Local and I. C. C. freight.....	49.93
Local commercial freight.....	10.37
Panama Railroad Company's freight.....	2.90

The total revenue of the railroad from freight was \$2,820,951.14, received in these percentages:

	Per cent.
Through commercial freight.....	66.88
Local commercial freight.....	15.80
Local I. C. C. freight.....	17.32

The railroad's total revenue of \$4,677,366.76 was derived from the following sources, in percentage:

	Per cent.
Through commercial freight.....	40.34
Local commercial freight.....	9.33
Local I. C. C. freight.....	10.44
Local passengers.....	12.58
Miscellaneous.....	27.11

RATES.

The company participated during the year in a general advance in rates on foreign cargo in both directions across the Isthmus, though it originated no advances. All increases were made by initial carriers at points of origin, and concurred in by the Panama Railroad Company as intermediate carrier, and by the connecting steamship lines as final carriers. There was no material change of rates on United States coastwise traffic. The division of those rates among co-carriers has been maintained as established on June 1, 1911. Space on outward-bound steamers of the company, available for coastwise cargo, was distributed on the basis of 57 per cent to the California-Atlantic Steamship Company and 43 per cent to the Pacific Mail Steamship Company.

Relations with the company's foreign co-carriers continued in the main satisfactory. By arrangement with the Postmaster of Great Britain compensation for the Isthmian transit of closed mails from Spain and Italy to South and Central America, previously made on the basis of actual weights, is now made on Postal Union statistics.

SUPPLIES.

During the fiscal year supplies for the commissary department on the Isthmus were purchased and forwarded by the New York and New Orleans offices at an aggregate cost of \$4,089,993.64. During the same period the company's requirements of coal on the Isthmus were met by forwarding 504,994 gross tons from various ports in the United States.

The coal contract having expired on April 1, 1912, the company entered into contract with the Pocahontas Fuel Company, in competition with other bidders, to meet requirements of coal for the Isthmus, up to 50,000 tons a year, for two years and six months, ending October 1, 1914, at a price of \$2.70 a ton for the first year and thereafter at \$2.65 a ton, should the ruling rate for coal at Norfolk, Newport News, and Sewalls Point fall below \$2.70. This is a departure from the practice of many years of inviting competitive bids annually. At the same time contract was made with the Ebensburg Coal Mining Company, J. H. Weaver & Company, selling agents, for bunker coal for the twelve months ending April 1, 1913, at \$1.89 per ton, an advance of 11 cents per ton over the cost during the previous year.

PLANT CHANGES.

Out of the net revenue \$1,385,568.25 was applied to additions and improvements to plant and equipment; \$1,241,161.94 was expended as follows:

New piers at Cristobal.....	\$735,925.69
New Washington Hotel, Colon.....	162,095.16
New concrete wharf at Balboa.....	343,141.09

The United States Government having accepted the installation of a submarine signal bell at Barnegat Inlet, the company authorized the equipment of all its vessels with submarine signal devices. The sea-going tug *Phoenix*, which was transferred from Colon to New York, was sold for \$25,000. The *Phoenix* was bought in 1907 for \$57,942.53, and after its five years of continuous service repairs necessary would have cost approximately \$30,000. The company accepted two of the six cement conveyors furnished by the Alvey-Ferguson Company for installation on the wharf at Cristobal, and later took title to all of the plant, at a total expenditure, under the contract, of \$28,818.89. The original contract, for \$29,000, was let in August, 1909, but difficulty and delay were experienced in making the conveyors meet the specifications, with a resultant loss to both the contractors and the company. In connection with the construction and taking over of the relocated line of the railroad, the telephone and telegraph system was remodelled and reconstructed along the relocation. The system is susceptible of enlargement to meet plans for a system adequate to the requirements of the railroad and the Canal, when the latter is in operation, and of commercial business. In anticipation of the opening of the Canal the company is receiving applications for wharfage accommodations and leases of land at the terminals.

SOCIAL LIFE OF THE ZONE.

Christmas at the Penitentiary.

In accordance with the practice of former years, the Christmas Committee for the relief of the convicts in the Canal Zone penitentiary will furnish a "treat" for the inmates on Christmas day. The treat consists of sweets, not including candies; fruits, nuts, and chewing tobacco. Contributions of any of these articles or of money will be received by the district quartermaster at any of the Canal Zone stations or they may be forwarded to the Rev. S. Moss Loveridge, penitentiary chaplain, or to Mrs. C. A. Devol, chairman of the committee. The funds remaining from the Christmas donations are apportioned by the committee to the relief of discharged convicts. The men are deported on being discharged and they are frequently entirely without means with the exception of the few dollars allowed to them by the government. The money is used to help them, often to purchase warm clothing, in case they are discharged in winter. Cakes and all other articles intended for the Christmas dinner should be forwarded through the local district quartermasters on December 24.

Missionary to the San Blas Indians.

On Friday afternoon, December 6, the Gatun Mission Study Class had as speakers and guests Miss Annie Coop, American missionary, and Miss M. Blackmore, English missionary. Miss Coop told of her visit to the San Blas country in 1909, and of her desire to locate there as teacher and missionary. She spoke of the interest of some of the chiefs in the enterprise and of the opportunities for educational work among the women and children of the villages. She is now waiting in Colon for a conference with one of the chiefs, and hopes to proceed to the Mulatas Islands within a short time, where she will establish her school. Miss Blackmore has been for fifteen years a missionary in Nicaragua. In her talk she gave interesting details of the life there and of her experiences in a difficult mission field. Miss Blackmore is not connected with any missionary society; she supports herself and her work entirely by the sale of needlework and fancy articles.

Women's Clubs.

The general meeting of the Cristobal Women's Club was held at the Commission clubhouse on Wednesday, December 4, the program being under the home department. The Rev. Edward J. Cooper was the speaker. Meetings of the club scheduled for this month are as follows: Home department, December 11, subject, model kitchens; art and literature department, December 18, subject, review of new books; board meeting, December 18, at 9 a. m.

Canal Zone Rifle Club.

The fourth monthly shoot of the Canal Zone Rifle Club for the Garlington medal at 300 and 600 yards, ten shots without marking, was held at Pedro Miguel on December 8. The winner, Archie Kennedy, established a new high score by making 91 out of 100.

Steamshovel and Dredgemen.

Local No. 19, I. B. of S. S. and D. M. will hold its monthly meeting on Sunday, December 15, at the I. C. C. lodge hall, Empire, at 12.15 p. m.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Schedule of moving picture dates for week, December 16 to 21, is as follows: Monday, Gatun; Tuesday, Cristobal; Wednesday, Gorgona; Thursday, Corozal; Friday, Empire; Saturday, Culebra.

Standing of the bowling league, December 9, was as follows:

Team.	Won.	Lost.	P. C.
Empire.....	20	10	.667
Gatun.....	18	12	.600
Cristobal.....	17	13	.567
Culebra.....	14	13	.519
Corozal.....	11	19	.367
Gorgona.....	7	20	.259

Standing of the basketball league, December 9, was as follows:

Team.	Won.	Lost.	P. C.
Empire.....	7	0	1.000
Corozal.....	4	3	.571
Gatun.....	3	3	.500
Gorgona.....	2	5	.286
Cristobal.....	1	6	.143

The first in a series of entertainments by performers from the States will be given by Miss Gay Zenola Mac Laren, beginning December 16. Her repertoire consists of the following plays: "Within the Law," "The Governor's Lady," "The Sign of the Rose," "The Woman in the Case."

Miss MacLaren's engagements for the first week are as follows: December 16, Empire; 17, Gorgona; 18, Gatun; 19, Culebra; 20, Porto Bello; 24, Cristobal; 25, Corozal. Return engagements at the clubhouses and engagements at other towns will be arranged after Miss MacLaren's arrival and dates will be published in next week's issue of THE CANAL RECORD.

COROZAL.

On Saturday, December 7, Corozal won two out of three games at Corozal, with the following scores:

Gatun.	Corozal.
O'Meara..... 122 123 152	Bordt..... 190 169 175
Oettle..... 145 147 203	Wilkins..... 198 138 148
Barte..... 161 148 153	Souder..... 147 191 169
Hodges..... 116 172 190	Buchanan..... 147 134 145
Swallow..... 157 193 155	Coonly..... 170 166 150

Total..... 701 783 853 852 798 787

Probably the most exciting game of basketball of the season was played at Corozal on Saturday, December 7, and was won by Empire; score, 21 to 19:

Empire.	Points	Fouls	Corozal.	Points.	Fouls
Sawyer.....	4	2	F Roberts.....	3	3
Cushin.....	6	0	F Wright.....	8	0
Hepler.....	0	1	C Kenaley.....	0	0
			Porter.....	2	0
Rowan.....	7	0	G Morris.....	4	1
Adams.....	4	2	G McCathern.....	2	1
Greening.....	0	0			

Saturday, December 14, Cristobal will play at Corozal.

CULEBRA.

One hundred and forty people attended the moving picture show on Wednesday night, December 4. Mr. Weston of Cristobal sang four songs, two of which were illustrated by stereopticon slides.

A new talking machine has been purchased, together with new records. The instrument was used to furnish music during the picture show on Tuesday night, December 10.

A pair of shoes will be given to the one making the highest score in bowling bigpins during the month of December. A similar prize is offered for high score in duckpins.

EMPIRE.

Twelve men joined the first-aid class, which meets every Monday evening at 7. The subject for Monday, December 16, will be "Common Accidents, Prevention of and Practice Work." All men are invited to attend.

A set of new billiard balls has arrived, with new cloths for the tables and a number of new cues. The tables will be recovered as soon as possible.

The handball tournament recently started has 16 men entered.

The second number of "The Forum" was given Sunday, December 8. Mr. C. W. Farnham of St. Paul, Minnesota, gave a series of readings from the poems of James Whitcomb Riley. The musical program consisted of violin solos by Mr. Whitehead of Culebra, and selections by the Tropical Male Quartet. The next in the series will be given Sunday evening, December 22. The speaker will be Mr. Childers of Gatun. There will be music by the Gorgona Y. M. C. A. chorus.

On Saturday, December 14, Empire will play the Gatun basketball team at Empire. This is the last game in the basketball league. So far Empire has not been defeated.

GORGONA.

About 300 people attended the motion picture show on Friday evening. The attendance of these exhibitions has been increasing recently.

A new supply of Gorgona pennants has arrived; also a supply of pamphlets summarizing the recent

mock political campaign on the Isthmus. These can be secured at the desk.

The handball players are much interested in the game and new members are joining every week.

The Gorgona Y. M. C. A. chorus will sing at Corozal on Sunday, December 15.

The interest in physical work is increasing: more members are joining and enjoying the benefits therefrom.

Gorgona Y. M. C. A. will give a special Christmas entertainment this year. The chorus of girls and boys is rehearsing twice a week. Two short plays will also be presented.

Empire took two out of three games on Saturday night in the bowling match. The following are the scores:

Gorgona.	Empire.
Roper..... 194 139 158	Gus..... 158 177 125
Arnold..... 120 138 150	Potter..... 169 169 141
Sims..... 170 152 148	Edwards..... 173 177 171
Keppeler..... 112	Pearson..... 176 148 166
Stewart..... 131 142	Huson..... 162 141 164
King..... 160 156 174	

Total..... 756 716 772 838 812 767

The following are the winners of the ragtime tournament, in order: Sims and Keppeler; Keppeler and King; Calloway and Stewart. Dense took first place for high three games, with 597 points.

GATUN.

Twenty members of the boys' department, under the direction of Physical Director Woolworth, enjoyed an outing to Toro Point on Saturday, December 7. The next outing will be to Porto Bello.

Copies of *The Political Times*, a local publication, containing the results of the political elections held recently in the various Commission clubhouses, are now on sale at the desk.

A class for instruction in first aid to the injured will be started in a few days. The physical director will have charge. The International Y. M. C. A. Red Cross examination will be held at the conclusion of ten lectures and official certificates will be given to those who pass these examinations.

The membership of the Gatun clubhouse was increased sixteen during the month of November. The total membership now is 471.

A third Spanish class for men was organized on Wednesday evening, December 11. It will be composed of beginners only and will meet from 9.30 to 10.30 p. m.

The Cristobal basketball team met defeat at Gatun on Thursday evening, December 5. Score, 39 to 30; referee, Sarter; attendance, 200.

The Gorgona basketball team played at Gatun on Tuesday, December 10.

The boys' athletic contest will close on December 18. The present standing is:

Jervey..... 1,558	Griffith..... 714
Meis..... 1,525	Witt..... 714
Cummings..... 1,509	Bath..... 602
Sisson..... 1,269	Kerr..... 599
Gray..... 1,198	Neville..... 587
Waid..... 1,188	Walsh..... 556
Billett..... 1,132	Sweek..... 505
Quinn..... 1,100	Graham..... 291
Bethea..... 1,077	Sibert..... 264
Loulan..... 1,033	Viberg..... 244
R. Appleton..... 751	DePoorter..... 223
Carkeet..... 731	

The senior athletic contest will close on December 20. The present standing is:

Martinoff..... 995	Jensen..... 122
Loulan..... 822	McMahan..... 116
Straub..... 685	Ogilvie..... 100
Jendres..... 508	Porter..... 86
Flynn..... 337	Dillon..... 85
Miller..... 296	Carpenter..... 84
Baeder..... 280	Dickson..... 66
Mitchell..... 240	Harper..... 64
Daniels..... 215	Tuthill..... 64
Ourand..... 181	Corson..... 55
Allbright..... 161	Curry..... 50
Huber..... 146	Nobel..... 21
Atkinson..... 129	Fomon..... 20

CRISTOBAL.

There was an attendance of 140 at the moving picture show Thursday night. The next show will be on Friday, the 13th, and Mr. E. L. Mosher will sing.

On Thursday night, December 12, the Forum will hold the first program at Cristobal. Mr. W. B. Childers will speak on "Land, Labor and Capital" and the Tropical Male Quartet will sing.

On Wednesday night, December 18, those interested in the organization of a literary and debating society will meet at the Y. M. C. A. at 8 o'clock. All the former members are urged to come with ideas and suggestions. This club will work in conjunction with the "Forum" and will be of interest to all. Men who are not members of the Y. M. C. A. are cordially invited to take part in this society.

On Saturday night, the Cristobal basketball team won from the Gorgona basketball team by the score of 19 to 10.

OFFICIAL CIRCULARS.

Acting Chief Sanitary Officer.

CULEBRA, C. Z., December 3, 1912.

CIRCULAR No. 465.

During the absence of Col. W. C. Gorgas, Chief Sanitary Officer, beginning December 4, 1912, Lieut.-Col. John L. Phillips is designated as Acting Chief Sanitary Officer.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Shop Expense Percentage.

CULEBRA, C. Z., December 6, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

In accordance with the provisions of Circular No. 169-E the following shop expense percentage for each shop is hereby fixed effective December 1, 1912, and will be applied until further orders, to the distributed labor used in all shop work, in accordance with the provisions of Circular No. 264-A, viz:

Division or Shop.	Shop expense percentage
Mechanical Division.....	50
Dry Dock shop.....	50
Balboa shop.....	40
Porto Bello shop.....	60
Toro Point shop.....	50
Panama railroad shop.....	30

Circular letter from this office dated August 5, 1912, is revoked.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Hunting in Canal Zone.

CULEBRA, C. Z., December 9, 1912.

CIRCULAR No. 372-A:

Hunting within that part of the Canal Zone lying west of the Canal line and between the Pacific Ocean and Gatun Lake is hereby prohibited. Employees violating this order will be discharged from the service of the Commission or the Panama Railroad Company. This is necessary to protect the four reservoirs in that territory which supply water for the Canal Zone towns and the city of Panama.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

In Absence of Electrical and Mechanical Engineer.

CULEBRA, C. Z., December 6, 1912.

MEMORANDUM FOR MR. ROUSSEAU:

Subject to your approval, effective December 9, 1912, and until my return, Mr. F. C. Clark, Acting Superintendent of Erection, and Mr. C. B. Larzelere, Assistant Engineer, will report direct to you in matters relating to erection and design respectively. In the absence of Mr. Larzelere, Mr. C. C. Coppin, Assistant Engineer, will be in charge of the drafting force.

EDW. SCHILDBAUER,
Approved: Electrical and Mechanical Engineer.
H. H. ROUSSEAU,
Acting Assistant Chief Engineer.

Married.

Sale of Dental Outfit.

OFFICE OF CHIEF SANITARY OFFICER,

ANCON, C. Z., December 5, 1912.

Bids will be received in the office of the Chief Sanitary Officer up to 3 p. m., Monday, December 23, 1912, when they will be opened:

For the purchase, as a whole, of a dentist's outfit; recently in use by the District Dentist, Gorgona, consisting of chair, "Imperial"; cabinet, instrument, mahogany, Corwin outfit; dental engine, electric anealer, electric lathe, set of pluggers, spittoon, fountain, Weber's; tables, dental, mahogany, glass tops; vulcanizer; and other dental apparatus and instruments.

The outfit can be seen during working hours, 8 to 12 in the forenoon and 2 to 5 in the afternoon, on any week day, by applying to the District Physician at Gorgona.

Terms: Cash. The United States reserves the right to reject any and all bids. Bids should be sealed and marked "Purchase of Dental Outfit at Gorgona."

JOHN L. PHILLIPS, Acting Chief Sanitary Officer.

Sale of Public Buildings at Nombre de Dios.

OFFICE OF THE CHIEF QUARTERMASTER,

CULEBRA, C. Z., November 14, 1912.

Sealed proposals will be received at this office until 3 p. m., Saturday, December 14, 1912, and then opened, for the purchase of any or all buildings, including plumbing, owned by the Commission at Nombre de Dios. List of buildings and full information will be furnished upon application to any district quartermaster, or at this office. Proposals must be accompanied by five percentum (5%) of amount bid. The Government reserves the right to accept or reject any or all bids. Envelopes containing proposals should be endorsed "Proposal for purchase of buildings," and addressed to Col. C. A. Devol, Chief Quartermaster, Culebra, C. Z.

Sale of Miscellaneous Property at Public Auction.

The storekeeper or the Medical Storehouse, Colon Hospital Grounds, Colon, will sell at his office, on Monday, December 16, 1912, at 1 p. m., to the highest bidder, for cash, a miscellaneous assortment of Isthmian Canal Commission property, some of which is second-hand, some new. This property consists mostly of furniture, clothing and household utensils and is subject to inspection by interested parties between the hours of 2 p. m. and 4 p. m., on all working days.

The Government reserves the right to accept or reject any or all bids.

For further information and a detailed list of the items to be offered for sale, apply by letter to the Medical Storekeeper, Cristobal, C. Z.

By direction of the Chief Sanitary Officer,

JOHN J. MORAN, Medical Storekeeper.

Misdirected Letters.

ANCON, C. Z., December 11, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressee:

Barker, Arthur (pkg.) Kunkel, Mrs. Edward F.
Bieneman, W. J. Liggie, A.
Bjorling, C. G. McCulloch, E. D.
Blake, Dr. D. E. McDevitt, Dr. John F.
Booth, W. G. McGee, W. G.
Bryce, Timothy Mead, C. Edwin
Burns, W. P. Mellon, J. J.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sailing every Monday, leave alternately at 10 a. m. and 2 p. m.; the *Prinz Joachim* and the *Prinz August Wilhelm* at 2 p. m., and the *Prinz Sigismund* and the *Prinz Eitel Friedrich* at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, DECEMBER 18, 1912.

No. 17.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Balboa Power Plant.

The Balboa electrical power plant will be closed as a generating station on January 1, and the Balboa territory will be supplied from Miraflores. Twenty-five-cycle equipment will replace the 60-cycle now in use in the Ancon District. The cranes on the pier at Balboa and the overhead crane in Balboa shops will be run by power generated in the Balboa plant with a motor generator set made up of motors now on hand. Except for this, the Balboa plant will be used solely as a distributing center.

All power and light installations for alternating current will henceforth be for three-phase, 25-cycle current.

Floating Islands.

"Floating Islands" is the term used on the Canal to describe masses of vegetation and earth loosened from the bottom of Gatun Lake by the rising water, and blown about on the lake surface by changing winds. Virtually these islands are sections of the floor of the swamp that has been overrun by the water backed up in the Chagres Valley by the dam at Gatun.

An examination of one of them reveals the reason why it floats as a raft would. It is composed largely of sticks and leaves with a matting of clay or other soil, and upon this buoyant material lush grass has grown. The mass is at times so thick that a launch cannot make its way through it, although it would not prove any obstacle or inconvenience to a steamship, and would not be safe for a man to walk upon.

When the wind is blowing up the Chagres Valley, its common direction, the islands are driven against the trees that stand at the south side of the anchorage basin at Gatun, where they seem to be anchored. But now and then the wind dies down or changes direction, and the islands slip their moorings and drift out into the lake. One of the lock and dam builders tells of a sudden transformation that occurred a few weeks ago. At noon when the men were leaving their work for luncheon, the lake was blue, and

free from a speck of any kind, except as an occasional gust of wind tossed up a tiny white-cap here and there. An hour later when they were returning to work, the surface of the lake was dotted with small green islands. Such rapid shifting of the scene was due merely to a veer of the wind, for the islands are always ready to be caught up by wind or wave motion and floated into the lake.

An island about three acres in area is the largest that has so far appeared in the basin at Gatun. The large masses break up easily into smaller ones. But up the valley of the Trinidad there are hundreds of acres afloat. The swamp floor seems to have arisen to the lake surface, and rises and falls in rhythm with its motion.

During the past six weeks the launch *Balboa* has been at work towing islands to the Spillway where they float over the dam. Even after the sluice gates are installed there will be no trouble in floating them over the dam, for the aperture between piers on the dam crest is 45 feet.

Spillway Caisson.

Work of erecting the steel caisson for use in closing the weirs of the Spillway Dam at Gatun has been begun. The ways are being constructed on the south slope of Gatun Dam above the present water level. The caisson will be erected and allowed to remain on the ways until the water in the lake rises and floats it off. It will be 49 feet 6 inches long, 22 feet 6 inches high, and will contain about 53 tons of steel. A duplicate will be erected for use at Miraflores Spillway.

Photographers at the Fortifications.

The following general order of the Chief of Police under date of October 27, 1911, is repeated for the information of persons wishing to take photographs in the vicinity of the fortifications:

Pursuant to the instructions of the Chairman of the Isthmian Canal Commission, it is hereby ordered that photographers be excluded from the vicinity of the fortification work at Tojo Point, Marguerita Island, the islands in Panama Bay.

In execution of this order, no persons not regularly resident thereat will be permitted to come ashore at the places above named having cameras in their possession.

Employees residing at those places will be made aware of the provisions of this order and notified of the necessity of their complying therewith.

No exception will be made to this order unless by written authority of the Chairman in each particular case.

Seeing the Canal.

On January 6 the daily schedule for the "Seeing the Canal" train on the Panama railroad will go into effect. It will provide for a trip over the Pacific Division in the morning, and through Culebra Cut in the afternoon of Monday, Wednesday, and Friday. Upon the return from the Pacific Division trip in the morning a lecture, illustrated by the use of models, will be delivered at the tourist station in Ancon. The trip over the work at

Gatun will be on Tuesday, Thursday, and Saturday.

The models of the locks and dams, and the model of the Canal Zone, used in illustrating a lecture on the Canal, have been moved from Culebra and may be seen at the tourist station in Ancon, which is situated northwest of the Tivoli Hotel, near the railroad tracks. The building was formerly used as a storehouse, and in it a room 38 feet wide and about 45 feet long has been partitioned off, and benches for 175 people have been built up in tiers, amphitheatre style. In front of these benches the models are arranged in such a manner that they can be seen plainly from the farthest seats. Electric lights above the models, with reflectors that throw the light directly upon them, permit of their use at night. The lecturer is William M. Baxter, Jr., the official guide, who also conducts the sightseeing train.

The sightseeing business, which has reached large proportions and is expected to increase still further during the coming dry season, is a necessity of the situation. There is danger in allowing people to wander unguided about the locks, where the structural steel work is in progress and there is chance of falling; or on the dam at Gatun where trains are moving to and fro; or in the Culebra Cut where trains and dynamite blasts are a constant menace.

The sightseeing business has therefore been systematized and its conduct is now a regular part of the work. There is no better way to see the Canal than the trips of the sightseeing train, and none that requires so little time. In any two consecutive week days it is possible to see the entire work. The train moves slowly through Culebra Cut, and about the locks and Gatun Dam, while the guide explains in clear and authoritative manner all phases of the work, and answers all questions. In anticipation of a great increase in the number of tourists, a second observation car is being constructed at Gorgona Shops, and when this is in service, it will be possible to take 150 people over the work at one time. The official guide is training an assistant in order that there may be a guide on each car.

Stevedoring at Balboa Docks.

The contract for stevedoring at Balboa docks has been canceled at the request of the contractors, and on January 1 this work will be undertaken by the Quartermaster's Department.

Improvements on the "Allianca."

The Panama Railroad Steamship Line's *Allianca* has undergone alterations in New York within the past 2 months, by which the amount of deck space for the accommodation of passengers has been doubled. Hatches under awning, and an extension of the floor of the passenger deck toward the stern, afford ample space for deck chairs, while on

WORK AT PACIFIC ENTRANCE.

Many Classes of Work in Progress There.

Fortification and breakwater work, dredging, and the construction of terminal wharves are in progress at the Pacific entrance to the Canal. Ships from all ports of the west coast of the Americas lie in the present docks unloading or taking on cargo. The lie of the land north of the Gulf of Panama is such that ships on entering the roadstead must sail northward, no matter from what direction they come, and therefore every vessel that comes into the Pacific entrance passes in full sight of most of the work.

The mainland has been connected with Naos Island by the breakwater, the gap of 17,000 feet having been closed after many setbacks occasioned by the rock and earth slipping upon the silt bottom, and settling into the mud. Dumping of spoil from Culebra Cut continues, because the breakwater, although stable for its whole length, is not yet completed to its full width. Already, however, the currents that set from the west have been stopped, and the uncompleted mole is serving its purpose of minimizing silting in the Canal channel.

All the new cranes for the old steel pier are in position, and the new concrete wharf, the first of the new terminal quays to be constructed, has been diverted from its original service as a lumber unloading wharf, covered throughout, and is used for general cargo. Beyond it, towards the north, work is being pushed on the remainder of the terminal quay to be built at this time.

Little remains of the old village of Balboa. Steamshovels working on the site of part of it have dug out a location for the railway tracks and highway that will run along the east side of the dry dock between the dock and Sosa Hill. In the marine shops two steel barges used in the Atlantic entrance, and brought around South America to Balboa, are being converted into dump bottom barges for use in towing spoil from the dredges out to sea.

The dredging fleet is stretched along a distance of 2½ miles, from the end of the steel pier to the dike that separates the entrance work from that at Miraflores Locks. The old French ladder dredge *Mole*, in charge of the master who has been dredging in the Pacific entrance for 25 years, is scraping hard rock from the bottom of the Canal, 45 feet below mean tide. This dredge can work only between mean and low tide, because its ladder will not reach a greater depth than 45 feet. All the rock it removes must first be broken by blasting, and nearby the drill barge *Teredo* is at work making holes in the rock bottom for the charges of dynamite.

The rock breaker *Vulcan* does its work by

raising a 20-ton steel ram to a height of ten feet or more and letting it drop upon the rock. This hammering is repeated upon one spot until the ram reaches the desired depth of 45 feet below mean tide. Then the *Vulcan* is moved over another spot where its work is continued. A plan in the master's office on board shows the area covered from hour to hour. The rock is broken at intervals of 3 feet, and an area covered in this way needs no no further attention.

The dipper dredge *Cardenas* is at work in the channel opposite the new concrete wharf, about 5 miles inland from the entrance. It is digging rock and earth at a depth of 45 feet below mean tide. This dredge was purchased when the canal plan called for locks at Balboa, and no deep water excavation in rock was anticipated. It is therefore too light for effective work at such a great depth, and its output is not good, although sufficient to justify its retention in the service.

Four miles up the channel the old French dredge *Badger* is scraping rock and mud off the bottom of the Canal, the material having been previously blasted by dynamite. It works under the same handicaps as the *Mole*, not having been designed to dig at a greater depth than 30 feet below mean tide.

At the end of the channel, with its nose touching the dike that separates the entrance work from that at Miraflores Locks, the new ladder dredge *Corozal* is digging rock and earth that have not been blasted. It is working to a depth of 45 feet below mean tide, and compared with the remodeled French dredges, gives a good illustration of the greater effectiveness of modern excavating machines. It has been at work since last April in various parts of the channel. Its string of 52 buckets of 35 cubic feet capacity each has required no renewal, but all of them show the effects of hard service. It works in unblasted material, and digs out both rock and earth without ceasing although some of the rock ledges struck at the greatest depth make the engines work slowly, while the ship quivers with the effort. The lips of the buckets are of manganese steel, and yet these have been broken and worn by the hard material encountered here and there. Digging is carried on at all stages of the tide, 24 hours a day, six days a week. The output in heavy clay and blue sandstone, interspersed with ledges of hard rock, is about 150,000 cubic yards a month. This is the dredge that will complete the digging in Culebra Cut if the steamshovels now at work there do not finish it before the water is turned into the trench.

The seagoing suction dredge *Culebra* is also at work in the channel, cleaning mud from the rock, at the bottom of the Canal. The pipeline suction dredge recently brought from Gatun Dam and reerected at Balboa is pumping mud from the site of the new terminal docks and depositing it on the flats nearby.

EXECUTIVE ORDER

Lands in Canal Zone to be Taken for Canal Purposes.

By virtue of the authority vested in me by the Act of Congress entitled "An Act to provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone," approved August 24, 1912. I hereby declare that all land and land under water within the limits of the Canal Zone are necessary for the construction, maintenance, operation, protection, and sanitation of the Panama Canal, and the Chairman of the Isthmian Canal Commission is hereby directed to take possession, on behalf of the United States, of all such land and land under water; and he may extinguish, by agreement when practicable, all claims and titles of adverse claimants to the occupancy of said land and land under water.

WM. H. TAFT.

THE WHITE HOUSE,
December 5, 1912.

PERSONAL.

President Taft will leave Washington on December 19 for Key West, Fla., where he will go aboard the *U. S. S. Arkansas* and sail for the Isthmus. He is expected to arrive at Colon on December 24. He will be accompanied by Mrs. Taft, Miss Louise Taft, daughter of Charles P. Taft, Mr. Hilles, private secretary to the President, and Mrs. Hilles, and his naval and military aides. He will remain on the Isthmus till December 26 and is due to arrive in Washington on December 31.

Lieut.-Col. Wm. L. Sibert and family returned from the United States on the *Cristobal* on December 17.

Capt. Charles W. Barber sailed for New York on December 12.

Christmas Holiday in the Zone Schools.

The Canal Zone schools will close on Friday, December 20, for Christmas holidays and will reopen on Thursday, January 2, 1913.

Balboa Sand Service.

A report of sand cars loaded and shipped from Balboa during the month of November, follows:

DREDGE DIPPER TRIPS.

Devices Installed under Direction of Atlantic Division Craneman.

The dipper dredges *Mindi* and *Chagres*, operating in the Atlantic entrance channel and in coral rock excavation for the new piers of the Panama Railroad Company at Cristobal, have been equipped with steam dipper

pers, are used entirely in rock, which when necessary, has been partly broken up by the operations of the drillboat *Terrier*. They are cutting channels of a minimum depth of 42 feet at mean tide, and this requires dipper handles of the great length of 62 feet, while the boom supporting the shipper shaft is 50 feet long. Because of the momentum of the heavy booms and dipper, the bucket is discharged on the swing, into hopper barges moored alongside the site of excavation.

out-of-the-way position on the interior of the boom. The steam exhausted from the operation of the ram is discharged below the surface of the water, in order that it may not obstruct the operator's view.

The cylinder is 5-inch bore and has a stroke of $8\frac{1}{4}$ inches. The piston rod carries the equalizing sheave, (D), and the jamb movement of the ram piston is decreased by allowing the shock to be taken up in two heavy $\frac{1}{2}$ -inch by $\frac{1}{2}$ -inch springs, $3\frac{1}{2}$ inches long, mounted on the supporting guide arms for the equalizing sheave. The cylinder valve is of simple design and operated through the operating lever (A) and the reach rod (B).

The latch chain is led to the purchase lever (G), which is made fast to the dipper handle in the manner shown, and a $\frac{1}{2}$ -inch flexible steel cable (F), is made fast to the opposite

CARTIER'S STEAM TRIP FOR DIPPER LIP.

This requires a quick-acting trip, to avoid spilling over the edge of the barge on the return swing. Operation by hand was slow and uncertain, because of the weight and accumulated slack in so long a trip line, and required the use of both hands by the crane-man. It was necessary that a tripping device be both positive in action and simple in construction, because of the arrangement of boom and dipper stick. The device had to be so arranged that the tripping line would not have to be overhauled, on a drum or otherwise. It will be seen by the accompanying sketch that the Cartier device consists of a steam ram (C), mounted on a foundation in an

end and led back over the small idler to keep the slack of the line from becoming entangled. It is then led over one of the two idler sheaves (E), mounted on a stationary shaft parallel to each other, thence over the sheave (D), back over the other idler sheave (E), and up and dead-ended at the top end of the dipper handle. The $8\frac{1}{4}$ -inch movement of the ram piston takes up $16\frac{1}{2}$ inches out of the line to overcome the necessary operating slack and pulls on the latch, this being sufficient to secure positive action. The line's being attached as shown overcomes the necessity of winding in and out the otherwise free end upon a drum, this line being free to travel with the dipper handle over the idler sheaves (E) and the equalizing sheave (D).

The closing of the door is accomplished by its flat surface striking the water with such force that it not only closes, but takes up the slack in the tripping line (F) and pulls the piston to a starting position in the ram.

The saving in time and the increase in yardage through use of this device cannot be arrived at, as no efficiency tests have been made. It is known, however, that a considerable increase in the yardage has been achieved.

trips which a test of six months shows to be successful. The trips were installed by the dredge crews, under the direction of one of the crane-men, Mr. Henry Cartier, who selected the material mostly out of scrapped French machinery.

The dredges, mounting 5-yard dip-

CHRISTMAS IN THE CANAL ZONE

Church Services and Community Celebrations.

The Christmas celebration in the Cristobal Union Church will be held on Sunday, December 22. The Sunday school exercises are to be in the morning at 10 o'clock, when a program will be given in which the pupils of the school will take part. At 7.45 p. m. the Christmas service will be held, the Rev. Carl H. Elliott preaching. Special music will be rendered by a double quartette.

On Christmas Eve, the community celebration will be held in the Commission clubhouse. The program has been divided into three parts as follows: Part 1, for children in the auditorium from 7 to 8.30 p. m.; part 2, for men, in the auditorium from 9 to 11 o'clock; part 3 will be for women in the game room from 9 to 10.30 o'clock. This celebration has been arranged by a committee of men and women representing the following organizations: The Cristobal Woman's Club, the Young Men's Christian Association, the Union Church and Sunday school, St. Joseph's Church, Colon, and the fraternal societies in Cristobal.

At Christ Church, Colon Beach, there will be a Eucharistic service at midnight, on Christmas Eve, and additional services at 5.30 and 7.30 a. m., on December 25. The Sunday school celebration will be held in the school room on Monday evening, December 30. Gifts for 100 children have been purchased by the Women's Altar Society of the church.

The Baptist mission at Colon will celebrate Christmas with a service in the hall on Monday evening, December 23.

The Gatun Sunday school celebration will be held in the Commission chapel on Christmas Eve. A "surprise" feature is promised in addition to the Christmas program, a tree and a visit of Santa Claus with gifts for the children present.

On December 26, the Baptist mission at New Gatun will hold a children's entertainment. Mrs. Stephen Witt, the wife of the pastor of the mission, has been assisted by American women in Gatun in the preparation of the program.

At Gorgona, the Sunday school celebration will be in the Commission chapel on Christmas Eve. A Christmas tree will be provided and gifts given to each child attending. Members and the Sunday school and others who wish to do so may place gifts for their friends on this tree. The program will consist of Christmas carols and recitations and is in charge of a committee composed of Mrs. March, Mrs. Gamble, Mrs. Hackenberg, and Mrs. Johnson. The Christmas service in the Gorgona church will be held on December 29 at 11 a. m., and the Rev. J. L. Wise will be the preacher.

The Las Cascadas Sunday school will hold its Christmas celebration in the Commission chapel on December 24.

At St. Mary's Church, Empire, there will be a service on Christmas day at 10.45 a. m. The Knights Templar will attend in a body.

The community celebration in Empire will be held at the Commission clubhouse on Christmas Eve. There will be a tree with gifts for each child present. The Sunday school of the Union church will hold no separate celebration.

At St. Ferdinand's Church, Empire, there will be midnight mass on Christmas Eve,

mass at 7 and high mass at 9 a. m. Solemn vespers will be sung at 7.30 p. m. On Christmas Eve there will be a concert and Christmas treat for the colored members of the church and parish house.

The Culebra Sunday school is celebrating its seventh Christmas on December 24. The entertainment will be held in the Sunday school room in the school building. The exercises will consist of a program by pupils of the school, closing with a Christmas play. Mrs. A. B. Dickson is in charge of the program. The school will distribute a souvenir booklet in honor of the occasion. The Christmas services will be held in the chapel on Sunday evening, December 22, at 7.20 o'clock. Chaplain A. A. Nellis will preach.

At the Church of the Holy Redeemer the Midnight Mass will be celebrated, and the second Mass in the morning at 8.30 a. m.

There will be preaching service on Christmas evening in the Commission chapel at Paraiso.

The community celebration at Pedro Miguel will be held in the social hall on Christmas Eve. The children of the Sunday school will take part in a Christmas play.

The Sunday school celebration at Corozal will be held in the Commission clubhouse on Christmas Eve. Forty pupils of the school will take part in a program consisting of songs, recitations, and fancy drills. There will be a tree and gifts.

An elaborate entertainment will be given by the Sunday school of the Methodist Church on the sea-wall, Panama. The program will be by the pupils of the school, the Spanish children as well as the American children participating. The opening number is the Christmas hymn, "O Santissimo," sung by the school in Spanish and the program will close with a dialogue in Spanish by nine children. There will be a Christmas tree and gifts. The pastor of the church is trying to arrange to have the prisoners of the Chiriqui Prison brought to the church on Christmas day when the program will be repeated for their benefit. In case this should not be permitted, the program will be given in the prison yard. The church has prepared gifts of candy for the prisoners.

At St. Paul's Church, Panama there will be a celebration of the Holy Communion on Christmas morning at 5.30 o'clock. The parish of St. Paul's will hold a Christmas bazaar in Ancon baseball park on Monday afternoon, December 23.

There will be a Christmas tree in Ancon hall on Christmas Eve, December 24, for all Catholic children living in Ancon and East Balboa.

There will be services at St. Luke's Hospital chapel, Ancon, on Christmas day at 10 o'clock.

The East Balboa Sunday School will have a Christmas meeting on Christmas day at 2 p. m. in the East Balboa Hotel.

Church Notes.

The offering at St. Paul's Church, Panama, on Sunday, December 22, will be devoted to charitable purposes. A part of the sum received in the day's offering will be donated to the mission of St. Michael, at Pedro Miguel and the remainder will be forwarded for the relief of the sufferers in the West Indian storm district.

The Rev. Charles W. Ports, for several years a missionary in charge of the Spanish

section of the Methodist Episcopal Church, Panama, will leave his present work to take up work in connection with the educational department of the church mission in Chili or Bolivia. The Methodist mission will send a new man to take his place on the Isthmus. Owing to the press of work in Bolivia in connection with the establishing of a girls' school by the Methodist mission, the first visit to the Panama mission of the new bishop, the Rev. Homer Stuntz, will not take place the end of this month as had been expected, but will be deferred until April, 1913.

Episcopal Churches.

The next meeting of the Women's Altar Guild of St. Luke's Church, Ancon, will be held at the home of Chaplain and Mrs. Henry A. Brown, on January 14, and will consist of a business session at 3 o'clock and a reception to Bishop Knight of Cuba from 4 to 5 o'clock. The Guild will make its usual Christmas gifts in Ancon Hospital.

On December 3 there was an election of officers in the Altar Society of Christ Church, Colon. The following were chosen for the year: Mrs. P. T. Murphy, president; Mrs. R. W. Bergin, secretary; and Mrs. W. H. Fenley, treasurer. The society hopes to have the new altar ready on Easter Sunday, and a new organ, the order for which has been placed with an English firm, will also be ready by Easter.

Reading Matter for Hospital.

There is a constant need of old weekly and monthly periodicals in Colon Hospital and the jails. Any resident of Cristobal or Colon having literature to give may have it taken by messenger upon dropping postal to Chaplain Carl H. Elliott, Cristobal, C. Z.

Public Playgrounds.

The Colon Public Playground, now situated behind the Washington Hotel building, will be abandoned for a new site on land belonging to the Panama Railroad Company near the new fill on E street. The removal of the equipment will take place as soon as the municipality can secure a labor force to prepare the ground. This playground, which was the first to be opened on the Isthmus, was presented to the city of Colon in August, 1909, by the educational department of the Cristobal Women's Club. The equipment, which was selected from photographs submitted by the National Playground Association of New York, consists of a shelter 12 by 40 feet, 6 swings, 2 ladders, 2 horizontal bars, 1 spring board, 1 May pole, and 2 sand gardens. In 1910, a similar playground was opened at Gatun for the American children of the village; the Cristobal Woman's Club placed equipment at Colon Beach, and at the point at Cristobal, and a playground was established in the school grounds at Empire.

United Spanish War Veterans.

Chagres Camp No. 1, U. S. W., V. will hold its regular meeting in the I. C. C. lodge hall at Gorgona, on Saturday evening, December 21, at 7.45 p. m. Refreshments will be served, and an election of officers will be held.

Tungsten Lamps for Sale.

The commissary stores have placed on sale 40-watt tungsten lamps, of voltage adapted to the lighting circuits of the Canal Zone villages. These lamps may be bought by those entitled to the commissary privilege, upon application to storekeepers, for 23½ cents each; frosted globes, for 25½ cents each.

CARE OF THE INCAPACITATED.

Report of Committee on the Administration of the Corozal Farm.

Following is the report of a committee, consisting of Lieut.-Col. Chas. F. Mason, chairman, Mr. H. A. A. Smith and Mr. C. A. McIlvaine, appointed by the Chairman to consider the administration of the Corozal Farm, a refuge for laborers who become chronically ill, insane or disabled in the employ of the Isthmian Canal Commission and the Panama railroad:

CULEBRA, C. Z., December 11, 1912.

COL. GEO. W. GOETHALS, *Chairman*
Culebra, C. Z.

SIR:

1. The committee appointed by your letter of November 29 respectfully submits the following report and recommendations relative to the administration of the Corozal Farm:

2. The committee met at the office of the Superintendent of Ancon Hospital, Tuesday morning, December 10, Mr. H. A. A. Smith, Examiner of Accounts representing his department. The matters discussed were as follows:

FUNDS.

3. The farm will in large part consist of institutions now forming a part of the Department of Sanitation, such as the Insane Asylum, the dairy, the piggery, the henry, and the cemetery. To these will be added certain features to make the farm self-supporting, if possible. The matter of caring for disabled employees was brought to the attention of the Appropriation Committee in 1910 (see page 196, Hearings Concerning Estimates for Construction of the Isthmian Canal for Fiscal Year 1912), as a result of which Item 12 of the Appropriation Acts for the Fiscal Years 1912 and 1913 contains a provision for the care of disabled employees under the appropriations for the Department of Sanitation.

4. This being the Congressional authority for the care of these men, and the farm being the means for using the funds most economically and humanely, it follows that the funds of the Department of Sanitation should be used for carrying out the plan. It is the opinion of the Committee that proper steps should be taken to credit to the farm and make available for its use such funds as amounts realized from sale of farm products, paid patients in the insane asylum and services performed on the farm or in its shops, etc., for other parts of the Canal work, and we so recommend.

CONDITIONS OF EMPLOYMENT.

5. The conditions of employment will probably have to be worked out by actual trial but, for initial purposes, the following general rules are recommended:

1. The rates of pay for hourly men will be 3, 5, 7 and 10 cents gold per hour, and for monthly men (foremen, clerks, etc.) \$15, \$20 and \$25 gold per month.

2. Ten hours will constitute a day's labor.

3. The 3, 5, and 7-cent rates will be paid to colored labor and the 5, 7 and 10-cent rates to European labor.

4. Employees will be furnished bachelor quarters, subsistence similar to that now furnished at I. C. C. kitchens and messes, necessary laundry work and plain work clothes.

5. All laborers must work at least two weeks at the lowest rate—3-cent and 5-cent for colored and European laborers respectively—and until they show that they can earn a higher rate, before receiving higher pay.

6. Men having families dependent on them and who wish to live at home will be allowed commutation of subsistence in the form of an increase of pay of 3 cents per hour for hourly men and 30 cents per day for monthly men for such time as service is actually rendered.

7. Employees of the farm may purchase products of the farm for use of themselves and families at wholesale market prices.

8. Married quarters, when available, will be furnished in cases found, after investigation by the Farm Advisory Board, to be most deserving.

9. Leave of absence without pay for any length of time may be granted by the Superintendent of the Farm.

10. Employees will be free to come and go as they please outside of regular working hours.

11. Employees will be subject to the orders of the Superintendent. They must perform the tasks allotted to them and, on failure to do so, will be subject to discipline or reduction of pay. When in the opinion of the Advisory Board such action becomes necessary, employees will be deported to their native countries and will thereafter not be

entitled to further assistance by the Government in any form.

12. Only men permanently disabled while employed by the Commission or the Panama Railroad Company or in service connected with the construction of the Canal will be employed, except such supervisory force as may be necessary.

13. To receive employment, application must be made to the Chairman of the Commission on a form to be provided for that purpose. When the application is approved, the applicant will be given employment.

DUTIES OF THE SUPERINTENDENT.

6. It is recommended that the duties of the Superintendent be tentatively outlined as follows, subject, of course, to modification as the need becomes apparent:

1. He will plan the work and general layout of the farm, subject to the approval of the Chief Sanitary Officer and the Chairman.

2. He will superintend the execution of all farm projects and the sale of products.

3. The government and assignment to duty of all employees, under such rules as may be approved by the Chairman, will be in his hands.

4. The physician in charge of the insane will also look after the health of the farm employees and will cooperate with the Superintendent in the administration of the farm, should any question of jurisdiction arise.

5. The Superintendent will grade and classify the laborers according to their various classes of employment and earning power.

OFFICE FORCE.

7. There will be a considerable amount of accounting and timekeeping and some correspondence, reports, etc., in the administration of the farm, and it is recommended that one gold clerk at \$125 per month be employed to take charge of the office, and that he recruit his force of assistants from the disabled force.

ACCOUNTING.

8. It is recommended that the Examiner of Accounts prepare a system of accounts for the farm work and that Mr. Faure outline a cost-keeping system.

ACTIVITIES.

9. The subject has been reported on in a general way by a previous committee. It is the opinion of the Committee that, as soon as the development of the work warrants, such adjuncts to the work as mess kitchens, animal transportation, corrals, carpenter shops, etc., should be a part of the farm work and in charge of the Superintendent.

10. Until that time, subsistence should be furnished by the Subsistence Department and corral service by the Quartermaster's Department.

11. The subject of flower raising was mentioned and the Committee, believing there is a ready market for cut flowers, recommends that this project be included in the farm plans.

12. The feasibility of operating shops similar to Quartermaster's Department carpenter shops, mattress factory, etc., to perform work for other departments, was also discussed and it appears to the committee that this is entirely practicable.

COROZAL FARM BOARD.

13. Mr. Smith suggested that a permanent board, to act in an advisory and consultative capacity, might often expedite the solution of farm problems and in other ways be of considerable help. The Committee recommends the adoption of the suggestion and that the board consist of three members, one from the Department of Sanitation, one from the Department of Examination of Accounts and one from the Chairman's Office.

Respectfully,

(Signed) CHAS. F. MASON, *Chairman*,
Superintendent of Ancon Hospital.

(Signed) H. A. A. SMITH,
Examiner of Accounts.

(Signed) C. A. McILVAINE,
Chief Clerk, Chairman's Office.

Married.

WARD-HARDEN—On Sunday evening, December 8, in St. Luke's Chapel, Ancon, Miss Mildred Arvilla Harden of South Weymouth, Mass., to Mr. William Henry Ward, Jr., of Washington, D. C., the Rev. H. R. Carson officiating. Canal Zone residence, Empire.

BOGGS-DAVIS—On Thursday, December 11, in the Union Church, Cristobal, Miss Mary Ella Davis of Marquez, Texas, to Mr. Julian Carson Boggs of Palestine, Texas, the Rev. Carl H. Elliott officiating. Canal Zone residence, Las Cascadas.

LOST—In Gatun on December 12, badge pin of Daughters of the American Revolution with the name of the owner on the back. Finder will please return to Box 177, Ancon, and receive reward.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The final standing of the basketball tournament is as follows:

	Won	Lost	P. C.
Empire.....	7	1	.875
Corozal.....	5	3	.625
Gatun.....	5	3	.625
Gorgona.....	2	6	.250
Cristobal.....	1	7	.125

The final standing of the teams in the bowling tournament is as follows:

	Won	Lost	P. C.
Empire.....	20	10	.667
Gatun.....	18	12	.600
Culebra.....	17	13	.567
Cristobal.....	17	13	.567
Corozal.....	11	19	.367
Gorgona.....	7	23	.233

Moving picture dates for the week, December 16 to 21, are as follows: Monday, Gatun; Tuesday, Cristobal; Wednesday, Gorgona; Thursday, Corozal; Friday, Empire; Saturday, Culebra.

Moving pictures will be shown at Porto Bello on Friday, December 20.

COROZAL.

The last basketball game in the league tournament was played on the Corozal floor Saturday, December 14, with the following results:

	Points	Fouls
Cristobal.....	13	2
Corozal.....	31	5

The third number of the Forum was presented last Sunday night. The music was furnished by the Y. M. C. A. mixed chorus from Gorgona; Mr. S. P. Verner delivered an address on "The Man Who Came Back". One hundred and twenty-five people were present.

Miss MacLaren will appear in Corozal on December 25, in "The Governor's Lady."

CULEBRA.

The second entertainment in the Forum series was held on Friday night, December 13. The instrumental trio, Messrs. Ramsey, Arbuckle and Howard, furnished music during the evening. Mr. Whitehead played two violin solos and Miss Lynch sang a solo. An address on "Natural Law in the World of Labor" was given by Mr. W. B. Childers.

On Saturday night, the Gorgona bowling team lost three games to the local bowlers with the following scores:

	Gorgona	Culebra
Davis.....	144 123 165	Case..... 149 154 149
Calloway.....	142 114 136	Hosetter..... 142 142 169
Dunst.....	153 130 134	Harrington..... 137 145 150
Shires.....	119 157 146	Anderson..... 144 154 148
Sims.....	166 158 155	Dougherty..... 159 202 186
	724 682 155	731 797 802

A new counter has been constructed in the pool room and ice cream and soft drinks may be purchased. A cigar stand will be installed at an early date.

EMPIRE.

The last game of basketball in the Isthmian League was played on Saturday, December 15, with the Gatun team, which won by a score of 21 to 16. This is the only game that was lost during the entire season by the Empire team. The members of the Empire team are Greening, captain; Rowan, Sawyer, Cushing, Miller, Adams, and King.

Thirty men have entered the rag-time duckpin tournament that started during the past week. An all-star bowling team will play the Empire tenpin bowling team on Saturday, December 21.

Much interest is now taken in volley ball. Two Culebra teams played an exhibition game at Empire on December 17. Match games will be arranged between the Empire and Culebra teams.

The third number of the Y. M. C. A. Forum will be given Sunday evening. The speaker will be Mr. Childers of Gatun. Music will be furnished by the Gorgona Y. M. C. A. chorus. All are invited to attend.

The Christmas entertainment to be given in the clubhouse on Christmas Eve for the children of Empire will consist of a program given by the children, about 25 of whom will take part in a play that has been prepared for them. There will be a Christmas tree with a gift for each child in Empire.

GORGONA.

Three hundred people attended the motion picture show on Saturday evening. The next show will be given on Wednesday evening.

The chorus furnished special music for the Corozal Y. M. C. A. on Sunday evening, and will sing at Empire on Sunday evening, December 22, 1912. They are preparing for Christmas and a special entertainment.

A wrestling tournament has been planned, and will begin in January. All contestants desiring to get in

shape should come out on Monday, Wednesday and Fridays. All desiring to get in shape for a handball tournament are requested to come out and practice.

A special Christmas entertainment is being planned, for December 25, 1912. The first part of the program is for the children, from 7 to 8.15 o'clock; following this, the second part will be for the big folks. The program consists of songs, orchestra and music, three small plays, and recitations. A smoker is being planned for New Year's.

The standing in the local bowling tournament is as follows:

Name.	Won.	Lost.	P. C.
Roper.....	13	0	1.000
Sims.....	11	4	.733
Powell.....	11	5	.722
Calloway.....	8	4	.667
Keppler.....	2	1	.667

High scores for the week: Powell, 221; Roper, 202; Trieber, 209. *Duckpins*—Davis, 108.

GATUN.

A campaign for "500 Members by January 1st" has been inaugurated and the cooperation of the members is solicited.

Khaki basketball pants have been added to the salable merchandise list.

The First Aid to the Injured Class will hold its initial meeting on Thursday evening, December 19. Any members may join.

Miss Gay Zenola MacLaren gave an imitative recital on Wednesday evening, December 18.

Eighteen men were enrolled at the first session of the "Beginners Spanish Class" which meets on Wednesday and Friday evenings. The total number now studying Spanish at the Gatun clubhouse is forty-two.

The Lock City Pocket Billiard Tournament closed on Friday evening, December 13. C. C. Bailey received first prize; H. E. Dewey, second prize, and W. H. Cheeks, third prize. The prizes consist of gold, silver and bronze medals.

Five new chest-weight machines have been added to the gymnasium equipment.

Martinoff, Loulan and Straub still lead respectively in the senior athletic contest. Jervey, Meise and Cummings have the largest number of points so far in the boys' athletic contest.

The married men defeated the bachelors in a game of volley ball on Friday, December 13.

CRISTOBAL.

On Thursday, December 12, the first session of the Forum was held at the Cristobal clubhouse. There was an attendance of 125. Prof. F. A. Gause delivered a talk on "Literature and Life," and there was music by Messrs. Ramsey, Arbuckle and Howard.

The ragtime tournament was opened on Friday, December 13, with 25 entries. Each bowler is to bowl ten games.

A moving picture exhibition will be held at the clubhouse on December 23; special reels will be shown to the children of the Cristobal Sunday school on the afternoon of this date.

A community Christmas celebration will be held at the clubhouse on Tuesday, December 24. All the residents of Cristobal and Colon Beach are invited. A program for the children with proper presentation of gifts will be held in the hall from 7 to 8.30 p. m. A program for the men will be held in the same place from 9 to 11. Elaborate refreshments will be served and numbers will be contributed by Miss Gay Zenola MacLaren and the Mosher brothers. A program for ladies will be given in the game room at 9 o'clock. Refreshments will be served.

OCCUPANTS OF CANAL QUARTERS.

The occupants of Commission quarters on November 30, 1912, were as follows:

PLACE.	Gold.			Europeans.			West Indians.

(1) Includes Sabanas police station, Taboga Island, Culebra Island, Palo Seco, and Naos Island. (2) Includes Europeans and Asiatics. (3) Includes 66 Panamanians. (4) Includes 52 East Indians. (5) Includes 71 Panamanians. (6) Includes Matachin. (7) Includes Colon Hospital. (8) Includes four Asiatics. Included in the above also, are 42 families, and 416 bachelors, belonging to the gold force of contractors.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the two weeks ending December 14:

Carrillo, December 1, from New York, with 25 cases babbitt metal, 12 cases hardware, for stock; 60 cases gate valves, 30 cases electrical machinery, 18 cases pipe and elbows, 7 cases gate machinery, for Superintendent of Erection.

Prinz Eitel Friedrich, December 3, from New York, with 48 bundles coiled springs, for stock.

Panama, December 2, from New York, with 20 cases drugs and sundries, 52 barrels alcohol, 24 cases Sherry wine, for Sanitary Department; 24 reels copper wire, for Superintendent of Erection; 60 locomotive tires, for Mechanical Division; 603 cases tile slabs for Panama Railroad Company; 440 reels wire, 884 bundles black pipe, 235 pieces switches and fittings, 34 cases wrapping paper, 68 cases caustic soda, 250 bundles brooms, 50 cases sal soda, 40 cases picks, 13 cases asbestos covering, for stock; and a miscellaneous cargo, the whole consisting of 3,075 packages, weighing 300 tons.

Lillie No. 5, December 4, from Mobile, with 6,745 pieces cross ties, for stock.

Santa Maria, December 4, from New York, with 40 bundles steel bars, 120 coils rope for stock; 1,478 bundles steel bars, for Fortifications; 201 cases electrical material, 40 crates varnish, 13 crates compound, 13 crates castings, for Superintendent of Erection.

Abangares, December 5, from New Orleans, with 312 bales straw, 1,470 bales hay, 511 sacks dairy feed, 100 cases soap, 1,628 pieces sewer pipe, 245 pieces piling, 977 pieces lumber, 560 drums oils, for stock; 5,205 pieces lumber, 12 cases lamps, for Mechanical Division; 102 barrels paving brick, for Panama Railroad Company.

Manx Isles, December 6, from Baltimore, with 387 crates rack castings, 303 cases gate machinery, 611 cases lock machinery, 22 cases valve machinery, 442 packages structural steel, for Superintendent of Erection; 1,426 bundles steel bars, for Atlantic Division; 187 bundles steel bars, for Pacific Division; 592 bundles steel bars, for Fortifications; 350 tons coke, 46 tons pig iron, for Mechanical Division; 533 pieces steel plates, 27 pieces angles and beams, for stock; 8 bales pillows, for Panama Railroad Company.

Ancon, December 8, from New York, with 22 cases electrical material, 33 cases varnish, for Superintendent of Erection; 400 pieces brake beams, for Mechanical Division; 17 cases rubber boots, for Pacific Division; 87 packages sashes and doors, for Panama Railroad Company; 120,870 bags cement, for Atlantic and Pacific Divisions; 10 cases paint, 250 pieces wrought pipe, 46 cases toe calks, 28 drums lubricating oil, 10 cases horse shoes, for stock.

Turrialba, December 8, from New York, with 13 reels hoisting cable, 20 cases babbitt metal, 10 cases paint, 16 cases tape fuse, 30 cases wire, for stock; 26 packages electrical material, for Panama Railroad Company; 38 pieces pump parts, for Superintendent of Erection.

La Plata, December 8, from Antwerp, with 16 cases valve machinery parts, for Superintendent of Erection.

Allianca, December 9, from New York, with 86 cases incandescent lamps, 10 cases brake shoes, 100 cases castings, for Mechanical Division; 25 cases drugs and sundries, for Sanitary Department; 12 barrels iron washers, 19 cases tackle blocks, 14 crates enamel ware, 150 pieces steel angles, 15 cases paper tablets, for stock; and a miscellaneous cargo, the whole consisting of 579 packages, weighing 120 tons.

OFFICIAL CIRCULARS.

Reorganization in Department of Construction and Engineering.

CULEBRA, C. Z., December 12, 1912.

CIRCULAR No. 183-S:

Effective at the close of business this date the following changes are made in the organization of the Department of Construction and Engineering:

The Pacific Division is abolished. Mr. S. B. Williamson, Division Engineer, and Mr. J. M. G. Watt, Assistant Division Engineer, having resigned, the positions are abolished.

The work heretofore assigned to the Pacific Division will hereafter be in charge of the Chief Engineer, under the following officers who will report direct to him:

1. Mr. H. H. Rousseau, Assistant to the Chief Engineer, in charge of the Second Division, will supervise the work on the Pacific terminal facilities, including the construction of shops, dry dock, coaling station and docks.

2. Mr. H. O. Cole, Resident Engineer, will be in charge of the construction of Miraflores and Pedro Miguel locks, dams and spillway, dry excavation of the Canal prism south of Pedro Miguel, municipal work in that territory, Ancon quarry and transportation. This division will be known as the Fifth Division, Chief Engineer's Office.

3. Mr. W. G. Comber, Resident Engineer, will be in charge of dredging operations, Balboa Shops, and the sand service. This division will be known as the Sixth Division, Chief Engineer's Office.

The timekeeping work will remain as at present and until it is transferred to the Examiner of Accounts.

The costkeeping work will be transferred to this office to be under the direction of the Chief Cost Accountant who will furnish the Resident Engineers and other officials the data which the costkeeping force of the Pacific Division has been furnishing to the various officials daily, to enable them to keep track of the cost of their work.

These are administrative changes only. The work to be performed will go forward with the same personnel and with about the same organization except for the division of work above ordered.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Carbon Copy of Correspondence.

CULEBRA, C. Z., December 16, 1912.

CIRCULAR No. 467:

When forwarding any typewritten communication, if there is reason to assume that the information contained therein is to be transmitted by the official receiving it to some other department or official, a carbon copy should be forwarded with the original.

GEO. W. GOETHALS, Chairman.

Christmas and New Year's Days.

CULEBRA, C. Z., December 14, 1912.

CIRCULAR No. 466:

Christmas Day, December 25, 1912, and New Year's Day, January 1, 1913, will be observed as holidays in the Canal Zone, and, as far as practicable, all public business will be suspended on those days.

GEO. W. GOETHALS, Chairman.

Classified Expenditure Accounts.

EMPIRE, C. Z., December 2, 1912.

CIRCULAR No. 37:

The following new account in the classified expenditures of the Isthmian Canal Commission has been authorized:

PERMANENT BUILDINGS.

Account 361—To this account will be charged all expenses incurred in the construction of permanent buildings for canal operation. This account will include all expenditures for permanent building construction without regard to existing departments and divisions. Detailed subaccounts shall be maintained to show cost of construction of each building or class of buildings, for use in such future distribution as may be determined.

H. A. A. SMITH,
Examiner of Accounts.

Approved:
GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Chief of Police.

ANCON, December 12, 1912.

CIRCULAR No. 110:

To Heads of Departments and Divisions: Effective today, Mr. A. G. Belknap will act as Chief of Police and Prisons during the absence of Capt. Chas. W. Barber, U. S. A., on leave.

M. H. THATCHER,
Head of Department of Civil Administration.

LOST—In Panama or Ancon on Saturday, November 7, pay envelope containing \$35 in bills. Owner's name on envelope together with the notation "\$35.00." Finder will please return to the Ancon police station and receive suitable reward.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

No material changes have been made in the prices of cold storage commodities sold at the Commissary stores since the last publication of the price list.

Misdirected Letters

ANCON, C. Z., December 18, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts and may be secured upon request of the addressees:

Atkin, John	Luttrell, J. T.
Barkley, J. M.	Major, Mrs. Eva
Barnes, George	Martin, Mrs. J. N. (2)
Betham, Thomas	McCray, H. A.
Bolen, H. E.	Mettke, E.
Bónila, J. M.	Morris, Mrs. Marget
Bonilla, Pablo	Needham, Dr. L. K.
Carrol, Robt.	Norton, Francis J. C.
Compton, Raoy A.	Patterson, Miss B. Mae
Compton, Rolla	Plummer, Harry

Total.....	20 (5)	747 (130)

NOTE—The figures in parenthesis show the number of applicants already occupying regular or non-house-keeping family quarters at stations other than those at which applications are filed.

Sale at Public Auction.

OFFICE OF THE CHIEF QUARTERMASTER.

CULEBRA, C. Z., December 14, 1912.

There will be sold at public auction, by the Storekeeper, Quartermaster's Department, at Gorgona, Canal Zone, at his office, at 3 p. m., Saturday, December 21, 1912, to the highest bidder for cash the following Isthmian Canal Commission property:

- 1 Gasoline engine removed from Motor Car No. 1.
- 1 Gasoline engine removed from Motor Car No. 4.

WEATHER CONDITIONS, CANAL ZONE, NOVEMBER, 1912.

The rainfall for November was generally below normal, but much heavier along the Atlantic coast than in the Pacific and Central sections. The monthly totals ranged from 6.14 inches at Balboa to 25.82 inches at Porto Bello. The maximum fall recorded in one day was 4.70 inches at Miraflores on the 11th.

A series of freshets occurred in the Chagres river during the last week of the month, due to heavy rainfall over the upper Chagres basin. On November 28 the river reached the highest stage recorded since December, 1910.

The mean air temperature was normal at each station, while there was a general deficiency in cloudiness, except along the Atlantic coast, where the conditions were reversed.

The average hourly wind movement was the highest of record for the month of November. Fresh southerly winds prevailed over the Isthmus from the 10th to 15th, during the passage across the Caribbean Sea of a hurricane of destructive force. Following the passage of this storm the barometric pressure rose rapidly and brisk northerly winds prevailed. The heavy swell in Limon Bay did damage to the breakwater trestle and the mole for terminal piers at Cristobal.

The following table summarizes the weather conditions for the month:

STATIONS	Press re-duced to mean of 24 hours	Temperature.						Mean relative humidity.	Precipitation.			Wind.			
		Mean	Maximum	Date	Minimum	Date	Total inches		Station average	Number of rainy days.	Total movement (in miles.)	Prevailing direction.	Max. velocity (in miles.)	Direction	Date

Culebra	29.842	75.0	88	Nov. 22	69	Nov. 17	93	7.59	12.30	24	5,039	N. W.	27	N. W.	Nov. 17
Ancon	29.831	79.0	91	Nov. 26	69	Nov. 17	92	6.35	10.45	22	5,105	N. W.	25	N. W.	Nov. 17

The Government reserves the right to accept or reject any or all bids.

For further information apply to the Storekeeper, Quartermaster's Department, Gorgona, Canal Zone.
R. E. Wood,
Assistant Chief Quartermaster.

Band Concert

A concert will be given by the Isthmian Canal Commission band at the Tivoli Hotel, Ancon, C. Z., on Sunday, December 22, at 8 p. m. The program follows:

1. March—*Distant Greetings*.....Doring
2. Selection—*Bohemian Girl*.....Balfé
3. Intermezzo—*In the Shadows*.....Finch
4. Overture—*Stradella*.....Flotow
5. Popular Song—*On Moonlight Bay*.....Wenrich
6. Descriptive—*Evening Idyls*.....Barnhouse
7. Waltz—*Blue Danube*.....Strauss
8. Medley of popular songs.....Harris
9. March—*Wenn Heißt Wien*.....Schrammel

CHARLES E. JENNINGS, Musical Director.

The next concert will be given at Cristobal, on December 29, at 4 p. m.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, December 14, 1912. All heights are in feet above mean sealevel.

Notice to Mariners.

There have been numerous complaints of alleged violation of the laws of the Canal Zone, and notice is hereby given to all concerned that any or all violations of the law will be prosecuted. Especial attention is called to Rules 48 and 50. Attention is also directed to all the rules, for close and careful compliance.

J. ST. C. HUNT, Port Captain.

Balboa, December 9, 1912.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

MOVEMENT OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sailing every Monday, leave alternately at 10 a. m. and 2 p. m.; the *Prins Joachim* and the *Prins August Wilhelm* at 2 p. m., and the *Prins Sigismund* and the *Prins Eitel Friedrich* at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

The following ships arrived at, or departed from the port of Balboa during the week ending December 14: Arrivals—December 9, *Guatemala*, from Callao; December 10, *Ucayali*, from Callao; December 10, *San Juan*, from San Francisco.

Departures—December 10, *Acapulco*, to San Francisco; December 10, *Palena*, to Valparaiso; December 11, *Hualala*, to Callao; December 12, *Arica*, to Guayaquil; December 14, *Portland*, to San Francisco; December 14, *Ecuador*, to Guayaquil.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications

THE CANAL RECORD.

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of November is published in full in this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and Divisions.

Lock Gate Inspection.

Six million rivets are required in the lock gates, and every one of them is carefully inspected before the contractor is paid for driving them. The inspection and testing of the gates are necessary to ensure a thoroughly good job. To properly protect the Government, 5 per cent of the total price is withheld until the gates prove themselves satisfactory by actual use.

Inspection of materials begins at the steel mills and of workmanship, at the shops of the contractor near Pittsburg. Inspection on the Isthmus is confined to erection methods and workmanship.

The gate leaves are shells of structural steel covered with a sheathing of steel riveted to the girder framework. They are 65 feet long, 7 feet thick and from 47 to 82 feet high. Each leaf is divided horizontally into two separate compartments. The lower compartment is watertight, for the purpose of making the leaf so buoyant that it will practically float in the water and thus largely relieve the stress upon the bearings by which it is hinged to the wall. This watertight compartment is subdivided vertically into three sections, each independently watertight so that if the shell should be broken in any way or begin to leak, only one section would probably be affected. An air shaft 26 inches in diameter runs from the bottom compartment up to the top of the gate, and this also is watertight where it passes through the upper half of the leaf.

After placing the steel plates upon the frame, the rivets are driven with care, and the edges of the plates are caulked, and inspectors follow closely each portion of the work. Within the great steel shell, made intensely warm from direct exposure to the sun, inspectors make their way, examining and

testing each rivet by the light of a candle, and marking those that are defective. Sometimes the head has been driven into the steel frame, again it will not center on the bolt, or it may be loose or broken. All imperfect rivets are rejected and cut out, and replaced by new rivets.

Watertightness is determined by filling the gate leaves with water. Inasmuch as the leaves are built to withstand pressure from without only, this is a severe test. One of the leaves at Gatun that is 77 feet high and weighs about 700 tons has been filled, through the air shaft mentioned above, to the full 77-foot height with five hundred tons of water. This gives a pressure of 32 pounds to the square inch at the bottom. So well has the work been done that only a few rivets show a tendency to "weep," and leaks develop in only very few of the joints. The results obtained have been surprising to the chief inspector, who has had many years experience in ship building, because the hydrostatic test on ship hulls usually reveals many more leaks at the rivet holes than have been found in the lock gates.

The lock gate inspection force on the Isthmus consists of about twenty men working in three sections under foremen experienced in shipyard work.

Foundations for Balboa Shops.

Foundations for the various buildings of the permanent shops at Balboa will be made upon piles driven in the mud flat along the east side of the Canal. The number required for each building will depend upon the size of the structure and the probable load that will be placed upon the foundation. The footings for the planing mill are all in, those for the lumber shed, the paint shop, and the general storehouse are being driven, and work on the others will be taken up as the piledrivers are at liberty. The clusters include from four to sixteen piles.

Guarding the Lock Machinery.

Operating machinery for the various moveable parts in the locks, such as gates, valves, and fender chains, will be installed in a tunnel in the center wall of the locks. In order to guard the machinery against malicious or careless persons, and to protect people who might be injured by handling it, steel doors will be erected in the passageways leading from the top of the center wall into the tunnel. The entrance to the stairway from the top of the wall will be guarded with a concrete parapet of artistic design.

High Tension Electrical Transmission Line.

A committee has been appointed to:

1. Review the plans for the proposed high tension power transmission line across the Isthmus.
2. Consider the various features of the telephone and telegraph cables, the possible disturbance to signal system, the probability of

the future electrification of the Panama Railroad; and to

3. Make recommendations relative to the best and most economical construction to be employed for all the different electrical conductors, all phases of the matter being taken into consideration, including any protection to electrical lines, and to guard against any possible attempts to cut communication in time of war.

The committee consists of Messrs. Edward Schildhauer, Lieut. F. Mears, Capt. W. H. Rose, C. F. Bleakley, W. H. Fenley, and W. R. McCann.

Naval Vessels to Visit the Isthmus.

It is planned to have the Atlantic fleet of the United States Navy visit the Isthmus during January or February in order that the officers and men may see the Canal before its completion. There will be 13 to 14 battle-ships each with a crew of about one thousand. They will come here from their winter practice near Cuba in four divisions, each remaining four or five days. On each of the days 1,000 men will be taken over the work.

A cable message from Washington announces that the Department of the Navy contemplates sending twenty oil burning torpedo destroyers to Colon in groups of five during January and February.

Spillway Sluice Gates Installed.

The first of the sluice gates for the spillway at Gatun Dam was placed in position on December 12, and two others were placed on the following day.

These gates weigh 44 tons each, with seals and bearings attached. They are built up of structural steel and are 47 feet 10½ inches in length and 19 feet high. They fit into steel grooves in concrete piers, and only one eighth of an inch play is allowed in each groove. On account of this small margin, the size of the gates, and the nicety required in their construction, it was thought that there might be difficulty in dropping them into place without removing the end rollers, rocker bearings, and the sealing devices. But no difficulty was experienced, although it developed that the play in one of the grooves was only one sixteenth of an inch.

Fourteen gates are required for Gatun Spillway, and they have already been erected at a point a little north of the Division Office—a distance by rail of about one mile and a half from the spillway. They are carried from the erecting grounds to the spillway on a single flat car, upon which they are loaded upright by two locomotive cranes, and are guyed to the car by lines leading from the top girder to the sides of the car. In the construction of the piers between which the gates operate, a high trestle was built, and upon this the cars containing the gates were pushed out over the weirs which they close. The cranes then lifted them from the cars, and lowered them

NOTES OF PROGRESS.

(Continued.)

slowly while men steered them into the grooves. The first gate was placed in about an hour, and the second and third in a few minutes each. Eleven gates yet to be installed will be placed as soon as the crest of the spillway dam and the piers are ready to receive them.

Eight gates of like construction and size are being assembled for the spillway of Miraflores Lake. As soon as the contractor finishes work on the caisson for the spillway of Gatun Dam, which is in process of erection at Gatun, he will set his force of erectors on the Miraflores spillway gates. This will be in about a month.

Visit of the President.

President Taft with his party arrived at Cristobal on the morning of December 24, on the *U. S. S. Arkansas*, convoyed by the *Delaware*. He was met by members of the Isthmian Canal Commission, the American Minister to Panama, and prominent officials of the Government of Panama, and of the Canal administration. He will leave on the return to Washington on December 26.

BALBOA TERMINALS.

Work on the Foundations of the Quay.

Work on the terminal quay at the Pacific entrance is fairly started. The flat bank of the river shows a few cylinders of concrete sticking above the ground here and there like chimneys of a subterranean oven, and nearby a few small derricks, locomotive cranes, dump cars and other tools of excavation. The foundations of the quay are under construction. On the surface, men are handling black mud from pit to car, and molding concrete cylinders, while far down in the pits other men are digging toward bed rock.

The quay will extend from the dry dock entrance, along the edge of the anchorage basin to its north end, then along the north side to the point where the first pier will jut into the basin towards the channel of the canal. It will be carried throughout on concrete piers founded on bed rock. The distance from the surface to this rock varies at places from 100 feet to 40 feet, and at present the work is in the part where the deepest digging must be done.

In a period long past the lie of the land at the Pacific entrance was not such as it is today. Then a valley indented the surface northeastward from the Rio Grande mouth towards Ancon Hill, where there is now a broad flat of mud. In the course of many years the valley was filled with earth and rock secured from the hill, and it may be that a seismic disturbance helped to make the land here level. The workmen find evidences of this old valley as they dig for the foundation piers. First they excavate only thick black mud, then, from 40 to 60 feet down, they discover gravel, boulders, tree trunks and other vegetation, and then comes the hardpan that overlies the rock bottom of the swale.

The section of the quay upon which work is being done is 400 feet long, and 68 feet wide. This will rest upon 450 piers in four parallel rows spaced 35 feet apart, except under the railroad part where they will be closer together. The holes for these piers are dug through caissons which are 8 feet in outside diameter and 12 inches thick. They are made of reinforced concrete, and are built up in sections 6 feet high. The first or bottom section is unlike the others in that it is but 6 inches thick and is shod with a steel shoe in order that it may sink readily into the ground. The method of sinking the caissons or cylinders is to place them on the surface, dig the earth out from under them, when they sink to their own weight. When the first section has sunk beneath the surface of the ground, another section is added, and this process is kept up until the desired depth is reached. Then there is a hole lined with concrete down to rock, and this is filled with concrete, so that the pier is really a monolith reinforced with steel.

But as the concrete cylinder or caisson sinks deeper into the earth the ground around naturally settles toward and binds it, so that its own weight is not sufficient to force it down. Great blocks of concrete eight tons in weight are loaded upon it, and the caisson drops slowly and evenly until it disappears entirely.

In order to overcome the binding effect upon the cylinders, the engineer in charge of construction has begun to make the sections above the first or bottom one, six inches less in diameter. In this way a hole 8 feet in diame-

ter is dug for the bottom caisson, and the sections imposed upon it have play of three inches all around. Further to facilitate the downward movement of the caissons and prevent binding, a three-fourths inch pipe has been embedded in the top of the first section of each caisson near the outside edge. Water under 140 pounds pressure will be carried to this pipe, and holes in it will allow jets of water to play upwards and fill the three inch space between the caisson and the surrounding earth, which will probably prevent binding.

One of the inconveniences of this work so far below the surface of the ground is the striking of subterranean veins of water. It is necessary to install pumps to keep the holes dry enough for the men to work in them. Two laborers were digging in one of the caissons on Saturday, 70 feet below the surface, when there was a rush of water from some underground spring and the cylinder began to sink more rapidly than usual. The men in the pit shouted and the engine began to hoist them to the surface. They were trembling with fear. There really was no danger, but one of the more experienced men had to go down himself to show that all was safe. Work so deep down in the earth as this is not pleasant for it is in semi-darkness, the bottom is wet and muddy, and the air is foul. On this account the caisson workers receive 16 cents an hour pay.

At present the average penetration is about 45 feet a day with short equipment, but as soon as more cranes can be spared from other parts of the Canal this will be greatly increased. Then, too, the work will go faster when the deep part of the old valley is passed, for it is easier to sink two caissons 40 feet than one 60 feet. After some of the piers are in place the superstructure will be begun, and arches of concrete and steel will span the spaces between the piers, which must be heavily and securely built to bear the weight of the superstructure, of the merchandise which will be piled upon it, and the railway trains that will run over it.

Brotherhood of Locomotive Engineers.

Canal Zone Division No. 756, Brotherhood of Locomotive Engineers will hold a meeting at the I. C. C. Lodge hall at Cristobal on Sunday, December 29 at 1.30. A full attendance is requested as matters of importance will be under consideration.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, engineers, and chauffeurs will be held by the Board of Local Inspectors at the Office of the Deputy Collector of Revenues, Cristobal, on Thursday, January 2, 1913. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. All applicants for examination must be present at the office of the Deputy Collector of Revenues, Cristobal at 8 a. m., with papers in proper form. In addition, applicants for chauffeur's licenses must bring an automobile with them in order to demonstrate their ability to operate the same.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Cristobal, C. Z., on Sunday, December 29, at 4.30 p. m.

The next concert will be given at Gatun, on January 5, at 5 p. m.

CANAL WORK IN NOVEMBER.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., December 14, 1912.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of November, 1912:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards...	2,203	973,071	303,755	1,279,029
Work excavation, wet	Cubic yards...	678,247		548,032	1,226,329
Total work excavation	Cubic yards...	680,450	973,071	851,837	2,505,358
Plant excavation, dry	Cubic yards...		3,000		3,000
Plant excavation, wet	Cubic yards...			2,668	2,668
Total plant excavation	Cubic yards...		3,000	2,668	5,668
Total Canal excavation	Cubic yards...	680,450	976,071	854,505	2,511,026
Material placed in dams	Cubic yards...	184,485		64,145	248,630
Concrete placed in locks and dams	Cubic yards...	7,232		47,846	55,078
Explosives used	Tons (Gross)...	38.47	133.28	90.11	266.86
Rock drilled	Feet	19,201	323,574	115,550	458,325
Tracks removed	Miles		5.17		5.17
New tracks laid	Miles	1.5	5.89	5.75	13.14
Rock crushed	Cubic yards...			54,048	54,048
Cement used	Barrels	10,282	16	48,904	59,202
New roads built	Miles	.19		.10	.29
Water mains laid	Feet	5,469	434	7,997	13,900
Sewers laid	Feet	400			400
Open drains and ditches dug	Feet	17,660	4,2259	22,886	82,805
Average daily force		4,662	6,639	7,896	19,156
Average rainfall	Inches	20.50	8.57	7.28	10.70

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineers and the erection subdivision of this office, the inspection of this work being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF INSTALLATION OF RISING STEM GATE VALVES, ERECTION OF SPILLWAY GATES AND CAISSONS, AND ASSEMBLY OF HYDRO-ELECTRIC DRAFT TUBES AT GATUN.

The work of preparing rising stem gate valve chambers and installation of valves, and erection of spillway gates, progressed satisfactorily during the month.

No work has yet been done on the erection of the caissons.

Work was continued on assembly and riveting of draft tubes for the hydroelectric station at Gatun.

LOCK GATES AND PROTECTIVE DEVICES.

Up to the 20th of November, a total of 60,866 tons of steel plates and shapes had been accepted at the rolling mills. In the above tonnage is included 1,414 tons on replace orders and 1,979 tons for spare parts, making a total of 57,473 tons rolled on the original order for 92 leaves, or practically all the material needed. A total of 48,792 tons of riveted structural steel has been shipped from the Rankin shops, or about 96 per cent of the total contract weight of this class. The total tonnage of lock gate material erected on December 1, 1912, in the different locks, without regard to its being fully reamed or riveted, was 33,292 tons, out of a total of 58,000 tons, or about 57 per cent. Of this,

1,964 tons, or about 3½ per cent of the total, were erected during the month. The number of field rivets driven was 2,230,289, or about 41 per cent of the total, of which 334,819 rivets, or about 6 per cent of the total, were driven during November. The tonnage erected was about 50 per cent greater and the number of rivets driven 4 per cent greater than the corresponding quantities for the preceding month. The status of the work in the several locks may be summarized as follows:

Gatun—Work is in progress on all the leaves, forty in number. Erection, 70 per cent completed; reaming, 67 per cent completed;

riveting, 53 per cent completed; finishing, 10 per cent completed.

Pedro Miguel—Work is in progress on the entire 24 leaves. Erection, 80 per cent completed; reaming, 71 per cent completed; riveting, 65 per cent completed; (no gates finished.)

Miraflores—Work is in progress on 16 of the 28 leaves. Erection, 21 per cent completed; reaming, 4 per cent completed; riveting, 6 per cent completed; (no gates finished.)

LOCK GATE RECESS COVERS.

At Gatun, out of a total of 40 recess covers, 4 remain to be aligned and 7 are still to be grouted. At Pedro Miguel all have been aligned and grouted, while at Miraflores 8 out of the 26 have been erected and 15 of this number have been riveted.

CHAIN FENDERS.

All material for the first chain fender, No. 812-813, including the piping, valves, etc., has been received at Gatun. The material for all hawse pipe castings has been received, except for four special ones in the fenders at the lower end of Miraflores locks. Two pumps and motors have also been received. The material for the first fender was erected previous to November 1; no work on same was done during the month.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection of the operating machinery and electrical equipment. The contractors are generally behind hand in their deliveries, but progress is being made with a view of bringing the rates of delivery up to the promised schedule. During the month another conference was held at the office of one of the principal contractors. The pre-

vious meeting, mentioned in last month's report, resulted in increased output. The rate of installing the machines keeps pace with the receipt of the various parts. On account of the late deliveries of electrical material, the force for the electrical work is not being recruited as fast as provided in the schedule. The following tabulations are given as a summary of the work:

RISING STEM GATE VALVES.

	Gatun—56		Pedro Miguel—24	
	*Assembled.		Placed.	
During mo.	6	6	4	3
To date.	20	26	14	10

*Valves assembled with seals after being placed.

FIXED IRONS AND TRACKS FOR RISING STEM GATE VALVES.

	Gatun—112		Pedro Miguel—48	
	Partially installed.	Installed.	Partially installed.	Installed.
During mo.		9		4
To date.		50		14

GUARD VALVES.

	Gatun—6		Pedro Miguel—6	
	Assembled.		Placed.	
During mo.				
To date.		6		

RISING STEM GATE VALVE MACHINES.

	Gatun—56.

To date.....	20	11	

Miraflores.			
	Placed.	Frozen.	Completed.
During month.....			
To date.....			

ELECTRICAL WORK—ATLANTIC DIVISION.

Conductor rails, insulators, brackets and cover plates were installed on 6,899 feet of straight track and 371 feet of curved track—total 7,270 feet, making a total to date of 14,379 feet. Of this, 7,396 feet have been equipped with steel conductor bar and 6,967 feet with copper conductor. Progress has been made in pulling cable into the conduit system, a total of 95,265 feet having been pulled to date. The cable pulling was handicapped somewhat by the nonreceipt of cable grips. All of the cable that has been pulled in the west side wall of the upper lock from transformer No. 756 to transformer No. 752 has been covered with tile in the manholes. The amount of duct which has been rodded, cleaned and wired totals 131,000 feet. Repairs and changes required on the temporary light and power system were made as required during the month.

ELECTRICAL WORK—PACIFIC DIVISION.

Pedro Miguel—Conductor rails, insulators, brackets and cover plates were installed on 3,038 feet of track equipped with copper conductor. A total of 40,105 duct feet of vitrified tile conduit was rodded, cleaned and wired preparatory to pulling cable; a total of 84,061 duct feet has been prepared to date. There were installed in the north approach wall 3,000 feet of fibre conduit, making a total of 6,542 duct feet to date. The total amount

of 3-conductor No. 0000 cable pulled to date is 2,400 feet. The temporary light and power system was maintained, altered and extended as required by the progress of the work.

Miraflores—The temporary light and power system was maintained, altered and extended to meet the needs of the work, and 76,840 feet of duct were rodded, cleaned and wired preparatory to pulling cable.

EMERGENCY DAMS.

Inspection was in progress at four localities in the United States and 868 tons of material were accepted. At the end of the month 7,148 tons had been fabricated and accepted. About 1,308 tons were delivered on the Isthmus during the month and approximately 237 tons were erected. On November 30 a total of 4,870 tons had been delivered and 1,974 tons erected. Work was in progress on the east and west dams at Gatun.

AIDS TO NAVIGATION.

Ten range towers of the Atlantic and Pacific Division type, including foundations, were completed, except that six steel lantern doors must be hung, stair railings erected, towers painted and permanent lights installed in each. Five range towers of the Gatun Lake section type, with foundations, were completed, except that doors must be hung, steel ladders erected, lantern glass set in place, towers painted and permanent lights installed in each. One range tower is 90 per cent completed. The excavations for two range towers of the Gatun Lake section type are completed and 40 per cent of the material is at the site. One foundation for Atlantic and Pacific Division type of tower is completed and one caisson foundation for the same type has been sunk to bed rock. Three skeleton tower beacons for the Pacific Division, including foundations, were completed, except that ladders must be painted, lens pedestals set up and permanent lights installed. The caisson for the west breakwater light was completed up to a height of 25 feet and was sunk at the inner end of Limon Bay in 20 feet of water, where it will remain until its riprap foundation at the outer end of the west breakwater is completed. Six concrete steel reference targets 20 feet high were completely erected. At the Balboa plant of the lighthouse subdivision 55 reinforced concrete beacons were cast in units and are ready for setting up at their respective sites upon completion of their foundations. There were also cast and completed at this plant 119 48-inch by 48-inch by 26-inch concrete sinkers for gas buoys and 105 24-inch by 24-inch by 18-inch concrete sinkers for spar buoys. Seventy-five concrete foundations for the electric light line from Aguadulce Pumping Station to Range No. ½ and Beacons Nos. 5 and 7, Pacific Division, were placed, 18 "dead men" set and 75 poles erected. During the month work was in progress on the erection of range towers No. 17-18 and 11, Gatun Lake Section; reference targets at Bohio North, Bohio P. I., and Pena Blanca P. I.; electric light line; and in the making of necessary surveys and reconnoissances.

Atlantic Division.

GATUN LOCKS.

Excavation—In preparing foundations 1,353 cubic yards of rock were excavated by hand and cranes, and 8,000 cubic yards of mud were removed by sluicing. There were 30,480 cubic yards of borrow pit excavation made by

shovel for the locks backfill, fill in the dam, and for construction tracks.

Backfill—Backfilling behind the side and center walls of the locks was continued, the quantity placed during the month aggregating 12,411 cubic yards. The total amount placed to December 1 was 1,908,355 cubic yards. On that date the work was 92.05 per cent completed.

Receiving and issuing material—No rock was received during the month; 7,693 cubic yards were issued. The issues of sand amounted to 3,650 cubic yards; 520 cubic yards were added to the storage pile as a by-product of rock screening. There were 12,668 barrels of cement received and 8,716 barrels issued.

Mixing and placing plants—Plant No. 1 and portable mixers were kept in satisfactory operation during the month.

Concrete work—A total of 6,028½ cubic yards of concrete was laid, distributed as follows: upper lock, 893 cubic yards; middle lock, 1,316 cubic yards; lower lock, 3,819½ cubic yards. On November 30 the concrete work was 92.82 per cent completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.

Length of working day (hours).....	9.00
Average number of hours per day worked per strand of cableway laying concrete (actual working time).....	.98
Average number of mixers per day.....	2.00
Average hourly output per mixer (actual working time) cubic yards.....	33.27
Average amount of concrete laid per hour, per strand of cableway (actual working time) cubic yards.....	3.63
Concrete laid (cubic yards) cableways.....	5,500
Concrete laid (cubic yards) derricks.....	25
Concrete laid (cubic yards) portable mixers.....	436
Concrete laid (cubic yards) hand mixers.....	94

Total amount of concrete laid (cubic yards) 6,055

GATUN DAM.

Construction during the month increased the total fill, as determined by cross-section of the material in place deposited during the month, by 184,485 cubic yards, making the total amount in place 20,925,835 cubic yards. On December 1 the dam was 96.4 per cent completed.

Hydraulic fill—There was no increase made in the hydraulic fill, the total in place remaining at 10,124,082 cubic yards.

Dry fill—Allowing an arbitrary reduction of 50,000 cubic yards to cover slow consolidation in slopes not cross-sectioned, the material received from steamshovels amounting to 184,485 cubic yards was placed on the north and south toes of the dam east and west of the spillway, making the total dry fill in place 10,801,753 cubic yards. Cross-section of the month's dry fill shows a loss of 1.61 per cent from car measurement.

Hydroelectric plant—During the month 850 cubic yards of earth and rock were removed by hand and crane in the preparation of foundations, making a total excavation of 96,249 cubic yards. There were 348 cubic yards of concrete placed, making the total to date 556 cubic yards.

GATUN SPILLWAY.

Backfill—No backfilling behind the spillway walls was done during the month, the total on November 30 remaining at 16,495 cubic yards.

Concrete—A total of 855 cubic yards of concrete was laid during the month. Concrete work for the spillway was 92.69 per cent completed.

Excavation—There was no material excavated during the month, the total remaining at 1,591,261 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging from the ocean to Mindi—Six dredges removed 609,480 cubic yards of earth and 60,767 cubic yards of rock from the canal prism. In addition, the dredge *Mindi* removed 36,432 cubic yards of coral rock from between docks Nos. 16 and 17, Panama Railroad Company's Cristobal Terminal Docks. On November 30, 1912, forty feet of water could be carried from zero to zero plus 2,100 feet, thirty-five feet to mile post 4 plus 3,600 feet, thirty feet to mile post 5 plus 2,300 feet, twenty feet to mile post 6 plus 1,900 feet. The *Terrier* drilled 3,177 feet, used 25,930 pounds of dynamite and shot 14,220 cubic yards of earth and 35,850 cubic yards of rock to minus 45 feet, mean sea level.

West breakwater, Colon—No trestle was driven during the month of November, the total length remaining at 11,434 feet. There were 13,389 cubic yards of Porto Bello rock unloaded, of which 7,042 cubic yards were handled by cranes and 5,347 cubic yards by the derrick barges, making the total amount unloaded to December first 118,556 cubic yards.

MUNICIPAL ENGINEERING.

New Colon waterworks—The excavation for the pump pumps was completed, the concrete floor laid, and the walls raised to a height of three feet. Excavation for the foundations of the filter building was commenced and approximately 2,000 cubic yards of material removed. This excavation was 50 per cent completed at the end of the month.

The reservoirs, water mains, sewers, roads and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the Colon street improvements.

Central Division.

During the month the total amount of material excavated by the Central Division was 976,091 cubic yards, of which 174,249 cubic yards were classified as earth and 801,822 cubic yards as rock. The entire amount was removed by steamshovels. Of this total, 973,071 cubic yards were primary excavation in the canal prism and 3,000 cubic yards from New Paraiso incline, east Station 1895 to 1900.

The daily average number of steamshovels at work was 36.45 and the total number of shovel days was 856½, as compared with 35.52 shovels at work and 959 shovel days in October. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period	Excavated by shovels.	Classification of material.		Av. No. of shovels at work	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1911:	<i>Cu. Yds.</i>	<i>Cu. Yds.</i>	<i>Cu. Yds.</i>			<i>C. Y.</i>
Nov...	1,212,548	1,089,021	123,527	41.54	24	1,216
1912:						
Nov...	976,071	801,822	174,249	36.45	23½	1,140

Rainfall at Empire: 1911, 11.73 ins.; 1912, 8.64 ins.

The above table shows the average output per shovel to be 6.25 per cent less in November, 1912 than in the corresponding month of 1911.

The total amount of material excavated from the Culebra section in November, 1912—976,071 cubic yards—was the lowest record in that section for the month of November since 1907; in November of that year only 834,676 cubic yards were removed.

The total estimated amount of material

(dry excavation) to be removed in the Central Division, according to revised estimate of July 1, 1912, was 106,116,221 cubic yards, and up to December 1, 1912, 99,860,153 cubic yards had been removed, leaving 6,256,068 cubic yards to be removed in order to complete all dry excavation in the Central Division. From these figures it will be seen that 94.10 per cent of all excavation in this division was completed on November 30, 1912, and that 5.9 per cent remained to be removed. At the close of November's operations the status of the excavation in the two sections which compose this division was as follows:

CULEBRA SECTION.		<i>Cu. Yds.</i>
Completed.....	87,475,498	
To be completed.....	6,256,068	
		93,731,566
CHAGRES SECTION.		<i>Cu. Yds.</i>
Completed.....	12,384,655	

From the above figures it will be seen that the Culebra Cut is 93.33 per cent completed. The Chagres section is entirely completed, so far as dry excavation is concerned, but it is estimated that about 300,000 cubic yards of wet excavation will have to be made in this section.

Work performed for the Pacific Division during the month included the removal of 20,814 cubic yards of rock by steamshovels, the drilling of 4,180 linear feet of holes, the use of 7,500 pounds of dynamite in blasting; all done in connection with preparation for foundations of the Miraflores spillway. In addition, miscellaneous service, such as transportation of spoil, dumping, etc., was performed.

During the month 18,835 cubic yards of material were dumped on the embankment for the new roadbed of the relocation of the Panama railroad, increasing the total amount furnished for this purpose to 4,466,809 cubic yards.

For use in construction of the Gatun Dam, 31,312 cubic yards of rock were furnished to the Atlantic Division, making the total amount of material furnished for this purpose 5,417,915 cubic yards.

There were also furnished during the month to the Panama Railroad Company, for the Cristobal mole, 21,147 cubic yards, the total amount furnished to December 1 for this purpose being 119,047 cubic yards.

During the month there were 169 linear feet of double track trestle driven for the Naos Island Breakwater, completing the trestle from the mainland to the island. There were 135,204 cubic yards of material dumped from the trestle during the month, making the total quantity dumped on November 30th 1,005,439 cubic yards.

The daily average number of laborers at work in this division during the month was 6,093, while the average number of gold men working was 546.

Pacific Division.

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation during the month amounted to 267,714 cubic yards, of which 199,776 cubic yards were classified as rock and 67,938 cubic yards as earth.

Filling and embankment—During the month 18,030 cubic yards of dry filling were added to the prism of the Pedro Miguel west dam, increasing the total amount of material in place at the end of the month to 658,984 cubic yards. The backfill at Pedro Miguel was increased by 19,853 cubic yards, the total quantity in place

at the close of the month being 760,531 cubic yards.

At Miraflores, the dry filling in the toes of the west dam was increased by 46,115 cubic yards, making the total quantities of dry and hydraulic filling in place at the end of the month 1,445,934 cubic yards and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 68,911 cubic yards, the total amount in place at the close of the month being 975,118 cubic yards.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours).....	8.00
Average number of hours per day worked laying concrete and large stone (actual working time).....	7.40
Average number of mixers per day.....	4.47
Average hourly output per mixer, actual working time (cubic yards).....	10.25
Large rock laid (cubic yards).....	7,972.00
Concrete laid (cubic yards).....	7,972.00
Total concrete laid (cubic yards).....	7,972.00

Daily average of one-half cubic yard mixers, 4.47, the output of which was placed by hand and by mixers discharging directly into forms.

Pedro Miguel Locks—Excavation was continued in the canal prism south of the locks and in the foundation of the lower guide wall. Backfilling of the two side walls and north wing walls was continued. The concrete work consisted of the construction of the north wing walls, caisson sill in forebay, and installation of electric cable ducts. No fixed irons were placed in the lock masonry at Pedro Miguel. The total amount of concrete and large stone laid at Pedro Miguel was 7,972 cubic yards, as compared with 6,627 cubic yards for October. The concrete was placed as follows: Two thousand seven hundred and eighty cubic yards in the northeast wing wall, 3,617 cubic yards in the northwest wing wall, 767 cubic yards in the east wall, 63 cubic yards in the center wall, 175 cubic yards in the west wall, and 570 cubic yards in the floors.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours).....	8.00 & 12.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time).....	4.00	6.20
Average number of mixers per day.....	7.40	4.25
Average hourly output per mixer, actual working time (cubic yards).....	47.28	10.32
Average amount of concrete and large stone laid per hour per berm or chamber crane (actual working time) (cubic yards).....	49.12	
Large rock laid (cubic yards).....	31,191.00	8,743.00
Concrete laid (cubic yards).....	31,191.00	8,743.00
Total concrete laid (cu. yds.).....	31,191.00	8,743.00

Permanent plant consisted of four berm cranes and four chamber cranes.

Berm cranes E and F worked 12 hours a day from November 14th to 30th. Chamber cranes Nos. 1 and 3 worked 12 hours a day throughout the month.

Auxiliary plant consisted of two 1-cubic yard mixers, having a daily average of 0.89; five ½-cubic yard mixers, having a daily average of 4.25; and three locomotive cranes and derricks, having a daily average of 1.53.

Miraflores Locks—Dry excavation was continued in the canal prism south of the locks, the material being used for backfilling the locks, filling on the west dam and for swamp reclamation. The excavation of the spillway was continued. Concrete work consisted of construction of the north approach and wing walls, and the extension of the west wall, south guide wall, operating tunnels and sills and floor of the lower west chamber. The amount of iron placed in the masonry amounted to 436,835 pounds. The total amount of concrete and large stone laid at Miraflores was

39,934 cubic yards, which was placed as follows: North center guide wall 2,335 cubic yards; northwest wing wall, 636 cubic yards; east wall, 4,654 cubic yards; center wall, 6,496 cubic yards; west wall, 12,516 cubic yards; southeast wing wall, 160 cubic yards; south center guide wall, 9,672 cubic yards; floors, 3,347 cubic yards; around ducts in area A, 30 cubic yards; around ducts in area B, 3 cubic yards; and around ducts in area C, 25 cubic yards.

DISTRICT NO. 2—DREDGING, BALBOA SHOPS, AND SHIPWAYS.

The following is a statement of the output of the seven dredges which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.			PLANT.		Total.	Remarks
		Earth.	Clay.	Rock.	Earth.	Rock.		
		Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.

*Excavated from Canal prism, south of Miraflores.

Chamé sand excavation—Approximately 35,768 cubic yards of sand were excavated at Punta Chame and delivered to the Balboa sand bins.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

Reservoirs, water mains, sewers and oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours).....	8.00
Average number of hours per day (actual working time).....	7.54
Average number of cubic yards crushed per hour per working day.....	250.22
Average number of cubic yards crushed per working hour.....	298.60
Total output for the month (cubic yards).....	54,048.00

Quartermaster's Department.

Labor—The force report of November 27 showed 40,196 men actually at work; this number includes the force of the McClintic-Marshall Construction Company. The shortage of unskilled labor continued throughout the month.

Buildings—The District Court building was moved from Gorgona to Pedro Miguel where it will be used as gold bachelor quarters. Two laborers' barracks were moved from Gorgona to Corozal Farm.

Quarters—The congestion of gold bachelor quarters at Gatun, Pedro Miguel and Corozal noted in the report for October, continued throughout the month.

Material and supplies—The total value of material received was \$970,523.03. This material came forward in 30 steamers, the total weight of cargo, exclusive of lumber, piling and ties, being 30,793 tons.

Subsistence Department.

The operation of the line hotels resulted in a net profit of \$36.84. The Hotel Tivoli showed a net profit of \$4,081.96. European laborers' messes, colored laborers' kitchens, restaurants, penitentiary tugs and dredges returned a net profit of \$2,738.57. The total

net profit on subsistence operations for the month was \$6,857.37.

Department of Civil Administration.

Courts—During the month three civil cases were disposed of in the Supreme Court; 58 civil and 43 criminal cases in the Circuit Courts; and 42 civil and 642 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$418,851.12, and the fees to \$2,055.78. Receipts from stamp and card sales and newspaper postage aggregated \$7,727.14. The total collection of revenues made was \$19,174.20; and the collections on account of court fines, costs and fees \$3,542.79. A total of \$124,173 was deposited in postal savings accounts

and a total of \$87,390 was withdrawn. At the port of Ancon 30 vessels entered and 29 cleared, and at the ports of Cristobal 25 entered and 23 cleared.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 661, of whom 606 were men and 55 women. Twenty-three nations or forty-seven separate states and dependencies were represented. There were 10 convicts committed to the penitentiary and 16 were discharged, leaving 127 convicts in confinement at the close of the month. The cost of guarding and subsisting these convicts was \$2,501.33 and the value of the work performed by them on the roads of the Canal Zone was \$2,043.40.

DIVISION OF FIRE PROTECTION.

There were five fires reported in the Canal Zone. The damage to Commission property was \$35 and to private property \$15.

DIVISION OF PUBLIC WORKS.

In the city of Panama the average daily consumption of water was 1,608,008 gallons, and in Colon 1,332,335 gallons. The usual inspection and maintenance work in this division was performed.

DIVISION OF SCHOOLS.

The net enrollment in the white schools was 1,202, the average number of pupils belonging was 1,097.4, and the average daily attendance 1,029.9. In the colored schools the net enrollment was 1,130, the average number belonging 925.3, and the average daily attendance 742.6. At the close of the month there were employed in the white schools 45 teachers and in the colored schools 29 teachers, the total being one less than the number employed at the close of the preceding month.

Department of Sanitation.

The total number of deaths from all causes among employes was 48, divided as follows: from disease 32 and from violence 16, giving an annual average per thousand of 7.31 and 3.65 respectively. The annual death rate

per thousand among employes for the month of November, 1911, was 9.75.

The annual death rate per thousand in the Canal Zone and in the cities of Colon and Panama, including both employes and non-employes, was 25.46. This rate is based upon a population in the Canal Zone of 62,810 according to the census of February, 1912, and populations in Panama and Colon of 47,172 and 20,232, respectively, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of November, 1911, was 20.29.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: Whites 2.80, blacks 8.77, giving a general average for disease of 7.31. For the same month during 1910 the annual average death rate per thousand from disease among whites was 5.55, blacks 12.59, giving a general average of 10.69; and for the same month during 1911, whites 6.62, blacks 8.27, giving a general average of 7.85.

Among employes during the month, deaths from the principal diseases were as follows: Abscess of liver ontamoebic 1, lobar pneumonia 6, malaria fever, E. A., 1, organic disease of heart 4, pellagra 1, tuberculosis, 4, leaving 15 deaths from all other diseases and 16 deaths from external violence.

No case of yellow fever, small pox or plague originated on or was brought to the Isthmus during the month.

Respectfully,
GEO. W. GOETHALS,
Chairman.

OFFICIAL CIRCULARS.

Tampering with Electrical Fixtures and Equipment at Locks Forbidden.

CULEBRA, C. Z., December 21, 1912.

CIRCULAR No. 468:

Any person found guilty of removing incandescent lamps or tampering with protective coverings of cables, panels and other equipment about the locks will be liable to prosecution. If such person is an employee of the Isthmian Canal Commission he will be dismissed from the service.

GEO. W. GOETHALS, Chairman.

Surcharge on Invoices covering Material and Supplies furnished the Navy Department.

HEADS OF DEPARTMENTS AND DIVISIONS:

The Secretary of the Navy has called attention to the difficulties caused and adjustments made necessary in the accounts of vessels and stations due to the fact that the Commission does not always show on the invoices covering material and supplies furnished, the surcharge which is to be added to the price charged, and has requested the Secretary of War to issue instructions to the Isthmian Canal Commission to take such steps as will insure that the surcharge mentioned, if any, is added to the original invoices (not summaries) so that each original invoice (not yellow summary) that is presented to a vessel or at a station for signature may show the ultimate charge on account of material listed thereon.

You will comply with the request of the Secretary of the Navy, and insert on all original invoices for materials, supplies, or labor furnished the Navy Department, or any vessel or station thereof, the surcharge that is to be added to the price of the material so that such invoice will show the total charges.

GEO. W. GOETHALS, Chairman.

Sailing Date of "S. S. Cristobal."

All Concerned:

The sailing date of the *S. S. Cristobal* has been set for Saturday, December 28, at 3 p. m., from Pier No. 11, Cristobal.

J. A. SMITH, General Superintendent.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The date fixed for the annual meeting of the Canal Zone Federation of Women's Clubs is January 25. One of the speakers at the afternoon meeting will be Dr. Edward Thomas Devine, educator and economist. Dr. Devine has been associated with the Charity Organization of New York, and was editor of *The Charities and Commons*; he is also connected with the Child Labor Committee, and was prominent in the Red Cross relief work in the San Francisco earthquake in 1906. The subject of his address will be "The Abolition of Poverty." Other speakers will be announced later. Clubwomen of the federated clubs of 1908-1910 are reminded to send their names to the corresponding secretary, Mrs. Thomas Edwin Brown, Jr., Cristobal, in order that transportation may be secured for them.

The meetings of the Cristobal Woman's Club for January will be as follows: January 8, general meeting, under the art and literature department, subject, Spanish artists; January 15, home department, subject, Domestic animals; January 29, the monthly meeting of the executive board in the clubhouse at 9 a. m. The annual complimentary concert will be given by the art and literature department in the clubhouse on January 22 at 8 p. m. The program is announced as a "Costume recital; Legends and songs of many lands."

The following is the schedule of the Gatun Woman's Club: January 2, business meeting and current events, the president as leader; January 22, under the art and literature department, an exhibition of the Federation pictures.

On January 2, the Empire Woman's Club will hold an open meeting for women in the Commission clubhouse when a lecture on "Health and what we know about it" will be delivered by Dr. A. J. Orenstein, chairman of the Canal Zone Committee of the Public Health Education section of the American Medical Association. The lecture will be illustrated with lantern slides.

Meetings of the Ancon Study Club have been suspended for two weeks. The next meeting will be at the home of Mrs. Mark White, Tivoli district, on Thursday, January 2. A study of the American dramas will be included in the next period of work, and a review of American history is also contemplated. The club will hold its annual meeting on January 24.

Church Societies.

The Ladies Auxiliary to the Empire Christian League held its semi-annual meeting with election of officers in the Commission chapel on Friday afternoon, December 20. During the past six months there have been six meetings for study and six social meetings. The affairs of the society have been conducted by committees appointed by the president under the following leaders: Membership, Mrs. Peek and Mrs. Young; Lookout, Mrs. Helmer and Mrs. Conner; Study, Mrs. Kelly and Mrs. Fuller; Music, Mrs. Glaw and Mrs. Wright; Thankoffering, Mrs. Drake. The plans for the study were under the direction of the two vice presidents. Mrs. Kelley took charge of the program, and Mrs. Fuller made the chart outlining the principal features of the Oriental religions. The following studies were taken in order: Confucianism,

Animism, Buddhism, Mormonism, Hinduism and Mohammedanism. The Burma series of pictures, maps, and selected literary articles were used. Several original papers were read and helpful discussions were held at the close of each meeting. On September 6 a supplementary program of plays and dialogues dealing with Oriental life was presented by members of the society. On October 25, a missionary convention was held, members of all the church organizations in the Canal Zone being present. A "Home bake sale" was held at the Commission clubhouse on December 7, the proceeds of which amounted to \$11.75. Gifts for missionary work were presented to Mrs. Stephen Witt of Gatun and to Miss Annie Coop. The officers elected for the ensuing six months were: Mrs. Nellis, president; Mrs. Kelly, first vice-president; Mrs. Stanton, second vice-president; Mrs. Drake, secretary-treasurer. The membership of the auxiliary is 25.

Following the business session the president introduced Miss Annie Coop who spoke on her missionary work among Indian tribes of Central America and of her recent efforts to establish a school in the territory of the San Blas tribe.

Church Notes.

On Sunday, December 22, the Baptist Sunday school at Culebra held its anniversary celebration. The Rev. Aquila Lucas was the preacher in the morning.

The offering of the Baptist mission throughout the Canal Zone for Sunday, December 22, will be forwarded to Jamaica for the relief of the sufferers in the hurricane district.

Watch meeting will be held in all the missions for West Indians on New Year eve. The religious service will begin at about 11 o'clock and close with the ringing of the bells announcing the new year. On such occasions the churches are crowded to their utmost capacity.

The Gatun Sunday school started a campaign in September to increase the membership, and the results have been so far satisfactory that the enrollment has increased one hundred per cent. One of the features of the campaign is the adoption of the cross and crown pin system; for regular attendance for three months a pupil receives a silver pin; at the end of a second consecutive period of three months, the silver pin is exchanged for a gold one, which is the property of the winner. In addition to this, prizes are offered to the pupils bringing one new member and to the pupil bringing in the largest number of new scholars within three months. The first period ends at Christmas time, and the awards will be given before the new year. The officers of the school are Mr. Frank Gardener Smith, superintendent; Mr. L. B. Hasting, assistant superintendent; Mr. M. W. Windes, secretary; Miss Carkeet, assistant secretary; Mr. George McFarland, librarian; Mrs. Logan, pianist. The teachers are Messrs. Hincky and Woolworth, Mrs. Hanna, Mrs. Bath, Mrs. Carkeet, Mrs. Logan, and Mrs. Witt. The community of Gatun held a reception in honor of the Rev. Charles O. Purdy and Mrs. Purdy in the Commission clubhouse on Wednesday evening, December 11. There was a short program of musical numbers and addresses were made by the Rev. Henry A. Brown, Mr. W. B. Childers, and Mr. Harry Ruckert. The reception followed, refreshments being served.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Miss MacLaren's engagements for the balance of her tour are as follows:

Monday, December 30, Paraiso; Tuesday, December 31, Pedro Miguel; Thursday, January 2, Corozal; Friday, January 3, Gatun; Saturday, January 4, Cristobal; Sunday January 5, Gorgona; Monday, January 6, Empire; Tuesday, January 7, Culebra.

Miss MacLaren will sail for New York on the steamer *Alianza*, on January 8.

Fireproof booths for inclosing the moving picture machines, are being installed in the clubhouses on the Isthmus.

Moving picture entertainments for the week of December 30 to January 4, are as follows: Monday, Gorgona; Tuesday, Gatun; Wednesday, Cristobal; Thursday, Empire; Friday, Culebra; Saturday, Corozal.

COROZAL.

The moving pictures Thursday night were shown from the new galvanized iron booth.

The wrestling class started Monday, December 23. The Christmas evening entertainment was given by the Sunday school.

Wednesday, December 25 is to be open house at the Corozal clubhouse.

CULEBRA.

One hundred and twelve people attended the moving picture show on Saturday night December 21. Miss Lynch played the piano.

A pool tournament will be started in the near future. Those desiring to enter may register with either Mr. Dougherty or Mr. Kersey. A duckpin tournament will start on January 2. Entries may be handed to either of the supervisors.

EMPIRE.

The rag time duckpin bowling tournament that started on December 13 has 35 entries. The following men have made scores over 105 during the past week: Rodeighiro—108, 119, 106, 109, 142; Giavolli—107, 116; Pinney—110, 106, 118; Potter—109, 112, 106; Edwards—106; Johnson—114; Smith—109; Brown—118; Thorpe—106; Gorham—125, 108, 106; Huson—113; Peason—117; Dryden—109; Lippert—109. The high team score was made by Rodeighiro and Huson when they made 646 pins in three hgames.

Sixteen men have entered the December handicap pool tournament.

The third number of the Forum was given Sunday evening, December 22, when Mr. Childers of Gatun spoke on "Natural law in the World of Labor." The Gorgona Y. M. C. A. Chorus furnished the music.

A rag time duckpin tournament will be started for the boys.

GORGONA.

The following is the standing of the tournament in the local bowling:

	Won	Lost	P. C.
Roper.....	19	2	904
Powell.....	16	8	667
Sims.....	12	6	667
Gibbart.....	8	4	667
Shires.....	4	2	667
Keppler.....	15	9	625

The following are the high scores for the week:

Big pins -Roper, 232; Keppler, 200. Duckpins—King, 118, 107, 116; Davis, 112; Sims, 104.

A smoker for the men is being planned for December 31.

GATUN.

The first lecture of the course on first aid to the injured was given on Thursday evening, December 19. The second lecture will be given on December 26.

Entries for the three-cushion billiard tournament which will begin on December 26, may be given to either the secretary or Mr. DePoorter.

The A. B. C. class pool tournament will be started on January 2.

Membership in the married men's gymnasium class has increased to 12. The class has a volley ball team which is open for challenges.

G. E. Swallow will receive a medal for third high average for the Isthmian tenpin tournament and another medal for high average of the Gatun team.

Winners of the senior athletic contest are: First prize, gold medal, P. L. Martinoff; second prize, silver medal, John Loulan; third prize, bronze medal, Harman Straub.

Several parts of the interior of the building are being repaired.

CRISTOBAL.

On Saturday night the monthly married folks' Bowling tournament was held with 16 playing: The first game was duck pins, the second candle pins and the third ten pins with small balls.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning December 23, 1912:

*Indicates reductions from last list.
**Indicates 5 cents allowed for return of bottle.
†Indicates advances on last list.
††Fowls weigh each about as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock supply next lightest weight is supplied and refund note sent for difference.
‡Sold only from Commissaries; no orders taken for delivery.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending December 21:

Colon, December 15, from New York, with 15 cases machine parts, for Pacific Division; 19 reels cable for superintendent of erection; 10 cases machinery, 45 cases soap, 25 barrels plaster, for Mechanical Division; 16 cases solder, 50 kegs wire nails, 680 bundles galvanized roofing iron, 117 rolls wire fencing, 198 barrels fire clay, 125 cases ink and mucilage, 56 kegs rivets, 50 kegs washers, 160 drums paint, 25 crates stoves, for stock; and a miscellaneous cargo, the whole consisting of 1,860 packages, weighing 200 tons.

Imperator, December 15, from Mobile, with 7,500 pieces cross ties, for stock.

Twines, December 15, from New York, with 1,471 bales hay, 10 cases hardware, 9 cases rubber hose, 11 cases packing, 29 cases pipe fittings, for stock; 7 reels cable, 39 cases electrical material, for superintendent of erection.

Isle of Jura, December 16, from New York, with 125,821 bags of cement, for Atlantic and Pacific Divisions; 10 cases benzine, for stock.

Cristobal, December 17, from New York, with 450 kegs wire nails, 12 barrels creosote oil, 9 cases crockery for stock; 50 barrels car wheels, for Mechanical Division; 9 cases rubber boots, for Pacific Division; 50 reels copper wire, 97 cases electrical material, for superintendent of erection; 150,005 bags cement, for Atlantic and Pacific Divisions.

Prinz Sigismund, December 17, from New York, with 16 drums lime, 34 crates brooms, 10 kegs bolts, 6 cases hardware, for stock.

Zacapa, December 18, from New York, with 131 barrels insulators, 11 crates refrigerator parts, for Panama Railroad Company; 5 pieces castings, for Mechanical Division; 85 cases machinery for superintendent of erection; 36 bales life preservers, 10 cases hardware, for stock.

Parismina, December 19, from New Orleans, with 9 cases car parts, 153 packages, castings, 324 tons pig iron for Mechanical Division; 163 barrels brick, 49 cases wash bowls, for Panama Railroad Company; 1,832 pieces lumber 232 pieces piling, 851 bales hay, 200 packages switch stands, for stock.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line:

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sailing every Monday, leave alternately at 10 a. m. and 2 p. m.; the *Prinz Joachim* and the *Prinz August Wilhelm* at 2 p. m., and the *Prinz Sigismund* and the *Prinz Eitel Friedrich* at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, JANUARY 1, 1913.

No. 19.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Excavation at Balboa Dry Dock.

A steam shovel has started excavation for the entrance basin and Dry Dock No. 1 at Balboa. The first cut began adjacent to the site of the permanent coaling plant, and the shovel is working northward across what will be the entrance basin to the axis of the Dry Dock and will thence proceed parallel to the length of the Dry Dock to its head. As excavation equipment becomes available by release from other portions of the work from time to time, other shovels will be added. The excavation for Dry Dock No 1 and the entrance basin includes about 750,000 cubic yards of rock and 500,000 cubic yards of earth. The spoil will be used to fill in the low ground behind the commercial piers, which will be the site of the permanent yard of the Panama Railroad.

Timbers for Lock Fenders.

Timber for the fenders in the approaches to the locks has arrived on the Isthmus, and will be treated with preservative before it is installed. In all 551,312 board feet, in sticks 12 by 16 inches and 16 feet long, will be required, and the first shipment is about 200,000 feet. In THE CANAL RECORD of October 11, 1911, there was an article about the fenders, together with illustrations. At that time it was the intention to use oak for this purpose, but the cost of both oak and yellow pine was so great that bids were asked including Douglas fir. This wood has been selected at a price of \$34.30 a thousand board feet.

Before it enters a lock, a ship will come to a stop alongside the center guide wall, where electric towing locomotives take it in tow for the passage through the locks. The fenders are designed to absorb the shock caused by the ship bumping against this wall. There will be two rows of fenders running longitudinally along the walls, the upper one 2 feet 6 inches from the top of the wall, and the lower one 7 feet 6 inches below this. At every five feet there will be a nest of

springs in the wall against which the timbers will bear.

The climate and insects in Panama are very destructive of wood. As preservative against these attacks, the fender timbers will be treated with *Avanarius carbolineum*, a liquid compound of oily nature. A tank 4 feet square in cross section and 20 feet long constructed at Gorgona shops has been erected at Miraflores for this purpose. Within the tank is a coil through which hot steam will be circulated, bringing the liquid up to a temperature of 190 Fahrenheit. The timbers will be immersed in this hot liquid, nine at a time, and allowed to remain in it thirty minutes. It is estimated that from 72 to 81 timbers can be treated in a day of eight hours.

Miraflores Spillway.

Of the 80,000 cubic yards to be excavated for the construction of Miraflores Spillway, 42,276 cubic yards, or 23.6 per cent, had been removed on December 1; included in this are 9,896 cubic yards of hydraulic excavation, which was completed in October. The placing of concrete will begin as soon as excavation is sufficiently advanced. The Spillway is to be 432 feet long, extending with connection by core walls from the north end of the east side wall of Miraflores Locks, across the Rio Grande and the construction tracks following the old line of the Panama Railroad, to the hill north of the Miraflores power plant. The crest of the ogee will be 38.67 feet above sealevel, and the piers to support the gates and the connecting footbridge, will be at elevation 85.17. The gates will be eight in number, regulating the 45-foot openings between piers, and will be similar in construction and operation to those now ready for installation in the Gatun Dam Spillway.

Conditions in Culebra Cut.

Lettering has been placed along the banks, on signboards or the face of the bluffs, to indicate levels which were indices of progress in excavation or to show the level at which the water will stand when the Canal is in operation. On some of the steamshovels at important points are placards which give the elevation. These are changed as the shovels reach lower levels.

No heavy slides have occurred within the last two months, the most important movement during that period having been a fresh break in the Cucaracha slide. This began moving about a month ago and is still in motion. About 50,000 cubic yards are in motion and this is less than the amount estimated as likely to move after the quiescence into which the slide had settled.

The removal of spoil from all the active slides is advancing without difficulty. Excavation at the foot of the slide in the east bank, half a mile north of Empire, which on August 20, 1912 carried away a section of the

Obispo Diversion and blocked the drainage channel in the bottom of the Cut, has advanced to such an extent that a new ditch was opened through the toe of the slide last week and the water now follows its former natural drainage toward the pumps at Gamboa dike. The three centrifugal pumps and one submerged air pump, which had been installed on the upstream side of the obstruction to lift the water over the toe to natural drainage, have been removed.

At the north end of the Cut, where a dike has been protecting it from the waters of the Comacho and Mandingo Rivers, which flow into the Chagres through the West Diversion, considerable leakage developed recently with the backing up of Gatun Lake. This dike was a fill of rock and earth, thrown across the old channel of the Obispo by the French canal workers, and proved to be porous under pressure. In order to stop the seepage clay was dumped along the outer face. At about the same time the waters of the lake began to recede, following the opening of the sluice gates in Gatun spillway, and under this dual influence the leakage has practically ceased.

Excavation at Gatun Locks.

A steamshovel began excavating in the lower approach to Gatun Locks on December 23, in rock, at elevation 41, in the west chamber. On the east side the material at that elevation is too soft for the use of steamshovels, and is being removed by sluicing and by a clamshell dredge dumping into buckets carried by the duplicate cableways. Following the excavation by dredges in the lower approach, and the unwatering of the lagoon, the embankments on either side were strengthened to support the cableway towers, a pair of which have been moved down a hundred feet beyond the end of the locks proper. They have been used in placing part of the concrete for wing and cut-off walls on both sides, in connection with narrow-gage dump trains and chutes. No concrete has been placed for the center approach wall, foundation piles for part of which are being driven to rock by four pile-drivers.

New Railroad Time Table.

A new schedule of the trains on the Panama Railroad is published on another page of this issue.

In the weekday trains, that from Colon to Panama in the afternoon will leave at 4.25 instead of 4.35 o'clock; and the early morning train will leave Colon at 5.30 instead of 5.10 o'clock. There is a general reduction of 10 minutes in the time of all trains from Colon to Panama. The late train on "Saturday night" will leave Colon at 12.15 Sunday morning.

In the Panama to Colon schedule the important changes for the weekday trains are that the morning trains, leave at 6.40 and

NOTES OF PROGRESS.

(Continued.)

10.10 o'clock respectively instead of 6.35 and 10.20. The late afternoon train leaves at 5.15 instead of 5.25. The evening train on Saturday leaves at 6 o'clock instead of 7.30.

Notice to Mariners.

It is dangerous to pass the drillboat *Terrier* in the channel excavation of the Atlantic Division when the one-ball signal is

up, this signal being hoisted for 20 minutes before a shot is fired. A red flag is hoisted at all times that there is dynamite aboard the drillboat or tending barge.

Gatun Dam Spillway

The concrete work in the Spillway at Gatun Dam is over 93 per cent completed, 211,565 cubic yards, out of a total of 225,000, having been placed at the close of work on December 28. A statement of the amount laid each

working day last week, and of the total in place, follows:

DATE.	Concrete laid.	Hours worked.	No. mixers used.
	Cu. Yds.		
December 16.....	88	6.00	1
December 17.....	24	1.05	1
December 18.....	38	4.00	1

December 20.....	160	7.75	1
December 21.....	172	7.00	1
Total.....	482	26.25	1
Previously reported...	209,955		
Week ended Dec. 28..	1,128		
Grand total.....	211,565		

CONCRETE WORK IN THE LOCKS.

Over 94 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on December 28, the amount in place being 4,189,059 cubic yards. The statement of concrete work was omitted from last week's CANAL RECORD because it arrived too late for publication.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on December 28 being 1,912,425 cubic yards, out of a total of 2,043,730. A statement of the amount placed in the locks each working day of the week ending December 28, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers.	Concrete placed.	Hours worked.	No. of mixers.

Grand total.....								1,914,446

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 99 per cent completed, 900,929 cubic yards, out of a total of 903,000, bucket measurement, having been placed at the close of work on December 28. In the week ending December 21st, 1,900 cubic yards were placed. The record for each of the working days of last week, follows:

DATE.	AUXILIARY PLANT.						Mixed by hand	Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.					
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

Grand total.....								4,493	900,929

MIRAFLORES LOCKS.

Over 91 per cent of the concrete for the system of two twin locks at Miraflores was in place December 28, the total amount on that date being 1,375,705 cubic yards, bucket measurement, out of a total of approximately 1,499,800. During the week ending December 21st, 11,908 cubic yards were placed. The record for each working day last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 1-cubic yard mixers.			1-cubic yard mixers.			Mixed by hand.	Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers.	Concrete placed.	Hours worked.	No. of mixers.	Concrete placed.	Hours worked.	No. of mixers.

ATLANTIC TERMINAL DOCKS.

Quay at Dock No. 16 Completed—Progress on Pier No. 17.

Ships wishing to come into dock at the Atlantic entrance to the Canal will turn east at right angles into a 500-foot channel leading up to the terminal piers and quays. Authority for excavating this lateral channel to a depth of 41 feet below mean sealevel was issued last week, and the work will be done by the suction dredge *Caribbean* and the dipper dredge *Mindi*. It will involve about 942,000 cubic yards of excavation, and additional work in the docks alongside the quays and pier will involve about 100,000 cubic yards.

Work on the terminals is advancing rapidly. The quay wall along the west front of Cristobal Point is completed, the mole that extends from the mainland out towards the Canal and at right angles to it is made to its full length, although much material must yet be dumped to bring it to its final width; and the caissons for the foundation of Pier No. 17 are practically in place. At the head of Dock No. 16, between the quay and Pier 17, is a landing for small boats, its top being only three feet above mean tide. This will be ready for use when the first ships of the Atlantic Fleet of the United States Navy arrive at Colon in January.

The plan for the terminal wharves is to build a quay around the point at Cristobal, extend a fill of rock and earth from the mainland 3,200 feet towards the Canal channel, and from this mole build out piers at such distances apart as to allow a berth or dock between piers of 300 feet in width.

At this time of the year winds from the northward enter Limon Bay and toss its waters so much that white caps are the rule rather than the exception. The west breakwater, extending from Toro Point towards the Canal entrance, cuts off the heaviest of the waves, but it does not entirely protect the harbor. The mole, whose chief use is that of a backbone for the system of piers, answers as a breakwater for the area immediately behind it. Although the water in front of this is so wind-tossed that it actually breaks over the mole and splashes to a height of twenty feet or more, that behind it is calm. In this calm water the entrance to the docks from the Canal will be dug.

The quay along Dock No. 16 is typical in construction and appearance of what Pier No. 17 will be. Both quay and pier are founded upon bed rock, from twenty to eighty feet below mean tide at various points. Steel caissons or cylinders are driven by pile drivers into the bottom of the bay, and men within them take out the earth and coral rock as the caissons sink. When bed rock is reached, it is leveled off so that each caisson may stand on a flat surface. Old railroad rails are placed within the cylinder to serve as reinforcement, and the whole is filled with concrete. The result is a concrete pillar, steel bound and heavily reinforced with T-rails, standing on rock.

A series of these pillars forms the foundation for a quay or pier. Upon, and joining them, are placed steel girders, and these are joined in turn by smaller steel forms, so that a network of steel overlies the pillars. Upon this network the concrete for the floor is placed, and upon this are laid brick, the railroad tracks along the face of the quay

and faces of the pier having first been set in place.

The quay at Dock No. 16 is completed. It stands upon 227 piers of concrete each 4 feet in diameter. In its construction 11,391 linear feet of caissons were sunk, 4,894 cubic yards of concrete were used in the foundation piers, and 3,182 cubic yards in the floor, which is 8 inches thick. Its length is 1,071 feet, width 75 feet, 6 inches. Along the front a line of batter piles is being driven to protect the structure against ships. A shed of steel will cover it, and the work on this will begin in April.

Pier No. 17 is now in the most interesting stage of its construction. Caissons are being sunk, excavation is in progress, concrete filling of the caissons is carried on, and the steel superstructure for the floor is about to be placed. This pier will be 1,042 feet long, 209 feet wide, and will rest upon 287 piers of reinforced concrete each 6 feet in diameter.

Dredging in the 300-foot slip between Dock 16 and Pier 17 is complete, and the dredge *Mindi* will move to the west side of Pier 17 in a few days to dredge out a 200-foot berth.

The dredge *Caribbean* will start next week to dredge out a 500-foot approach channel from the Canal axis to Dock 16.

There has been some question in regard to the cross currents in Limon Bay, carrying the silt into the approach channel, and the hydrographic office has been instructed to make a thorough study of this phase of the problem.

Case of Sunstroke.

The third case of sunstroke or thermic fever on the Isthmus, reported by the Canal physicians during the eight and one-half years of American work, occurred on December 5 at Miraflores locks. An Italian laborer who had been on the Isthmus only ten days was stricken at 4 o'clock in the afternoon after he had completed ten hours of work. He was taken in charge by the police and hurried to the dispensary. It was believed that he could not live. He was subjected at once to the customary remedies for sunstroke. Under treatment his temperature was reduced, and in the evening he was sent to Ancon Hospital where improvement continued. It is believed that he will make a complete recovery.

Visit of the Atlantic Fleet.

The Atlantic Fleet of the United States Navy which will visit Colon for the purpose of allowing its officers and men to inspect the Canal, will arrive in four divisions, according to the following schedule:

The Second Division commanded by Rear Admiral F. F. Fletcher, and consisting of the *Vermont*, *Michigan* and *South Carolina*, with 173 officers and 3,484 men, will arrive on January 12 and sail on January 17. It will be accompanied by the Fourth and Fifth Groups of destroyers, with 30 officers and 820 men. In the Fourth Group are the *Monaghan*, *Ammen*, *Burrows*, *Patterson*, and *Trippe*, and the Fifth Group is composed of the *Jenkins*, *Fanning*, *Jouett*, *Jarvis*, and *Beale*.

The Commander in Chief of the Atlantic Fleet, Rear Admiral Charles J. Badger, on the *Wyoming*, will arrive on January 20, together with the First Division, commanded by Capt. W. S. Benson. The First Division is made up of the *Utah*, *Florida* and *North*

Dakota and will be accompanied by these destroyers: First Group, *Roe*, *Drayton*, *McCall*, *Paulding*, and *Terry*; Third Group, *Henley*, *Sterrett* and *Warrington*, with the tender *Dixie*, bearing Capt. E. W. Eberle, Commander of the Torpedo Flotilla. These ships will depart on January 25. They carry a total of 177 officers and 3,710 men.

The Third Division, made up of the *Virginia*, *Georgia*, and *Nebraska*, under Rear Admiral N. R. Usher, will arrive on January 27 and sail on February 1. In this division are 113 officers and 2,616 men.

The Fourth Division, arriving February 4 and sailing February 9, consists of the *Minnesota*, *Ohio*, and *Idaho*, commanded by Rear Admiral F. E. Beatty, with 111 officers and 2,450 men.

Levelmen and Transitman.

An examination for promotion to the positions of levelman and transitman is scheduled to be held in the Commission clubhouse at Empire, on Sunday, January 26.

The examination will commence promptly at 9 a. m., and will be divided into three parts, which will be given in the order indicated, viz: Written and oral examination, and a statement of education and experience. Competitors will be required to complete the written portion of the examination before 1 p. m.

Applications for examination should be addressed to the undersigned, through the head of department or division, before the close of business on Thursday, January 23.

Applicants should bring to the examination room pens, pencils, triangles, and tables of circular functions, but no paper, ink, or blotters.

Applicants who fail to appear for examination before 9 a. m., or who do not apply for examination through the proper channels before the close of business on Thursday, January 23 will not be admitted to the examination.

No card of admission will be needed.

A. B. NICHOLS,

Chairman, Examining Board.

CULEBRA, C. Z., December 28, 1912.

Canal Zone Postal Savings Bank Transactions.

A statement of the transactions of the postal savings bank at the Canal Zone post offices from November 2 to November 30, inclusive, follows:

LIGHTING CULEBRA CUT.

Channel will be Dark Except for a few Beacons.

Ships sailing through Culebra Cut at night will be guided by a system of beacons on either bank, but except for these lights, or such light as is lent by the moon and stars, the journey through the Cut will be in the dark. From the top deck of the largest ship no glimpse may be obtained of the country along this part of the Canal, for even the broad swale opposite Culebra will be high above the deck, while at the summit of the continental divide, where Gold and Contractors' Hills have been cut away to make the channel, the rock sides will tower hundreds of feet above the mastheads. This close confinement of the Canal between the hills will make for intense darkness, and at times there will be heavy fogs such as now accumulate in the Cut during the night, and are dissipated by the sun in the morning.

In the original project for lighting the Canal, published in *THE CANAL RECORD* of November 22, 1911, it was explained that the conditions in Culebra Cut would make impracticable the system of range lights employed on the lake and in the sea level channels. In this system two lights are placed one behind the other on the bank, in such relation that when the pilot gets them both in line he knows that his ship is on the right range. But the steep sides of Culebra Cut do not permit such an arrangement, because there is not room for one light to be placed behind another at sufficient distance to make them of any use as range indicators. The plan therefore is to establish three beacons at each angle in the Cut, and between these, intermediate beacons in pairs on each side of the Canal. By keeping his ship pointed midway between these beacons, the mariner will be able to adhere closely to the center of the Canal.

Steering a ship through Culebra Cut will be much like the navigation encountered in the tidal estuaries of the southern rivers where there are many turns. For the Canal does not follow a straight line through the continental divide but takes advantage of natural depressions in the land, in order that excavation may be reduced to the minimum. In all there are eight turns or angles, the sums of which represent $144\frac{1}{2}$ degrees of curvature, so that if all the turns were made at one time and in one direction, a ship in passing through the Cut would describe over one third of the arc of a circle.

Entering the Cut from the Atlantic side and going southward, the first angle occurs at Bas Obispo, where the Canal turns 30 degrees to the right. The course lies straight ahead for 9,915 feet to Las Cascadas, where there is another turn to the right of 9d 9m 26s. From this point the next turn, which is at Cunette near Empire, is a distance of 6,219 feet, and there the Canal turns to the left 29d 25m 53s. Beyond this at a distance of 2,027 feet is another turn to the left of 7d 36m 13s at Empire. Four thousand five hundred thirty-three feet beyond Empire there is a turn to the right of 22d 14m. Then comes a straightaway of 7,891 feet to Contractors Hill, and there the line turns 17d 43m to the left, and there is another straight stretch of 6,467 feet to a point near Paraiso where there is another angle of 12d 7m 30s to the left. Between this point and the forebay of the locks at Pedro Miguel is a distance

of 3,663 feet and there the line turns again to the right 16d 15m 35s.

Throughout the entire length of the Cut, with the exception of only two turns or angles, the pilot will have before him only the lights necessary to guide the ship through the tangent in which it happens to be, and will see no other aids to navigation until he reaches the next turning point. This is accomplished by screening the lights so that

BEACON FOR CULEBRA CUT.

(Reinforced concrete, Occulting Light, base to focal plane 15 feet. Width of base $4\frac{1}{2}$ feet.)

they will be seen only through a certain number of degrees of arc of the horizon.

To eliminate the possibility of confounding the lights with one another, and with lights ashore, all the beacons will have individual characteristics formed by flashes of light and dark intervals. Thus the tentative arrangement for all turning point lights on the starboard hand is a single flash whose period of flashing is three seconds; for all turning point lights on the port hand, a double flash

whose period is three seconds; for all intermediate lights marking the starboard edge of the channel an occulting light whose period of occulting is ten seconds; and for all lights marking the port edge of the channel, a double flash whose period of flashing is 8.8 seconds.

There will be 35 reinforced concrete beacons in the nine miles of Culebra Cut, 23 at tangents, and 12 at intermediate points. These have been cast at the Balboa plant of the lighthouse subdivision, in three parts—the body, the roof and the part for the lantern, and are ready to be installed as soon as the work in the Cut has advanced far enough. At present the slides make it impracticable to place the foundations for the beacons. It is proposed to make the foundations on the 95-foot berms, after the Cut is flooded, to carry the beacons in barges to the points where there are to be set up, and there to lift them from the derrick barge into position.

Reduced Rates to the Interior.

A new steamship, the *Panama*, built in Scotland, has been brought to Panama by the recently organized Panama Steamship Company and has been placed in service between Panama and David, and intermediate points. The company has made a rate for Canal and Panama railroad employees of ten per cent off on single trips and 15 per cent off on return trips to all parts touched by the *Panama*. The new ship is of 1,000 tons burthen, and is equipped with electric lights, baths, and other conveniences.

Canal Zone Rifle Club.

The final shoot of the Canal Zone Rifle Club for the individual military rifle championship of the club was held on December 22 on the Pedro Miguel range, and was won by Mr. J. A. McLellan of Corozal with a total score of 285 out of 350. The complete shoot was held on three different dates and the winner led the score at the close of each day's shoot.

Misdirected Letters.

ANCON, C. Z., January 1, 1913.

The following insufficiently addressed letters, originating in the United States or its possessions, have been received in the office of the Director of Posts and may be

Barton, Robert C.	King, Harry

Heath, C. M.	

SOCIAL LIFE OF THE ZONE.

Christmas Entertainments.

It is estimated that more than 2,000 American children participated in the Christmas celebrations held in the Canal villages. The entertainments varied but little in character. A feature at the Sunday school exercises at Gatun was the showing of colored slides representing scenes in the early life of Christ. Moving pictures were also shown at Las Cascadas. At Cristobal the children were entertained by a representation of "Rebecca of Sunnybrook Farm" by Miss MacLaren. At Culebra, a treat of ice cream and cake followed the program. The pupils of the Sunday school at Bas Obispo were present at the social gathering held in the hall on Christmas eve and each received a box of candy.

The sale held at the Commission clubhouse by the Woman's Altar Guild of St. Mary's Church, Empire brought \$85 into the treasury; St. Ferdinand's three days' sale held in the parish house netted about \$400, and the same amount was made by the sale held in the girls' public school building, Colon, by the members of the parish of Christ Church. The results from the four sections of this bazaar were as follows. Panamanian, \$133.60, West Indian, \$124.25; Guatemala, \$94, American \$40.

Bishop Knight's Itinerary.

* The Rt. Rev. Albion W. Knight, Protestant Episcopal Bishop of Cuba, is expected to arrive in Colon from Havana on Wednesday, January 8, to remain on the Isthmus until January 27. His visitation to the thirteen churches of the Panama mission will be according to the following schedule: Sunday, January 12, St. Luke's Hospital chapel, Ancon, at 10 a. m.; St. Paul's, Panama, at 7.20 p. m.; Wednesday, January 15, at St. Augustine's, Paraiso, at 7.30 P. m.; Friday, January 17, at St. James, Empire, at 7.30 p. m.; Sunday, January 19, St. Mary's, Empire, 10.45 a. m., St. Philip's, Las Cascadas, 4 p. m.; St. Mark's, Culebra, 7.30 p. m.; Wednesday, January 22, St. Andrew's, Gorgona, 7.30 p. m.; Friday, January 24, St. Michael's, Pedro Miguel, 7.30 p. m.; Sunday, January 26, Gatun, 8 p. m., St. Stephen's, New Gatun, 10 a. m., Christ Church, Colon Beach, 8 p. m. On Saturday, January 18 there will be a conference of the clergy at St. Mary's Church, Empire, at 8 a. m.

The Altar Guild of St. Luke's Church, Ancon, will hold a reception in honor of the bishop at the residence of Chaplain and Mrs. Henry A. Brown, from four to six o'clock on January 14. The business meeting of the Guild will begin at four and the general reception will be from five to six o'clock. Members of the church and residents of Ancon are cordially invited to attend.

A meeting of the Colon Humane Society with election of officers was held in the municipal building, Colon, on Saturday evening, December 21. This meeting closed the year 1911-1912 and the officers chosen for 1913-1914 were as follows: Dr. Claude C. Pierce, President; Judge Erasmo Mendez, Mr. Arcelio Prieto, secretary; Mr. Frank Ullrich, treasurer; Mr. Clifford Byone, auditor.

The Canal Zone schools closed for the Christmas holidays on Friday, December 20, and will reopen for the winter term on Thurs-

day, January 22. The enrollment for the term just completed was the largest in the history of the schools. In the section for white pupils it was about 1250, and in that for colored pupils it was about 1150, making a total of about 2,400 for both sections. In the consolidated high schools, at Gatun, Empire, and Ancon, there were 84 students, a gain of 34 over any previous year.

PERSONAL.

President Taft and his party sailed for Key West on December 26 on the *U. S. S. Delaware*, under convoy of the *Arkansas*. They were accompanied by Col. Geo. W. Goethals and Mrs. Goethals.

Col. W. C. Gorgas, Maj. Robert E. Noble, and Mr. J. A. LePrince and party sailed from Guayaquil December 14. They arrived at the quarantine station in Panama Bay on December 28 and were released on the 31st, seven days after departure from Guayaquil.

Mr. Frank Feuille sailed for the United States on December 28, on the *Cristobal*.

Mr. Edward Schildhauer returned on December 26 from the United States, from special leave for the purpose of inspecting machinery in the course of manufacture for use in the locks.

A Congressional party composed as follows, arrived from the United States on December 26, on the *Panama*, for the week of sight-seeing along the Canal: Owen Calloway and Mrs. Calloway, Mrs. Champ Clark and daughter, Maurice Connelly, J. C. Copley and Mrs. Copley, G. E. Foss, W. S. Hammond, A. E. Kendall, W. S. Kenyon and Mrs. Kenyon, Thomas F. Konop and Mrs. Konop, George A. Loud and two daughters, W. A. Oldfield and Mrs. Oldfield, I. S. Pepper, Miles Poindexter and Mrs. Poindexter, J. D. Post, Chas. H. Sloan, E. P. Sweet, Mrs. Sweet and daughter, S. Warburton, Mrs. Warburton, daughter and son, W. W. Wedemeyer, I. D. Young, Mrs. Young, and daughter. Mr. and Mrs. Kenyon and Mr. Kendall sailed for the United States on December 28, on the *Cristobal*; others of the party will leave on January 2, on the *Panama*.

Obituary

A. Leitinen, an employee of the Mechanical Division at Gorgona, died at Ancon hospital on December 17. He was 45 years of age, married, and had been on the Isthmus six years; he was born in Finland. He is survived by his wife, Mrs. Katherin Leitinen, living at Gorgona.

New Year's dances were held at the Tivoli Club, Ancon, and at Kangaroo Hall, Empire, on New Year's Eve.

Band Concert.

A concert will be given by the Isthmian Canal Commission band at Gatun, C. Z., on Sunday, January 5, at 5 p. m. The program follows:

1. March—*Distant Greetings* Doring
2. Selection—*Bohemian Girl* Balfe
3. An Old-time Shuffle—*The Darkies Dream* Lansing
4. Overture—*Stadell* Flotow
5. Popular song—*On Moonlight Bay* Wentz
6. Waltz—*Blue Danube* Strauss
7. Intermezzo and Barcarolle from *Les Contes de Hoffman* (by request) Offenbach
8. Descriptive—*Evening Idyls* Barhausen
9. March—*Wein Bleib Wein* Schrammel

CHARLES E. JENNINGS, Musical Director.

A concert will be given at Corozal on Sunday, January 12, at 4.30 p. m.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Moving picture schedule for the week January 6 to 11, is as follows: Monday, Culebra; Tuesday, Corozal; Wednesday, Empire; Thursday, Gorgona; Friday, Cristobal; Saturday, Gatun.

COROZAL.

The wrestling class started Monday, December 23, with six men present.

Tuesday evening, December 24, the Sunday school conducted an interesting Christmas eve program, at the end of which presents and candy were distributed among the children.

Free bowling, pool and billiards, red lemonade and mixed nuts were enjoyed by all those who stayed around the clubhouse during Christmas day. At night, 290 people were entertained by Miss Gay Zenola MacLaren in "The Governor's Lady."

Duckpin scores of 100 or over for the week ending December 28, were: Beall, 100; Kent, 100; Souder, 105, 115; Kite, 101; Connors, 108; Deans, 101; Ryan, 102; Humphreys, 101.

Scores in tenpins of over 200 were all made by Mr. Ottli, whose highest score was 232.

The left-handed duckpin bowlers lost to the right-handed bowlers. Friday night, December 27, in three closely contested games.

On Sunday evening, December 29 Miss MacLaren presented "The Music Master" to an audience that filled the hall.

CULEBRA.

On Tuesday evening, Christmas eve, the Sunday school gave a Christmas concert in the school house. Gifts and candy were distributed by Santa Claus. After this program the Y. M. C. A. took charge and an entertainment for the older folks was given as follows: Piano duet, Mr. and Mrs. Bronson; violin solo, Mr. Whitehead, accompanied by Mrs. Dickson; baritone solo, "Silver Threads Among the Gold," Mr. Lynch; mandolin solo by Mr. Ramsey, accompanied by Mr. Howard; solo by Mr. Critchlow, accompanied by Mr. Bronson on the piano and Mr. Whitehead, violin. Refreshments of cake, apples and punch were served.

Miss MacLaren will appear on Tuesday, January 7, in "Within the Law." There will be no reserved seats.

Two sets of pool balls and a set of billiard balls have been received from the States.

A cigar and candy stand will be in operation on January 2, at which employees of the Commission may purchase supplies for cash.

EMPIRE.

For the last five years the Empire Y. M. C. A. tenpin bowling teams have won the Isthmian championship. The team of 1908 was made up of the following men: Bardleson, Brown, Edwards, Durand, and Dougherty. The 1909 team: Brown, Potter, Hinckley, Huson, Bardleson. The 1910 team: Pearson, Gustavson, Potter, Huson, and Bardleson. The 1911 team consists of ten men, as follows: Potter, Gustavson, Pearson, Huson, Pinney, Rodeighiro, Giavolli, Parkis, Davis. The 1912 team, which has just won the Isthmian tournament, consisted of Huson, Potter, Gustavson, Edwards, Pearson, and Pinney. This team won twenty out of thirty games.

High scores were made in the duckpin tournament games during the past week, as follows: Pinney, 110, 113, 111, 110, 120, 119, 107, 109; Edwards, 110; Brown, 118; Andrews, 107; Diedrich, 120; Scull, 107; Goolsby, 115; Rodeighiro, 123, 113, 109, 107.

On Thursday, December 26, Miss MacLaren gave the play entitled "Within the Law." She will be at Empire for the last time on January 6.

Sixteen have entered the duckpin tournament for boys.

Mr. H. W. Sawtelle won the monthly handicap pool tournament for the month of December.

The "smoker" advertised for New Year's eve has been postponed, but will be held in January.

GORGONA.

On Sunday, December 22, the Gorgona Chorus gave an entertainment in the Empire clubhouse.

Over 800 people attended the Christmas entertainment that was given on December 25. The program was rendered by the girls and boys of Gorgona. The first was given to the children and parents, after which the children were sent to the game room and received refreshments and Christmas stockings. At 8.25 o'clock the second program was rendered for the older folks. It consisted of the following: Gorgona Orchestra; two selections by the Gorgona Chorus, and four selections by the Children's Chorus. This was followed by recitations, "Christmas Stocking," "Seven Cousins," and "Drill Topsy Turvy." After the entertainment refreshments were served.

On Thursday afternoon Miss MacLaren gave an entertainment for the ladies of Gorgona, 225 of whom

attended. After the program refreshments were served. On Saturday evening Miss MacLaren gave the selection "Within the Law." The next entertainment to be given by Miss MacLaren will be on Sunday evening, January 5, when she will render "The County Chairman."

Following are the high scores for the week ending December 28:

Big Pins—Gibhart, 213; Roper, 222, 201, 203.
Duckpins—King 104; Sims 104; Davis 103, 101;
Ruckte 100; Rhodes 100; Simka 102.

The Gorgona Chorus will again meet for regular rehearsal on January 8, and will make ready for a special concert in the near future.

GATUN.

The boys' athletic contest was brought to a close on Monday, December 23. James Jervey, with 2,114 points, receives a gold medal as first prize; Franklin Cummings, with 1,849 points, receives a silver medal as second prize; and George Meis, with 1,807 points, receives a bronze medal as third prize.

Twenty-five new library books were placed on the shelves during the past week.

"Open house" was observed on Christmas Day. An all day bowling tournament was held. The married men defeated the single men in a game of volley ball. In the evening, in addition to the moving picture, slides illustrating the early life of Christ were shown and recitations, drills and songs were given by the children. After the entertainment informal singing was enjoyed by the men and Roswell Homer played several piano selections.

Several new educational classes will be started, beginning the first week in January. The Spanish classes did not meet during the holidays but will resume this week.

The two new rowing machines have arrived and are proving a popular feature in the gymnasium.

"Open house" is to be observed at the clubhouse on New Year's day.

Miss Gay Zenola MacLaren will give her third and last recital on Friday evening, January 3.

Gatun "Reds" won two out of three games of duckpins played with the Gatun "Stars" on Saturday evening, December 28. The scores were as follows:

Gatun Reds.				Gatun Stars.			
Harper....	88	98	89	Green....	78	85	79

The "Reds" won the roll-off.

High scores for the week are: *Tenpins*—Humphrey, 246. *Duckpins*—Claherty, 112.

CRISTOBAL.

There was an attendance of 175 children at a special moving picture show given Monday afternoon, December 23.

The first part of the Christmas eve entertainment consisted of exercises by the children of the Sunday school and Miss Gay Zenola MacLaren gave "Rebecca of Sunnybrook Farm." Candy and apples were distributed to all. The second part contained two duets by Messrs. E. L. and R. S. Mosher, a solo by the former, and "Shore Acres" by Miss MacLaren. The third part was for the ladies, to whom refreshments were served in the game room. Each guest received a box of candy and an apple.

The total attendance at the three entertainments was about 700.

The married men's gymnasium class will begin on January 7 at 8 p. m. This class will meet each Tuesday and Friday night.

"The Governor's Lady" will be given by Miss MacLaren at Cristobal on January 4. Tickets will be on sale January 1. All seats will be reserved; members free, others 50 cents.

All checker players are requested to meet Wednesday, January 8, to organize for a tournament.

PORTO BELLO.

Miss Gay Zenola MacLaren presented "The Man from Home" before an appreciative audience on Saturday night, December 21.

The "Blues" won the Sunday school attendance contest by a score of 128 to 103 points. As losers, the "Reds" entertained the "Blues" with a picnic on New Year's day.

The Christmas celebration observed on Christmas eve was the most successful ever given at Porto Bello. After an entertainment rendered by the children of the Sunday school, Santa Claus gave every resident of Porto Bello a present. The ladies served a luncheon, which was followed by an informal dance. Committees: Chairman, J. L. Tolar; Finance, Urwiler, Wright, and Page; Refreshments, Mrs. Cornelison and Mrs. Keene; Program, Mrs. VanVoy and Mr. Page; Purchasing, Miss Moon and Mrs. Towne; Decorating, Mrs. Geyer and Messrs. Sauvan, Thompson and Reichart. Mr. James H. Reichart painted the scenery for the occasion.

OFFICIAL CIRCULARS.

Consolidation of Timekeeping Forces.

CULEBRA, C. Z., December 24, 1912.

CIRCULAR No. 183-T:

With the approval of the Secretary of War, the timekeeping for the Quartermaster's Department and all divisions of the Chairman and Chief Engineer's Office will be placed under the supervision of the Examiner of Accounts, effective December 26, 1912. This includes those branches of the work recently transferred to the Chief Engineer's Office when the Pacific Division was abolished, and the timekeeping force and records at Corozal will be transferred to the Administration Building at Culebra, at which point the timekeeping work will be centered, on the above date. The formal transfer of the timekeeping forces on the rolls will be made effective January 1, 1912.

The timekeeping work of the Departments of Civil Administration and Sanitation will be transferred to the Culebra office on January 10, 1913, or as soon thereafter as may be agreed upon between the heads of those departments and the Examiner of Accounts.

GEO. W. GOETHALS, *Chairman.*

Acting Chairman and Chief Engineer.

CULEBRA, C. Z., December 26, 1912.

CIRCULAR No. 469:

Upon return from the leave on which he is now absent Col. H. F. Hodges will, during my absence from the Isthmus, be in charge of the work as Acting Chairman and Chief Engineer.

In the interim between my departure and the return of Colonel Hodges, Mr. H. H. Rousseau will act as Chairman and Chief Engineer, effective December 27, 1912.

GEO. W. GOETHALS, *Chairman and Chief Engineer.*

Commissary Books for Cash.

CULEBRA, C. Z., December 26, 1912.

CIRCULAR No. 256-T:

Effective December 28, 1912, commissary coupon books will be sold for cash at the Pedro Miguel Commissary on Wednesdays and Saturdays from 3 to 5.30 p. m.

The sale of commissary coupon books at Paraiso is authorized on Wednesdays and Saturdays from 8 a. m. to 12 m.

GEO. W. GOETHALS, *Chairman.*

Acting Head of the Department of Law.

CULEBRA, C. Z., December 28, 1912.

CIRCULAR No. 470:

Effective this date, Mr. William K. Jackson will act as Head of the Department of Law during the absence from the Isthmus of Judge Frank Feuille.

H. H. ROUSSEAU, *Acting Chairman.*

Limes, per 100	8
Pears, per pound	12
Oranges, Jamaica, per dozen	12

*Indicates reductions from last list.

**Indicates 5 cents allowed for return of bottle.

†Indicates advances on last list.

††Fowls weigh each about as follows: 3, 3 1/2, 4, 4 1/2, and 5 pounds. Prices are based accordingly; when size ordered is not in stock supply next lightest weight is supplied and refund note sent for difference.

‡Sold only from Commissaries; no orders taken for delivery.

Supplies for the Canal.

* The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending December 28:

Advance, December 21, from New York, with 30 coils steel wire, 42 packages wheels and tires, 75 cases incandescent lamps, 16 crates sash and blinds, for Mechanical Division; 31 packages castings, for Pacific Division; 67 barrels spikes, 96 packages sash and doors, for Panama Railroad Company; 267 cases candles, 320 bundles roofing iron, 30 carboys muriatic acid, for stock; and a miscellaneous cargo, the whole consisting of 1,115 packages and weighing 165 tons.

Sixola, December 22, from New York, with 10 cases electrical material, 15 cases pump machinery, for Superintendent of Erection; 38 barrels rosin, 16 carboys electrolyte, for stock.

Prinz Joachim, December 23, from New York, with 16 kegs bolts, 15 barrels pipe fittings, for stock.

Artist, December 24, from Liverpool, with 24 dredge buckets, 24 bucket links, 22 pieces chains, for 6th division Chief Engineer's Office.

Almirante, December 25, from New York, with 121 cases electrical material, 10 reels cable, 5 cases castings, for Superintendent of Erection; 125 pieces cast iron pipe, for Atlantic Division; 33 crates pipe and fittings, 8 reels cable, 25 pieces steel beams, 20 cases hardware, 15 cases water closets, for stock.

Abangarez, December 26, from New Orleans, with 361 tons pig iron, for Mechanical Division; 242 bales rice straw, 298 pieces piling, 4,664 pieces yellow pine lumber, 246 pieces cross ties, 700 cases kerosene, 49 rolls cotton duck, for stock.

Panama, December 26, from New York with 10 cases castings, 55 bales excelsior, 10 barrels pipe fittings, 10 bales suction hose, 15 cases varnish, 150 barrels alum, 12 cases hardware, 45 cases paints, 60 barrels batteries, 12 cases electrical material, for stock; 2,271 bundles steel bars, 17 pieces steel bars, for (Balboa) 6th Division of Chief Engineer's Office; 143 cases electrical material, for Superintendent of Erection; 52 cases ranges and parts, 100 barrels plaster, 23 packages, signal material, 80 crates fibre furniture, 8 crates enamel beds, for Panama Railroad Company; 300

pieces castings, 10 cases lamp shades, for Mechanical Division; and a miscellaneous cargo, the whole consisting of 3,565 packages, weighing 650 tons.

Aslec, December 27, from San Francisco, with 20 bales or dredging sleeves, for Pacific Division.

The following ships arrived at, or departed from the port of Balboa during the two weeks ending December 28:

Arrivals—December 16, *Pachitea*, from Callao; December 16, *Peru* (P. S. N.), from Guayaquil; December 17, *Quito*, from Guayaquil; December 18, *Limari*, from Valparaiso; December 19, *Santa Rita*, from Port Harford.

Departures—December 15, *Ucayali* to Callao; December 16, *Guatemala*, to Callao; December 19, *Barracouta* to San Francisco; December 20, *Kansas City* to San Francisco.

Arrivals—December 23, *Mexico*, from Valparaiso; December 26, *Manavi*, from Guayaquil; December 26, *Mackinaw*, from San Francisco; December 26, *Aslec*,

from San Francisco; December 26, *Pennsylvania*, from San Francisco; December 27, *Tricolor*, from San Francisco; December 27, *Ecuador*, from Guayaquil.

Departures—December 22, *San Juan*, to San Francisco; December 22, *Peru* (P. S. N.), to Guayaquil; December 22, *Santa Rita*, to Port Harford; December 23, *Limari*, to Valparaiso; December 23, *Pachitea*, to Valparaiso.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

LOST—At the end of Pedro Miguel Bridge, or on rear coach of Train No. 22, December 25, hotel book No. 265784. Finder will please return to Board of Health Laboratory, Ancon, and receive reward.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sailing every Monday, leave alternately at 10 a. m. and 2 p. m.; the *Prins Joachim* and the *Prins August Wilhelm* at 2 p. m., and the *Prins Sigismund* and the *Prinz Eitel Friedrich* at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, JANUARY 8, 1913.

No. 20.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Cargo Handling at Balboa.

Cargo handling at Balboa docks was taken over by the Quartermaster's Department on January 1. The policy of the work and its internal economy will be directed by this department, but the workers will be carried on the rolls of the Panama Railroad Company.

Three berths at the pier, and two at the concrete wharf, comprise the docking facilities at the Pacific entrance at this time. All of the berths are filled most of the time, and frequently ships wait in the stream for a chance to dock. About 550 men are employed in the cargo handling in the day time and 250 at night.

Canal Work in December.

The grand total of Canal excavation to January 1 was 188,280,312 cubic yards, leaving to be excavated 24,223,826 cubic yards, or a little more than one-eighth of the entire amount necessary for the completed Canal. The total excavation for the month of December was 2,815,816 cubic yards.

The dry excavation amounted to 1,454,728 cubic yards, and was entirely by steamshovels. The dredges and monitors removed 1,361,088 cubic yards. The progress in the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 836,050 cubic yards. Of this total 16,677 cubic yards consisted of dry excavation at Gatun Locks, and the remainder was wet excavation—814,373 cubic yards from the Atlantic entrance, and 5,000 cubic yards dredged at Gatun Locks.

The total excavation in the Central Division was 1,074,510 cubic yards, which includes 29,892 cubic yards in the Culebra Cut section charged to Obispo Diversion.

In the Pacific Division, the total excavation was 905,256 cubic yards, 363,541 cubic yards of which consisted of dry excavation. Of the 541,715 cubic yards of wet excavation 349,747 cubic yards were from the channel,

and 191,968 cubic yards were taken out at the Balboa terminals.

A detailed statement of the excavation, and a summary of the work on the locks and dams follows:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.

Mean rainfall along Canal (ten stations) 6.51 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as a prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Dry Season Work in Culebra Cut.

Excavation in Culebra Cut will be carried on during the dry season with the object of having all the work done by the beginning of

the next rainy season, except that in the two and one-half miles between Empire and Cucuracha.

A special effort will be made to dig out the slide on the west bank of the Canal at Culebra. Two shovels are at work on it, and the train service will be so arranged that these shovels will lie idle the least possible time, even though shovels elsewhere may be discriminated against in consequence. One shovel is now digging from the top of the bank, and it is probable that others will be added.

A new slide was developed on the east bank of the Canal opposite Culebra within the past month. The bank has broken for a thousand feet along the face, and if all of the material within the break slides into the Canal, it will probably aggregate a million cubic yards. Two steamshovels are excavating from the bottom of the slide.

Two steamshovels have been set at work completing the excavation in the anchorage basin at the north end of Pedro Miguel lock, and in the Cut nearby. The work includes bank excavation, taking a small amount of material from the bottom and cleaning up the small slides that have developed. It is expected that all the work between the locks and Cucuracha slide will be finished by March 1.

The break in the east bank of the Cut at Empire near the office of the Division Engineer showed further development on January 3, when about 125,000 cubic yards of material fell into the Canal. One shovel is at work on this slide.

Recent Slide Developments.

Early in December a slide on the east bank of the Canal opposite Culebra "Y," which had given evidences of its probable appearance some months previously, began to settle and move towards the Cut. This slide involves a little over 1,000,000 cubic yards of material, but it is not believed that all of this amount will have to be excavated and removed from the Cut. Two shovels are now engaged in working on the face of the slide with the view, if possible, of checking its further development and of cutting a bench into the bank in which broken material from the slide will fall and thereby be prevented from entering the prism of the Canal proper.

A portion of the Cucuracha slide, which has given very little trouble in the past two or three years, commenced a fairly active movement four or five weeks ago and within the past week a considerable additional amount of material has been brought down into the Canal. The total amount of material now in sight which will probably have to be removed is about 125,000 cubic yards. Two shovels are now working on this slide and will soon have all material which has entered the cut cleaned up.

The slide in the sharp ridge, immediately adjoining the north end of the Division Engineer's office, which had given no trouble

NOTES OF PROGRESS.

(Continued.)

for a year or more, but which threatened the safety of the Division Engineer's office about six weeks ago, began to move very rapidly towards the Cut on January 2, the rate of vertical subsidence on the afternoon of January 2 being four feet in 17 minutes. The moving material passed into the Cut, completely covering the two tracks on the west side of the drainage ditch, the total amount of material now in motion being about 125,000

cubic yards, but as the broken edge on the land side is practically vertical for a depth of at least 50 feet, it is probable that this slide will extend further and will eventually require abandonment of the present division office. One shovel is at work removing the material which has fallen into the Cut from this slide.

The total amount of material moving in the three slides just enumerated, all of which have become active, within the past few weeks, amounts to about one and a quarter million

yards, or the equivalent of a little more than one month's Central Division excavation.

Gatun Dam Spillway.

The concrete work in the Spillway at Gatun Dam is over 94 per cent completed, 212,547 cubic yards, out of a total of 225,000, having been placed at the close of work on January 4. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete laid.	Hours worked.	No. mixers used.
December 30.....	Cu. Yds. 220	7.25	1
December 31.....	204	7.75	1
January 1, 1913.....			
January 2.....	190	6.00	1
January 3.....	164	5.75	1
January 4.....	204	7.50	1
Total.....	982	34.25	1
Previously reported...	211,565		
Grand total.....	212,547		

CONCRETE WORK IN THE LOCKS.

Over 94 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on January 4, the amount in place being 4,204,983 cubic yards.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on January 4 being 1,916,274 cubic yards, out of a total of 2,043,730. A statement of the amount placed in the locks each working day of the week ending January 4, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers.	Concrete placed.	Hours worked.	No. of mixers.

Total.....	1,828	30.46	2	1,828
Previously reported.....	1,914,446
Grand total.....	1,916,274

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 99 per cent completed, 902,277 cubic yards, out of a total of 903,000, bucket measurement, having been placed at the close of work on January 4. The record for each of the working days of last week, follows:

DATE.	AUXILIARY PLANT.						Mixed by hand	Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.					
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

EMERGENCY DAMS.

Construction Advancing at Gatun—Pedro Miguel Work Begins this Week.

Each emergency dam will contain about 2,350 tons of steel. All of the material for the east dam at Gatun Locks is assembled, all that for the west dam is on the ground and erection has been begun; 840 tons for the east dam at Pedro Miguel lock has been delivered, and 130 tons for the west dam. No deliveries have been made of materials for the emergency dams at Miraflores Locks.

All of the structural material, and the turning and wedging machinery for the east dam at Gatun, have been assembled, and 80 per cent of the 62,000 rivets have been driven. All of the wicket girder and gate hoisting machines have been set in place. Work on the electric cables and conduits is advancing rapidly. The completion of this dam will depend upon the rapidity with which the counterweight of concrete and pig iron, 1,000 tons in all, can be placed upon the short arm of the cantilever, and the operator's house can be erected upon the counterweight. The building of the counterweight will be begun this week.

Installation of the machinery for the turning and wedging machinery has gone hand in hand with the erection of the structural material. The purpose of this machinery is to swing the dam across the approach to the lock, and to wedge it in place. The dam swings upon a pivot in the masonry, and the end containing the counterweight rests upon steel track embedded in the wall. The swinging movement is accomplished by two pinions in mesh with a rack track fixed in the masonry. Each pinion is in mesh with a separate train of gear wheels, which are engaged by an equalizer gear, which has the function of equalizing the tooth pressure on the two main pinions. The equalizer gear is actuated by two motors in the operating house, using alternating current, and especially adapted for intermediate service, because the dam will be turned only at long intervals, and the time of operation will be only two minutes. The motors are capable of developing 110 horsepower in this interval.

Six wedges, two at each end of the dam, and two in the center, will hold the dam in place when it has been swung across the lock approach. These wedges will be driven by machinery. The great force required for this purpose is obtained by means of a double toggle joint near each wedge, actuated by a worm and worm gear driven by a train of gear wheels, which in turn is driven through line shafting by a motor. This motor is installed at the center of the dam, is for alternating current, adapted for intermittent service, and will develop 25 horsepower during the wedging operation.

Machines for hoisting and lowering the wicket girders consist of a train of gear wheels driving a worm and worm gear, which actuate a drum upon which the cable is paid in and out. There is one set of these for each pair of girders, 6 in all on each dam. Each machine is actuated by a separate motor. Machines for lowering the gates in the wickets consist of drums driven through a train of gears connected with a motor. There are a set of five gates in each pair of girders at Gatun and Pedro Miguel dams, and each set is actuated by a separate motor. The construction of one dam requires the installation of 15 motors with various machines that they drive.

Erection work is in progress on the west dam at Gatun. The center pivot upon which the dam swings, and the rack and track segments have been embedded in the concrete. About two-thirds of the vertical trusses, and the intermediate sway frames have been assembled. Only a few rivets have been driven. As soon as the rivetting of the east dam has been finished, in about ten days, the gangs at work there will begin to drive rivets on the west dam, the first work being on the short arm of the cantilever, which has already been assembled. The amount of material erected at present is about 700 tons, or a little less than one-third of the total.

At Pedro Miguel 840 tons of material have been received for the west dam, and 130 tons for the east dam. It is expected that the center pivot and rack track segments for the west dam will be placed this week. Erection will not be at its height however until the middle of February, when it is expected that all of the heavy material in the west dam at Gatun will have been placed, and the crane now in use there can be moved to Pedro Miguel.

Rainy Season Precipitation—1912.

While the rainfall on the Isthmus for the calendar year 1912 was everywhere deficient along the immediate Pacific Coast, the fall during the rainy season of 1912, May to December inclusive, was not materially below the normal for this period, the greater part of the 1912 deficiency occurring during the dry season. The 1912 rainy season totals exceeded the values for the same period in 1911 at all stations except Rio Grande, Camacho, and Monte Lirio.

A comparative statement of the 1911, 1912, and average rainy season precipitation is given in the subjoined table:

STATION.	1911	1912	Average for years of record	1912 per cent of average

STEAMSHOVEL RECORDS.

Work of Central Division Machines in December.

During the month of December the total amount of material excavated in the Central Division was 1,074,510 cubic yards, of which 125,264 cubic yards were classified as earth, and 949,246 cubic yards as rock.

Of the total 1,016,866 cubic yards were primary excavation in Canal prism, and 57,644 cubic yards were classified as plant excavation.

The total of 1,074,510 cubic yards was removed by steamshovels.

The high record for the month was made by shovel No. 209 working 18 days in the Empire district and 5 days in the Culebra district, which excavated 51,746 cubic yards of rock.

The second best record for the month was made by shovel No. 262 working 25 days in the Empire district, which excavated 48,393 cubic yards of rock.

The best record for a shovel of the seventy-ton class was made by shovel No. 101 working 23 days in the Obispo Diversion in the Empire district, which excavated 29,892 cubic yards of earth.

Shovel No. 222 working in the Culebra district made a high record for one day by excavating 3,534 cubic yards of rock on December 3.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month and for one day are shown in the following table:

Immigration at Ports of Ancon and Panama in December.

The number of persons who landed at the ports of Ancon and Panama from foreign ports during the month of December was 398, consisting of 319 cabin, and 79 steerage passengers. The number of persons who embarked for foreign ports was 594 consisting of 449 cabin, and 145 steerage passengers. The number of persons who embarked from these ports over those who landed was 196.

LOST—On December 30, between Ancon Hall and House 166, Ancon, a bank book of International Banking Corporation, check book, and receipt book. Reward for return to B. H. Post, House No. 166, Ancon.

LOST—Will the person who took by mistake a large silk knit scarf on December 3 at the New Year's Eve dance, Kangaroo Hall, Empire please return the same to Mrs. E. R. Moore, House 153-D, Empire, and receive her own in exchange?

By Americans—

LIGHTING THE LOCKS.

System Provides for Thorough Illumination.

Exhaustive studies of the illumination of the locks have been made in order that a distribution of light best suited to all of the conditions may be secured. A few concrete lamp posts have been erected on the walls of the upper locks at Gatun, and a pair of bracket arms for trial are being cast at the Gatun concrete yard.

Lighting of the locks divides itself into three distinct classes—exterior, interior, and machinery room. A different system and a different lamp unit are required for each class. An effort has been made to design a distribution which will produce a correct illumination in a pleasing manner, with attractive fixtures, illumination of proper intensity and distribution, and the direct light of the lamp (intrinsic brilliancy of the filament) causing the least possible inconvenience to the eye; in short, an installation that will approach sunlight distribution as closely as possible. Advances during recent years in lamp manufacture make it possible to obtain nearly white light by the use of the metallic filament lamp, and to obtain nearly uniform distribution of lighting flux by the use of a properly designed reflector.

EXTERIOR LIGHTS.

The exterior lamp installation at the locks is somewhat at a disadvantage. Inasmuch

the lock chamber. Isolux diagrams have been constructed to give a graphical representation

FIG 1—LAMP STANDARD

A. Post, B. Pedestal, C. Outlet Box, D. Bracket, E. Reflector, F. Cap.

of the distribution of the lighting flux. Differ-

0.25 and 0.1 foot-candles. The entire reflector, with lamp and socket, is to be weather-proof, suited in every respect to resist the deleterious effects of tropical deterioration.

The exterior lamp units are to be set thirty feet above the coping, bracketed from an ornamental concrete lamp standard. The standards are aligned longitudinally and transversely, alternate lamps being spaced on from fifty to sixty-foot centers. The general design of the standard and concrete bracket reflector are shown in Fig. 1, and the position of the standards relative to the lock chambers is shown in Fig. 2. The proportions of the standards are massive, conforming to the heavy construction of the masonry. The standard is 12-sided and tapers from 1 foot 10 inches at the top to 3 feet six inches at the base of the pedestal. It is planned to build the larger portion of the pedestals in position, and to cast the columns in the yard, erecting the latter with a crane. Ten columns and several additional pedestals have already been erected at the Gatun Locks. Both the pedestal and column contain a large core, serving the double purpose of reducing the weight and of furnishing a runway for the electric wires. About $3\frac{1}{2}$ yards of concrete and 750 pounds of steel reinforcement will be required in the construction of each standard, of which there is a total of 511—211 at Gatun, 131 at Pedro Miguel, and 169 at Miraflores.

FIG. 2—CROSS SECTION OF LOCKS SHOWING ILLUMINATION SYSTEM.

1 Lamp Post. 2 Operating Tunnel. 3 Cylindrical Valve Room. 4 Rising Stem Valve Room.

as ships are to traverse the Canal at night, it is necessary that an excellent intensity be maintained on the coping and in the water chamber, and, furthermore, it is of prime importance that brilliant sources of illumination be shaded from the eye of an approaching pilot, permitting thereby an unhampered vision of all range and signal lights. The eye can untiringly accommodate itself, with excellent vision, to a very low intensity of illumination, such as moonlight, provided there exist no random interference possessing a relatively intense brilliancy. Any bright spot, however, renders vision indistinct, difficult, and fatiguing.

In the selection of exterior lamp units, a thorough investigation was made of different types of lamps and reflectors, and tests were conducted at Gatun Locks to determine the general characteristics and suitability of certain promising lamp and reflector units. The usual method employed in investigating a lamp characteristic has been to take its distribution curves, and to calculate the theoretical illumination at several points both on the wall coping and on the water surface in

ent illuminations are produced for different heights of lamp, and it was necessary to determine, in addition to a proper intensity, a proper height of the illuminating source.

The type of outside lamp finally selected is a large power tungsten bulb (400 watt) set in a concrete hood. The area to be illuminated extends three hundred feet back of the lock chamber, necessitating two types of lamp standards—single bracket and double bracket. The single bracket standards are to be used on the center wall, where the lamps are staggered so as to illuminate both lock chambers. The double bracket is to be used on the side wall, where it is desired to throw the lighting flux back of the lock chamber, for a considerable distance. The reflector is to be cast of concrete, and provided with shading skirts, which will prevent the glare of the lamp filament from penetrating into distance along the axis of the Canal, for the skirts will cut off the direct rays on the coping level at approximately forty one feet from the center of the post. The illumination on the lock coping will probably vary between the limits of 0.7 and 0.1 footcandles, and on the upper water surface of the chamber, between

Electrically, the lamps are connected alternately upon separate circuits, providing thereby a duplication of wiring, as well as a means of economical operation whenever only half illumination may be required on bright moonlight nights. Arrangement is made in the wiring so that all the lamp circuits are remotely controlled by the attendant in the control house—the operating center for all the lock machinery and indicating apparatus. Remote control is accomplished through solenoid-operated circuit-breakers, the main contacts of which connect the lamp circuit) to the lighting bus of each transformer room,* the solenoid being connected to the control wires which are run from the transformer rooms to the control house.

Each lamp standard is to be provided with a special outlet box, located in the concrete pedestal. The outlet box is to permit the insertion of plugs to connect up a portable lamp circuit and a portable telephone circuit. A portable lamp may be required at any moment in the operation of the locks to place light on an electric locomotive or on the deck

*Transformer rooms described in *The Canal Record* of April 10, 1912.

of a passing vessel. A portable telephone is to permit a supervisor of lockages to communicate with the central control-house from any position on the lock walls. The outlet is placed in the pedestal of the lamp standard merely as a matter of operating convenience during lockages, the standards being accessible throughout the entire length of the lock walls. The box is to be made of bronze and will be provided with a hinged waterproof cover as a protection against the elements.

INTERIOR ILLUMINATION.

The interior illumination—operating tunnel and machine rooms—is illustrated to a certain extent in Fig. No. 2. The tunnel, which connects the various machine rooms and operating centers, is seven feet in height, the floor being eight feet below the coping level. The tunnel is to be lighted normally during daylight hours through deck-lights located in the tunnel ceiling and spaced longitudinally on fifteen-foot centers. For illumination at night and on dark days, small 16 candle-power carbon-filament lamps (or 25-watt tungstens) are to be set in recesses in the tunnel ceiling, the lamps alternating with the deck lights on fifteen-foot longitudinal spacing. A special reflector will be cast from concrete and so designed that a proper diffusion of the light along the operating tunnel may be accomplished without a severe glare of the lamp filament striking the eye. There will be a total of 2,041 tunnel reflectors—952 at Gatun, 677 at Miraflores, and 412 at Pedro Miguel.

LIGHTS IN MACHINE ROOMS.

The machine room lamps and reflectors differ from the tunnel lamps only in the shape of the reflector, which will also be cast of concrete. Instead of being set in the ceiling, the machine room reflectors are to be grouted into recesses in the side walls, about six feet above the floor line. They are designed to throw the lighting flux outward and downward over the machines, and a cut-off screen (a concrete panel) is provided to prevent the glare of the lamp filament from striking the eye. During the day natural light will penetrate the machine rooms through manhole covers, which are equipped with small glass prisms. The location of the various machine rooms is shown in Fig. No. 2. There will be a total of 4,751 machine room reflectors—2,101 at Gatun, 1,524 at Miraflores, and 1,126 at Pedro Miguel.

Both the tunnel and machine room lamps are fed from panel boards (total number, 66) distributed throughout the lock walls. The panel boards are of the fused, branch-circuit type, with both main switch and branch switches. Eight hundred additional circuit switches are distributed among the machine rooms, breaking the circuits from the panel boards into smaller groups. Seven hundred receptacles for portable lamps are also provided among the various machine rooms.

All lighting is to be upon a 110—220-volt, 25-cycle, alternating-current, three-wire Edison system. The copper wires possess large cross-section area to produce a minimum drop and a consequential excellent regulation. Special provision will be made to obtain unusually excellent insulation. Joints will be avoided, the wires being looped into the lamp and receptacle terminals wherever practicable. The wires for lighting circuits will be run in longitudinal chases which are cast into the

upper corners of the operating tunnel. The chases are T-shaped and will be covered with concrete after installation of the wires. Branch chases connect to all recesses and to all machine room lamps.

Society of the Chagres.

At a recent meeting of the Executive Committee it was decided to hold the Annual Meeting and Banquet of the Society at the Hotel Tivoli, Ancon, on the night of February 21, 1913.

Tickets to the banquet will cost \$3 each and will be ready for issue on or about February 10. Prior to that time a plan of the table arrangements will be furnished each member and he will be requested to advise the undersigned where or near whom he desires to sit. It is suggested that members from each community consult on this question and group themselves, in order that everyone may have neighbors with whom he is acquainted. Seating requests will be followed as closely as possible, but as it is expected that about four hundred members will attend the banquet, it will not be possible to conform in all instances, so preference will be given to those requests which are received earliest. When the tickets are mailed there will be enclosed with each a completed plan of the seating arrangements with a list of those who will attend. Opposite each name will be shown the seat number to which member has been assigned, and this same number will also appear on ticket. This will eliminate delay and confusion in seating.

A canvas of the votes received for officers for the ensuing year will be made at the Annual Meeting and those elected will assume office.

A special train for members of the Society only will leave Colon at about six o'clock p. m., February 21, and returning leave Panama at about one o'clock a. m., February 22, 1913. As Panama will be crowded with visitors all during the month of February, members who desire to spend the night there are advised to make room reservations at the various hotels several weeks in advance.

It is desired to make this banquet the most successful ever given on the Isthmus by any organization, and to this end the cooperation of every member is earnestly requested. Suggestions are welcome.

W. F. SHIPLEY, *Secretary-Treasurer*.
Cristobal, C. Z., December 21, 1912.

Church Notes.

Empire Union Sunday school held a semiannual election of officers at the session on December 31. The Rev. A. A. Nellis, chaplain of the Christian League, was chosen superintendent; Mr. Garwood, assistant superintendent; Miss Marion Blake, secretary; and Mrs. Philip Kelly, treasurer. The Sunday school has an enrollment of 140 and the average attendance for the past six months has been 125.

The Empire Christian League held its semiannual meeting with election of officers in the Commission chapel on Tuesday evening, January 7. Following the business meeting there was a short program of music and a reception was held in honor of Mr. and Mrs. E. P. Beck, who are leaving for their home in Oregon on January 23. Mr. and Mrs. Beck have been active workers in the Empire church since 1907. At one time, Mrs. Beck

was president of the women's section of the Christian League.

The monthly meeting of the Isthmian Minister's Association was held at Gatun on Monday, January 6. The Rev. Charles O. Purdy, chaplain of the Union Church, was the speaker.

On Saturday evening, January 4, the Catholic Club at Empire held a "hard time" dance.

Bishop Knight's Visit Postponed.

A cable message received by the General Missionary of the Panama Mission of the Episcopal Church states that the visit of the bishop of Cuba has been postponed until March. Bishop Knight was expected to arrive in Colon on January 8.

Secret Societies.

The first annual election of officers in Orchid Chapter, Gorgona No. 1, Order of the Eastern Star, was held on Saturday, December 29, and the installation will be on Saturday evening, January 10. The roster is as follows: Worthy Matron, Mrs. Eleanor Babbitt; Worthy Patron, John Devers; Assistant matron, Mrs. Laura Whipple; conductress, Mrs. Minnie Kosier; assistant conductress, Mrs. Anges McCombs; secretary, Mrs. Katherine Casey; treasurer, Mrs. Emma Fahr. The five points of the star are represented by Mrs. Cecil Lowe, Mrs. Stanner, Miss Ida Jordan, Mrs. Anna Lucavie and Mrs. Emma Wilson. The order was installed on October 25, 1910, by the Rev. Willis D. Engle, Most Worthy Grand Patron, who came from Indianapolis for that purpose. On August 25, 1912, the Order gave a ball at the Commission clubhouse, Gorgona. There are 85 members, this being the largest membership of any organization of women in the Canal Zone.

The second largest women's organization, Isthmian lodge, the Daughters of Rebekah, Gorgona No. 1, will install officers for the ensuing year on January 10. Mrs. Marie Jansen will be the Noble Grand, Mrs. Harry Rhodes, vice grand, Mrs. M. Perry, secretary and Mrs. W. Vickery treasurer. Mrs. W. E. McCann is leaving the chair at this installation. The membership is 60. The order was instituted on October 10, 1908.

I. O. O. F.

District Deputy Grand Sire, B. F. Sisson and suite were present at the 1st meeting of Canal Zone Lodge No. 3, Independent Order of Odd Fellows, on Saturday evening, January 4, and installed the newly elected officers as follows: Noble Grand, Randall T. Bradberry; Vice Grand, William J. McLaughlin; Secretary, Rev. J. L. Wise; Treasurer, Bruno Balduf.

The appointive officers of the lodge were also installed.

The various lodges of Odd Fellows in the Canal Zone are preparing a souvenir booklet containing a history of the organization with a list of the members.

United Spanish War Veterans.

A special meeting of Chagres Camp No. 1 will be held in Kangaroo Hall, Empire, Sunday, January 12, at 3 p. m., for the purpose of a double installation of the officers of Chagres and Ladies' Auxiliary Camps, Refreshments will be served.

Cristobal Union Church.

The Christain Endeavor Society of the Union Church at Cristobal will hold a business meeting for the election of officers on Friday night, January 10, between 7 and 8. All members are requested to be present.

Missing Men.

Anyone having information regarding the whereabouts of the following named men, who are supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama: Scott Michael Rogers Beck, J. H. Strong, and C. M. Connor.

Anyone having information regarding the whereabouts of the following named men, who are supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD, Ancon: John or Jack Forrester, or Jack Darling, Jack Waters, and Edward B. Harrison.

Band Concert.

A concert will be given by the Isthmian Canal Commission band at Corozal, C. Z., on Sunday, January 12 at 4.30 p. m. The program follows:

1. March—*Wien bleibt Wien*.....Schramme
2. Selection—*The Rose Maid*.....Granichstaedten
3. Intermezzo—*In the Shadows*.....Finck
4. Overture—*Stradella*.....Flotow
5. Popular Song—*Moonlight Bay*.....Wenrich
6. (a) An Old-time Shuffle—*The Darkies'*
Dream.....Lansing
- (b) Danza—*Paca*.....Lansing
7. Descriptive—*Evening Idyls*.....Barnhouse
- Sunset, Evening Festivities, Dreamland.
8. Waltz—*Blue Danube*.....Strauss
9. March—*Distant Greeting*.....Doring

CHARLES E. JENNINGS, Musical Director.

The next concert will be given at Empire, January 19 at 6 p. m.

Misdirected Letters.

ANCON, C. Z., January 8, 1913.

The following insufficiently addressed letters, originating in the United States or its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressee:

Alexander, Tom	Kanzer, F.
Barrett, J.	Lancer, Thomas D.
Barton, Aldrich	Lister, George
Belanger, Charles (pkg.)	Lord, Benj. Garrett
Bentley, George J.	McArthur, Mrs. Naomi

Lost—On Sunday, December 15, near the Mount Hope railroad station, mileage book No. 9,269. Finder will please return to Box No. 144, Paraiso, and receive reward.

Lost—On some engine tying up at the Pedro Miguel engine house, a 12-size, thin model, 20-year case Elgin watch, together with metal check No. 136646. Finder will please leave at the engine house office, Pedro Miguel.

Lost—On January 2, either on noon train from Gatun to Colon, or in the railroad stations, an open face, gold, lady's watch with shark tooth fob attached. Finder will please return to Miriam Stevens, Cristobal, and receive suitable reward.

Lost—A Folding Brownie camera; was left on a seat at Cristobal Beach, Sunday evening, January 5, at 7 o'clock. Please return to house No. 241-A, Cristobal, and receive reward.

COMMISSION CLUBHOUSES.**Activities of the Young Men's Christian Association.****GENERAL.**

The meetings of the Forum, which were discontinued during the holidays will be resumed next week. Dr. A. J. Orenstein will deliver a stereopticon lecture on "Alcohol" at the following places on the dates named: Sunday, January 12, Corozal; Monday, January 13, Gatun; Wednesday, January 15, Cristobal; Thursday, January 16, Gorgona; Friday, January 17, Empire.

Miss MacLaren's date of sailing has been changed from January 8 to the 15th. Her last appearance will be at Pedro Miguel, on January 13, in the "County Chairman."

Dr. Edward T. Devine, Professor of Social Economy, Columbia University, Secretary of the Charity Organization Society of New York, and a world wide authority on economics will speak at the various clubhouses on the topic "The Abolition of Poverty" on the following dates: January 22, Cristobal; January 23, Gatun; January 24, Culebra; January 25, Empire; January 26, Corozal; January 27, Gorgona. Special music will be furnished at all of these events.

The Edith Harris Scott Concert Company will tour the Isthmus under the clubhouse supervision in February. The company is composed of Mrs. Grave Hall, a church soprano of Pittsburg, Mr. C. E. McAfee, concert pianist, Mr. Karl Malcherek, violinist, a former concertmeister of the Pittsburg orchestra, and Mrs. Edith Harris Scott, contralto, a well known concert singer and reader.

COROZAL.

The new class in Spanish started on Monday, December 30, and will meet on Tuesdays and Fridays.

The Corozal boys defeated the Balboa boys in a closely contested baseball game at Corozal on Saturday, January 4.

Gatun duckpin bowlers won three games from the Corozal team on the latter's alleys on Saturday night, January 4, with the following scores:

Gatun.				Corozal.			
Carlson....	71	97	85	Tougher....	89	77	74
Harper.....	72	87	90	Ryan.....	67	74	
Gibson.....	84	93	78	Harper.....			89
Sims.....	70	82	89	Sims.....	77		
Morrissey....	95	91	88	Wilkins....	85	86	
				Webb.....	99	89	94
				Patrick....	62	72	
				Bartlett....		83	
Totals....	401	450	430		394	406	426

The following are the high duckpin scores made during the week ending January 4: Souder, 103; Dalton, 103; Wilkins, 107; Sims, 123; Owens, 100; Webb, 103; Bartlett, 106. The only 200 score in tenpins was Wilkins' 211 score.

CULEBRA.

Approval has been given by the Acting Chairman for the construction of a reading room and library which will be located under the Quartermaster's Office, opening from the pool room.

Moving pictures will be shown on Saturday night, January 11, instead of on the date formerly announced.

Mr. Mengel won the prize for high score in bigpins and Mr. Brown the prize for high score in duckpins during the month of December, scores being 225 and 135, respectively.

EMPIRE.

The rag-time duckpin tournament for men, which opened on December 15, is about half over at the present time. Rodeighiro and Huson are first in the doubles with 642 pins for three games. Rodeighiro is first for single high score with 142 pins, Pinney is second with 139 pins. All games must be bowled by February 1.

The first aid class meets every Monday from 7 to 8 p. m. This class is open to all.

Miss MacLaren will read "The Music Master" at 8.15 o'clock Sunday night

GORGONA.

A smoker held on December 31 was attended by 400 men. The program was as follows:

Orchestra, 10th Infantry, several selections; Emery and Cogan; tenor solos by Messrs. Ringer, and Onkan; Bass solos by Messrs. Case and Kelly; Baton swinging by Mr. Kramer; piano solos by Mr. Wright; Wrestling bouts by Messrs. Shulte and Guinn, followed by Messrs. Brain and Dr. Funk. Refreshments and singing old folk songs.

The regular program will be continued as follows: Wrestling classes, Monday and Friday of each week; Boys classes, Tuesday and Friday afternoons; and the Ladies class on Friday afternoon. The Gorgona chorus will continue regular rehearsals on Wednesday of each week and will give a concert as soon as they are ready.

The following are high bowling scores for the week: Duckpins—King 100, 105, 100; Powell 103; Simka

102; Sims 103, 112, 116; Trieber 100; Moyer, 105; Davis 107, 102, 100, 105; Denst 100, 102, 110.

The December tenpin tournament resulted as follows:

	Won	Lost
Roper.....	26	4
Powell.....	18	12
Kepler.....	19	14
High average—Roper, 177		
High score—Powell, 244.		

GATUN.

"Open house" was held all day on New Year's Day. Volley ball was played in the morning. The boys' half mile race held outdoors at noon resulted: First, J. D. Garrison; second, Charlie Gray; third, Homer Garrison. P. K. Martinoff won the men's half mile run. In the afternoon the "Smiths" defeated the "Woolworths" in a tenpin match. In the evening the "Married Men" defeated the "Seniors" in a game of volley ball. The "Hubers" defeated the "Whistons" in a match game of basketball. Several athletic contests were held for the boys.

Gatun defeated Corozal in three games of duckpins on Saturday, January 4. The same evening Culebra defeated Gatun in four out of five games of volley ball.

A local volley ball tournament will be organized in the near future.

Mr. W. B. Childers has been appointed a member of the Gatun Y. M. C. A. Executive Council.

Miss Cervera of Panama city will play several piano selections at a meeting of "The Forum" to be held on Thursday, January 23.

CRISTOBAL.

On Wednesday night, January 1, there was an attendance of 175. Mr. G. K. Weston sang, and used illustrated slides. The next moving picture date for Cristobal is January 10.

On New Year's day there was free pool all day with tables in constant use. Forty five games were played with one hundred and eleven players using the pool room.

The married men's gymnasium class will meet weekly on Monday and Thursday nights at 8 p. m., under Mr. Schulte, the physical director.

The duck pin bowling contest held on December 31, and January 1, for the championship of the Isthmus resulted as follows:

Five-man Team Event.

1. Cristobal team.....	1,327
2. Gatun team.....	1,306
3. Empire team.....	1,297
4. Corozal team.....	1,206

Singles.

1. Herrington, Cristobal.....	304
2. Claherty, Gatun.....	291
3. DePolter, Gatun.....	283

Doubles.

1. Barrett and Bullard, Cristobal.....	574
2. Mosher and Herrington, Cristobal.....	566
3. Smith and Weston, Cristobal.....	562

High Score for the Day.

Claherty, Gatun.....	111
Herrington, Cristobal.....	111

(Claherty won on the roll off.)

Points on Point Trophy.

Empire.....	1
Corozal.....	½

(Gorgona and Culebra forfeited.)

78 entries were made and 40 different men from the six associations participated.

A local duckpin league tournament will be started January 13.

PORTO BELLO.

Practically all the residents of Porto Bello participated in the outing given under the auspices of the Sunday school on New Year's Day. The picnic was held in the little cove just at the entrance to Porto Bello Bay. Messrs. Conklin, and Quayle loaned their launches for the occasion. After a dinner served by the ladies, athletic events were run off as follows: Tug of war, boys vs. girls—Girls won; tug of war, five men teams representing transportation, steamshovel, shopmen and clericals—won by transportation, Mr. VanVoy, captain; three legged race (children)—Pauline Smith and Ruth Reichart won; four legged race (men)—won by Mr. Urwiler; wheel barrow race (men)—Won by Urwiler and Woods; 100-yard dash (men)—Hoehne, first, Woods second; 50-yard swim (men), Hoehne first, MacDonald second; 25-yard swim, men, vs. ladies, men handicapped 5 yards, Hoehne first, Miss Warner, second; 40-yard swim for boys, Claude Smith first, Irwin Buser second, Howard Geyer third; 20 yard swim for girls, Pauline Smith first, Lilian Quinn second, Dorothy Reichart third. The request has been made that another outing be arranged for Washington's Birthday.

J. L. Tolar will give an illustrated address on "Cuba" on Sunday night, January 11. The following Sunday night the "Life of Moses" with stereopticon views will be the subject of a lecture by Mr. Page.

OFFICIAL CIRCULARS.

Restrictions in the Use of Water during the Dry Season.

CULEBRA, C. Z., December 31, 1912.

CIRCULAR No. 183-E:

A necessity exists for restricting the use of water from the Camacho, Rio Grande, and Cocoli reservoirs during the dry season.

The use of garden and other hose for watering plants and flowers is prohibited except by authorized gardeners and employees of the Quartermaster's Department.

District Quartermasters are directed to report all leaks in faucets or pipes and all violations of this order.

H. H. ROUSSEAU, Acting Chairman.

Acting Disbursing Officer.

CULEBRA, C. Z., December 31, 1912.

CIRCULAR No. 472.

The duties of the Disbursing Officer on the Isthmus will be assumed by Mr. William M. Wood on January 1, 1913, to serve in that capacity during the absence of Mr. Edward J. Williams, on leave.

H. H. ROUSSEAU, Acting Chairman.

Acting Examiner of Accounts.

CULEBRA, C. Z., December 31, 1912.

CIRCULAR No. 471.

Effective January 2, 1913, Mr. T. L. Clear will act as Examiner of Accounts during the absence of Mr. A. A. Smith.

H. H. ROUSSEAU, Acting Chairman.

CULEBRA, C. Z., January 3, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Please make special efforts to release flat cars promptly during the next five days, on account of lumber at Balboa and Colon waiting for cars.

H. H. ROUSSEAU, Acting Chairman.

Proposals for Furnishing Plants and Seeds.

OFFICE OF DEPOT QUARTERMASTER,

MOUNT HOPE, C. Z., January 6, 1913.

Sealed proposals will be received at the office of the Depot Quartermaster, Mount Hope, until three o'clock p. m., February 1, 1913, when they will be opened in the presence of attending bidders, for furnishing, in cars at any station on the Panama railroad, 1,200 cocoanuts, 1,000 sugar cane plants and 5,000 white yam heads for planting; 1,000 banana plants, 1,000 plantain plants, one bushel seed sweet potatoes, two bushels Kafir corn seed, and two bushels sorghum cane seed. Best quality only is desired and samples must be submitted. Proposals should show unit prices. Cocoanuts are to be supplied at earliest practicable date and the other items to be delivered during April 1913. The right is reserved to reject any or all bids, or any combination of bids. Envelopes must be plainly marked; "Proposals for furnishing plants and seeds, to be opened February 1, 1913," and addressed to

C. NIXON,
Purchasing Agent on the Isthmus.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon and Balboa, during the week ending January 4:

Corrillo, December 29, from New York, with 21 cases valve parts for Superintendent of Erection; 8 cases solder, 63 cases water coolers, 12 pieces steel channels, 200 pieces steel angles, 18 cases hardware, for stock.

Tricolor, December 30, from San Francisco, with 818 pieces Douglas fir lumber, for Atlantic and Pacific Divisions; 2,525 switch ties, 271 pieces piling, 30,344 pieces Douglas fir lumber for stock.

Mackinaw, December 28, from San Francisco, with 640 bales hay, for stock.

Pennsylvania, December 28, from San Francisco, with 59 cases of babbit metal, for stock; 8 bales dredge sleeves for 6th division Chief Engineer's Office.

Prinz Eitel Friedrich, December 30, from New York with 8 reels, steel hawsers, for Atlantic Division; 157 pieces structural steel, 11 bundles structural steel, 23 cases structural steel for Panama Railroad Company.

Asian, December 30, from Liverpool with 600 barrels carbolic acid, for stock; 2 pieces hoisting chain, for 6th division Chief Engineer's Office.

Santa Maria, January 1, from New York, with 27 cases electrical material, 7 reels cable, for Superintendent of Erection; 5 cases electrical material for Panama Railroad Company; 60 cases putty, 60 cases varnish, 50 crates galvanized buckets, for stock.

Haakon VII, January 2, from Fernandina, with 2,737 pieces piling, 2,996 pieces yellow pine lumber, for stock.

Atenas, January 2, from New Orleans, with 1,163 pieces yellow pine lumber, 16 pieces piling, 167 pieces cross ties, 413 sacks feed, 320 pieces pipe, 15 bundles

pipe fittings, 200 cases cup grease, 50 pieces steel castings, for stock.

Allianca, January 3, from New York, with 6,000 pieces splice bars, 116 kegs bolts, 1,194 cases sashes, 13 barrels tiling, for Panama Railroad Company; 39 reels cable, 21 cases electrical material, for Superintendent of Erection; 20 crates handles, 68 cases caustic soda, 360 cases linseed oil, 40 bales oakum, 30 cases napkins, for stock; 90 barrels potash, for Mechanical Division; 25 cases rubber boots, for Atlantic Division; and a miscellaneous cargo, the whole consisting of 5,200 packages, weighing 260 tons.

Norhilda, January 3, from Baltimore, with 13,000 cases of dynamite, for stock; 1,629 bundles steel bars, for 6th division Chief Engineer's Office; 185 bundles steel bars, for Atlantic Division; 180 packages rack castings, 8 cases gate machinery, 237 cases valve parts, for Superintendent of Erection.

Rainfall from December 1 to 31, 1912, Inclusive.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sail thus: the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m., and the *Prinz Sigismund* and the *Prinz Eitel Friedrich* on alternate Mondays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

CANAL

RECORD

Volume VI

ANCON, CANAL ZONE, WEDNESDAY, JANUARY 15, 1913.

No. 21.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

North Guide Wall at Gatun Locks.

Excavation for the Atlantic approach to Gatun Locks has disclosed, at about 150 feet beyond the lower end of the locks proper, a sharp dip in the rock on which the center guide wall is to rest. The rock beneath most of the site lies under alluvial earth and mud, from 40 to 117 feet below sealevel. After excavation is carried about 40 feet below sealevel, piles are driven to rock. Where the plane dips, the rock lies about 90 feet below sealevel.

It has been decided to build the wall 200 feet shorter than was proposed in the original plans. At this it will be 1,015 feet long, six feet longer than the corresponding wall at the upper end of the locks. It will be longer than any ship that the 1,000-foot lock chambers can receive, or than any group of ships that might be passed through the locks simultaneously. Ships other than those which can be accommodated immediately will wait in the anchorage basin in Limon Bay, and approach on signal when the locks are ready for their passage. Curtailing the construction will save 9,000 yards of concrete, the driving of about 30,000 feet of piling, 800 linear feet of timber buffers, and an indeterminate amount of expensive excavation.

Breakwater at Atlantic Entrance.

The trestles for the breakwater at the Atlantic entrance to the Canal have been completed to their full length of 11,700 feet from the shore; and the core of the jetty, composed of rock quarried at Toro Point, is also completed. This core is composed of 819,930 cubic yards of rock, and in addition there have been placed upon the breakwater proper about 547,842 cubic yards of material dredged from the Canal. The armoring of the mole with hard rock from Porto Bello advances steadily, and at the close of December, 134,390 cubic yards of this rock had been dumped. The total amount of material of all kinds dumped within the area of the breakwater proper

is 1,502,362 cubic yards and there remain to be placed over 600,000 cubic yards.

During the past two weeks heavy seas have been running in Limon Bay but these are an advantage rather than otherwise at this stage of the work, because they help in reducing the seaward face of the jetty to its proper slope. As planned, the sea face of the mound is on a slope of 1 on 2 from the top (about 10 feet above mean tide) to a point 15 feet below mean sealevel. There it assumes the steeper slope of 1 on $1\frac{1}{2}$. The rock is dumped upon the jetty from the top and from the inshore side, and when the sea is calm it has a tendency to pile up on a steeper slope than that planned. The beating of the waves upon this piled up mass gradually reduces it to its proper slope.

Slide in West Bank of Culebra Cut.

Early in the morning of January 11 a portion of the west bank of the Cut, opposite Mount Zion Hill, Culebra, moved about thirty feet laterally towards the center of the cut, destroying the tracks on the two upper benches, west side, and preventing access during the day to steamshovel No. 219 working on the 95-foot berm on the west bank of the Canal. The total amount of material in motion was between two hundred and fifty and three hundred thousand cubic yards, but a considerable portion of the displaced material lies entirely west of the prism and will probably not have to be removed.

Steamshovel No. 204 was cut in at the toe of the slide on January 13 and the incline track from the 96-foot level, which had been out of commission during the entire day of the 11th, was again in working order on the morning of January 13.

Road from Diablo to Ancon.

A macadam road is being built from a point just east of the crossing of Corozal-Diablo road and Panama railroad to a point in Ancon, near the Hotel Tivoli. The road is to parallel most of the way the main line of the Panama railroad, and will utilize for a distance of 2,400 feet the bed of the old line of the railroad, from Diablo to the place at which it is intersected by the relocated line. Beyond that point it will continue along the east side of the railway, with a clearance of no less than 30 feet, on a fill to be made by dumping spoil from Culebra Cut. This fill will extend to a point about 300 feet south of the tower at Balboa Junction. There the road will cross the single track leading to Panama, and will pass over the fill within the triangle enclosed by the main line, the Balboa wye, and the branch line to Balboa of the Panama railroad. Crossing the Balboa branch near the building to which the lock models were recently transferred, the highway will join the street leading to the Tivoli Hotel. The road is to be 16 feet wide 9,600 feet long, and will lie entirely within the

Canal Zone. The distance to the summit of Caledonia Bridge from Corozal station by the present route is 22,000 feet.

The actual road construction is to be performed by labor of Ancon district prisoners. A laborers' barracks, normally accommodating 84 men, is being reconstructed on the plot of ground in rear of the Corozal police station, as a stockade for quartering the road-workers.

Decrease in Cost of Repairs to Unloaders.

The cost of repairs to unloaders used by the Central Division to unload spoil from flat cars has steadily diminished during the past three years. This has been due to careful supervision while the machines were under repair in the shops, as well as requiring unloader engineers to make all field repairs, and to the system of instruction and supervision of unloader engineers as to the proper method of handling the machines. A statement of the comparative cost follows:

MONTH.	1910		1911	
	M'hines in service.	Cost of Repairs.	M'hines in service.	Cost of Repairs.
January	11	\$7,499.80	10	\$4,584.83

Total	125	\$34,223.16

Dock No. 16 at Cristobal in Use.

Dock No. 16 at Cristobal was used for the first time on January 12, when the Peninsula and Occidental steamship *Evangeline* discharged its passengers on the quay along the east side. On January 13 the Hamburg-American steamship *Moltke* with a tourist party aboard berthed there, and at the same time six torpedo boat destroyers were also in the dock.

Brazos Brook-Gatun Lake Tunnel.

The 6 by 6 foot tunnel, through which is to be laid a 20-inch cast iron main for passing water from the Gatun Lake, as an auxiliary supply to the Brazos Brook reservoir, has to

NOTES OF PROGRESS.

(Continued.)

date been driven about half of its length of 400 feet. Driving is in progress from both ends along axes slightly inclined to insure drainage outwards. Each mining gang consists of about 8 West Indian laborers, working under an American foreman of mining experience. The drilling is done by hand, as the site of the tunnel is beyond connection with air or electric lines. The saddle beneath which the tunnel is being driven rises to an eleva-

tion of approximately 190 feet above sea-level, or 115 feet above the axis of the tunnel. This saddle is about $2\frac{1}{2}$ miles from the dam forming the reservoir.

All the material used in the construction must be hauled in wagons from the railroad at Mount Hope to the reservoir dam, a distance of $1\frac{1}{4}$ miles, and then is transported up the reservoir on a pontoon barge, towed by row boats. The water transportation extends about $2\frac{1}{2}$ miles above the dam, following a tortuous course among the hills.

From the wharf on which the materials

are unloaded from the barge, a Decauville track of a half meter gauge has been laid along the trail, a distance of 1,000 feet to the portal of the tunnel. This road will provide means for transporting sand, stone, cement, pipe, valves, etc., for the construction of the controlling works and gate-house.

The progress of the tunnel confirms the indication of the diamond drill survey as to the nature of the material through which it is being driven. The blue, argillaceous sandstone, dense and scarcely pervious, forms the body of the ridge above and below the axis of the tunnel. The walls and roof of the tunnel stand firm, and the driving has proceeded without hindrance or accident.

CONCRETE WORK IN THE LOCKS.

Over 95 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on January 11, the amount in place being 4,225,243 cubic yards.

GATUN LOCKS.

Over 94 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on January 11 being 1,921,988 cubic yards, out of a total of 2,043,730. A statement of the amount placed in the locks each working day of the week ending January 11, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

Gatun Dam Spillway.

The concrete work in the Spillway at Gatun Dam is over 94 per cent completed, 213,238 cubic yards, out of a total of 225,000, having been placed at the close of work on January 11. A statement of the amount laid each working day last week, and of the total in place, follows:

Internal Revenues.

Collections other than postal collections, by the Division of Posts, Customs and Revenues during December were as follows: Bicycle and chauffeur licenses, \$38; motor vehicle licenses, \$243; steamboat inspection, \$85.15; retail liquor licenses, \$21,000; taxes, license, etc. (Deputy Collectors of Revenues), \$13,650.34.

TRAFFIC CONGESTION.

One hundred and Seventy-five Trains through Single Track Tunnel in Ten Hours.

The site of Miraflores Spillway, for which excavation is in progress, is crossed by the double track over which the dirt trains leaving Culebra Cut from its south end pass on their way to the dumps. It will be necessary to remove the tracks from the Spillway site by the first of March. The possibility of raising them on inclines and spanning the site with bridges was considered, but as this would involve constant danger and interference it has been decided to take them out entirely and send the dirt trains over the main line of the Panama railroad, through the tunnel at Miraflores. Between Pedro Miguel and Corozal Junction the railroad has a single track. In order to cause as little congestion as possible the Central Division will construct two incline tracks north of the tunnel and build a second main track along the east side of the Panama railroad from the south end of the tunnel to Corozal, so that only about 1,050 feet of single track will be used.

Notwithstanding this arrangement, the centering of so much traffic at the tunnel will create the most difficult problem of transportation yet encountered in the Canal excavation. About eighty dirt trains pass out of the south end of the Cut, and back, during the ten hours between seven in the morning and five in the afternoon of a working day. During that time the Panama railroad runs six passenger and about ten freight trains through the tunnel. Approximately 175 trains are to pass over the single track in ten hours, which is at the rate of one in less than four minutes. A train 940 feet long, traveling at 10 miles an hour, will take not less than 48 seconds to pass clear of the single track span of 1,050 feet, and successive trains in the same direction can not pass over, with safe headway, faster than one a minute. Handling the trains in both directions through the tunnel will require expeditious management, with more time consumed by the passage of each train than would be the case were the movement all in one direction.

To facilitate train movement, the inclines over which dirt trains will be drawn from the present tracks, which are about 18 feet lower than the main line, for the shunt through the tunnel, will be built with easy grades except the one on which the empty trains will leave the tunnel. This will drop away on a grade of three per cent. At the north end of the tunnel the loaded trains will approach the mouth over a long incline, graded at a little less than one-half of one per cent. This incline will leave the Pedro Miguel yard near the coal chute, 650 feet north of the Pedro Miguel River, which it will cross on a pile trestle 300 feet in length, and then east of Pedro Miguel yards, and connect with the Panama railroad at the culvert just north of Miraflores passenger station. Trains will run left-handed on the inclines north of the tunnel.

The Panama railroad will begin shortly the construction of an interlocking system to operate the switches at the ends of the tunnel. An operating house will be erected at each end of the tunnel, with a system of signal towers to insure as safe control of trains as possible. The estimated cost of the interlocking plant is \$4,000.

Should any dumping be required after the completion of the new tracks the loaded trains can be sent to the dump by way of

WEATHER CONDITIONS, CANAL ZONE, YEAR 1912.

While the rainfall on the Isthmus during the calendar year 1912 was everywhere deficient, except along the immediate Pacific Coast, it was generally heavier than the annual rainfall in 1911.

The 1912 precipitation exceeded the values for the previous year at all stations except Rio Grande, Camacho, Alhajuela, Monte Lirio, and Porto Bello. The annual totals ranged from 71.78 at Ancon, to 147.61 at Porto Bello. The average fall over the Pacific Section was 76.59 inches, and over the Central and Atlantic sections 89.68 inches and 125.36 inches respectively. The maximum 24-hour rainfall recorded during the year was 7.23 inches at Ancon on May 12, and 13th.

The average annual temperatures were well above normal at all stations. March was the warmest month at Ancon, and April at Culebra and Colon, while November was the coolest month at all stations.

The mean annual atmospheric pressure and the relative humidity were below normal while average conditions of cloudiness prevailed.

There was a notable excess in the wind movement over the Isthmus. The prevailing direction was from the northwest at Ancon and Culebra and from the north at Colon. March was the windiest month at all stations, and June the month of least wind movement.

The weather conditions that prevailed during the year again favored a high rate of evaporation, and the annual totals were the highest of record.

The following table summarizes the weather conditions for the year.

STATIONS.	Pressure (reduced to mean of 24 hours.)	Mean.	Temperature				Mean relative humidity.	Precipitation			Wind				
			Maximum.	Date.	Minimum.	Date.		Total in inches.	Station average.	Number of rainy days.	Total movement (in fathoms.)	Prevailing direction.	Max. velocity (in miles.)	Direction.	Date.
Ancon.	29.835	80.7	97	Apr. 7	66	Feb. 1	87	71.78	71.25	153	70.04	N. W.	34	S.	June 15
Culebra.	29.846	79.6	96	May 5	65	Feb. 2	88	78.99	89.66	172	68.40	N. W.	36	N. E.	July 30
Colon.	29.861	80.7	91	May 5	71	Feb. 10	84	117.59	129.32	224	98.72	N.	38	S. W.	Oct. 23

WEATHER CONDITIONS, CANAL ZONE, DECEMBER, 1912.

While the rainfall in the Canal Zone during the month of December, 1912, was everywhere below normal, it was much heavier than the December rainfall in 1911. The monthly totals ranged from 1.53 inches at El Vigia to 11.52 inches at Porto Bello. The maximum fall recorded in one day was 4.04 inches at Miraflores on the 30th.

Monthly mean air temperatures were about normal at all stations, while there was a general deficiency in cloudiness, relative humidity, and atmospheric pressure.

The wind movement was below normal at Ancon, but slightly above normal at the interior and Atlantic Coast stations. No unusually high velocities were recorded during the month.

Average conditions of nighttime foginess prevailed at the interior stations. Of the fogs observed 63 per cent were dissipated by 6.30 a. m., 86 per cent by 7.30 a. m., and 98 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

STATIONS.	Pressure reduced to mean of 24 hours.	Temperature.					Mean relative humidity.	Precipitation.			Wind.				
		Mean.	Maximum.	Date.	Minimum.	Date.		Total inches.	Station average.	Number of rainy days.	Total movement (in miles.)	Prevailing direction.	Max. velocity (in miles.)	Direction.	Date.
Colon.	29.845	80.4	87	Dec. 2	67	Dec. 17	84	11.47	12.31	21	8,992	N. E.	23	N. E.	Dec. 13
Culebra.	29.828	78.8	88	Dec. 1	67	Dec. 18	91	4.87	7.68	15	5,567	N. W.	24	N.	Dec. 9
Ancon.	29.818	80.5	93	Dec. 5	69	Dec. 18	89	3.27	4.18	13	5,007	N. W.	20	N. W.	Dec. 16

an incline already built, east of the Panama railroad. It is believed, however, that the dumps at Miraflores will be completed by the first of March.

The work of laying out the lines of the inclines from the Pedro Miguel side of the tunnel began on January 3, and the construction of the new tracks will be pushed to completion. A total of about three miles of new track is to be built, and the filling required will amount to approximately 38,000 cubic yards.

The total cost of these track changes will exceed \$40,000.

It was first planned to build a double track incline south of the tunnel to connect with Central Division tracks about 2,000 feet north of Cardenas River. After the situation was carefully looked over by Central Division and Panama railroad officials it was decided to build a second main line along the east side of the P. R. R. main line from a point 250

feet south of the tunnel to Corozal junction. This will require only 1,000 feet more of track than the double track incline. The grade is easier, the expensive interlocking plant at Corozal junction will then not be necessary, and the track can remain for future use of the Panama railroad; whereas the incline tracks would have to be removed as soon as Culebra Cut is completed. Work will start at once; so as to have it completed if possible by March 1.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending January 25, 1913. (75th meridian time):

DATE.	High		Low

BUOYS FOR CANAL CHANNEL

Special Construction of Gas Buoys Necessitated by Local Conditions.

The sides of the Canal channel will be marked by gas buoys about every mile with intermediate spar buoys. Each gas buoy will consist of a cylindrical, floating, steel body surmounted by a steel frame which supports a light and lens at a height of 15 feet above water level. The body is eight feet in diameter, made of 5-16 inch steel plate with dished heads, to the bottom of which is attached a steel tube and counterweight. The draft of the buoy will be 12 feet, and it will be moored on its station by a heavy chain and a concrete sinker.

The corroding action of the salt water and sea air in the tropics is such that extra precautions must be taken to protect the buoys, and therefore the entire inside of the buoy is given first a coat of bitumastic solution, applied cold, and second, one coat of enamel applied hot. The exteriors of the buoys which will be moored in salt water will be given one coat of boiled linseed oil applied hot and two successive coats of the best quality of red lead, after which they will be treated with an antifouling compound.

The entire bed of what will be Gatun Lake, when the water is allowed to rise to an elevation of 87 feet, is covered with a dense tropical growth which in the state of decomposition causes the water to scour all ordinary paints from any kind of metal. To overcome this chemical action the exterior of the buoys will first be painted with red lead and linseed oil after which they will be painted with anticorrosive paint.

The lens and lantern at the top of the steel superstructure contains the source of light which in all buoys is a small acetylene flame of about 40 candle power. The rays of light of this flame when projected through the lens produce a light of about 450 candle power. The acetylene gas for each buoy is stored under about 150 pounds pressure in four tanks—technically known as accumulators; each accumulator being inserted in a pocket in the body of the buoy, from which it may be withdrawn when empty and replaced by a fully charged accumulator without taking the buoy out of the water. The gas of the four accumulators is led through piping to a manifold, thence up one leg of the steel superstructure to a governor in the base of the lantern. This governor reduces the high pressure to a uniformly low pressure which is required at the burner.

Each accumulator is a steel cylinder nine inches in diameter and 69 inches long, tested to 75 atmospheres and completely filled with a porous mass possessing a porosity of 80 per cent. Half of the porous space is occupied by acetone which is a peculiarly excellent solvent for acetylene. Acetylene dissolves as freely in it as sugar does in water, and the solubility increases with the pressure applied. Acetone dissolves 25 times its own bulk of the gas at ordinary temperature and pressure, and for each additional atmosphere of pressure to which it is subjected a similar quantity will be dissolved. Compressing acetylene to more than two atmospheres at a temperature of 71 degrees F. makes it liable to explosion but when the gas is forced into acetone, a mixture is secured which is free from danger of explosion, and therefore available for safe transportation and handling.

All the gas buoys will have flashing and

occulting lights, similar to those described for the beacons for Culebra Cut in THE CANAL RECORD of January 1, 1913, and to obtain the flashes and occultations, the gas issuing from the governor at the base of the lantern passes into a small device known as the flasher through a valve which remains open during the whole dark interval. When a certain pre-

GAS BUOY.

Focal Plane above Water line 15 feet. Eight of the buoys will be placed in the Atlantic Entrance, 6 in the Pacific Entrance, 43 in Gatun Lake.

determined quantity of gas has passed into the flasher, so that a flexible leather diaphragm is at the top of its stroke, the inlet valve instantaneously closes, and simultaneously the outlet valve of the main burner opens allowing the accumulated gas to pass

to the main burner where it is ignited by a constantly burning pilot flame. The gas outlet remains open until the total gas quantity has been consumed in the main burner, whereupon the outlet closes and the inlet opens, remaining open until a similar quantity of gas accumulates in the flasher, when the cycle of operations is again repeated. Thus the light and dark intervals alternate automatically and produce a flashing or occulting light.

The gas supply in each of the buoys will last from three to seven months depending upon the characteristic of the light, and will burn continuously day and night during that time. The acetylene gas will be made at the oxy-acetylene gas house at the Balboa Shops where it will be compressed and forced into the portable accumulators.

Postoffice Business.

Money orders were issued at Canal Zone postoffices in December to the amount of \$423,851.53, the number being 22,972. The stamp sales amounted to \$10,611 of which \$6,306.60 went to Panama.

Band Concert.

A concert will be given by the Isthmian Canal Commission band at Empire, on Sunday, January 19, 1913, at 6 p. m.

The next concert will be given at the Hotel Tivoli, Ancon, on January 26, at 8 p. m.

MUNICIPAL WORK IN PANAMA.

Maintenance of Streets and Sewers.

Maintenance of the street, sewer, and water systems in the city of Panama is carried on under the direction of an official of the Commission, the Superintendent of Public Works. In the routine work the fire hydrants are tested and flushed each month and necessary repairs made to them, and all valves on the water mains are tested at least once each month. All of the individual water connections in the city are metered, the water meters remaining the property of the Isthmian Canal Commission; there are 2,035 connections in use at the present time. These meters are read and bills rendered quarterly for water consumed. The usual work in connection with the sewer system consists of flushing the sewers and cleaning all of the manholes and catch basins at least once each month. Maintenance work on the streets consists of regular inspections, with such minor repairs to the pavements and to the concrete curb and gutter as may be needed. But in addition to this ordinary maintenance work, it is necessary to make more or less extensive repairs to the sewer system and to the pavements from time to time.

The most extensive piece of work in connection with the maintenance and repair of the sewer system during the past two years has been the construction of a wall for the support of the sewer outfall along the beach in the vicinity of West 17th and West 19th streets. The sand foundation, on which the sewer outfall was originally constructed, had been washed away to such an extent by the action of the tide that the outfall was broken in several places and it was impossible to repair it and maintain the proper grade on that foundation. Concrete supports were therefore constructed, resting on rock foundation, and the sewer pipe was laid in concrete, making an absolutely firm foundation for the outfall. Repairs were made to the outfall in September and October, 1911, for a distance of 234 feet and it has now become necessary to make similar repairs for a further distance of about 130 feet; work on this is now in progress.

Another piece of maintenance on the sewer system was the installation of nine large catch basins in various parts of Guachapali and Santa Cruz, and of three overflow connections between the sanitary sewer and the storm sewers. These installations were made so that the system would be better able to take care of the large amount of surface water on the streets during the heavy rains.

There are 117,353 linear feet or 22.2 miles of sanitary sewers, and 3,163 feet or 0.6 of a mile of storm sewers in the city.

Practically all of the streets of the city are paved with brick, concrete, or macadam, the relative proportions being as follows:

	Length.		Area.
	Feet.	Miles.	Sq. Yds.
Brick streets.....	24,870	4.71	64,227
Concrete streets.....	11,900	2.25	24,546
Macadam streets.....	28,508	5.40	61,879
Total.....	65,278	12.36	150,652

A part of the maintenance of the streets has been the removal of the basket gutters from the street crossings in various parts of the town. These gutters, which were a great hindrance to traffic and which were not necessary for drainage purposes, were filled and the pavement brought to the grade of the rest

of the street and the street intersections left with a level surface. Sixty-one gutters were removed in various parts of the city, most of them being in the brick paved streets.

In May, 1912, practically all of the lower part of West 20th street was washed out during a heavy rainfall, and extensive repairs had to be made. A retaining wall was built at the foot of the street, near the beach, and the street was then filled to the proper grade and macadamized; the concrete curb and gutter that had been washed out was also replaced.

Crude oil was first used as a binder on macadam streets in the city of Panama about a year ago and the results have been highly satisfactory. The oil was used on Avenue "B" extension in the vicinity of the Panama railroad freight house, and from there north. This is the oldest macadamized street in the city; and it has been in use for some time without repairs and was worn down so that there was very little screenings on the surface. The oil bound well with the macadam, completely laid the dust, and in addition afforded better surface drainage. California crude oil was used.

An improvement was made in the brick pavements about a year ago by putting a coating of hard tar on the steeper grades, where the bricks were worn and were very slippery. The tar was melted and poured on the brick and then covered with a thin layer of sand. All of the grades on Central Avenue were treated in this way and in many instances a second coating was applied.

The most recent maintenance work has been on the west end of B street and on Balboa Road. New concrete curb and gutter have been built on "B" street, and the Balboa Road has been entirely resurfaced. This work has just been completed.

During the past year a tramway system has been constructed in the city of Panama, but the pavement that has been removed in connection with this work has been replaced by the contractors. The total length of the tramway within the city is about 21,300 feet, not including double track and sidings, and all the track is now in place.

Visit of Second Division of Atlantic Fleet.

The Second Division of the Atlantic Fleet of the United States Navy, comprised of the battleships *Vermont*, *Michigan* and *South Carolina*, and the Fourth and Fifth Groups of destroyers, arrived in the harbor of Colon in the evening of January 12. The vessels are to lie there until January 17, and on each day a part of their crews is carried along the line of the Canal on a special train for the purpose of observing the work. This train leaves the special landing adjacent to the new Dock 16 at Cristobal, at nine o'clock in the morning. On January 13 accommodations were provided for 800 men, on each of three days thereafter, for about 1,200 men. The special train makes a stop of thirty minutes at Gatun, and stops at Gamboa, Culebra and other points of typical interest along the line. On the return trip to Colon the train leaves the station at Panama at 2.30 p. m. A baggage car is attached to the train for the use of those who desire to take their lunches with them, the morning and evening meals being eaten on board the ships. No special train is provided for the officers, who are passed, in uniform, on all passenger trains.

The facilities of the various departments of the Commission and the Panama railroad

have been placed at the disposal of the fleet. A special edition of 25,000 copies of the Official Handbook, compiled by the Secretary of the Commission, has been printed at the Mount Hope plant to be distributed among the sailors.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, January 11, 1913. All heights are in feet above mean sealevel.

Proposals for Furnishing Plants and Seeds.

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., January 6, 1913.

Sealed proposals will be received at the office of the Depot Quartermaster, Mount Hope, until three o'clock p. m., February 1, 1913, when they will be opened in the presence of attending bidders, for furnishing, in cars at any station on the Panama railroad, 1,200 coconuts, 1,000 sugar cane plants and 5,000 white yam heads for planting; 1,000 banana plants, 1,000 plantain plants, one bushel seed sweet potatoes, two bushels Kafir corn seed, and two bushels sorghum cane seed. Best quality only is desired and samples must be submitted. Proposals should show unit prices. Coconuts are to be supplied at earliest practicable date and the other items to be delivered during April 1913. The right is reserved to reject any or all bids, or any combination of bids. Envelopes must be plainly marked; "Proposals for furnishing plants and seeds, to be opened February 1, 1913," and addressed to

C. NIXON,

Purchasing Agent on the Isthmus.

Sale of Gasoline Engine.

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., January 11, 1913.

Sealed bids will be received at the Office of the Depot Quartermaster, Mount Hope, until 3 p. m., January 30, 1913, when they will be opened in the presence of attending bidders, for the purchase of one 7½ horsepower "Buffalo" gasoline engine, recently removed from the police launch *Chagres*. This engine may be seen at this Depot on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m. The right is reserved to reject any or all bids. Bids must be plainly marked "Proposal for purchase of gasoline engine, to be opened January 30, 1913," and addressed to

C. NIXON, Depot Quartermaster.

Misdirected Letters.

ANCON, C. Z., January 16, 1913.

The following insufficiently addressed letters, originating in the United States or its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Boyle, Edw.	Johnson, Charles A.
Brady, Miss Escher	Judd, Jr., Frank
Broome, R. E.	Kesner, L. M.
Brown, Dr. J. R.	Knox, Ben. C.
Capwell, L. E.	Locker, Geo. R.
Carigan, Mrs. Joan Reddish	Loyd, Harry
Carroll, Robt.	Marshall, John
Cassell, John	Kausser, Gus
Clarke, Mrs. R. Hamilton	McCann, Bill
Coburn, Ralph	McDermott, Hugh
Coleman, Albert J.	Nikolas, E. C.

Dobson, Gilbert C.	Reese, Wm. J.
Donnelly, P.	Rhodes, Harry
Frampton, Arthur	Richards, Miss Theresa
Gardner, Dean B.	Roper, Rev. L. R.
Grey, Edw.	Slatee, Mrs. A. A.
Hall, Mrs. Wells Hayden	Talor, Olive
Harwood, Mrs. Robt.	Walsh, Mrs. John J. (2cl.)
Hastings, Mrs. L. B.	Watson, Wm.
Heaton, August F.	Webb, Arthur D.
Henry Mrs. E. U.	Westberg, Mrs. J. E.
Holmeline, Miss Mamie	William, Maria

LOST—On January 10, between House 87, Bishop's Hollow, Ancon, and the railroad station, Panama, a purse containing seven 20-dollar gold pieces. A suitable reward will be paid if returned to the owner, at House No. 87, Ancon, Mrs. John Mergendollar.

FOUND—Ladies' silver watch. Owner can have same by identifying it at the Police Headquarters, Ancon, C. Z.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The arrangements for the annual meeting of the Canal Zone Federation of Women's Clubs to be held at the Tivoli Hotel on Saturday, January 25, are about completed. The clubs are expected to elect four delegates and four alternates, and to provide them with credentials which may be handed to the chairman of the Credentials Committee, Mrs. Charles S. Stoddard, of Gatun. The morning session will begin at 9 o'clock and the afternoon session will be at 2.30 o'clock. Members of the federated clubs, besides the delegates, alternates, and members at large, are expected to attend the business meeting. Invited guests, including club women who were members of the federated clubs in the years 1908 to 1910, are expected to attend the open session in the afternoon only. The Panama Railroad Company has cooperated with the Federation in the arrangements for this meeting by promising to place a car for club women and their guests on the 5.10 and 10.30 trains from Cristobal and on the 5.15 from Panama.

The Empire Woman's Club will hold a cake sale in the small game room of the Commission clubhouse on Saturday, January 18, beginning at 5 p. m.

St. Luke's Sunday School.

A Sunday school was organized at St. Luke's Hospital Chapel, Ancon, on Sunday morning, January 5, with 15 pupils and three teachers, and the chaplain, the Rev. Henry A. Brown, as superintendent. The lessons used are those issued by the Sunday school Commission of the Dioceses of New York, these being graded to various classes. The sessions of the school will be at 9 o'clock. St. Luke's Sunday school was organized at the beginning of the work of the Panama mission of the Episcopal Church in October, 1907. From that time until January, 1911, the school continued; it was disbanded owing to illness among the pupils, the majority of whom are the children of members of the hospital staff. There is a circulating library with the school, the books having been presented by two young members of the church and by the Church Periodicals Company.

Cristobal Union Church.

The annual meeting of the Cristobal Union Church organization was held in the chapel on Sunday morning, January 5, following the morning service. The following officers were elected for the ensuing year: Dr. Claude C. Pierce, president; Mr. Leander Larsen, vice president; and Mr. William Bennyhoff, secretary. The executive council is composed of J. M. Weaver, H. A. Clark, George Butters, and A. J. Billett. The membership of the Sunday school organization, including the outside departments, is 300. The social service department which was organized in 1912 continues its work; the Chinese class has about 20 members and the boys class is well attended. The Ladies Aid Society holds a meeting on the second Tuesday in each month.

Prisoner's Relief Fund.

The prison committee at Culebra has received the thanks of the convicts stationed at the Mandingo stockade for the cakes and other supplies sent them for their Christmas dinner. There was a religious service at the stockade on Christmas day, following

which dinner was served. The committee has in hand a sum of \$50 which will be used as occasion arises for the relief of discharged prisoners.

Pythian Sisters.

The recently elected officers of the Canal Zone Chapter, Pythian Sisters, will be installed at a called meeting which will be held in January. These officers, who will serve for one year are as follows: Mrs. Bessie Walraven, excellent chief; Mrs. Susan Reese, excellent senior; Mrs. Lettie Peterson, excellent junior; Mrs. Louise Lotz, manager of the temple; Mrs. Marion Stanner, mistress of records and correspondence; Mrs. Ellen Warren, mistress of finance; Mrs. Annie Peirson, protector of the temple; Mrs. Grace Smith, guardian of the temple. The past excellent chief is Mrs. Annie Wilson. Meetings of the auxiliary are held in the lodge hall, Las Cascadas, upon call of the presiding officers. The membership is about 50.

Church Concert.

The Woman's Altar Guild of Christ Church, Colon, will hold a concert on Monday evening, January 27, for the purpose of raising money for the purchase of a credence table to match the stone altar which has already been ordered for the church. Among those who will sing are Miss Marjoria Holme of London, the Cecelian Chorus of the Cristobal Woman's Club, and Dr. Frank Godfrey.

Visit of Bishop Stuntz.

Bishop Homer C. Stuntz, the newly elected head of the Methodist Episcopal Church for Central and South America is expected to pay his first visit to the mission in Panama in the early spring, arriving on April 28 and remaining until May 6. Bishop Stuntz is the bishop chosen at the quadrennial meeting of the General Conference of the Methodist Board held in Minneapolis in May, 1912.

Red Cross Finances.

A statement of finances of the Canal Zone chapter, American National Red Cross, for the month of November, 1912:

RECEIPTS.	
November 1, On hand.....	\$1,843 46
13, Received refund of amount paid for meals for man at Cristobal.....	11 70
22, Donation from Col. D. D. Gaillard.....	15.00
23, Sale of Christmas seals.....	100.00
23, Membership dues.....	2.00
	\$1,972 06
DISBURSEMENTS.

Approved: JOHN L. PHILLIPS, Treasurer. C. A. DEVOL, Chairman.	

Election in Gatun Christian League.

At a recent meeting of the Gatun Christian League, the following officers were unanimously reelected for the next six months: President, B. F. Sisson; vice-president, Wm. A. Wells; secretary, C. O. Jones; treasurer, Isaac Andrews.

International Brotherhood of Steam Shovel and Dredge Men.

Local No. 19, I. B. of S. S. and D. M., will hold its regular monthly meeting at Cristobal, Building No. 1, on Sunday, January 19, at 12.30 p. m. All members are requested to be present.

PERSONAL.

Mr. H. A. A. Smith and Mrs. Smith sailed for the United States on January 2, on the *Panama*.

Mr. R. Budd, who resigned as Chief Engineer of the Panama railroad on September 21, 1909, was appointed on January 1, 1913, Assistant to the President of the Great Northern Railway.

Col. H. A. Greene, accompanied by Mrs. Greene, returned to command at Camp Otis on January 12, after a leave of absence in the United States.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

LARGEST MEMBERSHIP WAS IN 1912.

The total membership of Y. M. C. A. Clubhouses reached the highest figure yet attained at the close of 1912 when there were enrolled 2,127 members. The previous record was for the month of January 1911 when there were 2,121 members.

ENTERTAINING THE SAILORS.

During the stay of the Second Division of the Atlantic Fleet, the Y. M. C. A. has undertaken to provide a lunch for the sailors who are being shown the Canal. This lunch is served on the train while the sailors are being taken from Colon to Panama approximately 1,000 per day for four days. A bureau of information has been established in the old Administration building in Panama and also at the Cristobal Y. M. C. A. for the benefit of the fleet, and the Gatun Y. M. C. A. has furnished a Committee to show the sailors the locks.

GENERAL.

The lecture on "Alcohol" which was to have been given by Dr. Orenstein in the various clubhouses this week has been indefinitely postponed on account of his illness.

The moving picture schedule for the week January 20 to 25, is as follows: Monday, Empire; Tuesday, Culebra; Wednesday, Corozal; Thursday, Cristobal; Friday, Gatun; Saturday, Gorgona.

Moving pictures will be shown at Porto Bello on Friday night, January 17.

CULEBRA.

Much interest is being manifested in the local duckpin tournament in which 26 men have entered.

High scores for the week are as follows: Perkins, 102; Kersey, 103, 115; Steele, 104, 101; Case, 119, 103, 109, 113, 106; Johnson, 113; Cain, 113, 106; Durand, 101; Dougherty, 123, 102; Brown, 105; Anderson, 106; Leonard, 105; Patterson, 100.

A "smoker" is being planned for the week of January 19.

EMPIRE.

A "smoker" program is being prepared and will be given sometime during the week of January 19.

Following the "First Aid" class on Mondays from seven to eight o'clock, there will be a gymnasium class beginning January 13.

GORGONA.

Members of the wrestling class are working hard to secure honors in the local championship meet to be held the latter part of the month. They are also looking forward to an Isthmian meet to decide the championship of the Zone.

The regular nights for wrestling are Mondays and Fridays and the regular nights for track team work are Wednesdays and Saturdays. Mr. Allen Wight has been appointed manager of the track team.

GATUN.

A wrestling class has been started, with Fred Hube and Eddie Andrews acting as coaches.

The Corozal duckpin team defeated the Gatun team on Saturday night, January 11.

The scores of a hundred or over in duckpins for the month were as follows: DePoorter, 100, 109; Carlson, 103; Humphreys, 108, 111, 100; Barte, 106, 109, 102, 104, 104, 104; Green, 101, 101, 103; Morrissey, 100, 100; Harper, 108; Claherty, 100; Ryan, 102; Dalton, 116. High scores in tennis were as follows: Eutermark, 220; Barte, 224, 212; Swallow, 205.

OFFICIAL CIRCULARS.

General Workmanship and General Conduct Report of Shop Employees on Termination of Service.

CULEBRA, C. Z., December 6, 1912.

CIRCULAR No. 309-B:

The general workmanship and the general conduct of shop employees on the gold roll upon termination of service will hereafter be marked as follows:

1. General workmanship will be described as excellent, very good, good, indifferent, or poor, and the qualifications for each rating are as follows:

(a) The rating of "excellent" will be given to those employees only who have demonstrated exceptional ability in both the quality and quantity of their workmanship in all classes of work assigned to them; furthermore, it will not be given to an employee on whose file a warning letter in regard to either the quality or quantity of his work, or both, or on whose file more than one letter in regard to work spoiled by him has been placed.

(b) The rating of "very good" will be given to those employees only who have demonstrated exceptional ability in either quality or quantity, or ability markedly above the average for the grade in both the quality and quantity, of their workmanship in all classes of work assigned to them; furthermore, it will not be given to an employee on whose file more than one warning letter in regard to either the quality or quantity of his work, or both, or on whose file more than two letters in regard to work spoiled by him have been placed.

(c) The rating of "good" will be given to those employees only who have demonstrated marked ability in either quality or quantity, but not both, or average ability for the grade in both quality and quantity of their workmanship in all classes of work assigned to them; furthermore, it will not be given to an employee on whose file an average of more than one warning letter for each year of service in regard to either quality or quantity of his work, or both, or more than one warning letter if his service was less than one year, has been placed, or on whose file more than two letters in any year's service have been placed in regard to work spoiled by him.

(d) The rating of "indifferent" will be given to those employees on whose files have been placed a sufficient number of warning letters in regard to either quality or quantity of work, or both, or letters in regard to work spoiled by them to make them ineligible for the rating of "good", and whose workmanship, on account of carelessness or lack of ability or experience, has been below the average in the grade in either quality or quantity, or both.

2. The rating of "poor" will be given to those employees on whose files have been placed a sufficient number of warning letters in regard to either quality or quantity of work, or both, or letters in regard to work spoiled by them to make them ineligible for the rating of "good" and whose workmanship, on account of gross carelessness or incompetency, has been markedly below the standard in either quality or quantity, or both.

3. Employees in each grade of each designation will be rated in general workmanship independently of other grades and in accordance with the foregoing rules, but the termination of service papers shall show the grade and the class of work performed when the designation covers a trade for which an apprenticeship is required and the rate of pay for the grade is fifty cents or less per hour.

4. The rating in workmanship will be determined by the quality of work performed in the grade in which the employee is serving at the time his services are terminated and by his record during his entire service; provided that, upon request, foremen and craftsmen special, or "leadingmen" will also be rated as grade 1 craftsmen.

5. General conduct will be described as excellent, good, or poor, and the qualifications for each rating are as follows:

(a) The rating of "excellent" will be given to those employees only who have received no warning letters and have not been orally warned in regard to their conduct at any place on the Isthmus, or who have not been absent without prior permission, and whose conduct on duty has been an example to other employees. The receipt of more than two cautionary letters in any one year of service in regard to failure to check in or out will constitute ineligibility for this rating.

(b) The rating of "good" will be given to those employees who have received not more than one letter in regard to conduct or absence without prior permission in any service year, have received not more than four cautionary letters in any one service year in regard to failure to check in or out, and whose conduct otherwise has been equal to the average in the shop.

(c) The rating of "poor" will be given to those employees whose records make them ineligible for the rating of "good," who have been intemperate or insubordinate, or whose general character has made them undesirable employees.

6. The fact that an employee has no warning or

cautionary letter on his file does not entitle him *per se* to the rating of "excellent" or even "very good," since he may have been derelict in several ways and on different occasions, no one of which warranted the placing of a warning letter on his file. These rules are intended to secure uniformity in ratings and insure that the ratings correctly represent the employee's average general conduct throughout his employment and his average general workmanship in the grade in which he is rated.

7. Upon the termination of the services of a shop employee the foreman under whom the employee last worked will recommend the rating in general workmanship and general conduct to which he considers the employee is entitled, and will forward his recommendations through the general foreman to the master mechanic or superintendent and the latter will determine the rating after consideration of the employee's record.

8. When a shop employee whose services have been obtained temporarily under Circular No. 357 is returned to the Division in which he is regularly employed, the latter division will be furnished promptly with a statement showing the ratings in general workmanship and general conduct to which the quality and quantity of work and the conduct of the employee entitled him during his temporary service.

When a shop employee is transferred permanently from one division to another, the former will furnish the latter with the ratings of the employee in general workmanship and general conduct during his employment in the division.

In either of these cases, if the employee is given a rating below "good" in either general workmanship or general conduct he shall be so informed.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Approved Ratings and Rates of Pay for Silver Employees.

CULEBRA, C. Z., December 15, 1912.

CIRCULAR No. 229-z. (Superseding Circular No. 229-g.)

Attention is invited to the following extracts from Circular No. 229-Revised, "Approved Ratings and Rates of Pay—Silver Roll;" amended in accordance with present rules:

"Upon first appointment, or upon reappointment after a break in service, unless specially authorized to the contrary, employees shall be entered upon the rolls at the lowest rate of pay authorized for the class of work which they are to perform, provided that an employee may be regularly transferred from one department or division to another without reduction; and provided further that an employee absent for not more than thirty days, with the prior consent of competent authority in his department or division, may be reinstated at his former rate of pay.

The thirty-day limit does not apply to European contract laborers in possession of checks of the series Nos. 1-13999, who should be reemployed at the contract rate (20 cents an hour) provided they show certificates of discharge from hospital of recent date, or certificate stating discharge due to reduction of force, or regular assignment, transfer or release by check number from the office of the Chief Quartermaster, or from another department or division.

Preferred laborers and artisans in possession of checks of the series No. 14001-19999, should be reemployed at the 16-cent rate unless they show certificate of discharge from hospital or a discharge or release from last employing division in good standing at a higher rate, of date within thirty days. After three full calendar months service, those reemployed at 16 cents should revert automatically to the 20-cent rate.

Other employees shall not be promoted from a lower to a higher rate of pay until they have completed at least three month's service at the lower rate. Promotions shall always be to the next higher grade."

In order to provide a uniform method for the regular transfer of a silver employee from one department or division to another without reduction of pay, "Silver Employee's Service Slip," Form 262-C, E., is hereby discontinued and new Silver Employee's Service Slip (Revised) Form C. E. 262-1 will hereafter be used in its place. Requisition should be made on the Depot Quartermaster for a supply to be put into use at once.

This service slip should be used in the case of all employees on the silver rolls who receive a rate of pay in excess of 10 cents an hour, and should not be used for any employee receiving 10 cents an hour or less.

Timekeepers in charge of silver rolls will see that three or more of these slips (depending on the number of men in the gang) are attached to the inside of the back cover of each odd and even day time book carrying any silver employees rated higher than 10 cents an hour.

When an employee is transferred to any other gang,

division, or department, or is discharge for any reason whatsoever, or voluntarily quits the service he must be furnished with one of these service slips, properly filled out and signed by the foreman, and the foreman must have the employee sign his name on the back of this form as a means of future identification. In the event the employee cannot write, his name will be signed and witnessed by the foreman, the employee making "his mark" in the usual way. This slip must then be presented to the time office for countersignature by the timekeeper. When the man reports at his next place of employment the slip must be presented to and taken up by the employing foreman, who will require the employee to sign his name as above, noting whether it agrees with signature placed thereon when he left his former employment, and attach it to the time book in which his name is entered, as authority for rating him higher than the minimum rate. The timekeeper in charge of the roll must enter his name on the time roll at the lowest rate of pay for the class of work performed, unless one of these service slips is attached to cover such employee. The slip will be attached to and remain with the time roll so that it may be accessible at all times for verification by inspectors of the rate of pay.

This service slip must be given to each employee who quits voluntarily or is discharged for any cause, and the specific reason for such action must be shown on the form: Such as, reduction of force, insubordination, violation of rules, absence without permission, etc. The foreman must indicate by note in time book each case in which service certificate is given.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Half-Rate Mileage for Servants.

CULEBRA, C. Z., January 9, 1913.

CIRCULAR No. 420-E:

Servants accompanying employees or members of their families may travel in first-class coaches of the Panama railroad on I. C. C. half-rate mileage. Servants, when not accompanying employees or members of their families, will not be permitted to travel on I. C. C. half-rate mileage. Requests for mileage tickets (Form C. E. 319) need not include servants.

H. H. ROUSSEAU, Acting Chairman.

Classified Expenditure Account.

EMPIRE, C. Z., December 6, 1912.

CIRCULAR No. 38:

The following new account in classified expenditures of the Isthmian Canal Commission has been authorized under "Construction and Engineering—General." Account 365—CONSTRUCTION, ELECTRIC TRANSMISSION LINE.

To this account will be charged a proper proportion of the salaries and expenses of the supervising force of the divisions, and the salaries and expenses of all officers and employees while engaged directly on the work of constructing the electric transmission line across the Isthmus; also the cost of all material, supplies, and incidental expenses used in connection therewith.

H. A. A. SMITH,
Examiner of Accounts

Approved: GEO. W. GOETHALS,
Chairman and Chief Engineer.

Cost of Brass Castings.

CULEBRA, C. Z., January 6, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

On account of the increased cost of copper the Quartermaster's Department has increased its price from 12 to 18 cents per pound, effect the 1st instant. On account of this increase in the cost of copper the Mechanical Division will charge 24 cents per pound for brass castings, effective January 1, 1913.

H. H. ROUSSEAU, Acting Chairman.

Price of Scrap Brass and Copper.

CULEBRA, C. Z., January 10, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Referring to circular letter addressed to Heads of Departments and Divisions under date of January 6, relative to increased cost of copper.

In addition to prices mentioned in the above quoted circular, the price of scrap brass and copper will be 12 cents per pound effective January 1, 1913.

H. H. ROUSSEAU,
Acting Chairman and Chief Engineer.

Married.

†Indicates advances on last list.

‡Fowls weigh each about as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock supply next lightest weight is supplied and refund note sent for difference.

§Sold only from Commissaries; no orders taken for delivery.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, and Colon during the week ending January 11:

Schwarzald, January 4, from Antwerp, with 18 cases of valve parts, for Superintendent of Erection.
Prinz August Wilhelm, January 6, from New York with 300 cases soap polish, 58 bales rubber hose, 17 cases paper, 60 kegs rivets, for stock; 600 pieces coupler knuckles, for Mechanical Division, 66 cases castings, for Superintendent of Erection; 895 bundles steel bars, 2nd division Chief Engineer's Office; 20 bundles steel bars for Atlantic Division; 787 bundles steel bars, Panama Railroad Company.

Luchana, January 6, from Baltimore, with 200 cases turpentine, 120 cases dry paint, 150 kegs white zinc, 100 pieces steel plates, for stock; 182 crates furniture, Panama Railroad Company; 325 pieces car wheels, Mechanical Division; 674 bundles steel bars, 2nd division Chief Engineer's Office; 238 valve machine parts, 305 cases gate moving machines, 135 pieces structural steel, 30 packages chain fender material, 28 crates rack castings, 24 packages valves, for Superintendent of Erection.

Metapan, January 9, from New York, with 36 barrels lime, for Panama Railroad Company, 711 pieces iron pipe, for stock; 12 cases electrical material, for Mechanical Division; 150 cases electrical material, 13 cases castings, 71 packages pipe and fittings, for Superintendent of Erection.

Parismina, January 10, from New Orleans, with 151 pieces lumber (white oak), for Mechanical Division; 434 pieces cross ties, 148 pieces piling, 2,652 pieces lumber (yellow pine), 16 bundles shingles, 1,073 bales alfalfa hay, 19 rolls cotton duck, 357 drums lubricating oils, 400 cases greases, for stock.

Colon, January 10, from New York with 200 pieces bar iron, 210 bundles bar iron, 9 cases sheet metal, 20 cases oils, 25 pieces steel channels, 250 pieces steel bars, 500 kegs wire nails, 12 cases ledger paper, 50 drums lime, 83 crates handles, 50 bundles baskets, 36 rolls wire fencing, 200 drums welding compound, 300 drums dry paint, 600 kegs white lead, 91 cases bolts, for stock; 94 cases range parts 2,030 bundles steel bars, 30 crates chairs, 15 barrels tile, 522 crates tile slabs, 200 barrels plaster for Panama Railroad Company; 109 barrels clay, 63 bundles car couplers, 805 barrels sand, 109 bundles steel bars, 55 bundles steel springs, 104 cases electrical material, for Superintendent of Erection; and a miscellaneous cargo, the whole consisting of 6,751 packages, weighing 1,060 tons

MOVEMENT OF OCEAN VESSELS.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Acting Chairman's Report.

The report of the Acting Chairman of the Isthmian Canal Commission for the month of December is published in full in this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and Divisions.

Slides in Culebra Cut.

On the afternoon of January 16, the Cucuracha slide, located on the east bank of the Canal, again renewed its activity and by the morning of the 17th, the moving mass of material had completely covered all tracks in the Canal, except one next the west bank, making five tracks in all covered and destroyed by the slide.

A train of cars, standing at the two shovels which were excavating the toe of the slide, was caught by the rapidly moving material and two cars were derailed and buried. A new track was built around the toe of the slide and steamshovels No. 206 and No. 256 commenced digging the slide away before noon of the 17th.

This recent movement of the slide carried material to a greater distance across the canal than in any other case, except the original movement of the same slide in 1907. It is estimated that in all not less than three or four hundred thousand cubic yards of material will have to be removed from this slide before the end of the present fiscal year.

On the night of January 19-20 the rock bluff, some 300 feet in height, on the east bank of the Canal, immediately south of Gold Hill, broke away at a distance of several hundred feet to the east of the Canal, and a large part of the broken material moved into the Canal, entirely covering all tracks to the east of the center line. The total amount of material in the broken rock portion is estimated at about 500,000 cubic yards, but this bluff, which was quite flat on top, served to prevent the movement into the cut of a clay top-covering several feet in thickness, which lay to the eastward of it, some of which will now undoubtedly move into

the cut, so that it is estimated that the probable effect of the break just described will be to add not less than 1,000,000 cubic yards to the amount which will have to be removed from the cut by means of steamshovels.

Immediately south of the recent break is the "Purple Hill" by which the moving clay of the Cucuracha slide was divided in two, and which has served very effectually, on account of its superior height, to hold back a large amount of top-covering which would otherwise have come into the Canal. There are indications that the "Purple Hill," has been weakened on its north face by this break, and should this small hill break away and come into the cut, it would probably release an amount of moving material which would aggregate between half a million and a million cubic yards additional to that previously described.

A new slide has recently developed in the east bank of the Canal, about 325 yards north of the suspension bridge. The amount of material in motion is estimated at 125,000 cubic yards, the greater part of which consists of rock.

Closing Old Spillway of Cocoli Lake.

An earth dam, with concrete core wall, is being erected across the site of the old spillway of Cocoli Lake which lies west of Cocoli Hill. With the lake at its present normal elevation of 47 feet above sea level there was no danger of escape of water through the discarded cut, but when the lake becomes a part of Miraflores Lake, in the operation of the Canal, the surface of the water will normally be 55 feet above sealevel, which is about a foot below the top of the old spillway cut. The top of the core wall, which is 142 feet long, 9 feet high, and 18 inches thick above the broadened base, will be 60 feet above sealevel, and the earth dam will be 2 feet above that. The dam is about 30 feet wide at the top, with slopes two in one. Two lines of sheet piling have been driven along the core wall to about elevation 40.

The old spillway was designed to discharge into a tributary of the Rio Grande, and in preparing the site in 1908 the excavation had reached elevation 56 when the project was abandoned.

Tile Roof for Permanent Shops.

A contract has been entered into with the American Cement Tile Manufacturing Company for the manufacture and placing of tile for the roofs of the shop buildings at Balboa. It is estimated that 6,500 squares of tile 26 by 52 inches, with ridge rolls, and such flat tiles as may be required in valleys to form gutters between roofs, will be required. The contract price for tile is \$10.25 per square; ridge roll 55 cents per linear foot, flat tile plates 1½ inches thick at \$11.25 per square, tile with wire ribbed glass for use in special skylights at \$1.75 each. A second contract provides for placing the tile

The tile it is proposed to use is made by a special process. The Commission will furnish all cement, sand, water, a building for manufacture, power, light, and storage track, and the contractor will furnish the labor and the machinery and process. Each tile will be seven-eighths of an inch thick, 26 by 52 inches exposing 24 by 48 inches to the weather, weight per square foot 13½ pounds. The exposed surface will be dark red, and the under surface white, the colors being given in the process of manufacture. On the upper end of each tile is a hook or hanger for the connection on the roof purlin. Sideways the tiles will interlock by means of a rabbet and side roll, both of which form an integral part of the tile. Each row will overlap the lower row about four inches.

Materials to be used are clean, sharp, comparatively coarse sand, mixed with cement and water in proportions of 2½ to one. Each tile will be made on a metal pallet, and reinforced approximately one fourth of an inch from the underside by a sheet of expanded metal of No. 18 gage, weighing 3 pounds per sheet. After manufacture, the tile will season for at least thirty days before being placed. In place, they can stand a uniformly distributed load of 150 pounds per square foot.

The manufacture of the tile will be carried on in one of the buildings at Paraiso formerly used in the mechanical shops at that place.

Guard Railings for Spillways, and Doors for Machine Tunnels.

Bids will be asked in the near future for materials for guard railings around the upper approach, and lower wing and channel walls at Gatun spillway, and the lower wing and channel walls of Miraflores spillway. The railings will be 3 feet 6 inches high and will consist of three runs of galvanized iron pipe 2½ inches in diameter, with necessary uprights. Fifteen hundred feet of railing will be required at Gatun, and 500 feet at Miraflores, a total of 6,000 feet of pipe.

Bids will also be asked on 82 iron doors to close the entrances into the machinery tunnels from the copings of the walls of the locks. These doors will be about 6 feet high and 4 feet wide, and if practicable they will be locked with a combination lock, so as to avoid the necessity of carrying keys.

Upper Wing and Core Walls at Pedro Miguel Lock.

Mass concrete work at the upper end of Pedro Miguel Locks is being carried to completion with the construction of the wing and core walls on each side of the entrance to the lock. On the west side the walls are finished, having been carried, on a foundation of rock at approximately 37 feet above sealevel, into the core of Pedro Miguel Dam. The core wall is surrounded by puddled clay and on the water side the filling is protected by riprapping; behind the wall a backfill of earth and rock is being made even with the top of the

NOTES OF PROGRESS.

(Continued.)

wall, at 92 feet above sealevel. On the east side the flare wall is completed and the core wall is being tied into Cerro Luisa, beyond the old tracks of the Panama railroad, now used for the dirt trains coming from the south end of Culebra Cut. Excavation by task and the laying of concrete are carried on without interruption to traffic. The concrete is being brought up to the bottom of the stringers

supporting the tracks and to full height on either side of the tracks, leaving a temporary opening in the core wall.

Filling in Upper Approach Wall at Pedro Miguel.

A double-story trestle, over 60 feet high, has been constructed across the west side of the upper entrance to Pedro Miguel Lock to carry trains with fill for the cellular approach wall. Lumber from the dismantled storage trestle in the west approach was used for this construction and as the 12 by 12-foot supporting timbers were not longer than 30

feet, a second row of bents was erected on top of the first. The bents are placed about 15 feet apart, and made with the familiar trapezoidal section, with two uprights flanked by battering timbers. Crossing the approach at an angle of 44 degrees with the axis of the lock, to allow a curve on which the track may connect with the return track for towing locomotives on the cellular wall, the trestle is 192 feet long. It has a grade of two per cent, in passing from the wing wall, at 92 feet above sealevel, to the top of the approach wall, at elevation + 99.

The filling of the cells in the approach wall is to be carried to the top of the wall from natural bottom, at elevation approximately 37 feet. Until the water is in the Canal channel this fill will subject the cells to a heavy outward pressure, but so far there has been no indication of giving way. The fill is being made principally of earth.

CONCRETE WORK IN THE LOCKS.

Over 95 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on January 18, the amount in place being 4,245,472 cubic yards.

GATUN LOCKS

Over 94 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on January 18 being 1,929,306 cubic yards, out of a total of 2,043,730. A statement of the amount placed in the locks each working day of the week ending January 18, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

Pilots, Masters, Mates, Engineers, Chauffeurs.

Examinations for pilots, masters, mates, engineers, and chauffeurs will be held by the Board of Local Inspectors at the Administration Building, Ancon, on Wednesday, January 29, 1913, beginning promptly at 8 a. m. All applicants for licenses must secure from the Executive Office, Department of Civil Administration, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, applicants for chauffeurs' licenses must bring automobiles with which to demonstrate their ability to properly operate the same.

CANAL WORK IN DECEMBER.

Monthly Report of the Acting Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., January 15, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of December, 1912:

Department of Construction and Engineering.

Effective at the close of business December 12, the following changes were made in the organization of the Department of Construction and Engineering:

The Pacific Division was abolished. Mr. S. B. Williamson, Division Engineer, and Mr. John M. G. Watt, Assistant Division Engineer, having resigned, the positions were abolished. The work theretofore assigned to the Pacific Division is now in charge of the Chief Engineer, under the following officers who report directly to him:

Mr. H. H. Rousseau, Assistant to the Chief Engineer, in charge of the Second Division of the Chief Engineer's office, supervises the work on the Pacific terminal facilities, including the construction of shops, dry dock, coaling station and docks.

Mr. H. O. Cole, Resident Engineer, is in charge of the construction of Miraflores and Pedro Miguel locks, dams and spillway, dry excavation of the Canal prism south of Pedro Miguel, municipal work in that territory, Ancon quarry and transportation. This division is known as the Fifth Division, Chief Engineer's Office.

Mr. W. G. Comber, Resident Engineer, is in charge of dredging operations, Balboa shops, and the sand service. This division is known as the Sixth Division, Chief Engineer's Office.

The timekeeping work of the former Pacific Division was transferred to the Examiner of Accounts on December 28.

The costkeeping work was transferred to the Chairman's Office and placed under the direction of the Chief Cost Accountant, who furnishes the Resident Engineers and other officials the data which the costkeeping force of the former Pacific Division furnished to the various officials daily, to enable them to keep track of the costs of their work.

The changes are administrative only. The work will be performed with the same personnel as theretofore and with about the same organization, except for the division of work as above stated.

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the Division Engineer of the Atlantic Division, Resident Engineer Cole and the erection subdivision of this office. The inspection of this work is being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF INSTALLATION OF RISING STEM GATE VALVES, ERECTION OF SPILLWAY GATES AND CAISSONS, AND ASSEMBLY OF HYDRO-ELECTRIC DRAFT TUBES AT GATUN.

The work of erection of the spillway gates at Gatun was continued during the month and the fourteen gates required for that place were completed and accepted. Three of these

The following table summarizes the principal items of construction work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d. Div.	5th Div.	6th Div.	Total.
Work excavation, dry	Cubic yards..	16,677	1,074,510	27,598	335,943	1,454,728
Work excavation, wet	Cubic yards..	819,373	191,975	349,747	1,361,088
Total work excavation	Cubic yards..	836,050	1,074,510	219,566	335,943	349,747	2,815,816
Plant excavation, dry	Cubic yards..
Plant excavation, wet	Cubic yards..
Total plant excavation	Cubic yards..
Total Canal excavation	Cubic yards..	836,050	1,074,510	219,566	335,943	349,747	2,815,816
Material placed in dams	Cubic yards..	142,245	54,151	196,426
Concrete placed at locks dams and spillways	Cubic yards..	8,763	54,144	62,907
Explosives used	Tons (Gross)	31.95	143.81	10.277	74.07	11	271.107
Rock drilled	Feet	25,692	381,376	6,776	111,330	6,770	531,944
Tracks removed	Miles	7.52	7.52
New tracks laid	Miles	3.018	11.02	2,595	16.633
Rock crushed	Cubic yards..	56,620	56,620
Cement used	Barrels	13,873	27	63,142	9	77,051
New roads built	Miles	2.5	.10365
Water mains laid	Feet	410	3,023	3,433
Sewers laid	Feet
Open drains and ditches dug	Feet	39,732	53,093	2,495	95,320
Average daily force	4,540	6,697	733	5,889	1,281	19,140
Average rainfall	Inches	10.65	4.45	4.42	6.51

gates were installed in position on the spillway dam.

Work was begun on the erection of the caisson at Gatun and was about 50 per cent completed at the close of the month.

No work was done on the spillway gates at Miraflores, nor was any work done on the caisson for that point.

Work was continued on the preparation of rising stem gate valve machinery chambers at Gatun and Pedro Miguel and satisfactory progress is being made. Similar work was begun at Miraflores, but no valves were installed.

Work was continued on assembly and riveting of draft tubes for the hydro-electric station at Gatun.

LOCK GATES AND PROTECTIVE DEVICES.

Owing to illness of the assistant engineer in charge of the inspection in the United States, the report covering shop work accomplished during the month was delayed and will be included in the report for January. Up to December 5, a total of 49,707 tons of riveted structural steel had been shipped from the Rankin shops for the 92 leaves to be erected, or about 97 per cent of the total contract weight of this class. In addition, there were 321 tons of spare parts shipped. Erection work was pushed with much energy by the contractors. The total tonnage of lock gate material erected on January 1 in the different locks, without regard to its being fully reamed or riveted, was 36,030 tons, out of a total of 58,000 tons, or about 62 per cent. Of this, 2,738 tons, or about 4½ per cent, were erected during the month. The number of field rivets driven was 2,621,405, or about 41 per cent of the total number, of which about 6 per cent of the total, were driven during December. The tonnage erected was about 1 per cent greater and the number of rivets driven about the same as for the preceding month. The status of the work in the several locks may be summarized as follows:

Gatun—Work is in progress on all the leaves, 40 in number. Erection, 75 per cent completed; reaming, 73 per cent completed; riveting, 54 per cent completed; finishing, 10 per cent completed.

Pedro Miguel—Work is in progress on the entire 24 leaves. Erection, 81 per cent completed; reaming, 77 per cent completed; riveting, 59 per cent completed.

Miraflores—Work is in progress on 12 out of the 28 leaves. Erection, 30 per cent completed; reaming, 11 per cent completed; riveting, 6 per cent completed.

LOCK GATE RECESS COVERS.

All recess covers at Gatun have been aligned and riveted and but 2 of the 40 remain to be grouted. At Pedro Miguel, all have been completed. At Miraflores, 20 out of the 24 have been erected and 18 of this number have been riveted, but no aligning or grouting has been done.

CHAIN FENDERS.

As stated in the report for November, the machine proper has been erected in pits 812-813 at the upper end of Gatun locks, in the east chamber. During the month work progressed on the piping in these two pits; at the end of the month that in No. 813 was 80 per cent completed and that in No. 812 was 20 per cent completed. The tank and pump were placed in position in pit No. 813. The decking is in place over both these pits. The concrete has been practically completed for pit No. 812, but none for pit No. 813. The decking and the piping are also in place in many of the other pits.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection of the operating machinery and electrical equipment. The contractors are generally behindhand in their deliveries, but progress is being made with view to bringing the rates of delivery up to the promised schedule. The rate of installing the machines keeps pace with the receipt of the various parts. On account of the late deliveries of electrical material, the force for the electrical work is not being recruited as fast as provided in the schedule. The following tabulations are given as a summary of the work:

RISING STEM GATE VALVES.

ELECTRICAL WORK—ATLANTIC DIVISION.

Conductor rails, insulators, brackets and cover plates were installed on 2,093 feet of straight and 770 feet of curved track, making a total to date of 17,226 feet. Of this, 8,576 have been equipped with steel conductor bar and 8,650 feet with copper conductor bar. Progress has been made in pulling cable into the conduit system, a total of 175,482 feet having

been pulled to date, of this total, 10,240 feet have been protected with tile in the man-holes. A total of 235,312 feet of duct has been rodded, cleaned, and wired. Twenty-six control panels for cylindrical valve machines were assembled ready for conduit and cable work. At Gatun 18 cylindrical valve machines and 4 rising stem valve machines were tested and operated satisfactorily. Miter gate moving machines Nos. 35 and 36 were operated successfully, swinging the gate free in the dry.

ELECTRICAL WORK—PACIFIC DIVISION.

Pedro Miguel—Conductor rails, insulators, brackets and copper plates were installed on 2,656 feet of track, making a total to date of 5,694 feet. Of this amount, 1,920 feet have been equipped with steel and 3,774 feet with copper conductor rail. A total of 10,405 duct feet of vitrified tile conduit was rodded, cleaned and wired; a total of 94,466 duct feet has been prepared to date. There were installed in the north approach wall 2,475 duct feet of fiber conduit, making a total of 9,017 feet to date. During the month 160 feet of iron conduit were installed. There were 10,300 feet of 3-conductor No. 0000 cable installed, making the total 12,700 feet. During the month 3,360 feet of 3-conductor No. 00 cable were also installed.

Miraflores—Preparatory to installing cable, 8,740 feet of duct were rodded, cleaned and wired.

All tunnels at Pedro Miguel and Miraflores were examined for leaks and methods of waterproofing are being experimented upon. At Pedro Miguel, preliminary test was made on rising stem valve machines Nos. 314 and 315.

EMERGENCY DAMS.

Inspection was in progress at seven localities in the United States and 385 tons of material were accepted. At the end of the month 7,534 tons had been fabricated and accepted. About 736 tons were delivered on the Isthmus during the month and approximately 712 tons were erected. On December 31 a total of 5,606 tons had been delivered and 2,686 tons erected. Work was in progress on the east and west dams at Gatun.

AIDS TO NAVIGATION.

Ten range towers of the Atlantic and Pacific type, including foundations, were completed, except that six steel lantern doors must be hung, stair railing erected, towers painted and permanent lights installed in each. Seven range towers of the Gatun Lake Section type, with foundations, were completed, except that doors must be hung, steel ladders erected, lantern glass set in place, towers painted and permanent lights installed in each. Two foundations for Atlantic and Pacific type of towers were completed and one tower begun. Three skeleton tower beacons, including foundations, for the Pacific end were completed except that permanent lights must be installed. The caisson for the west breakwater light was completed to a height of 25 feet and sunk at the inner end of Limon Bay in 20 feet of water, where it will remain until its riprap foundation at the outer end of the west breakwater is completed. During the month work was in progress on the erection of range towers Nos. 2, 17, 18 and 11, Gatun Lake Section, electric light line, and in the making of necessary surveys and reconnaissances.

SECOND DIVISION—OFFICE OF THE CHIEF ENGINEER.

The work on the Pacific terminals, including the construction of shops, dry dock, coal-ing station and docks, was transferred to the Second Division, December 12, when the Pacific Division was abolished. The following work was accomplished during December:

EXCAVATION.	
<i>Steamshovel.</i>	<i>Cu. Yds.</i>
Sosa Hill	19,251
Foundations	750
Dry Dock	3,751
<i>Hand.</i>	
Sinking piers	1,940
Shop foundations	853
Sosa Dam toe	534
Sosa Hill	519
Total	27,598

The foregoing was distributed as follows:

	<i>Cu. Yds.</i>
Preparing site	20,304
Dry excavation	3,751
Foundations for shops	1,603
Sinking caissons for piers	1,940
Total	27,598

FILLING AND EMBANKMENT.

	<i>Cu. Yds.</i>
Preparing site .. work	27,803
Yards and tracks .. work	10,301
Sand line .. plant	1,149
Total	39,253

CONCRETE PLACED.

	<i>Cu. Yds.</i>
Caissons	817
Shop foundations	251
Total	1,068

GENERAL REMARKS.

Excavation by steamshovel was continued in Sosa Hill, and excavation in the entrance to Dry Dock No. 1 was begun on December 27. The old Balboa yards of the Panama railroad were removed in the vicinity of the dry dock. A new sand and general service track was built to Diablo Hill to connect the sand dock and lumber wharf to a proposed connection at Corozal with the main line; this track will allow the removal of the remaining tracks in the vicinity of the proposed shops.

METEOROLOGY AND HYDROGRAPHY.

The usual observations and measurements were continued during the month.

FIFTH DIVISION—OFFICE OF THE CHIEF ENGINEER.

This division was established December 12, 1912, and comprises all the work of the former Pacific Division, except dredging operations, Balboa shops and the sand service, and the construction of terminal facilities. In the following is included work done from December 1 to 12 inclusive by that part of the Pacific Division which now comprises the Fifth Division.

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation during the month amounted to 335,943 cubic yards, of which 251,175 cubic yards were classified as rock and 84,768 cubic yards as earth.

Filling and embankment—During the month 11,696 cubic yards of dry filling were added to the prism of the Pedro Miguel west dam, increasing the total amount of material in place at the end of the month to 670,680 cubic yards. The backfill at Pedro Miguel was increased by 14,416 cubic yards, the total

quantity in place at the close of the month being 774,947 cubic yards.

At Miraflores, the dry filling in the toes of the west dam was increased by 42,485 cubic yards, making the total quantities of dry and hydraulic filling in place at the end of the month 1,489,419 cubic yards and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 96,639 cubic yards, the total amount in place at the close of the month being 1,071,757 cubic yards.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours)	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	6.80
Average number of mixers per day	4.68
Average hourly output per mixer, actual working time (cubic yards)	9.28
Large rock laid (cubic yards)	6,958.00
Concrete laid (cubic yards)	6,958.00
Total concrete laid (cubic yards)	6,958.00

Average number of one-half cubic yard mixers, 4.68, output of which was placed by hand, by derricks, and by mixers discharging directly into forms.

Pedro Miguel Locks—Excavation was continued in the Canal prism south of the locks and in the foundation of the lower guide wall. Backfilling of the two side walls and north wing walls was continued. The concrete work consisted of the construction of the north wing walls, caisson sill in forebay, and installation of electric cable ducts. Fixed irons aggregating 36,341 pounds were placed in the lock masonry. The total amount of concrete and large stone laid at Pedro Miguel was 6,958 cubic yards, as compared with 7,972 cubic yards for November. The concrete was placed as follows: Two thousand five hundred and sixty-two yards in the northeast wing wall, 185 cubic yards in the northwest wing wall, 283 cubic yards in the east wall, 28 cubic yards in the center wall, 1,290 cubic yards in the west wall, 792 cubic yards in the floors, 1,728 cubic yards in the south center guide wall, 39 cubic yards around ducts in area A, and 51 cubic yards around ducts in area C.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00 & 12.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	4.96	5.49
Average number of mixers per day	7.84	3.96
Average hourly output per mixer, actual working time (cubic yards)	42.68	9.17
Average amount of concrete and large stone laid per hour per berm or chamber crane (actual working time) (cubic yards)	50.32	
Large rock laid (cubic yards)		
Concrete laid (cubic yards)	35,468.00	12,718.00
Total concrete laid (cu. yds.)	35,468.00	12,718.00

Permanent plant consisted of four berm cranes and

four chamber cranes. Berm cranes E and F worked 12 hours a day from December 1st to 14th. Chamber cranes Nos. 1 and 3 worked 12 hours a day from December 1st to 14th.

Auxiliary plant consisted of two 1-cubic yard mixers, having a daily average of 1.16; five ½-cubic yard mixers, having a daily average of 2.08; and three locomotive cranes and derricks, having a daily average of 1.16.

Miraflores Locks—Dry excavation was continued in the Canal prism south of the locks, the material being used for backfilling the locks, filling on the west dam and for swamp reclamation. Excavation of the spillway was continued. Concrete work consisted of the construction of the north approach and wing walls and the extension of the west wall, south guide wall, operating tunnels, sills and floor of lower west chamber, and the northeast core wall. Fixed irons aggregating 529,148 pounds were placed in the masonry. The total amount of concrete and large stone laid at Miraflores was 48,186 cubic yards, which was placed as follows: Two thousand four hundred and sixty-seven cubic yards in the north center guide wall, 194 cubic yards in the northwest wing wall, 215 cubic yards in the northeast wing wall, 1,413 cubic yards in the east wall, 4,431 cubic yards in the center wall, 11,271 cubic yards in the west wall, 7,704 cubic yards in the floors, 19,766 cubic yards in the south center guide wall, 440 cubic yards in the northeast core wall, 181 cubic yards around ducts in area A, 14 cubic yards around ducts in area B, and 90 cubic yards around ducts in area C.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

Reservoirs, water mains, sewers and oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours)	8.00
Average number of hours per day (actual working time)	7.81
Average number of cubic yards crushed per hour per working day	252.09
Average number of cubic yards crushed per working hour	289.97
Total output for the month (cubic yards) ..	56,620.00

SIXTH DIVISION—OFFICE OF CHIEF ENGINEER.

To the Sixth Division of the Chief Engineer's Office, which was established December 12, has been assigned that part of the work of the former Pacific Division covering dredging operations, Balboa shops and the sand service. In the following is included work performed by that part of the Pacific Division from December 1 to December 12, inclusive which now comprises the Sixth Division.

The following is a statement of the output of the seven dredges which were in operation during the month and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.			PLANT.		Total.	Remarks.
		Earth.	Clay.	Rock.	Earth.	Rock.		
		<i>Cu. Yds.</i>	<i>Cu. Yds.</i>	<i>Cu. Yds.</i>	<i>Cu. Yds.</i>	<i>Cu. Yds.</i>		
Badger	Ladder	28,575		4,396			43,961	Place measurement
Cardenas	Dipper		2,694	8,084	15,699		26,477	Place measurement
Corozal	Ladder		42,636	69,564			112,200	Place measurement
Culebra	Suction	158,465			14,027		172,492	Scow measurement
Marmot	Ladder	1,060		7,816			13,248	Place measurement
Mole	Ladder		1,970	9,125			11,095	Scow measurement
No. 85	Hydraulic				162,242		162,242	Place measurement
Total		188,100	62,662	98,985	191,968		541,715	

Chamé Sand Service—Approximately 35,000 cubic yards of sand were excavated at Punta Chame and delivered to the Balboa sand bins.

Balboa Shops—The manufacturing and repair work in the shops and shipways was satisfactorily performed during the month.

Atlantic Division.

GATUN LOCKS.

Excavation—There were 26,281 cubic yards excavated during the month; of this amount, 20,215 cubic yards were removed in preparing foundations for the lock walls.

Backfill—Backfilling behind the side walls was continued, the quantity placed during the month aggregating 33,232 cubic yards. The total amount placed to January 1 was 1,941,587 cubic yards. On that date the work was 96.12 per cent completed.

Receiving and issuing material—No rock was received during the month; 9,065½ cubic yards were issued. The issues of sand amounted to 4,567 cubic yards; 300 cubic yards were added to the storage pile as a by-product from rock screening. There were 37,419½ barrels of cement received and 10,593½ barrels issued.

Mixing and placing plants—Plant No. 1 and portable mixers were kept in satisfactory operation during the month.

Concrete work—A total of 5,696½ cubic yards of concrete was laid, distributed as follows: Upper lock, 672½ cubic yards; middle lock, 747 cubic yards; middle lock, 4,277 cubic yards.

On December 31 the concrete work was 93.1 per cent completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.

Length of working day (hours)	9.00
Average number of hours per day worked per strand of cableway laying concrete (actual working time)	1.13
Average number of mixers per day	2.00
Average hourly output per mixer (actual working time) cubic yards	59.91
Average amount of concrete laid per hour, per strand of cableway (actual working time) cubic yards	27.27
Concrete laid (cubic yards) cableways	5,329½
Concrete laid (cubic yards) derricks
Concrete laid (cubic yards) portable mixers	318½
Concrete laid (cubic yards) hand mixers	48½

Total amount of concrete laid (cubic yards) 5,696½

GATUN DAM.

Construction during the month increased the total fill, as determined by cross section of the material in place deposited during the month by 142,245 cubic yards, making the total amount in place 21,068,080 cubic yards. On January 1 the dam was 95.8 per cent completed.

Hydraulic fill—There was no increase made in the hydraulic fill, the total in place remaining at 10,124,082 cubic yards.

Dry fill—Allowing an arbitrary reduction of 50,000 cubic yards to cover slow consolidation in slopes not cross-sectioned, additional material received from steamshovels amounting to 142,245 cubic yards was placed on the north and south toes of the dam east and west of the spillway, making the total dry fill in place 10,943,998 cubic yards. Cross-section of the month's dry fill shows a loss of 2.9 per cent from car measurement.

Hydro-electric plant—During the month 1,462 cubic yards of earth and rock were removed by hand and crane in the preparation of foundations, making a total excavation of 97,711 cubic yards. There were 93 cubic yards of concrete placed, making the total to date 649 cubic yards.

GATUN SPILLWAY.

Backfill—No backfilling behind the spillway walls was done during the month, the

total on December 31 remaining at 16,495 cubic yards.

Concrete—A total of 3,066 cubic yards of concrete was laid during the month. Concrete work for the spillway is 94 per cent completed.

Excavation—There was no material excavated during the month, the total remaining at 1,591,261 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging from the ocean to Mindi—Seven dredges removed 746,285 cubic yards of earth and 68,088 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 13,885 cubic yards of earth and 16,294 cubic yards of rock from the slip between docks 16 and 17, Panama Railroad Company's Cristobal Terminal Docks. On December 31 forty feet of water could be carried from zero to zero plus 2,100 feet, 35 feet to mile post 4 plus 3,350 feet, 30 feet to mile post 6 plus 600 feet, 20 feet to mile post 6 plus 1,765 feet, 10 feet to mile post 6 plus 2,800 feet. The *Terrier* drilled 4,052 feet, used 31,160 pounds of dynamite and shot 11,741 cubic yards of earth and 31,763 cubic yards of rock to minus 45 feet, mean sealevel.

West breakwater, Colon—There were 92 lineal feet of single track trestle driven during the month. The trestle was completed on January 1, its total length being 11,526 feet. There were 16,034 cubic yards of Porto Bello rock unloaded, of which 9,039 cubic yards were handled by cranes and 6,995 cubic yards by the derrick barges, making the total amount unloaded to January 1st 134,590 cubic yards.

MUNICIPAL ENGINEERING.

New Colon waterworks—During the month the walls for the sump pumps were built up to the level of the floor of the pump station and the sump was practically completed. Approximately 3,000 cubic yards of material were removed in preparing for foundations of the filter building, the excavation being 98 per cent completed at the close of the month.

The reservoirs, water mains, sewers, roads and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the Colon street improvements, the macadamizing being completed as far as possible at present.

Central Division.

During the month the total amount of material excavated was 1,074,510 cubic yards, of which 125,264 cubic yards were classified as earth and 949,246 cubic yards as rock. The entire amount was removed by steamshovels. Of this total, 1,016,866 cubic yards were primary excavation in the Canal prism and 57,644 cubic yards from the Obispo Diversion.

The daily average number of steamshovels at work was 34.28 and the total number of shovel days was 857, as compared with 36.45 shovels at work and 856½ shovel days in November. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table is presented:

Period	Excavated by shovels.	Classification of material.			Av. No. of shovels at work	W kg. days.	Av. yards per shovel per day.
		Rock.	Earth.				
1911	Cu. Yds.	Cu. Yds.	Cu. Yds.				C. Y.
Dec. 1911	1,351,052	1,189,597	161,215	41.54	25		1,301
Dec. 1912	1,074,510	949,246	125,264	34.28	25		1,254

Rainfall at Empire: 1911, .20 ins.; 1912, 3.71 ins.

The above table shows the average output

pershovel to be 3.61 per cent less in December, 1912 than in the corresponding month of 1911.

The total amount of material excavated from the Culebra section in December, 1912—1,074,510 cubic yards—was the lowest record in that section for the month of December since 1906; in December of that year only 307,689 cubic yards were removed.

[NOTE—The actual excavation accomplished in the Canal prism during December amounted to 1,044,618 cubic yards, and on the Obispo Diversion 29,892 cubic yards, the difference shown above being due to adjustment of 27,752 cubic yards which were incorrectly included in prism excavation in the report for November.]

The total estimated amount of material (dry excavation) to be removed in the Central Division, according to revised estimate of July 1, 1912, was 106,116,221 cubic yards, and up to January 1, 1913, 100,887,019 cubic yards had been removed, leaving 5,239,202 cubic yards to be removed in order to complete all dry excavation. From these figures it will be seen that 95.06 per cent of all excavation in this division was completed on December 31, 1912. At the close of December's operations the status of the excavation in the two sections which compose this division was as follows:

CULEBRA CUT.	Cu. Yds.
Completed	88,492,364
To be completed	5,239,202
	93,731,566
CHAGRES SECTION.	Cu. Yds.
Completed	12,384,655

Thus it will be seen that the Culebra Cut is 94.41 per cent completed.

The Chagres Section is entirely completed, so far as dry excavation is concerned, but it is estimated that about 300,000 cubic yards of wet excavation will have to be made in this section.

Work performed for the Fifth Division included the removal of 15,548 cubic yards of rock by steamshovels, the drilling of 5,152 lineal feet of holes, the use of 8,000 pounds of dynamite in blasting, and miscellaneous service such as transportation of spoil, dumping, etc.; all done in connection with the Miraflores spillway.

During the month 4,378 cubic yards for material were dumped on the embankment for the new roadbed of the relocation of the Panama railroad, increasing the total amount furnished for this purpose to 4,471,187 cubic yards.

For use in the construction of the Gatun dam, 1,836 cubic yards of rock were furnished to the Atlantic Division, making the total amount of material furnished for this purpose 5,419,751 cubic yards.

There were also furnished during the month to the Panama Railroad Company, for the Cristobal mole, 32,533 cubic yards, the total amount furnished to December 31 for this purpose being 151,580 cubic yards.

During the month there was employed a daily average of 6,145 laborers, while the average number of gold men working was 552.

Quartermaster's Department.

Labor—The force report of December 25 showed 39,499 men actually at work; this number includes the force of the McClintic-Marshall Construction Company. The shortage of unskilled labor continued throughout the month. However, when the 500 laborers recently recruited in Barbados arrive on the

Isthmus the situation will be relieved to an extent.

Buildings—Alterations to the Hotel Tivoli were entirely completed and additions were built to the commissaries at Corozal and Paraiso.

Quarters—The congestion of gold bachelor quarters at Gatun and Corozal continued. Moving the courthouse from Gorgona to Pedro Miguel and converting it into gold bachelor quarters relieved the situation at the latter point.

Material and supplies—The total value of material received was \$882,383.51. This material came forward in 31 steamers, the total weight of cargo, exclusive of lumber, piling and ties, being 30,755 tons.

Subsistence Department.

The operation of the line hotels resulted in a net loss of \$43.54. The Hotel Tivoli showed a net profit of \$8,003.51. European laborers' messes, colored laborers' kitchens, restaurants, penitentiary, tugs and dredges returned a net profit of \$2,688.93. The total net profit on subsistence operations during the month was \$10,648.90.

Department of Civil Administration.

COURTS

During the month 132 civil and 50 criminal cases were disposed of in the Circuit Courts, and 45 civil and 666 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$423,851.53 and the fees to \$2,115.57. Receipts from stamp and card sales and newspaper postage aggregated \$10,686.21. The total collection of revenues made was \$48,057.37, and the collections on account of court fines, costs and fees \$4,607.88. A total of \$113,538 was deposited in postal savings accounts and a total of \$102,987 was withdrawn. At the port of Ancon 20 vessels entered and 25 cleared, and at the port of Cristobal 21 entered and 22 cleared.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 665, of whom 593 were men and 72 women. Twenty-three nations or 43 separate states and dependencies were represented. There were 11 convicts committed to the penitentiary and 19 were discharged, leaving 119 convicts in confinement at the close of the month. The cost of guarding and subsisting these convicts was \$2,547.34 and the value of the work performed by them on the roads of the Canal Zone was \$2,139.20.

DIVISION OF FIRE PROTECTION.

There were eight fires reported in the Canal Zone. The damage to Commission property was \$120.

DIVISION OF PUBLIC WORKS.

In the city of Panama the daily average consumption of water was 1,752,419 gallons, and in Colon 1,368,953 gallons. The usual inspection and maintenance work in this division was performed.

DIVISION OF SCHOOLS.

The net enrollment in the white schools was 1,241, the average number of pupils belonging was 1,094.6, and the average daily attendance 1,025. In the colored schools the net enrollment was 1,165, the average number of pupils belonging was 946.9, and the average daily attendance 780.5. At the close of the month there were employed in the white schools 47 teachers and in the colored

schools 31 teachers, the total being four greater than the number employed at the close of the preceding month.

Department of Sanitation.

The total number of deaths from all causes among employes was 32, divided as follows: from disease 23 and from violence 9, giving an annual average per thousand of 5.13 and 2.01 respectively. The annual death rate per thousand among employes for the month of December, 1911, was 10.42.

The annual death rate per thousand in the Canal Zone and in the cities of Colon and Panama, including both employes and non-employes, was 20.99. This rate is based upon a population in the Canal Zone of 62,810 according to the census of February, 1912, and populations in Colon and Panama of 20,232 and 47,172, respectively, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of December, 1911, was 20.30.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: whites 3.74, blacks 5.56, giving a general average for disease of 5.13. For the same month during 1910 the annual average death rate per thousand from disease among whites was 5.59, blacks 8.79, giving a general average of 7.94; and for the same month during 1911, whites 5.71, blacks 5.68, giving a general average of 5.68.

Among employes during the month, deaths from the principal diseases were as follows: Lobar pneumonia 6, malaria fever, E. A., 1, organic disease of heart 1, tuberculosis 6, leaving 9 deaths from all other diseases and 9 deaths from external violence.

No case of yellow fever, small pox or plague originated on or was brought to the Isthmus during the month.

Respectfully,

H. H. ROUSSEAU,

Acting Chairman and Chief Engineer.

Proposals for Furnishing Plants and Seeds.

OFFICE OF DEPOT QUARTERMASTER,

MOUNT HOPE, C. Z., January 6, 1913.

Sealed proposals will be received at the office of the Depot Quartermaster, Mount Hope, until three o'clock p. m., February 1, 1913, when they will be opened in the presence of attending bidders, for furnishing, in cars at any station on the Panama railroad, 1,200 cocoanuts, 1,000 sugar cane plants and 5,000 white yam heads for planting; 1,000 plantain plants, one bushel seed sweet potatoes, two bushels Kafir corn seed, and two bushels sorghum cane seed. Best quality only is desired and samples must be submitted. Proposals should show unit prices. Cocoanuts are to be supplied at earliest practicable date and the other items to be delivered during April, 1913. The right is reserved to reject any or all bids, or any combination of bids. Envelopes must be plainly marked; "Proposals for furnishing plants and seeds, to be opened February 1, 1913," and addressed to

C. NIXON,

Purchasing Agent on the Isthmus.

Sale of Gasoline Engine.

OFFICE OF DEPOT QUARTERMASTER,

MOUNT HOPE, C. Z., January 11, 1913.

Sealed bids will be received at the Office of the Depot Quartermaster, Mount Hope, until 3 p. m., January 30, 1913, when they will be opened in the presence of attending bidders, for the purchase of one $7\frac{1}{2}$ horsepower "Buffalo" gasoline engine, recently removed from the police launch *Chagres*. This engine may be seen at this Depot on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m. The right is reserved to reject any or all bids. Bids must be plainly marked "Proposal for purchase of gasoline engine, to be opened January 30, 1913," and addressed to

C. NIXON, Depot Quartermaster.

LOST—Seven \$10 bills in Ancon or Panama on January 15. Reward if returned to police station, Ancon.

LOST—Will the purchaser of 400-mile mileage book No. 1812 please communicate with the Ticket Agent, Panama railroad station, Colon.

OFFICIAL CIRCULARS.

General Workmanship and General Conduct Report of Shop Employes on Termination of Service.

CULEBRA, C. Z., January 15, 1913.

CIRCULAR No. 309-c:

Paragraph (b) of Section 5 of Circular No. 309-B, dated December 6, 1912, is hereby changed to read as follows:

The rating of "good" will be given to those employes who have received not more than one warning letter in regard to conduct while on duty in any service year, who have received not more than two letters in regard to absence without prior permission in any service year, and who have received not more than four cautionary letters in any one service year in regard to failure to check in or out, and whose conduct otherwise has been equal to the average in the shop.

H. H. ROUSSEAU,

Acting Chairman and Chief Engineer.

Signature to Pay Receipts by Mark.

EMPIRE, C. Z., January 14, 1913.

CIRCULAR No. 40:

The following is an extract from a recent decision of the Comptroller of the Treasury, relative to signatures by mark to pay receipts where the employe is unable to write his name.

"In a signature by mark the vital part is the mark made by the signer and the witness to the making of the mark.

The name of the signer and the words "his mark" may be prepared before the signing, where it is known the signing will be by mark, and I see no reason why the name may not be in typewriting and the words "his mark" by a ruber stamp, the signer's mark and the witness's signature to be made in ink."

In accordance with this authority all pay receipts of silver employes who do not sign their own names may be completed on the typewriter at the time the receipt is written.

The names of employes who sign their own names should not be so placed on the receipts. This includes clerks, timekeepers, foremen and any others who are known to write.

The signature of the witness must be a responsible timekeeper and must not be placed on the receipt until it is delivered or paid.

Rubber stamps can be used for inserting the words "his mark" between the first and last names of employes, leaving sufficient space for the employes' mark between the two words. T. L. CLEAR,

Approved: Acting Examiner of Accounts.

H. H. ROUSSEAU,

Acting Chairman and Chief Engineer.

Classified Expenditure Accounts.

EMPIRE, C. Z., January 9, 1913.

CIRCULAR No. 39:

The following new account in classified expenditures of the Isthmian Canal Commission has been authorized under "Construction and Engineering—Atlantic Division

Account 320—Trinidad River Dam.

(a) Construction.

To this account will be charged a proper proportion of the salaries and expenses of the supervising force of the division, and the salaries and wages of all officers and employes engaged directly on the construction of a dam in the upper reaches of the Trinidad River; also the cost of all material, supplies and incidental expenses used in connection therewith and suitable depreciation on plant equipment used in this work.

(b) Plant.

To this account will be charged all plant assigned to the work of constructing the Trinidad River dam, and credited with plant transferred from that work together with plant arbitrarily applied to construction account 320-A above. T. L. CLEAR,

Approved: Acting Examiner of Accounts.

H. H. ROUSSEAU,

Acting Chairman and Chief Engineer.

Acting Chief Sanitary Officer.

CULEBRA, C. Z., January 13, 1913.

CIRCULAR No. 473:

Effective this date and during the absence of Col. W. C. Gorgas, Col. John L. Phillips is designated as Acting Chief Sanitary Officer.

H. H. ROUSSEAU, Acting Chairman.

Mail for the Panama Railroad Company.

PANAMA RAILROAD COMPANY,

COLON, R. P., January 13, 1913.

CIRCULAR No. 8:

HEADS OF DEPARTMENTS, ISTHMIAN CANAL COMMISSION:

In communicating with Heads of Departments of this company, through the Zone mails, please address such mail to Cristobal, Canal Zone, instead of Colon. J. A. SMITH, General Superintendent.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The speakers at the open session of the Canal Zone Federation of Women's Clubs, on Saturday afternoon, January 25, will be Dr. Edward Devine, of New York, and Dr. Cueva Garcia, minister resident of Ecuador to the Republic of Panama. Dr. Garcia will speak on the educational outlook of Panama and Central America. A program of music has also been arranged. This program will be followed by an informal reception.

The meetings of the Gatun Woman's Club during the past month have been unusually well attended the members showing unusual interest in the programs presented. Discussions on current events have been held semi monthly, the social meetings, with papers on various timely topics have been interesting features. The club has taken up several questions of civic improvement, among these the maintenance of the public playground.

At the meeting of the Ancon Study Club on January 16, the new work of the study or American history was begun. In addition to this course, which will continue during the next three months, a half hour at the close of each meeting will be devoted to the study of popular astronomy, Martha Evans Martin's book, "The Friendly Stars," being the text book used.

Church Notes.

The Gatun Christian League will hold a musical at the Commission chapel on Wednesday evening, January 22, the proceeds of the entertainment to be devoted to the purchase of hymn books for the church. Those who will participate in the program are Mrs. Purdy Mrs. Farmer, Miss Palm and Miss Neville.

University of Illinois Graduates.

For the purpose of organizing a Canal Zone Chapter of the Alumni, you are requested to communicate your name and address to Mr. James Zetek, Ancon.

Lawn Tennis.

The Isthmian Tennis Association commenced the season of 1913 with a doubles tournament at Ancon on Sunday, January 12, with the following clubs represented: Ancon, Drs. Ross and Runyan; Tivoil, Fechtig and Edwards; Pacific, Poole and Nevius; Culebra, Goethals and Tupper; Empire, Pulsifer and Shropshire; Tenth Infantry, Lieuts. Patch and Swartz; Gatun, Rose and Wells; Cristobal, Hart and Farquarson.

Lost—Treasury check No. 105954, dated January 3, 1913, drawn for \$60, not endorsed. Finder please return to H. E. King, Empire, and receive reward.

Married.

ERDMAN-McCULLOUGH—On Friday, January 17, Miss Sarah W. McCullough of Empire, to Daniel J. Erdman of Empire, the Rev. A. A. Nellis officiating. Canal Zone residence, Empire

PERSONAL.

Col. H. F. Hodges returned from his annual leave on the *Panama* which arrived at Cristobal on January 21.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for week January 27 to February 1, is as follows: Monday, Gatun; Tuesday, Cristobal; Wednesday, Gorgona; Thursday, Empire; Friday, Culebra; Saturday, Corozal; Friday, Porto Bello.

COROZAL.

A new floor is being laid in the assembly hall and the bowling alleys are being refinished. The work will probably be completed this week.

CULEBRA.

The "smoker" previously mentioned has been postponed and will be held at the earliest possible date.

Gatun lost three games at duckpins on the local alleys on Saturday night, January 18, with the following scores:

	Gatun.		Culebra.	
Gardiner.....	79	84	66	Silvers..... 90 103 87
Carlson.....	75	96	84	Durand..... 93
Morrisey.....	72	75	83	Steele..... 94 85
Harper.....	82	81	66	Anderson..... 83 83
Barthe.....	75	91	79	Case..... 83 95 76
				Kiernan..... 87 95
				Kersey..... 86
				Brown..... 86

Totals. 383 427 378 443 453 430
The following high scores were made during the week: Steel, 107, 105, 109, 102; Brown, 120, 114, 103; Anderson, 101, 100; Grossberg, 104, 103, 106; Belchem, 105; Kiernan, 101; Durand, 106; Dougherty, 109; Leonard, 100, 101; Silvers, 102, 103; Case, 100, 104.

Moving picture dates with Gorgona have been exchanged, and pictures will be shown at Culebra on Saturday night, January 25.

The reading room adjacent to the poolroom has been completed, as has the barber shop and Mr. Ketchum, formerly employed at the old clubhouse, has been reemployed.

Dr. Devine of New York City will give a lecture on "Abolition of Poverty" in the schoolhouse on Friday evening, January 24. Admission free. A musical program will be given.

EMPIRE.

The gymnasium class has started and will meet twice weekly. On Monday night the class will meet directly after the First Aid class, all interested see Mr. Russell.

The men have all ready started training for the athletic meet to be held on February 22. The jumping pit has been put in shape. All those wishing to enter should come out for practice.

Mr. Russell took the boys of the boys department on a tramp to Cruces on Saturday January 18. Fifteen boys were in the party.

GORGONA.

Three hundred and fifty people attended the motion picture show Saturday evening.

The Gorgona track men are getting into shape for the meet at Empire on February 22. The practice nights are Mondays, Wednesdays, and Saturdays. A track team special diet club has been organized at the hotel so that the men can have proper food during training term.

A handball tournament has been organized.

A wrestling tournament will begin next week.

Members working at night are allowed to transfer their ticket for entertainments to an immediate member of the family. It will be necessary for a member using such ticket to show the regular membership ticket at the desk in order to secure an entertainment ticket.

A bowling tournament will be started in February. All wishing to join should see Messrs. Regan or Roper. A new supply of phonograph records has been secured.

High bowling scores during the week follow: Davis, 110, 107, 108, 102, 101; King, 113, 118, 104, 112, 101, 121, 109; Roper, 103; Dunlap, 104, 118, 107; Sims, 103, 122, 114, 100, 103; Regan, 111; Denst, 113, 100; Moyer, 108; Gibhardt, 100, 121, 105; Seeb, 103, 100; McCain, 105.

GATUN.

On Thursday evening, January 23, Dr. Edward T. Devine of New York City, will deliver a lecture on the "Abolition of Poverty." Senorita Cervera of Panama City will play several piano solos.

An order for new library books was sent to the States during the past week.

Five hundred members are now enrolled in the Gatun Y. M. C. A. This is the largest number enrolled at a single clubhouse since the work was started on the Isthmus.

MOVEMENT OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sail thus: the *Prins Joachim* and the *Prins August Wilhelm* on alternate Tuesdays at 10 a. m., and the *Prins Sigismund* and the *Prins Eitel Friedrich* on alternate Mondays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans via Limon and Barrios, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, JANUARY 29, 1913.

No. 23.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Bids for Transmission Line.

More time is required by foreign and some American manufacturers than has been given them to prepare bids on the material specified in Circular No. 752, materials and equipment for the Cristobal-Balboa electric transmission line, including steel track span bridges, copper wire, insulators, ground plates, and equipment for substations. The date of opening the bids has therefore been changed from January 30 to February 15.

Pulling Electric Cable in the Locks.

Electric cables for the control, power, and lighting systems of the locks will be carried in vitrified clay duct, which has already been placed at Gatun and Pedro Miguel Locks and is being placed at Miraflores. For the control and power systems 246 miles of lead covered cable are to be pulled through these ducts, 40 per cent of the total amount that was placed by the largest power company in the United States during the twenty years preceding 1908. In addition there are 112 miles of wire of miscellaneous sizes from No. 12 up to 00 B. & S. gage for the lighting system.

This work in the locks was begun in October and will be finished in June. On account of the large amount of cable to be handled the expedient of laying it from an electrically driven winch has been resorted to. Before the operation is begun the ducts are carefully cleaned. Then a lead wire is pulled through, and by this means a manila cable is drawn through the duct. The electric cable is attached to the rope, and the winch is set in motion. By this method it is possible to pull 900 foot lengths of No. 0000 B. & S. gage lead covered cable at one time, whereas the average length by other methods is about 300 feet. The outside diameter of this cable is a trifle more than 2 inches. In such a length the cable passes through two intermediate manholes, and is greased at three points to aid in reducing friction. The advantage of pulling the long sections at one

operation is that the making of two joints is saved, and this is a considerable economy. The winch used for the purpose is mounted upon trucks operated over the return tracks of the towing system. The cable is being placed directly below the floor of the operating tunnel, and therefore the pull by the winch is direct.

Highest Range Tower.

The highest of all the towers that will be used in the range light system of the canal is now being constructed at Gatun, where it rises above the lock walls to such height as to cause general comment. When completed it will stand 95 feet above the coping of the lock walls.

This is the rear tower of the Trinidad-Gatun range, the front tower being that which straddles the center approach wall at the south end. The site is upon the backfill near the north end of the south lock, west side, and as the material of the fill is not sufficiently stable to sustain the weight of the tower, the foundation is a caisson sunk to bed rock. This caisson is of reinforced concrete 18 feet external diameter, and 15-inch walls, and it was sunk to bed rock through the fill, a distance of 62 feet below the top of the lock wall.

The tower has an octagonal base with an inscribed diameter of 17 feet 2 inches. The conical section has an outside diameter of 13 feet 8 inches and from this it tapers to 8 feet 8 inches at the top; wall 7½ inches thick at bottom and 5 inches at top. The focal plane of the light will be 87 feet 10 inches above the lock wall. The tower will be equipped with a reinforced concrete spiral stairway from the bottom to the light.

Waterproofing Expansion Joints and Cracks.

As in the case of all underground structures of concrete, the operating tunnels of the locks show a tendency to leak. It is necessary to leave expansion joints in placing the concrete, and in addition to these the concrete forms expansion cracks in various places. These places were marked during the last rainy season, and during the present dry season the work of stopping them with some material that will prevent the leaking of water will be done. Experiments are now being conducted at Pedro Miguel to the end that a suitable material may be determined upon.

Road from Gamboa to Empire.

Work on a macadam highway from Gamboa toward Empire, on the east side of the Canal, has been begun by the convicts who were engaged until February 11 in the construction of the Canal Zone portion of the Empire-Chorrera road. The men are quartered in a stockade south of Tower R, on the relocated line of the Panama railroad, and are extending the road southward. The new highway will lie east of the railroad as far as the junction with the track along the east di-

version of the Canal. Here it will cross both railroad and diversion and, swinging to the west, will strike the Las Cascadas Plantation road about a thousand feet east of the Canal bank.

With the completion of this road, highway connection will be established on the east side of the Canal from the Chagres River, or the edge of Gatun Lake, to Panama. Such connection is made now to Gorgona, but all of the road north of Empire is on the west side of the Canal and is reached by the Empire suspension bridge over Culebra Cut, which will be removed when the Canal is ready for operation.

Installation of Fender Chain Machines.

Two sample machines for operating the chain fenders have been installed, and will be ready for test during the next fortnight. These machines have been placed in the east flight of locks at Gatun, and the chain has been stretched across the upper forebay. The test will determine what, if any, changes must be made in the manufacture of the 46 additional machines, required for all the locks.

Cardenas River Highway Bridge.

Plans are being prepared for extending the Cardenas River bridge of the highway between Corozal and Miraflores. The present opening of 30 feet between abutments has been inadequate during freshets, and as the abutments are not provided with flare walls the road was washed out twice during the past rainy season. An additional span about 20 feet long is to be constructed at the north end of the present span.

Fuel for Torpedo Boat Destroyers.

For supplying fuel oil to the torpedo boat destroyers of the Atlantic fleet at Colon the eight-inch pipe line of the Union Oil Company has been extended 500 feet beyond the Isthmian Canal Commission's tanks Nos. 28 and 29 at Mount Hope and connected with a four-inch pipe, with a 50-foot hose, at the berth of the seagoing suction dredge *Caribbean*. The berth is immediately south of the dry dock, along the French Canal. The oil pumped to the destroyers is of the same quality as that supplied to the Commission, and at the same price of \$1.10 per barrel of 42 gallons, with deductions at the rate of one per cent for each per cent of water in excess of two per cent. It is estimated that approximately 7,000 barrels of fuel oil will be supplied to the 19 destroyers and the tender *Dixie*.

Recruiting of Laborers.

A temporary shortage in the supply of common laborers for work on the canal and railroad has been overcome by the importation of negroes from Barbados. Ninety eight arrived on the *Trent* on January 19, and 300 more will be here on February 2. The recruiting of laborers for the Canal has been in

NOTES OF PROGRESS.

progress since 1904, and meanwhile it is estimated that practically as many have come to the Isthmus of their own initiative as have been imported. The importations of contract laborers are shown for each year in the following statement:

Gatun Dam Spillway.

The concrete work in the Spillway at Gatun Dam is over 95 per cent completed, 215,162 cubic yards, out of a total of 225,000 having been placed at the close of work on January

25. A statement of the amount laid each day last week, and of the total in place, follows:

DATE.	Concrete laid.	Hours worked.	No. mixers used.
January 20.....	Cu. Yds. 122	7.00	2
January 21.....	184	6.25	1

Election of Red Cross Officers.

The annual election of officers for the Canal Zone Chapter, The American National Red Cross, resulted as follows: Chairman, Col. Carroll A. Devol; vice-chairman, Mr. Edw. Schildauer; secretary, Mr. A. B. Dickson; treasurer, Lieut.-Col. John L. Phillips; executive committeemen, Col. W. C. Gorgas, Maj. Chester Harding, Dr. A. J. Orenstein.

Delivery has been made on the Isthmus of the 120 cylindrical valve machines required for the locks; and of the 114 motors required for the rising stem valves.

CONCRETE WORK IN THE LOCKS.

Over 96 per cent of the total of 4,416,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on January 29, the amount in place being 4,268,226 cubic yards.

GATUN LOCKS.

Over 94 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on January 25 being 1,937,716 cubic yards, out of a total of 2,043,730. A statement of the amount placed in the locks each working day of the week ending January 25, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

EXECUTIVE ORDER

To Amend the Executive Order Providing for the Inspection of Steam Vessels, Approved July 21, 1911.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

SECTION 1. Section 10 of the Executive Order entitled "Executive Order Providing for the Inspection of Steam Vessels," approved July 21, 1911, is hereby amended to read as follows:

SECTION 10. Before issuing an inspection certificate to any vessel, the Collector of Revenues shall demand and receive from the owner or master of such vessel the following compensation for inspection and examination made for the year, in addition to any fees for issuing enrollments and licenses now, or which may hereafter be, allowed by law:

For each steam vessel under 15 gross tons..... \$5.00

For each steam vessel over 15 gross tons and not exceeding 100 gross tons..... \$10.00

For each and every gross ton in excess of 100 gross tons..... \$.05

The fees herein provided for shall cover the cost of the certificate, as well as the cost of inspection and examination of the vessel, and shall be for the use and benefit of the Canal Zone Government.

SEC. 2. Section 18 of the above mentioned Executive Order is hereby amended so as to read as follows:

SECTION 18. Every vessel coming within the provisions of this Order shall be provided with such number of lifeboats, floats, rafts, life-preservers, line carrying projectiles and best means of propelling them, lights, drags, anchors, and with such other equipment, as, in the judgment of the Board of Local Inspectors, will best procure the safety of all persons on board such vessels in case of disaster. And every such vessel shall have the lifeboats required by this Order provided with suitable boat disengaging apparatus, so arranged as to allow such boats to be safely launched while such vessels are under speed, or otherwise, so as to allow such disengaging apparatus to be operated by one person, disengaging both ends of the boat simultaneously from the tackle by which it may be lowered to the water; and the Board of Local Inspectors shall determine the kind of lifeboats, floats, rafts, life-preservers, line carrying projectiles and means of propelling the same, lights, drags, anchors, and other equipment which are to be used on the vessel; and also the kind and capacity of the pumps for freeing the vessel from water in case of heavy leakage, the capacity of such pumps being suited to the navigation in which the vessel is employed.

SEC. 3. This Order shall take effect thirty days from this date.

WM. H. TAFT.

THE WHITE HOUSE,
January 13, 1913.

[No. 1680.]

Ordinances on Navigation of Canal and Operation of Motor Boats.

On December 16, 1912, an ordinance was enacted by the Isthmian Canal Commission,

which was approved by the Secretary of War on January 13, amending Rules 90 and 91 of the Rules for the Navigation of the Panama Canal and the approaches thereto, effective on February 12.

On December 16, 1912 the Commission also enacted an ordinance, which was approved by the Secretary of War on January 13, providing for the licensing of navigators of motor boats.

As these laws make important changes in the present laws they will be published in full in the next issue of THE CANAL RECORD.

Canal Zone Postal Savings Banks.

Postal Savings Bank transactions at the Canal Zone postoffice during December, 1912, were as follows:

NOTE—The figures in parenthesis show the number of applications already occupying regular or non-housekeeping family quarters at stations other than those at which applications are filed.

Missing Men.

Anyone having information regarding the whereabouts of Ben Knox, who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD.

Anyone having information regarding the whereabouts of Dr. M. H. Lindenbaum, who is supposed to be practicing medicine on the Isthmus, is requested to communicate with the American Legation, Panama.

Anyone having information regarding the present whereabouts of Louis F. Fanovich, who was discharged from the service of the Commission on October 1, 1912, but who, it is understood, is still on the Isthmus, is requested to communicate with the office of the Chairman and Chief Engineer.

OFFICIAL CIRCULARS.

Approved Ratings and Rates of Pay For Silver Employees—Service Slips.

CULEBRA, C. Z., January 23, 1913.

CIRCULAR No. 299-Z-1:

When the service slip issued to a silver employee shows that he was his rated for any form of misconduct or unsatisfactory service, he is thereby debarred for a period of not less than three months from reemployment at the same rate of pay received when discharged.

H. F. HODGES,

Acting Chairman and Chief Engineer.

Signatures of Employees Authorized to Witness Pay Receipts or Time Voucher.

EMPIRE, C. Z., January 22, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Promptly upon receipt of this circular, kindly forward to the Disbursing Officer at Empire ten (10) sets of autographic signatures of each and every responsible timekeeper or other employees in your department duly authorized by you to witness signatures upon pay receipts or time vouchers.

These should be made up in ten separate sheets, each sheet containing the signature of each and every timekeeper and other employee concerned, alphabetically arranged.

Effective February 1, 1913, no pay certificate or time voucher will be honored unless witnessed by some authorized employee whose signature has, prior to the date of witnessing, been forwarded to the Disbursing Officer in ten copies, as per the above. All changes among such authorized employees, caused by separation from the service or addition thereto, should be promptly reported to this office.

W. M. WOOD,

Disbursing Officer.

H. F. HODGES,

Acting Chairman and Chief Engineer.

Removal of Old Cards from Panama Railroad Cars that have been Emptied.

CULEBRA, C. Z., January 21, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Some confusion has arisen through failure to remove old cards from P. R. cars that have been emptied. Please see that these cards are removed in the future as soon as the cars are empty.

H. F. HODGES, Acting Chairman.

Proposals for Furnishing Plants and Seeds.

OFFICE OF DEPOT QUARTERMASTER,

MOUNT HOPE, C. Z., January 6, 1913.

Sealed proposals will be received at the office of the Depot Quartermaster, Mount Hope, until three o'clock p. m., February 1, 1913, when they will be opened in the presence of attending bidders, for furnishing, in cars at any station on the Panama railroad, 1,200 coconuts, 1,000 sugar cane plants and 5,000 white yam heads for planting; 1,000 plantain plants, one bushel seed sweet potatoes, two bushels Kafir corn seed, and two bushels sorghum cane seed. Best quality only is desired and samples must be submitted. Proposals should show unit prices. Coconuts are to be supplied at earliest practicable date and the other items to be delivered during April, 1913. The right is reserved to reject any or all bids, or any combination of bids. Envelopes must be plainly marked; "Proposals for furnishing plants and seeds, to be opened February 1, 1913," and addressed to

C. NIXON,

Purchasing Agent on the Isthmus.

Misdirected Letters.

ANCON, C. Z., January 29, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

COALING PLANTS

Proposed Method of Handling Coal at Atlantic and Pacific Entrances.

Speed in handling coal with the least possible amount of breakage is the main requirement of the coaling plants to be established at the Atlantic and Pacific entrances to the Canal, at Cristobal and Balboa respectively. Specifications for the machinery of the two plants have been completed and within a few weeks advertisement will be made for bids.

GENERAL PLANS.

It is planned to have a coal storage basin at Cristobal with a capacity of two hundred and ninety thousand tons, and one at Balboa with a capacity of one hundred and sixty thousand tons. In each place the storage will be within a large basin made of reinforced concrete, in which approximately half of the coal will be stored under water for use in time of war, and the other half above water to be added to and taken from continually for the ordinary uses of commercial and Government vessels. It is also planned, if the policy should be approved, to be able to lease parts of the storage basin to such private coaling companies as may wish to maintain their own coal stores on the Isthmus; but in such cases all of the handling will be done by the Government plant, a suitable charge being made for the service.

The specifications are not hard and fast, but merely establish certain general methods and standards, leaving it to manufacturers to devise suitable machines. One of the limiting conditions is that the Government shall build the substructure or storage bin and place upon the walls such tracks as cranes and other moveable machines may require. This substructure will cost more than the coal handling plant. The details will not be decided upon until the bids for the handling plant have been canvassed, because each plan will require its own special substructure, and one of the points considered in awarding the contract will be the cost of the substructure required under each plan.

In general, however, the specifications call for cranes that will unload coal from ships, a conveying system that will transfer it to bridges that will span the storage basin, and dump it at any place desired; and such a system of buckets operating upon these bridges as will make it possible to lift coal from the storage basin, and by means of conveyors raise it to loading machines that will dump it into colliers or lighters. The Cristobal plant must be capable of unloading 1,000 tons and loading 2,000 tons of coal each hour, and the Balboa plant 500 and 1,000.

In the ordinary operation of each of the plants, vessels requiring bunker coal will not go alongside the wharves of the plants to receive such coal, but will be coaled while lying in the stream from barges laid alongside, these barges having been loaded by means of the reloaders forming part of the specified handling machinery for each plant. The plants are to be capable, however, of rapidly loading colliers laid alongside the wharves by means of the above mentioned reloaders, the high capacities specified for outward bound coal being fixed with a view to re-

quiring colliers to remain at the plants for the shortest time practicable.

ATLANTIC ENTRANCE PLANT.

The coaling plant at the Atlantic entrance will be situated on the north end of the island formed by the old French canal, the American canal, and the Mindi River. It will be reached from the mainland by means of a bridge to be built by the Panama railroad over the French canal south of the dry dock shops. The storage basin will be opposite Dock No. 13 at Mount Hope, and it will be 1,000 feet long and 250 feet wide. The bottom of the basin will be 19 feet below mean tide, and the elevation of the decks of the wharves 10 feet above mean tide. There will be 41 feet depth of water alongside the wharves. The wharves will be founded upon steel cylinders filled with reinforced concrete resting upon hard rock. The maximum tidal oscillation in Limon Bay is 2.65 feet.

For this type of storage basin, at least two layouts of coaling plant are feasible; the first being that in which the loading and unloading wharves occupy opposite sides of the basin parallel with one another, with the coal piles between them, and the second that in which the unloading wharf will be at right angles to the loading wharf. The normal capacity will be 240,000 tons, capable of increase to 290,000 tons by piling coal to ten feet additional height.

PACIFIC ENTRANCE.

The coaling plant at the Pacific entrance will be on the quay wall south of the entrance to the large dry dock. The size of the basin will be 500 feet long and 250 feet wide for one design of plant, and the same length and 340 feet wide for a second design. The extreme tidal difference here is 21.8 feet. As at the Atlantic entrance, the loading wharf will be founded upon concrete cylinders resting upon hard rock; the unloading wharf will be gravity section concrete wall resting on rock. The normal capacity of the Balboa plant will be 135,000 tons, capable of increase to 160,000 tons, by piling coal ten feet above normal height.

The layout is somewhat different from that at the Atlantic entrance, although the methods of handling the coal will be similar. The unloading wharf will be situated at the outer end of the dry dock slip, while the line of the loading wharf makes an angle of about 45 degrees with that of the unloading wharf, running out toward the canal prism from the end of the unloading wharf.

In the first plan a basin 500 feet long and 250 feet wide is provided for, with bottom at 18 feet below mean tide, and top of wharf at 16½ feet above mean tide. The capacity of this plant must be not less than 500 tons of coal an hour to be unloaded and 1,000 tons per hour to be loaded aboard colliers or barges. Two unloaders will be required with conveyors, and two single stocking reclaiming bridges. Two reloaders will also be required. The operation of this plant is essentially the same as that for the Atlantic entrance.

An alternate plan for the Balboa plant provides for the same location of the wharves but for a basin 500 feet long and 340 feet wide. The unloaders are the same as in other plans, but instead of dumping into conveyors they will discharge by means of the cantilever end directly into the basin, and large cantilever cranes will then pick up the coal and deposit it at any desired points in the storage basin.

For reclaiming, these same cranes will pick up the coal and trolley it into their towers where it will be dumped into cars or other conveyors, whence it will be carried away from the basin, along the front of the reloading wharf to the reloaders.

The purpose of this second plan is to make use of four berm cranes now used in the placing of concrete at Miraflores locks, and thus save the expense of the stocking and reclaiming bridges. Whether they will be used depends upon the cost and general desirability of this plant compared with one having entirely new handling machinery.

UNITS OF THE PLANTS.

The following paragraphs refer particularly to the Cristobal plant, but with certain modifications, as indicated above, apply also to the Balboa plant.

UNLOADERS

The unloading operation will consist of taking coal from a collier, and depositing it at any desired place in the bin or basin. For this purpose unloading towers, a conveying system that will carry the coal lengthwise of the storage bin along the wharf, bridges spanning the basin, and a conveying system upon these bridges, which will take the coal from the first conveyors and dump it wherever required, are specified.

Four unloading towers of not less than 250 tons capacity per hour each, making a total capacity of one thousand tons an hour, form the first unit of the unloading system. These towers must be capable of four operations: (1) Mining coal from a vessel and depositing it into a hopper built within the tower, whence it may be delivered by chutes to the conveying system, or to Panama railroad cars running on a track beneath the tower. (2) Mining coal from a vessel and depositing it by the bucket or shovel into the storage pile behind the tower. (3) Mining coal from storage pile behind the tower and depositing it in the hopper in the tower. (4) Mining coal from the storage pile behind the tower and depositing it by the bucket or shovel aboard vessels.

Each tower will travel on two parallel pairs of rails between which, at the level of the wharf deck, there shall run a railroad track so located that cars may be run beneath the unloading tower and receive coal from its hopper. The speed of travel in either direction must be not less than 50 feet per minute against a wind pressure of 10 pounds per square foot. The track travel must be by motors or engines within each tower, and cable drive will not be acceptable.

The bucket or shovel by means of which the tower will mine coal from the colliers will have a capacity of 100 cubic feet, liquid full. This size is specified because, although many colliers will have large hatches equivalent to those of the latest naval type, a considerable proportion of the coal will be carried to the Isthmus in vessels in which a larger bucket could not be used. Larger buckets may be offered, however, provided small buckets are also supplied and a rapid means of making the change from one to the other is provided.

Each tower will be fitted with a lifting or folding boom on the water side and with a cantilever on the storage basin side. The cantilever may be moveable if necessary to permit the passage of the reclaiming bridges. In any case the track for the trolley of the bucket shall be horizontal and continuous, between the extreme ends of boom

and cantilever, when both are in a horizontal position, and the passage of the trolley over the hinge joints shall be made easily and without shock. Suitable buffers will be fitted at each end of the trolley runway. The distances through which the trolley or bucket will be capable of operation are as follows: Maximum height above wharf level, Balboa and Cristobal, 60 feet; maximum depth for reclaiming coal from ships below wharf level, Cristobal, 30 feet, Balboa, 45 feet; maximum horizontal travel of bucket on water side beyond center line of tower legs next to water, Cristobal and Balboa, 60 feet; maximum horizontal travel of bucket on land side, beyond nearest wall of coal basin, Cristobal and Balboa, 35 feet; maximum depth below wharf level for reclaiming coal from storage on land side at Cristobal, 29 feet; maximum depth below wharf level for reclaiming coal from storage on land side at Balboa, 34½ feet.

In addition to these operations the towers will be able to dredge the bottom of the slip in front of the unloading wharf 51 feet below wharf level at Cristobal, and 61½ feet at Balboa.

The hopper within the unloading towers will have a capacity of not less than 50 tons of coal. The boom on the water side will lift or fold by movement in a vertical plane in such fashion that when fully housed no part of it shall project more than four feet beyond the concrete face of the wharf, nor descend lower than the top of the hopper.

CONVEYORS.

The conveying system must provide for the transfer of coal from the unloading towers along the wharf to any point at which the bridges may be spanning the bin, and the transfer along the bridges to any point desired, where it may be tripped into the storage basin. It must have a sufficient capacity to handle the maximum amount of coal delivered by the unloading towers. It may consist of either cars of trains propelled by electricity or cable, belts or continuous conveyors of similar construction, or any other approved, tried out, and guaranteed means of doing the work, due regard being had to the basic requirement that breakage of coal in handling must be reduced to a minimum.

At the Cristobal plant the conveying system must be capable of performing any of the eight operations described below. At the Balboa plant the requirements are similar, but are necessarily modified by reason of the smaller size of that plant and the use of the berm cranes referred to above: (1) Receiving coal from a single unloading tower or group of towers located anywhere on the unloading wharf, as for the unloading of a single vessel, and transporting it to any part of the storage pile. (2) Receiving coal from a single unloading tower, or group of towers located anywhere on the unloading wharf, as for the unloading of a single vessel, transporting it direct to the reloaders, which may be spaced at any intervals along the reloading wharf, and delivering it to one only or distributing it among any number of reloaders, the proportionate distribution among the reloaders in action being of as wide a range, within the individual capacities of the reloaders, as practicable without undue complication and cost. It will be possible, in any event, to distribute the coal substantially equally among any number of reloaders in action. (3) Receiving

coal from a single unloading tower or two towers, located anywhere on the unloading wharf, as for the unloading of a single vessel, and transporting it direct to the wharf bunker, the capacity of the conveying system leading to the wharf bunker being sufficiently great to handle the maximum discharge from two unloading towers. (4) Receiving coal from a single unloading tower, or a group of towers, located anywhere on the unloading wharf, as for the unloading of a single vessel, and transporting it to storage at any part of the storage pile, while at the same time coal is being reclaimed from any other part of the storage pile, and being conveyed to the reloaders or to the wharf bunker. (5) Receiving coal simultaneously from two vessels located anywhere along the unloading wharf, one, two, or three unloaders being at work on one vessel, and transporting it from both vessels to the same part of the storage pile, to the reloaders direct or to the wharf bunker direct, within the capacity of the conveyors supplying the bunker. If coal from both vessels is being transported to the storage pile, it shall be possible simultaneously to reclaim coal from any other part of the storage pile by means of the remaining bridge or bridges, and transport it to the reloaders direct or to the wharf bunker direct. (6) Receiving coal simultaneously from two vessels, located anywhere along the unloading wharf, one, two, or three towers being at work on one vessel, and simultaneously transporting the coal from any one of the two vessels to any point in the storage pile, and from the other vessel to any other point in the storage pile, or to the reloaders direct, or to the wharf bunker direct. (7) Receiving coal reclaimed from the storage pile by one or more bridges up to the full number, spaced at any intervals along the storage pile, and transporting it to the reloaders or to the wharf bunker. (8) Taking coal from any point in the storage pile and depositing it at any other point in the storage pile by use of the bridges.

BRIDGES.

Two duplex or four single bridges are required in the proposed plan for the Cristobal plant. The former are fitted with two shovels or buckets, and the latter only one each. These bridges will span the coal storage basin, over the coal piles, and move along the walls longitudinally of the basin, so that they can cover any point in the basin. Upon them will be mounted the conveyors, that will carry coal from the conveyors upon the walls to any point desired within the basin; and the shovels or buckets that will mine coal from the basin and carry it to the conveyors, which will transfer it to the wharf bunker and to the machines for loading it upon colliers or barges.

RELOADERS.

The reloaders will be machines moving longitudinally along the wharf at which colliers and barges will tie up to receive coal. They will move by their own power, but not by cable. They will receive coal from the conveying system and deliver it to the vessels, and, to this end, will be fitted with the following essential parts: (a) A hopper or hoppers for the reception of coal from the conveying system of sufficient size to regulate the flow of coal; (b) a conveying system to transfer coal to the discharging end of the reloader; and (c) an adjustable arm or boom equipped with a telescopic chute to deliver coal with a minimum of breakage. This boom

will house in sufficiently to lie entirely behind the plane of the front wall of the wharf when the reloader is not in use, in order that the reloader may be moved past shrouds, upperworks, etc., of vessels lying at the reloading wharf. The extreme conditions of discharge that must be met by each reloader are as follows:

(1) For vessels having cargo holds 70 feet wide athwartship, fore and aft center line of vessel assumed to be fifty feet from face of wharf; cargo hatches not less than 10 feet wide by 30 feet long; long dimension athwartship; hatch coaming 35 feet above deck of wharf and nearest side 35 feet horizontally from face of wharf; handrail 40 feet above deck of wharf and nearest side 3 feet distant from face of wharf; bottom of cargo hold 45 feet below hatch coaming; hatches 25 feet center to center fore and aft. (2) For vessels similar to the above, light draft at extreme low water; extreme depth of cargo hold below deck of wharf, at Cristobal 25 feet at Balboa 40 feet. (3) For coal barges 30 feet wide, light draft at extreme low water; deck of barges 5 feet below deck of wharf at Cristobal, and 20 feet at Balboa.

Each reloader at each plant shall be able to perform the following functions at maximum rate: (a) Filling the holds of vessels having the characteristics outlined in (1) and (2). (b) loading flat deck barges as indicated in (3); (c) filling holds of smaller vessels and loading larger flat deck barges through all gradations of size of each class. The foregoing operations shall be performed with minimum of trimming by means outside the reloader itself. Under (c) vessels having hatches as small as 12 feet square shall be readily loaded. It shall not be necessary to breast off vessels smaller than described in (1) and (2) in order to bring their hatches under the point of discharge from the reloaders, but all adjustments to suit the particular vessel or barge to be loaded shall be by means within the reloader itself.

Red Cross Finances.

A statement of the finances of the Canal Zone Chapter American National Red Cross for the month of December, follows:

RECEIPTS.	
December 1, On hand	\$1,886.42
December 11, Sale of Christmas Seals	70.00
December 20, Sale of Christmas Seals	31.00
December 24, Interest on money in bank, June to to November, inclusive	21.20
December 24, Sale of Christmas Seals	14.00
December 31, Membership dues ..	101.00
Total receipts	\$2,123.62
DISBURSEMENTS.	
December 12, Payment for meals furnished at Cristobal Hotel	\$18.00
December 12, Printing ballots	4.59
December 13, Payment of rent for destitute family at Colon	11.00
December 24, Cablegram to New York	3.55
December 27, Relief of American woman from Chiriqui, Rep. of Panama	30.00
Total disbursements	\$67.14
December 31, Balance on hand	\$2,056.48
JOHN L. PHILLIPS, Treasurer.	
Approved: C. A. DEVOL, Chairman.	

FOUND—A purse, in Culebra, Monday, January 20. owner can obtain same by applying at the dispensary.

THE WOMEN'S CLUBS.

Last Meeting of Canal Zone Federation.

The sixth annual meeting of the Canal Zone Federation of Women's Clubs was held at the Hotel Tivoli on Saturday, January 25, being attended by nearly two hundred club women and their friends. In view of the fact that the next general meeting of the Federation would not occur until January, 1914, and the forthcoming changes in the canal force would remove the majority of the members from the Isthmus, the convention ordered that this should be the last annual meeting of the Federation and that at the close of the club year, April, 1913, the organization should go out of existence. This action was taken in accordance with the recommendation of the executive board made at its meeting in November, 1912. At the business session, therefore, which convened at 9 o'clock, the questions to be decided upon were the disposition of the Federation property, the publication of the history which will place the work of the Federation in permanent form, and the possibility of carrying on for one more year the work of educating the blind boy now in Perkins Institute, Boston, as the ward of the Federation.

In her welcome to the delegates, Mrs. Henry Ropes Trask, representing the members at large of the Federation, reminded the club women that one justification of the organization had been the work of placing this boy in school. In her response to the greeting, the President told of a busy year; of visits from club women from organizations in the United States, and of their good will and interest. The librarian, Mrs. M. E. Smith, of Empire, reported that the juvenile library of 250 books is now at Cristobal. The pictures are in use in the Empire school and have been much enjoyed by the pupils. They have been exhibited in the public school in Gorgona and have also been exhibited by several of the federated clubs. In February, 1912, they were lent to the Ancon Study Club. The chairman of the Federation pins committee, reported all the pins sold, and a letter was read from the firm which makes the pins stating that they will continue to sell them in lots of ten for \$2.50 each, in smaller orders the price will be \$3.50 each. Mrs. J. H. Westberg, reported that the box of individual gifts for the inmates of the leper asylum at Palo Seco had been received at the asylum on December 23, and read a letter of thanks and appreciation from the superintendent of the asylum. In her report, the chairman of the history committee, Mrs. Carl H. Elliott, recommended the printing of the history. This committee was retained, its number being increased by the addition of two more members, and was authorized to publish the book in time for distribution at or before the last meeting of the executive board which will be held in April.

The reports of the club presidents showed a weakening of club work, which has been foreseen and which is inevitable in the face of the approaching end of the canal construction and the disbanding of the present force. Nevertheless, good philanthropic work has been carried on by the Empire Women's Club, the Gatun Club reported interesting meetings, and the Cristobal Woman's Club maintains its regular department work with success.

As chairman of a special committee on the Federation library, Mrs. Elliott stated that the Isthmian Sunday School Association

would be glad to receive the books for library extension work among the federated Sunday schools. The transfer of the library was ordered by the convention and the books will be turned over to the representatives of the association within a short time. A committee was appointed to decide upon the disposition of the pictures and the five books on art belonging to this collection. These pictures will however remain in the Federation until the close of the club year.

By an enthusiastic and unanimous vote, the Federation banner was given into the hands of the corresponding secretary to be forwarded to Mrs. Lorin C. Collins as a gift from the Federation. Mrs. Collins was the president of the Federation in its early days and placed the organization on the working basis by which it has been enabled to carry out club effort under its peculiar conditions. The banner is made of heavy green silk rep, ornamented with gold lettering and finished with fringe and tassels of gold. It was the gift of Miss Ferriss of New York in 1910. The gavel, one of three presented by the Superintendent of the Panama railroad in 1909 was given to the President, Miss J. Macklin Beattie, in accordance with the tradition established in the same year. At 12 o'clock, the meeting adjourned for the luncheon period.

At 2.30 o'clock an audience of two hundred was gathered in the ballroom for the afternoon session. The room had been arranged for an auditorium; at the back of the hall hung the Federation banner, and potted plants and ferns were ranged on either side of the chairs of the officers. It had been the object of the Federation to rally the club women who were members of the organizations in the beginning of the work, for this last meeting, and when a call was made for these women to stand it was found that there were 40 present. Other guests were the American Minister and Mrs. Dodge, the Hon. and Mrs. M. H. Thatcher, the Hon. Peter M. Speer, Member of Congress from Pennsylvania and Mrs. Speer, and Mrs. Nelly Peters Black, member of the executive board of the Georgia State Federation.

The program in full was as follows:

Piano duets:

- (a) Triumphal March, Grieg.
- (b) Salutation, Moskowski.

Mrs. Frank Ullrich and Miss Dorothy Leyland.

Communications—Letter of greeting from Mrs. Lorin C. Collins, read by the recording secretary.

Vocal solo, The Shadow Song from the opera of Dinora, Miss Loraine Foster.

At the piano Professor Garay, director of the National Conservatory of Music, Panama.

Address, The Philanthropic Outlook in Panama, Dr. Cueva Garcia.

Violin Solo:

- (a) Salut D'Amour, Elgar.
- (b) Perpetua mobile, Bohm.

Miss Dorothy Leyland.

Address—"The Abolition of Poverty," Dr. Edward T. Devine.

Greeting from the Georgia State Federation, Mrs. Nellie Peters Black, member of the Executive Board.

Chorus:

- (a) The Merry Lark, Gounod.
- (b) Kuessen will ich, Abt.
- (c) Huete dich, Genser.

Cecilian Chorus, Cristobal Woman's Club.

An informal reception followed, refreshments being served.

The arrangements for the day were in the hands of various committees acting under Mrs. Thomas Edwin Brown, Jr., chairman of the committee on arrangements. Of these subcommittees, Mrs. Fredrick Mears of Cristobal was chairman of the program and music and Mrs. Trask of Culebra chairman of the social committee. This committee had as assistants, Mrs. Mears and four presidents of the original federation clubs; Mrs. J. C. Barnett of Paraiso, Mrs. Frank Morrison of Gorgona; Mrs. W. H. Stoddard of Gatun and Mrs. Frank Roberts of Pedro Miguel.

An unannounced number of the program was a report made by the corresponding secretary of the progress of the blind boy in his first year of school. This being the last opportunity for concerted work of the Canal Zone club women, the appeal was made for donations toward a fund for one more year of schooling for James. A generous response was made by many present so that the Federation feels that a sum sufficient to carry on this work for one more year is assured.

The officers of the organization will carry over until April, and any communications may be addressed as formerly to the corresponding secretary or to the president.

Isthmian Sunday School Association.

The annual meeting of the Isthmian Sunday School Association was held in the Commission chapel, Gorgona on Sunday, January 12, beginning at 2.30 p. m. Twelve Sunday schools were represented by delegates, the total number present being 51 and there were 21 visitors from the various schools.

The Cristobal school has donated money to the Jacob Riis Settlement in New York, to the St. Bernado Home in England, and to the Sailors' Bethel in Massachusetts. Gorgona has assisted a needy family and sent money toward the relief of a theological student. Gatun, recently reorganized and brought up in efficiency, endeavored in its Christmas entertainment to emphasize the religious meaning of the festival. The Las Cascadas school presented the patients in the government asylum for lepers at Palo Seco with a graphophone for Christmas. Several of the schools observe mission Sunday once a month the offering being devoted to missions, and several support scholarships in the Methodist school in Panama. The superintendent of the Culebra school described the souvenir booklet presented by the school at Christmas. This booklet contains photographs of the chapel and of the teaching staff, the names of the scholars and teachers, the history of the Sunday school since its organization and the statistics at the close of the year 1912.

A letter was read from Mrs. Carl H. Elliott, chairman of a special committee for the Canal Zone Federation of Women's Clubs offering the Federation library of 250 books to the Association for library extension work. The offer was accepted, and a committee will be formed in the Association for the handling of this work.

The officers elected for the ensuing year are: President, the Rev. A. A. Nellis of Culebra; vice-president, W. H. Kromer of Cristobal;

treasurer, J. M. Weaver of Cristobal; secretary, W. M. Windes of Gatun.

Following are the statistics of the schools federated in the Isthmian Sunday School Association: Total number of children enrolled, 663; total number of adults, 193; number in the Home Department (Culebra only), 17; total number in the Cradle Roll, 116; total enrollment for the Association, 1,167; average attendance for the past quarter for the entire number of schools, 654. These numbers include a Sunday school at Porto Bello which has an enrollment of 20.

The next meeting of the Association will be held at Gorgona on Sunday, April 13.

Canal Zone Rifle Club.

At the annual meeting of the Canal Zone Rifle Club on January 12 at Pedro Miguel, the following officers were elected: President, F. W. Walraven; vice-president, J. N. Haynes; secretary, G. C. Ferris; treasurer, A. K. Evans; executive officer, W. L. Greene.

The reports of the officers of the past year showed that more shooting than ever before was done by the members, because of the club's having a range at Pedro Miguel, and 76 per cent of its members qualified under Class C, War Department regulations.

After the meeting, the fifth shoot for the Garlington medal was held, the winner being G. C. Ferris, with a score of 86.

Any white American citizen is entitled to membership in the club. Full details may be secured from the secretary, whose post office is Pedro Miguel. The new model Springfield is used by the club exclusively.

The Canal Zone Rifle Club held an informal match shoot with the Marines at the Gamboa rifle range on Sunday, January 19, in which the Marines were the victors. The best score of the match was made by Lieutenant Smythe, U. S. M. C., who made 49 at 200 yards. McLellan of the Rifle Club also made a good score at the same range, 48. The scores follow:

U. S. Marines.	200 yds.	300 yds.	600 yds.	Total.
Lieut. Smythe.....	49	46	46	141
Myers.....	39	43	47	129

PERSONAL.

Capt. Charles W. Barber and Mrs. Barber returned from leave in the United States, on the *Panama*, arriving January 21.

Obituary

Harold Wood, an employe of the Atlantic Division at Porto Bello, died on January 14 while enroute to hospital. He was injured by a falling dipper door on a steamshovel. He was 22 years of age, single, and had been on the Isthmus seven years, coming here from Chicago. He is survived by his father, Geo. W. Wood, living at Gatun.

LOST—On Sunday afternoon, January 19, at Las Cascadas or Bas Obispo, or passenger train No. 26, a lady's gold chain and locket. The locket is heart-shaped, engraved with the initials "L. M. P.," and contains a photograph. A suitable reward will be paid if returned to the owner or left at the Las Cascadas police station.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Moving picture schedule for the week February 3 to 8, is as follows: Monday, Cristobal; Tuesday, Gorgona; Wednesday, Gatun; Thursday, Culebra; Friday, Corozal, Saturday, Empire; Friday, Porto Bello.

Lunches were served to the members of the First Division of the Atlantic Fleet on the special trains which transported the men across the Isthmus the first five days of last week; about 4,300 men were served. Lunches will be served this week to about 2,600 men, comprising the Third Division of the fleet.

COROZAL.

The floor of the assembly hall of the Corozal Y. M. C. A., will be completed this week in time for the regular weekly picture show. The lecture by Professor Devine of Colombia University, which was to have been given on Sunday night, was postponed on account of the repairs to the floor.

Mr. Burnsee of Cristobal played checkers with 18 different men, winning 64, losing 5, and drawing 4 games out of 73 played.

GAMES PLAYED.

CULEBRA.

The high scores in duckpins for the week are as follows: Case, 100; Brown, 110; Warner, 103; Steele, 100; Bechlem, 102; Silvers, 114; Anderson, 110; Durand, 115, 107, 102; Palmer, 102.

EMPIRE.

The "smoker" held Thursday evening, January 23, was attended by 250 men. The program consisted of music by the Tenth Infantry Orchestra; Butts' Manual drill by a squad of Tenth Infantrymen; solos, by Messrs. Case, Ross, Mosher; Duet by Mosher brothers; Reading by Mr. Fenstermacher; Mandolin trio, Mr. Ramsay, Mr. Arbuckle and Mr. Howard Culebra. With the refreshments that were served were home-made cakes donated by the Empire ladies.

Saturday evening, January 25, the Corozal duckpin bowling team lost two out of three games to the Empire team. The scores were as follows:

Empire.....	429	410	430
Corozal.....	396	445	420

The jumping pit in the rear of the building has been put in condition; all those intending to enter the track meet on February 22 may use this pit.

GORGONA.

A handball tournament opened Monday night, January 27. Twelve men have entered, and special prizes will be given.

The Empire duckpin team bowled at Gorgona on Saturday night, January 25. Results follow:

Empire.	Gorgona.
Lowande... 85 72 85	Dunlap.... 81 89 82
Gurd..... 87 95 89	Sims..... 107 85 89
Sawtell.... 89 76 82	Moyer.... 90 83 ..
Gustafson.. 87 92 82	Davis.... 108 92 81
Rodeghiero. 88 92 86	King..... 94 83 89
	Gebhart.... 88

Totals... 436 420 424 480 432 429

Monday evening the Gorgona people were entertained by the orchestra from the steamship *Prins Joachim*. Three hundred people attended.

The Gorgona Chorus will give a concert in February.

GATUN.

The present personnel of the Spanish classes under Professor Gomez, new courses for which started on January 24, is as follows: *Ladies class*—Mrs. Waid, Mrs. Parneter, Mrs. Weidner. *Advanced class*—Dr. Farmer, Mr. Porter, Mr. Waid, Mr. Valleley, Mr. Duckworth. *Intermediate class*—W. A. Roberts, W. S. Golden, O. E. Alyea, A. N. Margenson, Chas. E. Mead. *Primary class*—W. H. Brown, C. A. Tharp, E. C. Mackey, R. G. Dalton, I. F. Nock, H. D. Crandall, N. S. Seeley, N. W. Brewbaker, A. G. Pelley, C. S. Wickham.

A band of 15 pieces and a team of basketball players of the U. S. S. *Utah* with Ensign Fort in charge visited Gatun Y. M. C. A. on Wednesday evening, January 21.

A concert was given and a game of basketball was played with the Gatun team, the score resulting favorably to Gatun. E. D. Christopherson acted as referee. Three hundred people were present. Following the game and concert, refreshments were served in the game room where Mr. G. A. Reeder, International Secretary of the Y. M. C. A., gave an informal talk on V. M. C. A. work on battlefields.

Three hundred and thirty-six people saw moving pictures on Friday evening, January 24. D. Roswell Homer played several piano selections.

A duckpin bowling fest was held at Gatun clubhouse on Saturday, January 25 with Cristobal and Culebra as visiting teams. Refreshments were served and a general good time enjoyed. The scores follow:

Gatun.	Cristobal.
Harper..... 70 94 99	Herrington.. 84 86 100
Carlson..... 92 84 81	Orr..... 85 81 86
Gibson..... 82 70 75	Gibson..... 88 75 83
Morrissey... 95 77 83	Blind..... 94 87 100
Wurster.... 91 88 81	Barrett..... 92 93 95
Totals.... 430 413 419	443 422 464

Gatun.	Culebra.
Green..... 82 91 108	Silvers..... 86 71 85
DeMoll..... 83 96 86	Steele..... 83 74 86
Humphrey.. 95 99 80	Kersey..... 86 99 94
Well..... 84 106 94	Anderson... 103 90 90
Claherty... 81 91 84	Case..... 78 95 85
Totals.... 425 483 452	436 429 440

In the ragtime tenpin tournament the two highest scores are Humphry and Wurster, 1,071; Barte and Miller, 1,058.

In the ragtime duckpin tournament three teams are tied for first place: Harper and Morrissey, 552; DePoorter and Wells, 552; Wells and Wurster, 552.

The high games in duckpins for the week ending January 25 are Carlson, 102; Humphrey, 100, 112; Green, 108; Morrissey, 100, 100, 100; Harper, 109, 103; DeMoll, 100, 100; Wurster, 101, 104, 107, 114, 101, 100; Wells, 106, 102, 106, 100.

A 75-yard straight-away and a jumping pit have been constructed at the rear of the clubhouse and the athletes who are to compete in the meet on February 22 are using these each evening for practice.

CRISTOBAL.

On Monday, January 13, a simultaneous checker match was played. Twenty-two men took part. Mr. F. L. Bernsee won the total of 43 games played.

Wednesday, January 15, the Cristobal basketball team played the team from the U. S. S. *Michigan*. Score 31 to 6, in favor of Cristobal. On Thursday, January 23, the U. S. S. *Florida* basketball team was defeated by a score of 13 to 43 in favor of Cristobal's team.

There was an attendance of 130 at the moving picture show Saturday, January 18 and at the show of January 23 the attendance was 220.

The band from the U. S. S. *Florida* gave a concert on Thursday night, January 22. The attendance was 350.

From January 12 to 15 there were prepared at the Cristobal clubhouse 2,000 sandwiches and lemonade each night, as well as from January 19 to 23 a like amount, for serving lunches to the members of the First and Second Divisions of the Atlantic Fleet, while on shore leave en route to Panama City.

The monthly married folks bowling tournament was held on Saturday night, January 18. Mr. and Mrs. Weston won first place with a score of 495; Mr. and Mrs. Buser were second with 481. Mrs. Bell won the five-pound box of candy donated by a novelty shop for the lady making the highest score. Mr. Buser won the week's tickets to a theater for the man making the highest score, and Mr. and Mrs. Collins secured the tickets to the theatre given for the couple finishing in last place.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending February 8, 1913. (75th meridian time):

DATE.	High	Low	High	Low
	A.M.	A.M.	P.M.	P.M.
February 2.....	12.32	7.00	1.35	7.30
February 3.....	1.43	8.00	2.35	8.30
February 4.....	2.40	8.53	3.22	9.20
February 5.....	3.28	9.38	4.00	10.00
February 6.....	4.08	10.16	4.33	10.38
February 7.....	4.42	10.52	5.02	11.11
February 8.....	5.13	11.25	5.30	11.43

Band Concert.

A band concert will be given by the Isthmian Canal Commission Band at Toro Point, C. Z., Sunday, February 2, 1913 at 2.30 p. m.

A concert will be given at Gorgona, C. Z., February 9 at 6 p. m.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold-storage provisions for the week beginning January 29, 1913:

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sail thus: the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m., and the *Prinz Sigismund* and the *Prinz Eitel Friedrich* on alternate Mondays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Boca de Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,

Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Riprapping Gatun Dam.

The lake side of Gatun Dam will be riprapped with hard rock for a distance of ten feet above and below the normal level of the water, 85 feet above sealevel. About 175,000 cubic yards will be required for this purpose, and a steamshovel has been set at work in one of the borrow pits near Monte Lirio to procure this rock. Earlier in the history of the Canal work it was believed that the trap rock from the Bas Obispo dike of Culebra Cut could be used for this purpose, and to that end a large amount of this rock was stored at Gatun. It soon developed, however, that it weathered rapidly and would not answer for the purpose, therefore it was used elsewhere in the work at Gatun. The rock from the borrow pit is hard and stands both air and water well. It will be dumped upon the south slope of the dam, without effort being made to place it regularly. Paving the slope would not be profitable, because the material in the dam is going through the process of shrinking, and evenly laid rock would not settle evenly.

Temporary Coaling Dock at Balboa.

A new coaling dock for vessels at the Pacific entrance must be provided during the next few months, because work on the Balboa terminals will make the use of the present dock impossible after June 1. A trestle will be built at the north end of the steel pier, on the site of the dock that recently slid towards the canal.

Four other sites were considered, one at the north end of the dredged channel of the Canal at Corozal, where the Fortifications division has its coaling trestle, a second at the south end of the steel pier, a third any location on the dump at Balboa projecting towards Naos Island, and a fourth at the intersection of the Naos Island Breakwater with the French Canal channel. All of these presented obstacles of construction, cost, or operation greater than those to be met with in the site determined upon.

It is proposed that a temporary trestle of

about 120 feet usable length be constructed in such manner that barges can be filled from it directly from side dump cars. The necessary approach tracks, aprons, and trestle are estimated as costing from \$3,500 to \$5,000. This trestle is for use only until the permanent coaling plant provided for on the east side of the entrance to dry dock No. 1 is ready for use.

The Joint Land Commission.

Dr. Roland P. Falkner of Washington, D. C., and Prof. L. S. Rowe of Philadelphia have been appointed by the President to represent the United States on the Joint Commission which is to adjudicate claims for Canal Zone lands. The representatives for Panama are the Hon. Federico Boyd, and the Hon. Samuel Lewis. Dr. Falkner is an eminent statistician who has been connected with the Bureau of the Census; Professor Rowe is a jurist and economist who has represented the Government of the United States in Latin-American affairs on several occasions, and at present is a member of the faculty of the University of Pennsylvania. Messrs. Boyd and Lewis have been prominent in the Government of Panama for many years.

The Commission will act under Articles VI and XV of the Treaty of February 26, 1904 between the United States and Panama. The first commission on lands made its report on August 8, 1908.

North Guide Wall—Gatun Locks.

The construction of the north guide wall of Gatun Locks is the most important part of that work at present, because upon its completion depends the earliest time at which the locks can be used. A slide occurred in the east bank of the north approach on January 25 that will set the construction of the guide wall back several weeks, and the date set for the completion, June 30, must therefore be advanced. This part of the locks involves the placing of only 123,000 cubic yards of concrete, out of the total of 2,043,000 cubic yards of the locks in Gatun; and yet it has been one of the most difficult and tedious parts of the whole job.

The surface of the land just north of Gatun Locks, the area in which the north guide wall must be built, is only a few feet above sealevel, and the rock of the hill in which the locks are emplaced dips suddenly here to depths varying from 35 feet to a hundred or more feet below sealevel. The excavation for the approach itself has been taken down to 51 feet below sealevel by dredge, and that for the foundations of the wing walls on either side of the approach and for the center guide wall down to from 65 to 70 feet below sealevel. The wing walls and part of the guide wall are based upon solid rock, but the greater part of the guide wall is to be founded upon piles driven to bed rock. The material through which the excavation has been car-

ried is composed of silt, and clay, all below sealevel and, therefore, containing so much water that it has little cohesiveness. All this excavation had been completed, and the driving of piles had been advanced for a distance of 600 feet out of the 1,000-foot length of the guide wall, when the slide of January 25 occurred.

The material on the east bank had shown no tendency to move towards the approach channel, although the excavation had been completed several weeks and there was nothing to hold the bank except its own coherency. It broke away without warning, carrying with it into the channel two railroad tracks, picking up a hoisting engine that had been used on the bank in "snaking" piles and depositing it three hundred feet away, wrecking two of the four pile drivers that were at work on the foundation of the guide wall, pushing the barge upon which the unwatering pumps were mounted far westward of its original position, and in fact moving or wrecking everything in its path. A part of the east bank 500 feet in length and 300 feet in breadth moved slowly into the Canal, and completely covered seven hundred feet of the guide wall site with a stratum of viscous mud from three to fifteen feet in depth.

Preparations were in progress to lay concrete in the first 600 feet of the guide wall, because it requires a section of this length for the most advantageous use of the plant assigned to the work. The laying of concrete in the first three hundred feet can be carried on, but the slide must first be cleaned out before the plant can work to full capacity. The material overlying the site of the guide wall is too soft to sustain the weight of a steamshovel, and therefore it must be taken out by locomotive crane with clam shell bucket, a comparatively slow process. To this end two trestles are being constructed over the soft mud, one for the crane to operate upon and the other for the cars into which it will load spoil. The exact amount it will be necessary to excavate before the laying of concrete in the guide wall may be carried forward, cannot be ascertained, but it is estimated that at least 5,000 cubic yards of material must be dug out of the slide in order to bring the approach to its proper depth.

Movements similar to this occurred in the east bank of the lower lock chamber, and caused no little inconvenience. In the construction of the wing walls, therefore, they were anticipated. On either side of the site of these walls the earth was dug down to rock and a rock fill was made, upon which the cableway towers could operate. This fill, which is really a wall of rock, has protected the site of either wing wall from slides, and the construction of these is therefore advancing without menace from land movements. The east wing wall is about 75 per cent completed. In excavating to rock for the west wing wall, however, a sharp dip in the rock

has been encountered, and in the northern section, near the north abutment, the excavation has already been carried down to 65 feet below sealevel. This digging must continue by hand until bed rock is reached. Meanwhile the placing of concrete in this wall is advancing, one cableway being devoted to the concrete laying, while another is lifting from the foundation pit the soft mud and rotten sandstone that overlies the bed rock.

Gatun Dam Spillway.

The concrete work in the Spillway at Gatun Dam is over 96 per cent completed, 216,150 cubic yards, out of a total of 225,000 having

been placed at the close of work on February 1. A statement of the amount laid each day last week, and of the total in place, follows:

DATE.	Concrete laid.	Hours worked.	No. mixers used.
	Cu. Yds.		
January 27.....	192	6 75	1
January 28.....	130	6 50	2
January 29.....	221	7 50	1

January 31.....	168	6 00	1
February 1.....	112	5 00	1
Total.....	988	39 00	
Previously reported.	215,162		
Grand total.....	216,150		

CONCRETE WORK IN THE LOCKS.

Over 96 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on February 1, the amount in place being 4,286,882 cubic yards.

GATUN LOCKS.

Over 95 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on February 1 being 1,945,448 cubic yards, out of a total of 2,043,730. A statement of the amount placed in the locks each working day of the week ending February 1, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers.	Concrete placed.	Hours worked.	No. of mixers.

MIRAFLORES LOCKS.

Over 95 per cent of the concrete for the system of two twin locks at Miraflores was in place February 1, the total amount on that date being 1,432,592 cubic yards, bucket measurement, out of a total of approximately 1,499,800. The record for each working day last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.						Mixed by hand.	Large stone.	Total.	SPILLWAY.			Total.

Hydraulic Spoil for Fill at Colon.

The excavation of slips alongside the piers and wharves of the Cristobal terminals will necessitate the removal of considerable quantities of soft material in addition to the rock which has been excavated by the dipper dredge *Mindi*. The pipeline suction dredge No. 4, which is now undergoing repairs at the dry dock, will begin work west of Pier 17 within a few weeks, removing silt and soft earth. This spoil will be discharged in the new fill east of Colon, raising and smoothing the present area and extending its limits into the swamp toward Folks River. The 18-inch discharge pipe will extend along the mole at the inner end of the piers, under the Panama railroad tracks, across Front Street and out Twelfth Street to the fill, a distance of about half a mile. Section estimates indicate that 90,000 cubic yards of soft material are to be removed in the area assigned to this dredge, but the tendency to slide from the sides, in connection with silting due to the dumping, will probably make it necessary to remove double that quantity.

Pilots, Masters, Mates, Engineers, Chauffeurs.

Examinations for pilots, masters, mates, engineers, and chauffeurs will be held by the Board of Local Inspectors at the Administration Building, Ancon, on Wednesday, February 12, 1913, beginning promptly at 8 a. m. All applicants for licenses must secure from the Executive Office, Department of Civil Administration, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to properly operate same.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the weeks ending January 18 and 25:

DATE.	Hours worked.	Cubic yards.

January 25.....	8 45	2,826
Total.....	52 30	17,763

Mosquitoes at Gatun.

It has been determined that Gatun Lake is not responsible for the plague of mosquitoes which has prevailed for several weeks at Gatun. The breeding place is a swamp and is north of the dam, between the French Canal and the Chagres river. The swamp, on account of receiving the water from the dredges operating north and east of it, is composed of about 30 per cent of sea water. Its eastern edge is more than 3,800 feet from the village, and since the beginning of sanitary operations on the Isthmus in 1904 so long a flight of mosquitoes in such large numbers has not been noted. The period of maximum flight is between 6.15 and 7.30 o'clock in the evening, when there is usually a lull in the wind, and at this time mosquitoes are plainly visible against the skyline along the banks of the French Canal, about opposite the cement shed. Operations are in progress for draining the swamp, thereby rendering it free from mosquito propagation.

The mosquitoes from this source are exclusively a variety of *Anopheles*—a malarial mosquito. So far, *Anopheles* have not bred in the lake, the little breeding noted there being almost wholly the harmless *Culex*.

Civil Service Examinations.

A supply of the Manual of Examinations for the spring of 1913 has been received.

Examinations for the following-named positions are scheduled to be held, probably on March 16: Assistant, Philippine Service; assistant engineer, Reclamation Service; assistant inspector of boilers, assistant inspector of hulls, Steamboat-Inspection Service; clerk, Isthmian Canal Service; copyist topographic draftsman, topographic draftsman, non-apportioned Departmental Service; junior engineer draftsman, Engineer Department at Large; forest assistant, Forest Service; forest assistant, Philippine Service; industrial teacher, Philippine Service; junior engineer, Reclamation Service; kindergarten teacher, Indian Service; local inspector of boilers, local inspector of hulls, Steamboat-Inspection Service; matron, Indian Service; physician, all services; teacher, Philippine Service; veterinarian.

Women will be admitted only to the examinations for copyist topographic draftsman, topographic draftsman, kindergarten teacher, matron, and teacher, Philippine Service.

Applications for the above-named examinations will not be received in this office after February 21; this date will be changed if necessary. In requesting information, the kind of examination desired should be specifically mentioned.

The examinations will be held probably at Empire, in the Commission clubhouse, but the place of examination should be omitted in application forms. The date of examination should also be omitted.

All instructions found in application forms and in the Manual of Examinations concerning an examination desired should be carefully read and understood before filing application. Vouchers should show only the place of their bodily residence.

application. Vouchers should show only the place of their bodily residence.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., February 3, 1913.

LABOR FORCE AND QUARTERS IN DECEMBER.

The total force at work on the Canal and Panama railroad on December 24, was 39,336. Of this number 28,698 were employed on the canal by the Commission, 4,677 by contractors, and 5,961 by the Panama railroad. The gold force on the Canal work composed almost exclusively of white Americans, was 4,325. The total Government force was as follows:

DEPARTMENT	SILVER EMPLOYES.*													Total silver.	Total gold.	Grand total.

TWO NEW DIPPER DREDGES.

Contract for Two 15-Yard Dredges Let in United States.

Two 15-yard dipper dredges have been contracted for with the Bucyrus Company of South Milwaukee, one to be delivered at a port on the Atlantic coast for towing to the Isthmus on or before December 1, 1913, and the other on or before January 1, 1914. A penalty of one hundred dollars is provided for each day that the contractor overruns the time of delivery, and a like premium for him for each day that he anticipates in delivery. The price agreed upon is \$258,500, a total of \$517,000. The contract was entered into under the law for open market purchases under authority of the Secretary of War, dated January 13, 1913. The principal features of the dredges according to the specifications are summarized in the following:

Fifteen Yard Dipper Dredge with 16 by 28 by 24 Twin Tandem Compound Main Hoisting Engines with Single Part Wire Rope Hoist and Steel Hull.

This dredge will dig to a depth of 50 feet below the surface of the water; the machinery throughout will be constructed to withstand maximum pull of the engines when working with 125 pounds steam pressure at the engine and condensing. The dipper will be hoisted by a single part steel wire cable. All parts of the machinery will be designed especially with a view to rapidity of work and convenience in operation.

Hull—The hull will be of steel, approximately 136 feet overall length; 44 feet width; 15½ feet deep at bow, 13½ feet deep at stern.

Plating—Bottom 17 pounds per square foot except outer strakes which will be 20-pound; side plating bilge strake 17-pound; sheer strake 20-pound; bow and stern plating 20-pound; deck plating 12½-pound except outer strakes which will be ¾-inch diamond or checker plates, raised pattern. **Frame Spacing**—Frame spacing approximately 24-inch centers; floor beams 12-inch 25-pound channels; deck beams 5-inch by 3½ by 5/16-inch Z bars 11.6 pounds per foot; Frames 6 by 3½ by ¾-inch Z bars. Every fifth frame to be ¾-inch web frame, about 30 inches deep with 3½ by 3½ by ¾-inch angles; intercostal stringers of 15-inch 33-pound channels will be set between web frames to support Z frames. A heavy structural steel truss will be built into the hull with cross trusses between spud wells, the trusses will also be arranged at the bow to support the swing circle. An intermediate cross truss will be located at about frame 24 and a transverse water tight bulkhead between boiler and engine rooms. **House and Cabins**—A wooden house will cover the machinery and main deck, and on the upper deck there will be cabins for the crew.

Main Engines—The main engines will be twin tandem compound with cylinders 16 by 28 inches in diameter and 24-inch stroke; crankshaft of forged steel 12 inches in diameter with journals 9¼ inches in diameter and 14 inches long. Link motion of the Stephenson type with 6-inch diameter steam actuated reverse.

Hoisting Drum and Gears—The hoisting drum will be of differential type and cast of steel, small diameter 55 inches, large diameter 84 inches at the bottom of the grooves; grooved for 3-inch diameter wire rope. The hoisting shaft is to be of forged steel about 14½ inch diameter with journals 11½-inch diameter by 18 inches length. Power will be ap-

plied to the drum by means of two outside woodlined band frictions, one on each side of the drum, both being operated by means of a single steam cylinder 14 inches in diameter, placed at one end of the drum shaft and attached to a thrust spindle passing through the center of the shaft. This thrust spindle operates the friction band through a system of bell cranks and toggles.

A single lowering brake 12 inches wide, same diameter as the clutch frictions, will be provided on one end of the hoisting shaft. The brake band will be controlled by steam friction. A ratchet and pawl will be provided to hold up the dipper when not running.

The drum will be driven by two gears, one at each side meshing with the corresponding pinions on the intermediate shaft. The intermediate shaft will be driven from the crank shaft through a single gear which will have steel casting rim bolted to a heavy cast steel spider arranged so that the rim can be replaced without stripping the shaft.

Bearings for the intermediate shaft will be bolted directly upon engine bed plates. The bed plate, which also contains the drum shaft bearings, will be a heavy steel casting, and will form an extension of the engine bed plate, securely bolted to the same and to the structural base built into the hull. The drum shaft bearings will be of the quarter box type with wedge adjustment.

Boom—The boom will be of structural steel about 62 feet long, with curved top and bottom chords, all parts of ample section for the stresses they must bear; the boom feet will be heavy steel castings with webs and flanges of sufficient length to provide ample rivets. The shipper shaft bearings will be bolted to the top chords.

Shipper Shaft and Brakes—The shipper shaft on the boom will be hollow and cast of nickle chome steel, not less than 9½-inch diameter in the middle, and 8-inch diameter in the bearings. Pinions and flanges will be cast in one piece with the shaft. The brake wheels will be steel castings 75 inches in diameter with 12-inch face, and will be bolted to the flanges on each end of the shipper shaft. The brakes will be of the double acting differential type, and will be operated by means of a combined hand lever and foot treadle.

Base Plates—The boom will be stepped into a steel casting pivot bearing formed with sockets to receive the boom feet. This pivot will rotate on a heavy cast steel base plate securely bolted to the hull and having flanges extending over the front of the hull. The pintle will be bushed with bronze, and a bronze wearing plate or washer will be provided between the boom step collar and the base plate. The base plate on which the swing circle will rotate will be a heavy steel casting, with pintle bushed with bronze, and bronze wearing plate or washer between the base plate and the center casting of the swinging circle.

"A" Frame—The "A" Frame will be of structural steel properly proportioned to carry all the loads that may come upon it, each leg of box section. The head and feet and the base castings which support the frame, will be of cast steel; pins in the feet will be of forged steel not less than 7 inches in diameter, and the pin in the frame, for connecting the back guy equalizer, not less than 6½ inches in diameter. An equalizing arrangement consisting of two U-shaped forgings to carry sheaves, and two heavy steel plates for connecting the U straps to the "A" Frame head, will be pro-

vided to equalize the load on the back guy ropes. In the U-shaped forgings there will be two sheaves grooved for 3-inch rope, and of 37-inch diameter at the bottom of the groove.

Swinging Circle—The swinging circle will be of structural steel 24 feet in diameter, and mounted upon the hull truss. Connection to the boom will be made by means of two heavy, built-up girders extending out from the circle, one on each side of the boom. The center will be a heavy steel casting securely bolted to the circle.

Swinging Machinery—The swinging machinery will be operated by an independent double engine having cylinders 12 inches in diameter by 16-inch stroke with link reversing gear. The engine and drum will be mounted upon heavy structural steel bases built into the hull. The links will be reversed by a steam thrust cylinder, controlled by the same lever that operates the throttle. The swinging drum will be of cast steel 42-inch pitch diameter and grooved for 2-inch diameter wire rope, and will carry on one side a housing for a wood lined band brake, on the other a cast iron spider for the driving gear. The brake will be actuated by a steam thrust cylinder with compensating valve motion. The drum shaft will be 7½ inches in diameter with journals 6½ by 12 inches running in cast steel babbitted bearings. The intermediate shaft will be 7 inches in diameter with journals 6½ by 12 inches running in cast steel babbitted bearings. The sheaves, for guiding the swinging ropes from the swinging circle to the swinging drum, will be located on top of the hull truss, will be 42 inches in diameter, and grooved for 2-inch rope.

Spuds and Spud Machinery—There will be two forward spuds of Oregon fir timbers, plated on four sides with steel plates one inch thick, 72 feet long and 48 inches square over the plating. The forward spuds will be operated by an independent double 12 by 16-inch engine with link motion reverse, operated by steam thrust cylinder, controlled by same lever that operates throttle valve. The drums will be of not less than 42 inches diameter, grooved for 2½-inch wire ropes. The dredge will be "pinned-up" and the spuds lifted by 2½-inch wire ropes passing around the top and bottom of each spud; the load to be taken by four parts of rope. Wood lined band brakes will be provided, operated by a suitable steam cylinder to hold the dredge when "pinned-up." A suitable friction clutch, operated by a steam thrust cylinder, will be provided for disconnecting the drum from the engine to allow the dredge to rise and fall with the tide, when not in use. Sheaves for guiding the ropes to the drums will be not less than 45-inch pitch diameter. Each forward spud will be provided with a collapsible spud foot, consisting of two heavy steel castings that will form a foot about 7 by 9 feet when open.

There will be one stern spud of Oregon fir, plated like the forward spuds, and about 80 feet long and 30 inches square over the plating. The machinery will be arranged for a trailing spud. The spud will be hoisted by a wire rope and a winding drum driven through two gear reductions by a 9 by 9-inch double engine located on deck at the foot of the stern spud casing.

The dredge will be equipped with backing machinery, the drum to be operated by a 12 by 16-inch double, nonreversing engine.

Operating Levers—Levers for controlling the dredging machinery will be mounted on the

main forward deck, grouped for convenient operation. They will include a lever for operating the main hoisting engine throttle valve, for the steam cylinder actuating the main hoisting frictions, for the steam cylinder actuating the main lowering brake, for the steam cylinder for reversing the main engine, for the combined throttle and reversing links of the swinging engine, for the steam cylinder actuating the swinging drum brake, for the combined throttle and steam cylinder actuating the friction clutch of the backing engine, for each of the combined throttles and reverse links of the forward spud engines, for operating each of the steam cylinders actuating the forward spud clutches, for operating each of the steam cylinders actuating the forward spud brakes; pulley and rope with handle for operating the pawl for engaging with the ratchet on the main hoist, pulleys and rope with handle for operating the steam whistle. Levers for controlling the stern spud machinery will be mounted at the stern, and levers for controlling the scow moving winches at the end of each winch.

Dippers—There will be two dippers, one of fifteen cubic yards capacity and one of ten cubic yards, the latter especially adapted for digging in rock. They will be dumped, that is the door will be unlatched, by a steam cylinder mounted upon the boom with the necessary guide sheaves, bearings, and brackets.

The 15-yard dipper will be built with shell plate front and sides $\frac{3}{4}$ -inch thick, back plate $\frac{3}{4}$ -inch thick, door 2 inches thick steel plate, top band 2 by 14-inch steel bar around the front and sides projecting back beyond the dipper to support pin for the back brace, bottom band 2 by 16-inch steel bar around front and sides. On the back of the dipper will be two heavy steel castings, the lower one with a double set of lugs to carry the pins for the hinges and for the handle hinge in double shear, the upper casting, a channel shaped girder. The hinges will be of forged steel 10 inches deep and 6 inches wide in heaviest section. The lip will be of manganese steel 50 inches high over all at the center and $9\frac{1}{2}$ inches high at the back edge of the sides, 2 inches thick at the bottom edge, tapering down to $1\frac{1}{4}$ -inch thick at the top of the deepest section. The latch bar will be forged steel not less than 4 inches wide by 5 inches deep; latch keeper also of forged steel 20 inches wide and 4 inches thick at the lower end and 12 inches wide and 2 inches thick at the upper end; lower end recessed to receive hardened steel wearing bar and thickness of latch increased to $5\frac{1}{2}$ inches at this point. This dipper will not have teeth.

The 10-yard dipper will be interchangeable with the 15-yard and will be used in rock excavation. It will have shell plates $\frac{3}{4}$ of an inch thick, back plate $\frac{3}{4}$ of an inch, door of 2-inch steel plate, top band 2 by 12-inch steel bar around front and sides to project beyond the back of the dipper to support the pins for the back braces, bottom band 2 by 10-inch steel bar around front and sides. Heavy steel castings on the back will serve the same purpose as those on the 15-yard dipper. The hinges will be of forged steel, 8 inches deep by 5 inches wide in heaviest section. The lip will be of forged steel $2\frac{1}{2}$ inches thick by 27 inches high overall at center and $9\frac{1}{2}$ inches at the back edge. This dipper will have four heavy forged teeth with hardened steel points.

The dipper handle will be of Oregon fir about 72 feet long reinforced with 2 by 12-

inch bars top and bottom and by 1 by 22-inch plates on both sides of each dipper stick. The racks will be nickel chrome steel castings, 3-inch pitch, 12 inches wide, shrouded to pitch line.

Boilers and Fittings—Two boilers of the Scotch marine type, each having a total heating surface of approximately 2,700 square feet, working pressure of 150 pounds per square inch, will supply steam. Each will have a Morrison suspension furnace, and a double stack with two-inch air space, to stand about 50 feet high above the top of the boiler. There will be also one vertical donkey boiler about 54 inches in diameter and ten feet high, built for 150 pounds steam pressure.

One surface condenser having approximately 1,500 square feet of cooling surface, independent air pump of suitable size, and an 8-inch centrifugal circulating pump, driven by an independent engine, will also be provided.

Other Equipment—The specifications provide for an electric lighting plant equipped with one 10 k.w. 110 volt, direct current generator and a complete lighting system; fuel oil tanks with a capacity of 18,000 gallons of fuel oil; fresh water tanks with 18,000 gallons capacity, and a 5,000-gallon tank for use of the galley; pumps for boiler feed, general service, fresh water, fire service and pumping bilge water; deck fittings, wire ropes and guys, feed water heater, oil feed pumps, ash ejectors, and complete system of piping.

Stages of the Chagres.

Maximum heights of the Chagres River for the weeks ending midnight, Saturday, January 18 and 25, and February 1. All heights are in feet above mean sea level.

ORDINANCES

(Canal Zone Ordinance No. 33)

To Amend Rules 90 and 91 of the "Rules for the Navigation of the Panama Canal and Approaches Thereto, including all Waters under the Jurisdiction of the Isthmian Canal Commission" enacted by the Isthmian Canal Commission, December 5, 1910, and approved by the Secretary of War, December 21, 1910,

Be it ordained by the Isthmian Canal Commission as follows:

SECTION 1. Rule 90 of the "Rules for the Navigation of the Panama Canal and Approaches Thereto, Including all Waters under the Jurisdiction of the Isthmian Canal Commission," enacted by the Isthmian Canal Commission December 5, 1910, and approved by the Secretary of War, December 21, 1910, is hereby amended so that the same shall read as follows:

Rule 90. (a) Hereafter it shall be unlawful for any person to navigate upon the waters of the Canal Zone, for the transportation of passengers for hire, any boat propelled by sail or oars until same, upon application of its master or owner, has been inspected by the Board of Local Inspectors, and until there has been issued by said Board a certificate based upon such inspection setting forth the following matters, viz: a brief description of the boat, including a statement of its tonnage; the fact that such inspection has been made and that the boat is seaworthy and is safe and suitable for the transportation of passengers; the total number of passengers and crew which may be carried thereon; the life-saving and other equipment which shall be carried thereon; and the portions of the waters of the Canal Zone upon which, and the routes over which, the boat may navigate. Such certificate shall be valid for one year next following the date of its issuance unless, during that period, said Board shall determine that the boat certificated becomes unseaworthy, or unsafe or unsuitable for the carriage of passengers; in either of which cases said Board shall have the power, and it shall become its duty, to revoke such certificate. Said Board shall also have the authority to make, during the period covered by any such certificate, any inspection or examination of any such boat to determine any question of its seaworthiness, or of its safety and suitability for the transportation of passengers. Said certificate shall be carried on the boat for which same was issued, suitably framed and displayed and protected from the weather, and shall be always open to the inspection of the Canal Zone authorities. After any such boat shall have been inspected and certificated as aforesaid, it shall be unlawful for any person to navigate same upon the waters of the Canal Zone if any of the equipment named in said certificate is not carried thereon, or if the number of passengers and crew carried thereon shall exceed the total number named in the certificate, or if such navigation is upon portions of the waters of the Canal Zone or over routes not designated in said certificate. The master or owner of any such vessel may, within ten days after said Board renders any decision or takes any action upon any question involving the inspection or certification of any such boat, or the revocation of any such certificate, appeal to the Head of the Department of Civil Administration, who may thereupon modify or set aside the action of said Board, and he shall

certify his ruling to said Board for its observance in each case.

(b) It is hereby made the duty of the Collector of Revenues to demand and receive from the owner or master of each such vessel the following compensation for such inspection and certification, in addition to any other fees which may now or hereafter be allowed by law for issuing enrollments and licenses:

For each vessel of less than fifteen (15) gross tons.....	\$5
For each vessel of fifteen (15) gross tons and over and not exceeding one hundred (100) gross tons.....	\$10
For each and every gross ton in excess of one hundred (100) gross tons.....	\$.05

The fees herein provided for shall be for the use and benefit of the Canal Zone Government.

SEC. 2. Rule 91 of said "Rules for the Navigation of the Panama Canal and Approaches Thereto, Including all Waters under the Jurisdiction of the Isthmian Canal Commission" is hereby amended to read as follows:

Rule 91. Any boat, vessel, scow, raft, or other craft, used or employed in violating any of the provisions of Rules 33, 46, 49, 51, 60 and 89, shall be liable for all damages that may be done to the plant of the Isthmian Canal Commission, and said boat, scow, raft, or other craft may be proceeded against summarily by way of libel in the Canal Zone Circuit Courts.

SEC. 3. This ordinance shall take effect thirty (30) days after its approval by the Secretary of War.

Enacted by the Isthmian Canal Commission, December 16, 1912.

Approved by the Secretary of War, January 13, 1913.

(Canal Zone Ordinance No. 34)

Providing for the Licensing of Navigators of Motor Boats.

Be it enacted by the Isthmian Canal Commission, as follows:

Section 1. That for the purposes of this ordinance any boat or vessel operated by means of gas, gasoline, naphtha, or other like fluid, or by electricity, shall be deemed a motor boat.

Sec. 2. That hereafter it shall be unlawful for any person to navigate or operate in the waters of the Canal Zone any motor boat without first having obtained a license to navigate motor boats as in this ordinance provided, such license to be known as a Navigator's License for Motor Boats.

Sec. 3. Any person desiring to navigate motor boats in the waters of the Canal Zone shall first make written application to the Board of Local Inspectors of the Canal Zone, stating his nationality, age, and character of experience in the operation of motor boats and gasoline and electric machinery; and shall also have his application endorsed by two reputable citizens of the Canal Zone or of the cities of Colon or Panama, Republic of Panama, vouching for his sobriety and trustworthiness. The Board of Local Inspectors shall thereupon examine the applicant touching his knowledge of the use of gasoline, gas, naphtha, and other like fluids, and electricity in the operation of motors and machinery, and of the mechanism and operation of motor boats, as well as upon his

knowledge of the English or Spanish language, and upon laws and regulations of the Canal Zone relating to the navigation of the aforesaid waters and to the operation of motor boats and other vessels upon said waters. In order to determine the skill of any applicant, said Board may require him to make a practical demonstration thereof. If the applicant is found to be competent, the Board shall determine whether his knowledge, skill and experience are such as to qualify him for the navigation, in Canal Zone waters, of motor boats of any tonnage, or of those only of less than 15 gross tons each.

Sec. 4. No person shall be granted such license unless he is not less than eighteen years of age, is of sober habits, is able to read either the English or Spanish language, and unless he shall prove to the satisfaction of the Board of Local Inspectors that he has the knowledge, skill and judgment necessary for the safe and skillful operation and navigation of motor boats.

Sec. 5. The Board of Local Inspectors shall meet at Ancon, Cristobal, or at such other points in the Canal Zone as it may designate, at such times as may be convenient to it and to the applicants for such licenses, and shall examine such applicants. The Board shall keep a careful record of all such applications, and of its action thereon, together with any papers submitted in connection with such applications and examinations.

Sec. 6. Upon the completion of an examination as herein provided for, the Board of Local Inspectors shall make a report to the Head of the Department of Civil Administration showing whether the applicant is competent under the provisions of this ordinance to operate motor boats in the waters of the Canal Zone, and if the Board's report is to the effect that the applicant is thus competent, the Head of the Department of Civil Administration shall issue to the applicant a license as follows:

(a) If the report of said Board shows the applicant to be competent to navigate in the aforesaid waters motor boats of any tonnage, the license shall be in form substantially as follows:

THE GOVERNMENT OF THE CANAL ZONE.

NAVIGATOR'S LICENSE FOR MOTOR BOATS OF ANY TONNAGE.

No.

Whereas, it has been reported to me by the Board of Local Inspectors that has given satisfactory evidence that he is a skilled navigator of motor boats of any tonnage, and can be entrusted to perform the duties of Navigator of Motor Boats of Any Tonnage in the waters of the Canal Zone, he is therefore licensed to act as such Navigator until such time as this license may, for cause, be revoked.

Witness my hand this day of 19.....

Head of Department of Civil Administration.
Countersigned:

Chairman, Board of Local Inspectors.

(b) If the report of such Board shows the applicant to be competent to navigate only motor boats of less than fifteen gross tons each, the license shall be in substantially the

same form as the license described in (a), except that it shall only authorize the licensee to navigate in the aforesaid waters motor boats of less than fifteen tons gross each.

Sec. 7. Coincident with the issuance of any navigator's license herein provided for, the Collector of Revenues, upon the direction of the Head of the Department of Civil Administration, shall deliver to the licensee a metal check or badge having stamped thereon the serial number of the licensee's license and the words and letters "Navigator's License, C. Z." It shall be the duty of each person holding such license to wear or carry with him said check or badge when he is operating any motor boat in the waters of the Canal Zone. For such badge and license, each such licensee shall pay to the Collector of Revenues one dollar (\$1), same to become a part of the revenues of the Canal Zone Government. Upon request of any Canal Zone police officer any such licensee, while in charge of any motor boat in the waters of the Canal Zone, shall exhibit such badge. In addition to wearing such badge, the licensee shall have framed and carried on any motor boat which he may be navigating the license issued to him as aforesaid.

Sec. 8. The said navigator's license shall continue in force until it may be revoked for cause, as herein provided for. It shall be unlawful for any person who does not hold a license for the navigation in Canal Zone waters of any motor boat of any tonnage to navigate in said waters any motor boat of fifteen gross tons or over.

Sec. 9. The Head of the Department of Civil Administration is hereby given the right to revoke any license issued under the provisions of this ordinance when it shall appear to him that the holder thereof, because of drunkenness or lack of skill in operating motor boats, should not be further entrusted with the operation of such boats in the waters of the Canal Zone.

Sec. 10. Any person who operates a motor boat in or upon the waters of the Canal Zone without first having obtained a license as herein provided for, or without complying with any other requirement of this ordinance applicable to him, shall be guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not to exceed five hundred dollars (\$500), or by imprisonment in the district jail for not more than six months, or by both such fine and imprisonment, in the discretion of the court.

Enacted by the Isthmian Canal Commission, December 16, 1912.

Approved by the Secretary of War, January 13, 1913.

Band Concert.

A concert will be given by the Isthmian Canal Commission band at Gorgona, C. Z., Sunday, February 9, 1913 at 6 p. m. The program follows:

1. March—*Chateau Gontier*..... Fischlin
2. Selection—*The Rose Maid*..... Granichstaedten
3. (a) —*Simple Avenue*..... Thome
- (b) —*Pilgrim's Chorus from Tannhauser*... Wagner
4. Overture—*Stradella*..... Flotow
5. Popular Song—*Moonlight Bay*..... Wenrich
6. Cornet Solo—*The Holy City* (by request)... Adams
Chas. E. Jennings.
7. Descriptive—*Evening Idyls*—by request.....
Sunset, Evening Festivities, Dreamland.
8. —*Glorsia from 12th Mass.* (by request)... Mozart
9. March—*The Man Behind the Dirt* (new)... Jennings
Respectfully dedicated to the Canal Diggers.

CHARLES E. JENNINGS, Musical Director.

A concert will be given at Culebra, C. Z., February 16 at 3 p. m.

SOCIAL LIFE OF THE ZONE.

Church Notes.

Beginning on Ash Wednesday, February 5, a ten days' mission will be held at St. Ferdinand's Church, Empire. Masses will be said daily. The visiting missionary, the Rev. Father Mulane, will remain on the Isthmus for about one month.

The proceeds of a concert in aid of the altar fund of Christ Church, Colon, which was held on Monday evening, January 27, amounted to \$100. Those who participated in the program were Mrs. Faure, Mrs. Ulrich, Mrs. Lynn, Miss Layland, Miss Holm and the Cecilian Quartette, Mrs. Smith, Mrs. Mears, Mrs. Diers and Mrs. Wilford and Messrs. E. L. and R. S. Mosher, Murchison, Murphy, A. B. Dickson, Folger, and Dr. Godfrey.

Owing to the last day of the carnival falling on Tuesday, February 5, the monthly meeting of the Woman's Altar Guild of St. Luke's Hospital chapel was postponed one week. The meeting will be held at the home of Mrs. C. W. Barber on Tuesday, February 11 at 3 o'clock.

Ancon Study Club.

The Ancon Study Club completed its first year on January 24. The meeting was held at the home of Mrs. White, and an election of officers for the ensuing six months was held. The first month's study, from January 24, 1912 to March 6, was on the history of Panama and the Canal Zone; the study for March, April, and May was Italy, Greece, and Rome, and the Greek and Roman renaissance. In connection with this course there was an exhibit of pictures on March 13. The third course was a study of the operas currently given, including the French, Italian, German, and American works, and from July to December Shakespeare's plays were studied. A three weeks' recess was taken at Christmas, and the meetings were resumed on January 17 when a course in American history was begun. The club has the library formerly belonging to the Ancon Woman's Club, and, in addition to these books, has purchased an encyclopedia and several reference books. At its meeting on January 31, the club voted \$15 for the benefit of the blind boy fund of the Canal Zone Federation of Women's Clubs. The officers are, Mrs. H. C. Shick, president; Mrs. A. O. Mason, secretary and treasurer; and Mrs. Mark White, librarian.

Isthmian Tennis Association Tournament.

The following is the result of the Isthmian Tennis Association Tournament of singles, held at Gatun and Cristobal on January 26:

First Round—Runyan (Ancon), defeated Hart, (Cristobal), 6-4, 6-2.

Pulsifer (Empire), defeated Pearman (Pacific), 6-3, 8-6.

Wells (Gatun), defeated Swartz (10th Infantry), 6-0, 6-4.

Fechtig (Tivoli), defeated Tupper (Culebra), 6-1, 6-3.

Semi Finals—Runyan defeated Pulsifer, 6-2, 6-3.

Fechtig defeated Wells, 2-6, 6-4, 6-2.

Finals—Fechtig defeated Runyan, 6-0, 6-8, 6-2.

The next tournament in doubles will be held at Empire and Culebra on Sunday, February 9.

PERSONAL.

Col. Geo. W. Goethals, accompanied by his wife and Mrs. George R. Goethals, arrived from the United States on the *Colon* on February 3.

Among the other passengers on the *Colon* were Mr. Frank Feuille, returning from an official visit to Washington, Brigadier General Tasker H. Bliss and family, Representatives John Q. Tilson and family and J. L. Hartman and family and Mr. Ray Stannard Baker, of the American Magazine.

Rear Admiral Hugo Osterhaus, Captain W. R. Shoemaker of the Navy, Maj. William Chamberlaine and Captain Charles E. Kilbourne of the Coast Artillery, and Maj. Eveleth E. Winslow of the Corps of Engineers, U. S. A. arrived on the Isthmus on February 3 for an inspection of the Fortification work.

Commission of Fine Arts.

Mr. Daniel C. French, Frederick L. Olmsted, E. H. Blashfield, Charles Moore, and A. B. C. Cammerer, members of the United States Commission of Fine Arts will arrive on the Isthmus on or about February 12. The Canal law of August 24, 1912, contains the following provision:

"Before the completion of the Canal the Commission of Arts may make report to the President of their recommendation regarding the artistic character of the structures of the Canal, such report to be transmitted to Congress."

Obituary.

B. A. Kallish, an employe of the Panama Railroad Company at Colon, died in Colon Hospital on January 29. He was 53 years of age, widower, and had been on the Isthmus 20 years.

Michael J. Mohen, an employe of the McClintic-Marshall Construction Company at Gatun, fell from the center wall, middle lock, at Gatun, on January 29, and received injuries which caused his death. He was 27 years of age, single, and had been on the Isthmus nearly a year. He is survived by his mother Mrs. Elizabeth Mohen, living at Brad-dock, Pa.

Leslie C. Cunningham, an employe of the Mechanical Division at Paraiso, was killed by an engine on the construction track at Pedro Miguel on January 31. He was 26 years of age, single, and had been on the Isthmus nine days, coming from Florida. He is survived by a brother, C. V. Cunningham, living at Tifton, Georgia.

The monthly meeting of the I. O. P. K. will be held at Empire on Saturday night, February 8.

Missing Men.

Anyone having information regarding the whereabouts of Mr. Edward P. Murphy of Worchester, Mass., who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

New Chapter, I. B. E. W.

Local No. 397 of the International Brotherhood of Electrical Workers was recently installed at Paraiso. Meetings are held at Paraiso Lodge Hall semi-monthly.

The dedication of the United Methodist Free Church in Guachapali district, Panama, has been fixed for Sunday, February 23, at 3 p. m.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week February 10 to 15, is as follows: Monday, Gorgona; Tuesday, Gatun; Wednesday, Cristobal; Thursday, Corozal; Friday, Empire; Saturday, Culebra.

CULEBRA.

High scores for the week in duckpins are as follows: Steele, 103, 107, 103, 101, 105; Brown, 116, 102, 111, 113; Case, 106, 101; Anderson, 113, 101, 100; Palmer, 114, 109, 101, 105; Dougherty, 108; Kersey, 103, 110; Silver, 101, 101; Durand, 102.

The ladies' team from Cristobal will bowl the local ladies' team on Saturday, February 8.

EMPIRE.

On Wednesday evening, January 29, the basketball team from the U. S. S. Nebraska played the Empire team. This was a game between two champion teams Empire being the champions of the Isthmus and the Nebraska team holding the championship of the Atlantic fleet for the years of 1908, 1909, and 1910. The result was a score of 38 to 41 in favor of Empire. Before the game the Nebraska's band, which accompanied the team, played a number of selections, and during the intermission and after the game several more were rendered.

The athletic meet entry-blanks are now at the desk for all those who wish to enter the Washington's Birthday Meet. Entries must be in to the Clerk of Course by Saturday evening, February 15.

A beginners' Spanish class has recently been started. This class is composed of ladies and meets at 8.30 p. m., on Wednesday and Friday of each week.

The First Aid Class meets every Monday night at 7. Many of the men are attending this class and find it very interesting.

GORGONA.

A duckpin tournament has been arranged for the month of February, with 42 entries. Seven medals will be given, one for high pin fall, second high, and third for the teams; also first, second, and third for singles and one for high average.

The pool tournament closed Saturday evening and Mr. Louden will be awarded the \$3 cue for playing the greatest number of games during the month.

The handball tournament opened on Saturday evening, February 1, Caruthers taking two games from Calloway.

Two hundred and seventy-five people attended the moving picture show on Wednesday night, when Mrs. Kramer sang three solos. Mr. Case will sing at the next entertainment.

The Gorgona Chorus concert which was scheduled for February 14 has been postponed.

The February phonograph records have been received.

GATUN.

A brass band and a basketball team from the U. S. S. Virginia visited Gatun on Thursday evening, January 30. The band concert began at 7.30 p. m. During the evening two match games of basketball were played: "Mosquitoes" vs. "Red Bugs" and U. S. S. Virginia vs. Gatun. In the former game the "Mosquitoes" won and in the latter, the Gatun team.

A male glee club has been organized at the clubhouse. Messrs. Harper and Kohl won pennants given as prizes during January, for high scores in duckpins and tenpins, respectively.

The rag time tenpin tournament closed on January 31. Humphrey and Wurster took first prize and Miller and Barte, second.

The present standing of the ragtime duckpin tournament shows DeMoll and Wurster in the lead with 585; and Wells and Vierbuchen are second with 574.

The high scores for the week ending February 1 are: *Tenpins*—Swallow, 227; Miller, 201. *Duckpins*—Wells, 112, 104, 105, 106, 103, 109; Wurster, 104, 105, 106, 106, 100; DeMoll, 121, 106; Green, 106; Vierbuchen, 101; Claherty, 102.

CRISTOBAL.

On Saturday night the local bowlers took three games from the team from Gatun by the following scores:

Gatun.				Cristobal.			
Wells.....	86	87	76	Barrett.....	96	100	75
DePoorter....	85	104	83	C. Cotton....	92	79	73
Green.....	100	81	83	Collins.....	77	92	102
Humphrey....	81	81	76	Smith.....	97	87	83
DeMoll.....	82	74		Bullard.....	169	81	108
Barte.....			87				

Totals... 434 427 405 471 439 441

Twenty-two men organized a French pool tournament which started the past week. First, second, and third place prizes will be given.

On the night of January 29 the band and basketball team from the U. S. S. Georgia gave a concert and played basketball at the Y. M. C. A. The concert was well attended and the game resulted in a score of 28 to 6 in favor of the Cristobal team.

OFFICIAL CIRCULARS.

The Peninsular and Occidental Steamship Company Rates and Sailings between Key West and Colon.

CULEBRA, C. Z., January 23, 1913.

CIRCULAR No. 175-J:

The Peninsular and Occidental Steamship Co., of Jacksonville, Fla., has inaugurated a special service between Key West and Colon with sailings approximately twice a month each way. The schedule calls for a direct run from Key West to Colon, and returning stops are made at Kingston and Havana, with stop-over privileges at both points if desired. The run from Key West to Colon will consume approximately three days, and from Colon to Key West six days. There follows a list of regular tariff rates, from which a reduction of 20 per cent will be accorded employees of the Commission and the Panama Railroad and dependent members of their families who make their homes on the Isthmus including wives, children, parents, brothers, and sisters.

FARES.

Including meals and berth at sea and in the ports during the entire trip. (No charge for excess baggage.)

	One Way.	Round Trip.
Key West to Colon, Panama Canal Zone	\$ 50 00	\$110 00
Key West to Kingston, Jamaica (via Colon)	85 00	110 00
Key West to Havana, Cuba, (via Colon and Kingston)	105 00	110 00
Colon to Kingston, Jamaica	35 00	110 00
Colon to Havana, Cuba (via Kingston)	60 00	110 00
Colon to Key West (via Kingston and Havana)	70 00	110 00
Kingston to Havana	35 00	110 00
Kingston to Key West (via Havana)	47 50	110 00
Kingston to Colon (via Havana and Key West)	97 50	110 00
Havana to Colon (via Key West)	62 50	110 00
Havana to Kingston (via Key West and Colon)	97 50	110 00

Children between five and twelve years of age will be charged one-half and those under five years of age one-quarter of the above rates. Servants will be carried at a charge of two-thirds the adult rate; meals and berths to be furnished them according to the ship's rules.

The following sailing dates are scheduled for January, February, March and April:

SAILING DATES.

For further information apply to Mr. E. G. Booth, Jr., Agent, Peninsular and Occidental Steamship Company, Colon.

H. F. HODGES,
Acting Chairman.

Timekeeping Forms.

CULEBRA, C. Z., January 24, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

On account of the consolidation of timekeeping in connection with the Departments of Civil Administration and Sanitation, Quartermaster's Department, and the various divisions of the Chief Engineer's Office, it is requested that one extra copy of the following forms be furnished this office for transmission to the Chief Timekeeper:

Increase of Pay- Force.

Notice of return from leave of absence.

Termination of service.

In cases of transfers to and from the Departments of Civil Administration and Sanitation, Quartermaster's Department, and the various divisions of the Chief Engineer's Office, one extra copy of the transfer slip should be furnished the Chief Timekeeper, Culebra, Canal Zone.

When transfers are effected between the Second, Fifth and Sixth divisions, and other divisions of the

Chief Engineer's Office, the usual transfer slips must be furnished.

All transfer slips covering transfers from the different divisions of the Chief Engineer's Office, with exception of the Second, Fifth and Sixth divisions, will hereafter be issued by the personnel division.

H. F. HODGES,

Acting Chairman and Chief Engineer.

Steamship Reservations.

CULEBRA, C. Z., January 28, 1913.

ALL CONCERNED:

Cable advice has been received from the Washington office of the Commission to the effect that accommodations on all steamship lines to the Isthmus are being booked far in advance of scheduled sailings. Employees and members of their families visiting the United States are urgently requested to notify the Washington office of the return sailing date as far in advance as possible, in order that suitable accommodations can be reserved.

H. F. HODGES, Acting Chairman.

Employment on the Corozal Farm.

CULEBRA, C. Z., January 30, 1913.

The Corozal Farm is now able to use whatever men have been disabled in the service and cannot be profitably used by the departments or divisions in which they are at present employed or in which they were disabled. Applications for employment on the farm should be made out on form C. E. 379, a supply of which may be obtained from this office on request.

H. F. HODGES, Acting Chairman.

Typewriter Baseboards and Covers.

CULEBRA, C. Z., January 31, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Please ship any spare typewriter covers and baseboards that are not needed in your respective offices to Mr. A. L. Robinson, Superintendent Mechanical Division, Gorgona, as these are needed in sending out typewriters which have been forwarded to the repair shop.

H. F. HODGES, Acting Chairman.

Contract for Clearing Trails.

Bids will be received by the Purchasing Agent on the Isthmus, Isthmian Canal Commission, Mount Hope, C. Z., until 2.30 p. m. Wednesday, February 19, 1913, at which time they will be opened in the presence of attending bidders, for the clearing of the following trails: Arraijan-Rio Grande, Arrijan-Cochinito, Gamboa-Cruces, Mount Hope-Majagual. Work shall be done in accordance with the specifications to be obtained upon application to the Superintendent of Public Works, Isthmian Canal Commission, Administration Building, Panama. Proposals may be made for any or all trails. The successful bidder will be required to furnish a bond or to make a cash deposit in the sum of 10 per cent of the amount bid as a guarantee that the work will be performed. The Commission reserves the right to reject any or all bids, or accept any bid as may be deemed to its interest, or to waive defects and informalities in proposals. Proposals should be inclosed in sealed envelopes, marked "Proposal for Clearing Canal Zone Trails," and addressed to C. NIXON, Purchasing Agent on the Isthmus, Mount Hope, C. Z.

Misdirected Letters.

ANCON, C. Z., February 5, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Becker, Mrs. E.	Kennish, Mrs. H. L.
Bernhardt, Miss Marie (c/o	Lenow, Francis
Mr. Arthur B. Round)	McHenry, Mrs.
Broughton, Mrs. Archie	McKee, Mrs. Amy
Bryant, Fred	Nurse, Caiaphas
Burns, Dan W.	Paletz, Harry J.
Cornwell, Mrs. Eva	Patterson, Miss B. M.
Costalos, Mrs. A.	Peter, John
Curtis, Frank	Piper, Mrs. Jennie
Dill, Teray	Quinn, James
Erbe, Ernest A.	Railsback, Mahlon
Gallagher, William F.	Ruse, Dr.
Godfrey, Miss Mary Jane	Sample, Miss Doll B. (2)
Hamilton, Capt. James	Sehr, Mikel
Hearn, J. W.	Smith, Peter S.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sail thus: the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m., and the *Prinz Sigismund* and the *Prinz Eitel Friedrich* on alternate Mondays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m.; and Thursdays at 2 p. m.; for Boca del Toro, on Mondays at 5 p. m.; for Limon via Boca del Toro, on Tuesdays at 5 p. m.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, FEBRUARY 12, 1913.

No. 25.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

**Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.**

No communication, either for publication, or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Reducing Stock.

The only materials to be purchased on annual contracts this year are lubricants, waste, white lead, red lead, rope, forage, turpentine, kerosene, and gasoline. All other supplies required for the year will be purchased under what are known as emergency contracts. This decision is in line with the policy instituted in 1910 of gradually reducing the stock of materials carried in store on the Isthmus so that when the work is completed there will be the least possible amount to dispose of.

In 1910 all the storehouses on the Isthmus were transferred to the Quartermaster's Department, all storekeepers prepared lists of surplus materials and the surplus stock was concentrated—steamshovel, drill repair parts, and electrical material at Empire; air brake material, lubricators, injectors, car, locomotive and similar materials at Gorgona; and general stock at Mount Hope. Unused materials were collected on all parts of the work and turned into the storehouses. The lists of materials on hand made it possible to make substitutions on requisitions, and to supply from the depots materials that otherwise might have been duplicated in orders upon the United States.

In the fiscal year ending June 30, 1911 an actual reduction in value of stock on hand was made amounting to \$1,183,050.72, although the value of material received during that year from the United States was \$10,051,926.25, not including coal, fuel oil, and miscellaneous purchases on the Isthmus amounting in value to \$2,440,226.40.

The number of annual contracts let in the fiscal year 1912 was smaller than in previous years, and although the value of purchases in the United States amounted to \$10,517,260.77 the reduction in stock was continued. On June 30, 1911 the value of stock on hand was \$5,374,182.24 and on June 30, 1912 this had been reduced to \$3,721,212.90, or by \$1,652,969.34.

The materials to be purchased this year on

annual contracts are only such as will have a continued use after the Canal is completed. The Washington office has been directed to continue the dynamite contract of last year, or to make purchases in the open market, repair parts are being supplied as far as possible from equipment retired from the service, and other parts that can be made economically on the Isthmus are manufactured at Gorgona shops.

Dry Filling Opposite Corozal.

A trestle has been driven across the Rio Grande diversion at the site of the suspension foot bridge, which has been removed, for hauling spoil from the steamshovels south of Miraflores Locks to the flat land opposite Corozal. Dumping in this area is part of the scheme for the reclamation of the swamps between the Panama railroad and the Pacific entrance channel, from Miraflores Locks to Diablo Hill, but this is the first dry fill to be made east of the diversion. Such filling heretofore has been made with spoil from the hydraulic sluicing and dredging plant now shut down. The trestle crosses the diversion on a 10-degree curve and at an upgrade of two per cent, from the old sand track.

New Track to Pacific Locks from Balboa.

In anticipation of interference with the old Pacific Division sand track by the construction of the Balboa terminals, a new track on which unqualified train crews may operate has been laid from Balboa, along the east toe of the abandoned Sosa Dam to Diablo Hill, thence parallel to the Panama railroad and on its right of way to Corozal Junction. At the latter point it diverges from the Panama railroad, connecting with the old construction track leading to Miraflores Locks. This construction affords, as the old sand track did, a clear connection between the Pacific locks and the sand wharf at Balboa, and the rock trains from Ancon crusher use the Panama railroad to the same extent as before.

Gatun Spillway Caisson Completed.

The caisson for the spillway at Gatun has been completed and accepted. It was tested for water tightness by filling it with water, then all of the leaks were noted, and the necessary calking was done to seal the breaks. After that the concrete floor and the wooden decking were placed, and the caisson was painted. The caisson is 49½ feet long and 22½ feet high. It is to be used for the purpose of closing the sluice gate bays of the spillway in case it be desired to make repairs to the gates or their bearings.

Change of Approach to Miraflores Tunnel.

The connections for hauling dirt trains from the south end of Culebra Cut through Miraflores tunnel have been changed slightly from the plans outlined in THE CANAL RECORD of January 15, 1913. Loaded trains

will not use the proposed separate incline to the tunnel but will utilize for the most part the present embankment, slightly extended, for the Panama railroad main line. They will switch from the present Central Division construction tracks about a hundred yards south of Pedro Miguel station and pass up an easy grade on the face of the main line embankment. The incline reaches the level of the main line about a mile north of Miraflores station, and the new track then parallels the single track main line, switching into it about 200 feet north of the tunnel. This construction lessens the amount of filling by about 10,000 yards and avoids the building of a trestle across the Pedro Miguel River.

The rest of the work is being carried out as reported. The 3½ per cent grade for empty trains, returning from the tunnel to the construction tracks, is about half completed. To make way for it the passenger station at Miraflores has been moved and set up on the east side. This allows southbound passenger trains to attain more momentum before steam is shut off for the passage through the tunnel. Signal towers have been erected at each end of the tunnel as part of the interlocking plant which will control the 1,050 feet of single track. Stakes have been driven for the road with which the line will be double-tracked from the tunnel to Corozal Junction, and part of the relatively slight filling and task excavation required for this construction has been performed.

Installing Mechanism for Bascule Span.

The lifting mechanism for the center span of the new bascule bridge at Monte Lirio is being installed without interruption to traffic. Contract for this material was let in April of last year, stipulating delivery within 120 days, which the contractor has not been able to make on account of financial difficulties. The installation is being made by a small force of railroad employees and should be completed within two months if the rest of the material arrives on time.

Ditching Machine Loading Gravel.

The Panama railroad ditching machine, equipped with a ¾-yard dipper, loaded 1,058 cubic yards of gravel at the Matachin gravel pit on February 4. This record is comparable with that of some steamshovels. The engineer was E. Richard.

New Hotel Washington.

It is expected at present that the new Hotel Washington on Colon Beach will be ready for occupancy early in March, though the time consumed in final work and furnishing cannot be foretold with accuracy. The hotel has 90 bedrooms, capable of accommodating about 180 persons. Masonry work for exterior improvements, including the walls flanking the building in front and rear, and the laying of concrete pavements, has been completed

NOTES OF PROGRESS.

(Continued.)

and the lawns are being graded and planted in grass. The monument to Aspinwall, Chauncy and Stevens, the pioneers of the Panama railroad, to which the new hotel belongs, has been placed near the side entrance leading to Bolivar street.

Gatun Dam Spillway.

The concrete work in the Spillway at Gatun Dam is over 96 per cent completed, 216,985 cubic yards, out of a total of 225,000 having been placed at the close of work on February

8. A statement of the amount laid each day last week, and of the total in place, follows:

DATE.	Concrete laid.	Hours worked.	No. mixers used.
	Cu. Yds.		
February 2.....	158	5.5	1
February 3.....	116	4.5	2
February 4.....	94	6.00	2
February 5.....	155	7.00	2
February 6.....	141	6.00	2
February 7.....	86	5.00	1
February 8.....	85	7.00	2
Total.....	835	41.00	
Previously reported...	216,150		
Grand total.....	216,985		

CONCRETE WORK IN THE LOCKS.

Over 97 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on February 8, the amount in place being 4,306,209 cubic yards.

GATUN LOCKS.

Over 95 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on February 8 being 1,953,262 cubic yards, out of a total of 2,043,730. A statement of the amount placed in the locks each working day of the week ending February 8, and of the total, follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers			Large stone.	Total.
	Concrete placed.	Hour worked.	No. of mixer.	Concrete placed.	Hours worked.	No. of mixers

Civil Service Examinations.

A supply of the Manual of Examinations for the spring of 1913 has been received.

Examinations for the following-named positions are scheduled to be held probably on March 16: Assistant, Philippine Service; assistant engineer, Reclamation Service; assistant inspector of boilers, assistant inspector of hulls, Steamboat-Inspection Service; clerk, Isthmian Canal Service; copyist topographic draftsman, topographic draftsman, nonappointed Departmental Service; junior engineer draftsman, Engineer Department at Large; forest assistant, Forest Service; forest assistant, Philippine Service; industrial teacher, Philippine Service; junior engineer, Reclamation Service; kindergarten teacher, Indian Service; local inspector of boilers, local inspector of hulls, Steamboat-Inspectors Service; matron, Indian Service; physician, all services; teacher, Philippine Service; veterinarian.

Women will be admitted only to the examinations for copyist topographic draftsman, topographic draftsman, kindergarten teacher, matron, and teacher, Philippine Service.

Some of the optional subjects which may be taken in connection with the assistant, Philippine Service, examination are accounting; auditing of accounts; civil engineering electrical engineering; finance; Spanish language; law; and mechanical engineering.

Applications for the above-named examinations will not be received in this office after February 21; this date will be changed if necessary. Applications should be secured from and filed with this office. In requesting information, the kind of examination desired should be specifically mentioned.

The examinations will be held probably at Empire, in the Commission clubhouse, but the place of examination, and also the date, should be omitted in application forms.

All instructions found in application forms and in the Manual of Examinations concerning an examination desired should be carefully read and understood before filing application. In answering question 4 in applications, applicants must show residence in a State, and county therein, of the United States, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., February 8, 1913.

LOST—In first class coach of Panama railroad train No. 7, Saturday evening, February 8, a 3-A Eastman kodak in leather case. Reward is offered if returned to H. G. Cornthwaite.

EMPIRE-CHORRERA ROAD.

Completion of Canal Zone Portion of Projected Highway.

The highway from Empire to the Canal Zone boundary, built as part of a projected road from Empire to the village of La Chorrera in the Republic of Panama, was brought to completion on January 11. Actual construction had been under way since March 20, 1911; the first survey started on March 1, 1911.

This is the most elaborately constructed and durable of the Canal Zone highways. The distinctive feature about it is a base of telford paving. After the route was brought to first grade, by excavation or fill, the base of heavy rock was laid, like ancient paving, and from 6 to 10 inches thick. A 4-inch macadam cover of 1½-inch rock was laid and rolled on the top of this, and a covering of 2 inches of screen as a binder was spread and rolled. In the other roads which the Commission has constructed in the Canal Zone no telford paving was used, the macadam being laid on a base of natural earth which had been graded and sloped. These roads have given satisfaction under the rather light traffic to which they have been subjected, but are in need of continual repair owing to their foundations not being stable.

In a typical cross section, the Empire-Chorrera road is 24 feet between inner edges of gutters. On each side a berm of earth, about 4 feet across, flanks the macadam which is 16 feet wide and slopes from the center, ¾-inch to a foot. The gutters are a foot wide at bottom, a foot deep, and 3 feet across at the top, the outer side being built with a slope of ¾ on 1. The width of the base through cuts is 30 feet, and on fills 27 feet.

The total length of road constructed under this project is 5 miles and 4,262 feet, extending from a connection with a street in west Empire. The Zone boundary is 6 miles, 1,682 feet from the northwest corner of the concrete platform of the Empire passenger station. Telford paving was laid for 28,505 linear feet, with drains to the side every 50 feet. Two bridges of reinforced concrete were constructed, provided with rubble masonry abutments and wing walls. Bridge No. 1 crosses the Mandingo River about 4 miles west of Empire; bridge No. 2 is across the Rio Piza at a point 5 miles, 600 feet west of Empire.

In addition to the bridges, culverts were constructed at intervals. One hundred and twenty linear feet of 48-inch concrete pipe, and 1,919 linear feet of 18-inch concrete pipe were manufactured on the ground for this use, and 431 linear feet of 12-inch vitrified pipe were imported.

Clearing of timber and brush through the route amounted to 37.88 acres. There were 98,742 yards of excavation and 17,540 cubic yards of fill. Bridges and culverts required 886 barrels of cement, and 9,113 cubic yards of crushed rock were used for concrete and macadamizing.

All labor, except some skilled work in the bridge and culvert construction, was performed by Canal Zone convicts. During the construction of the first mile and three-quarters of road they were quartered at Culebra Penitentiary. On October 5, 1911, they were moved to a stockade near the Mandingo River and 4 miles, 1,500 feet

WEATHER CONDITIONS, CANAL ZONE, JANUARY, 1913.

Rainfall in the Canal Zone for the month of January was generally above normal except along the immediate Pacific coast and over the Upper Chagres basin. Monthly totals ranged from .63 inches at Ancon to 6.71 inches at Colon. The maximum precipitation recorded in one day was 2.32 inches at Colon on January 1. Abnormally cloudy weather with frequent showers prevailed during the last decade of the month. Monthly mean air temperatures were above normal, while there was a general deficiency in atmospheric pressure and wind movement. Approximately average conditions of relative humidity and cloudiness prevailed. The following table summarizes the weather conditions for the month:

STATIONS.	Press're (reduced to mean of 24 hours.)	Temperature				Precipitation				Wind			
		Mean.	Maximum.	Date.	Minimum.	Date.	Mean relative humidity.	Total inches.	Station average.	Number of rainy days.	Total movement (in miles.)	Prevailing direction.	Max. velocity (in miles.)

west of Empire, which remained their quarters until the completion of the road, after which they were transferred to a similar stockade at Gamboa. They are now engaged in building the Empire-Gamboa road. During most of the time since March, 1911, the number of convicts had been about 125, but not more than 105 are now at work on the road.

One factor in the policy of road building by the Commission has been the desire to keep the convicts and prisoners employed. Inasmuch as it has not been the practice to use them in competition with paid laborers, road construction has been practically their only work. The Canal Zone part of the road was built with the understanding that the government of the Republic of Panama would continue it to La Chorrera. Up to the present time no construction work has been done by the Republic, but in its *Gaceta Oficial* of January 24, 1913, was published a note of the authorization by the National Assembly of the President to continue the road. Similar authorization was made for the construction of a road from La Chorrera to Arraijan, which lies between the former village and the city of Panama. The road from Empire to the boundary is useful at present principally to the planters and squatters along it. Two miles west of Empire a cattle ranch is developing and beyond the boundary near the end of the road, is a tract on which Canal employes are projecting a townsite.

Balboa Sand Service.

COAL AND OIL.

Abstract of Plans to Encourage Maintenance of Private Supplies.

An outline has been made of the policy to be pursued by the Government with regard to private coal and fuel oil depots on the Isthmus, for the purpose of supplying ships passing through the Panama Canal. The following is an abstract:

It will be the policy of the Government to keep complete control of the terminals, water frontage, and transportation by land and water across the Isthmus, and to this end no land, nor land under water, near the terminals that may later be needed by the United States will be leased. It will not be the policy to attempt to monopolize the fuel business, and every means will be taken to encourage the establishment of private coal and oil depots on the Isthmus under proper conditions. It is believed that the duplication of plant for private coal and oil stations is undesirable, and therefore the Government plants are being so laid out as to afford ample wharf room, and to provide modern coal handling machinery for unloading colliers into the coal pile and reloading coal to lighters or barges. An outline of the plants to be provided was published in THE CANAL RECORD of January 29, 1913.

Coal—A certain ground area will be set aside for the storage of coal by individuals or companies, and this area will be served by the Government handling machinery with the same effectiveness as coal in the Government storage basin.

This arrangement will obviate the necessity of any dredging, wharf construction, or purchase of coal handling machinery by private owners and companies, and at the same time will enable them to obtain the benefits of the rapid coal handling machinery to be purchased by the United States. It is to be expected that the cost of taking coal in and out of storage, and of the wharfage facilities and dredging thus availed of, will be apportioned at a reasonable price per ton to all individuals and companies alike on an equitable basis. For the area to be occupied by the coal pile a rental charge based upon the cost of fitting up the area for private coal storage would have to be charged in addition. Assurance of satisfactory service can be given by the Canal authorities. It is expected that the Government coaling plant will be in operation before January 1, 1915. Suitable temporary arrangements will be made to take care of any business originating before the permanent plant is completed. Such a permanent plant will require no outlay for improvements on the part of individuals and companies, and will enable them to participate in the coal business on what appear to be more advantageous terms than if they should each proceed with the construction and installation of their own docks and coal piles and coal handling machinery.

Oil—After the completion of the coaling plants, a permanent installation for fuel oil will be made in connection with them, to the extent that piping and pumping plants will be installed. All that will remain therefore for oil companies and dealers to do will be to obtain a revocable license for land on which to construct their oil tanks, and to run pipe lines to the oil wharves and pumps, which will be used for all oil vessels alike, including the vessels carrying oil for the United States.

This will render the exclusive occupancy or assignment of any water frontage at either terminus of the canal to an individual or company unnecessary. The individuals or companies will be charged a uniform and equitable rate per barrel of oil for pumping oil to and from the water front to their tanks.

The pumping of oil across the Isthmus after the Canal is opened will doubtless be economical and therefore necessary, and it is considered that it will be desirable for the United States to control oil transportation across the Isthmus in pipes, the same as other forms of transportation. More than one pipe line across the Isthmus will not be necessary to handle the business. The ownership of this pipe line will be in the United States and it will be considered a common carrier available for the use of all individuals and companies on an equal basis at an equitable charge. This will tend to reduce the selling price of fuel, and place all individuals and companies on the Isthmus on a uniform basis.

Lighterage—The United States will maintain a large number of coal and oil lighters at each terminus of the canal, and it is believed that it will be able to make a price to private individuals and companies on the lighterage of coal that will be so advantageous that they will not want to purchase and maintain additional barges.

Temporary Oil Plants—It is proposed to fit up on Docks 13 and 14 at Cristobal oil pumps and pipe lines in duplicate for use until the permanent plants are installed. A similar temporary plant will be installed at Balboa.

Taxation—Any taxes levied in connection with private coal and oil plants will have two purposes in view for the interest of the Canal: First, to reduce the unnecessary duplication of plant; Second, to encourage the carrying of large stocks of coal and oil. There will be a tax based upon the cost of improvements which would enable revenue to be derived in proportion to the investment made, which will probably be one per cent per annum on the cost of the improvements.

Inasmuch as the storage of a large amount of coal and oil on the Isthmus should be encouraged, a tax similar to the present merchandise tax would not be satisfactory, as it would tend to discourage the same. In lieu of this tax therefore a tax of about one per cent on the sales of coal and fuel oil by individuals and companies will be levied. This

tax will probably be one and one-quarter cents per barrel of oil and five cents per ton of coal of 2,000 pounds.

Application for Privilege—All individuals or companies applying for coal and oil privileges on the Isthmus must furnish satisfactory evidence to the Canal authorities of their ability, financially and otherwise, to conduct the business they wish to undertake.

Navigators of Motor Boats.

Examinations of persons applying for licenses as navigators of motor boats, under the Ordinance enacted December 16, 1912, and approved by the Secretary of War on January 13, 1913, as published in THE CANAL RECORD of February 5, will be held by the Local Board of Inspectors at the following places on the dates named, at 8 a. m.: Administration Building, Ancon, February 17 and 19; Collector's Office, Cristobal, February 18 and 20. Applicants are required to have their applications fully made out, including endorsements. Blanks can be secured by application to the Local Board of Inspectors, Ancon.

W. G. COMBER,

Chairman of Local Board of Inspectors.

Red Cross Finances.

A statement of the finances of the Canal Zone Chapter American National Red Cross for the month of December, follows:

		RECEIPTS.

CULEBRA CUT.

October Set as End of Dry Excavation.

Dry excavation in Culebra Cut will be carried forward in accordance with the following program:

The lake level will be brought up to plus 50 by July 1, 1913. On and after July 1, the lake will be permitted to rise continuously, and steamshovel work in the Cut can continue as long as the height of the Gamboa dike will suffice to hold back the water of the lake. The top of the dike is about elevation plus 78. Inasmuch as with a season of average rainfall, an elevation of plus 74 may be expected to be reached about October 10, the dry excavation may be continued in the Cut until October 1, 1913. It may be necessary to flood the cut at any time thereafter. This program has been laid out so as to obtain a lake elevation of 85 feet above sealevel on December 1, 1913, and in accordance with it, Gorgona Shops will be flooded out about September 15.

On February 1, there had been dug out of Culebra Cut 88,592,307 cubic yards of rock and earth, and there remained to be excavated approximately four million cubic yards not including present slides. The work is now practically confined to three out of the nine miles of the Cut.

On the south end the excavation is completed from Pedro Miguel Locks north to a point beyond Paraiso, except that the widening of the canal immediately north of the locks to make an anchorage basin will not be completed for about two months, and that the incline on the east side at Paraiso, up which spoil is hauled out of the Canal, cannot be removed until the steamshovel work is over. On the north end the completed section extends from the Chagres River to a point near Empire. In both of these sections there is a small amount of cleaning up to be done, but this is unimportant. The six miles of canal represented in these two sections are practically completed.

The section in which the work is being carried on is that between stations 1680 and 1845, that is, from a point near Empire, one fourth mile south of the angle at Cunette, to a point near the old hamlet of Cucuracha, about one half mile north of Paraiso. This includes the channel in front of Empire, Culebra, Rio Grande, Gold and Contractors' Hills, and a short distance south. In accordance with the original plans the work is being prosecuted so as to keep the highest point in the Cut somewhere about half way between the ends to assist in drainage, and to make it possible for loaded spoil trains to run down grade in going through the Canal. The summit in the pioneer or lowest cut is now between stations 1762 and 1769, about opposite the administration building at Culebra, and here the excavation is down to 61 feet above sealevel, 21 feet above the bottom of the Canal. From there it slopes gradually on both sides to the bottom at 40 feet above sealevel. The drainage is continued as heretofore, through the main culvert of Pedro Miguel Locks on the south end, and into the sump at Gamboa at the north end whence it is pumped into the Chagres.

At present 37 steamshovels are at work, and when emergency demands some of them are run on double shift, making twelve hours a day. Recent instances of this are two shovels at work on the slide opposite Empire, and

two on Cucuracha slide. The daily excavation in January averaged over fifty thousand cubic yards, and this is being maintained at the present time. The equipment engaged in hauling the spoil includes 124 locomotives 1512 flat cars of 19 yards capacity, 199 steel dump cars of 17 cubic yards, and 136 dump cars of 10 cubic yards capacity.

Digging has not increased in difficulty as the bottom is neared, and the use of dynamite has become increasingly economical. At present the hardest material to blast is the cemented gravel met with opposite Empire, where it is necessary to follow the primary or deep blasting with surface or "doby" shots in order to break the material into sizes that can be handled by steamshovel. The trap rock encountered in the Gold Hill dike, the face of which is about 1,000 feet long on the Canal, is very hard, but requires less surface blasting than the cemented gravel does. At all other points the material requiring blasting is soft rock that crumbles readily under the force of the initial explosion. In blasting work 359 drills are employed, and in January 396,250 pounds of dynamite were used; about 0.35 pounds per cubic yard of material excavated.

THE SLIDES.

Although there is nothing new in the manner of the development of the slides on either bank of Culebra Cut, they have shown unexpected activity during the past few weeks. The theory once held, that these movements of the banks towards the Canal were more likely to occur in the rainy season than in the dry, was abandoned a year ago when the most notable slides of the year occurred in the dry season. The latest movement of a large amount of material occurred on the night of February 4, when a pocket of earth and loose rock on the east bank opposite Hodges Hill at Culebra settled downward and moved 80 feet into the Canal. The movement began about 9 o'clock and continued two hours, in which time the bank sank in places as much as 60 feet. The break is 1,000 feet long across the face towards the Canal, and extends back 680 feet from the face of the bottom slope to a point near the relocated highway between Empire and Panama. In its area is a section of the Obispo Diversion, which is merely a shallow ditch at this place, however, whose relocation will not be necessary. Half a dozen drills were caught in the moving material, but only two of them were wrecked. A steamshovel was moved towards the center of the Canal, and three railroad tracks were temporarily blocked. The break in the bank that indicated a probable slide at this point was noted two months ago, but the movement was unexpected at this time. Apparently it is like a large number of other slides, merely a loose mass of rock and earth moving on an underlying surface of rock that dips towards the Canal. The toe of the slope having been dug away, the mass moved of its own weight. It is estimated that two million cubic yards are in motion here, although this is largely conjectural, because it is not known on what slope the material is moving. Two steamshovels are digging out this slide.

A survey of the old slide at Cucuracha, which has resumed activity recently, was made last week. It is estimated that from two to three million cubic yards of material are now in motion here, but this also is sub-

ject to the qualification made above. On the other hand it is not believed that all of this material will move into the Canal. Five steamshovels are now at work there. One day last week one of these was put out of service temporarily when the material it was digging flowed about it and covered the loading tracks. It was extricated within 24 hours, and is again at work. Incidents like these have become part of the day's work in Culebra Cut. They no longer cause surprise and the men have become so accustomed to meeting such emergencies that delays on account of them are continually growing less.

A 95-ton steam shovel is being so altered that it can lift spoil 21 feet above the track on which it is standing and load it into cars. This is necessary for the purpose of handling material to advantage in Cucuracha slide.

The bench on which the shovel will work through the sliding material is 40 feet above sea level, and it is necessary for it to load upon cars that are on a bench 57 feet above sealevel. The floor of the flat car is three feet above the track, so that the total lift is 20 feet. Shovels of this class now load 17 feet above the level of the track on which they stand. The alterations consist of extending the boom 21 inches by adding two 15 inch I beams, and arranging the sheaves upon them as sisters instead of tandem, as at present; lengthening the dipper stick six feet making it 24 feet 6 inches long; and fixing upon it a 3-yard instead of a 5-yard dipper.

At the slide in front of Culebra on the west bank, the shovels have dug away the toe up to the line of the Canal channel, but it is not believed that this will hold. The work of lightening the mass from the top is advancing. The material is very soft and has practically no cohesiveness. Farther north, on the face of the hill upon which stands the residence of Colonel Hodges, the big slide of a year ago seems to be stationary. The toe of this slide has been dug out up to the channel and the material seems to be sufficiently cohesive to maintain itself.

Opposite Culebra on the east bank of the Canal is a wall of grey rock upon which is a bank of clay in places fifty feet deep. A steamshovel is digging away this mass of clay with the purpose of making a bench or terrace on top of the rock; and after this is accomplished the slope of the rock face will be made less steep. The advisability of moving this clay, by sluicing it into the ravine behind the north spur of Gold Hill, is under consideration.

The slide at Cunette which necessitated the relocation of the Obispo Diversion at that point is being dug out by one steam shovel, and it is believed that the channel will be free from all spoil from this source by the end of the dry season.

Panama-Pacific Exposition Stamps.

An error, in designating the picture on the two cent stamps in the Panama-Pacific Exposition commemorative series as "Gatun Locks" when it really represented Pedro Miguel Locks, has led the Post Office Department to destroy all of the stamps thus printed, about twenty millions. The new stamps will bear the words "Panama Canal," under the picture of Pedro Miguel Locks. The one cent, five cent, and ten cent stamps are on sale in the United States, and the new two cent stamp will soon be added.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The Empire Woman's Club held an exhibition of pictures at the clubhouse on February 6. Besides the copies of the old masters and the note books belonging to the Canal Zone Federation of Women's Clubs, there was an exhibit of water colors by Mrs. E. H. Ash, formerly president of the Empire Woman's Club. During the afternoon, several duets for violin were played by Miss Jessie Smith and Miss Juanita Pearson.

On February 27, there will be an open meeting of the Gatun Woman's Club under the educational department, Mrs. Gabler, chairman, when the Federation pictures will be exhibited.

At the general meeting of the Cristobal Woman's Club, on February 5, Dr. M. E. Connor delivered an address on "Modes and Sources of Infection." At this meeting the resignation of the president, Mrs. J. L. Storla was tendered, owing to her removal from the Isthmus, and the first vice-president, Mrs. Carl H. Elliott, was elected to fill the office for the remainder of the year. Meetings to follow for the month are as follows: February 12, Home Department, Subject, Home Life in the Colonies; February 19, Art and Literature Department, subject, "Well known Women Writers;" February 26, board meeting in the clubhouse at 9 a. m.

Church Notes.

The services during Lent at St. Luke's Hospital Chapel, Ancon, will be on Wednesday morning at 9 o'clock. The regular Sunday services will be maintained; Celebration of the Holy Communion at 7 a. m., Sunday School at 9 a. m., and Divine service at 10 a. m. The Woman's Altar Guild will hold weekly meetings during Lent on Tuesday morning at 9.30 o'clock; the first of these is to be held at the Tivoli Hotel on February 18, with Mrs. DeKanstein as hostess.

At St. Mary's Church, Empire, services will be held on Friday evenings at 7.30 p. m. A brake will run from Culebra and Empire on Friday evenings during Lent for the accommodation of those wishing to attend the services at St. Mary's Church, and the mission services that are being conducted at St. Ferdinand's. The brake will leave Culebra station at 7 o'clock and returning will arrive in the village at about 9.30 o'clock.

The Woman's Guild of Christ Church, Colon, will hold weekly meetings during Lent at the homes of members. The work planned is the making of new cotters for the choir boys.

On Sunday, February 9, the visiting preacher at Christ Church was the Rev. W. A. Robinson, of England who is on his way to Belize, British Honduras, to take up duty there under Bishop Farrar.

The Woman's Missionary Society of Empire, held its monthly meeting at the home of Mrs. Philip Kelly on Friday, February 7, when there were thirty present. The study consisted of the second lesson on the book, Mormonism; the Islam of America, by Bruce Kinney. Mrs. Kelly read a paper illustrative of the subject and Mrs. Goolsby read a paper on politics and Mormonism.

The lesson at the Fidelity Bible class Empire, on Sunday February 11, was led by Mrs. Stephan Witt, the founder of the class, the subject being Faith.

The Gatun Mission Study Society began

the new work on Mormonism at the meeting on Friday, February 7. The meetings of the club are held at the home of Mrs. Witt.

British and Foreign Bible Society.

The annual report of the work of the British and Foreign Bible Society in the Canal Zone and on the Isthmus of Panama has just been issued. It shows a large circulation of bibles throughout the territory for the year 1910-1911. The year's work began with a stock of 747 bibles, 1,481 New Testaments and 5,053 Gospels, a total of 7,281 books containing the whole or portions of the Scriptures. From London there were received 4,877 bibles, 2,137 New Testaments, a total of 7,014 books; this brought the total stock up to 14,295 books, the largest ever carried on the Isthmus. There were issued from the society's depot 3,986 bibles, 1,691 New Testaments and 3,251 gospels, a total of 8,928 books. Of this number, 3,055 were given away, and the remainder were sold at nominal price. The cash receipts for the year amounted to \$1,266, and the total expense incidental to the circulation was \$3,588, the deficit of \$2,321 being met by the society. For two and one half years the British and Foreign Bible Society has maintained a depot and an agent on the Isthmus, and during this time the circulation has reached a total of 13,313.

At its headquarters in England, the Society publishes the scriptures in more than four hundred languages. It maintains more than one thousand representatives throughout the world. Since its foundation in 1804, it has issued 222,000,000 copies of the scriptures and has expended over \$78,075,000.

Commission Band to be Discontinued.

The Isthmian Canal Commission Band will be discontinued on March 1. It was organized in September, 1905, as a private organization, and the Commission appropriated \$600 to buy instruments. On March 27, 1907 the Commission authorized the employment of a director at \$2,000 a year, a librarian at \$1,500, and 35 men at \$25 a month each. It has given a concert at one of the Canal villages each Sunday since it became an official organization.

A concert will be given by the Isthmian Canal Commission Band, on the porch of the Administration Building, Culebra, C. Z., on Sunday, February 16, 1913, at 3 p. m. The program follows:

1. March—*2nd Regt. Conn. N. G.* Reeves
2. Selection—*The Rose Maid* Granichstaedten
3.—*Pilgrims Chorus from Tannhauser*. Wagner
4. Overture—*Mirilla* Gounod
5. Popular song—*Moonlight Bay* Wenrich
6. Intermezzo—*In the Shadows* Finch
7. Descriptive—*A Soldier's Life* Keler Bela
Approach of night; the serenade; tattoo and march; the prayer before the battle; finale.
8. Potpourri—*The Sunny South* Lampe
9. March—*The Men Behind the Dirt* (new) . . . Jennings
Respectfully dedicated to the Canal Diggers.

(CHARLES E. JENNINGS, Musical Director.)
A concert will be given at Hotel Tivoli, Ancon, on February 23, at 8 p. m.

Tennis Tournaments.

The doubles tournament held at Culebra and Empire, on Sunday, February 9, resulted as follows:

Preliminaries—Gatun (Neeley and Wheeler), defeated Empire (Pulsifer and Wechsler), 6-2, 6-2.

Pacific (Pearman and Snyder), defeated Tivoli (Ohlson and Tannehill), 6-1, 6-2.

Ancon (Ross and Earhart), defeated Culebra (Goethals and Tupper), 7-5, 6-2.

Cristobal (Hart and Farquharson), defeated Camp Otis, 6-4, 6-0.

Semi-finals—Gatun defeated Pacific, 2-6 7-5, 7-9.

Ancon defeated Cristobal, 6-2, 6-4.

Finals—Ancon defeated Gatun, 6-8, 6-4, 6-3.

An allcomers tournament in singles will be held at Ancon, on Washington's Birthday, February 22, and Sunday, February 23. This tournament is for the Isthmian Championship, and is open to all members and clubs affiliated with the association. Entrance fee for this tournament is \$1.00 for each player; this must be in the hands of the secretary, H. E. Ruckert, Gatun, not later than February 19.

Fire at Toro Point.

A fire occurred at Toro Point early in the morning of February 6, completely destroying two four family Commission quarters. The occupants of the second floor quarters had a narrow escape, and three of them sustained bruises through the breaking of the ladder by means of which they were rescued. An adjoining house was damaged. The loss to the Commission is estimated at \$11,326; and the losses of the occupants, who had no time to remove their effects, at \$3,900.

Canal Zone Rifle Club.

At an informal shoot held on Sunday morning, February 2, the members of the Canal Zone Rifle Club defeated the Marines by eight points, 988 to 980.

A three-cornered match may be arranged between the Tenth Infantry, U. S. Marines, and the Canal Zone Rifle Club.

PERSONAL.

Col. C. A. Devol, accompanied by Mrs. Devol, sailed for the United States on February 9, on the *Colon*, on leave of absence.

Obituary.

Mr. T. J. Mulligan, an employee of the McClintic-Marshall Company at Gatun, died in Colon Hospital on February 2. He was twenty-six years old, single, and had been on the Isthmus three months, coming here from New York. He is survived by his sister, Mrs. M. P. Baron, living at Baton Rouge, La.

Married.

LUCEY-CAUGHLIN—On January 14, at Rochester, N. Y., Miss Alice Veronica Coughlin, of Rochester, N. Y., to Mr. William J. Lucey of Pedro Miguel, Canal Zone Residence, Pedro Miguel.

Jackson, Mrs. Nora	Williams, Daniel A.
Jendras, Frank	Wilson, Chas. A.
Jones, Wm. A.	Wright, Dr. T. B.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

Visit of the Atlantic Fleet.

Twelve thousand six hundred and seventy-eight officers and men from the Atlantic Fleet were served with sandwiches, fruit and lemonade on the fifteen special trains that carried the members of the fleet across the Isthmus at various intervals from January 13 to February 8.

These lunches were served under the direction of the Y. M. C. A. at cost. The force of waiters was organized from among the colored attendants at the various clubhouses along the line. These men prepared the lunch at the Cristobal clubhouse in the evening and served the same on the train after leaving Culebra the next day. Fully 26,000 sandwiches were prepared.

As many secretaries as could be spared acted as guides on the special trains, explaining the various points of interest along the line. Bureaus of information were established at the Cristobal clubhouse and in the old administration building at Panama.

Band concerts were given by the bands from the Georgia, Virginia, Nebraska, Idaho, Ohio, Minnesota, Utah and Michigan at various clubhouses and each of these vessels sent basket ball teams that competed with the team from the local clubhouse. One of the most interesting bands was that of the U. S. S. Georgia which, with the exception of the leader, was composed entirely of Filipinos.

On Friday, February 7, 100 members of the Boys' department spent the day on the U. S. S. Ohio, where they were given luncheon and were entertained by the officers and men.

GENERAL.

The moving picture schedule for the week February 17 to 22, is as follows:

Monday, Corozal; Tuesday, Culebra; Wednesday, Empire; Thursday, Gorgona; Friday, Gatun; Saturday, Cristobal; Friday, Porto Bello.

COROZAL.

The new floor in the assembly hall has been completed and the bowling alleys refinished.

A "smoker" will be given on Friday night, February 14.

CULEBRA.

On Thursday night the Empire duck pin team visited Culebra; the following scores resulted:

Empire	Culebra.
Sawtelle.... 79 84	Palmer..... 86 79
Kosier..... 81 86	Barnes..... 79 79
Driedrick.... 82 84 90	Dougherty.. 88 81 81
Leon..... 87 111 80	Steele..... 82 82 92
Gustavson.... 92 98 85	Silver..... 90 84 93
Hentry..... 100 94 105	Case..... 77 125 77
Totals.... 440 471 446	423 451 422

On Saturday night, the Cristobal married folks duck pin team visited Culebra, the ladies bowling the Culebra ladies' team and the men bowling a Culebra team:

Cristobal.	Culebra.
Mrs. Bell..... 76 74	Mrs. Hobbs.... 60 72
Mrs. Landers... 81 69	Miss Westman.. 62 67
Mrs. Weston.... 66 80	Hayes..... 72 67
Mrs. Cotton.... 67 70	Dunlap..... 72 74
Mrs. Burns..... 73 72	Mrs. Dougherty. 31 57
Totals..... 362 365	297 337

Bell..... 78 88	Hobbs..... 74 83
Landers..... 74 68	Silver..... 84 111
Barrett..... 94 90	Johnson.... 83 70
Cotton..... 82 84	Perkins..... 73 74
Burns..... 80 82	Dougherty.... 87 84
Totals..... 408 412	401 422

High bowling scores for the week are as follows: Brown, 107, 111; Silver, 100, 111; Steele, 106, 104, 113; Palmer, 101; Dubois, 101; Dougherty, 103; Warner, 115; Durand, 115; Barnes, 122, 103; Case, 125, 114.

EMPIRE.

Mr. F. A. Gause, superintendent of schools, will deliver an address on Abraham Lincoln at the Empire Y. M. C. A. Sunday evening, January 16. There will be music by a small orchestra.

February 6 the basketball team and the band from

the battleship *Minnesota* entertained the people of Empire; the basketball game resulted in a score of 38 to 24 in favor of Empire.

The married folks tenpin bowling tournament which was begun Friday evening, February 7 had an entry of ten couples, five of whom bowled on Friday evening. The scores were as follows:

	1	2	3	Total
Mrs. J. E. Johnson.....	150	105	117	
Mr. J. E. Johnson.....	127	173	137	809
Mrs. J. W. Whaler.....	96	90	110	
Mr. J. W. Whaler.....	128	168	213	805
Mrs. T. M. Drake.....	132	110	134	
Mr. T. M. Drake.....	131	119	134	742
Mrs. H. W. Sawtelle.....	61	74	97	
Mr. H. W. Sawtelle.....	133	126	168	656
Mrs. L. J. Fabian.....	110	119	86	
Mr. L. J. Fabian.....	106	88	94	603

Prizes will be awarded for first and second place in team score and for the lady making the high single score.

The Gorgona duckpin bowling team were the guests of the Empire team on Saturday, February 8. Empire won two out of three games, the scores were:

Empire.....	459	459	440	Gorgona....	471	408	414
-------------	-----	-----	-----	-------------	-----	-----	-----

GORGONA.

A band concert was given by the band from the Idaho and a basketball game was played between the Idaho and Gorgona Y. M. C. A.; on Friday night; the score 11 to 24 in favor of Gorgona.

A local wrestling tournament was held at the Y. M. C. A. of Gorgona on Saturday evening, February 8 when three classes were represented, the heavyweight, middleweight and lightweight. The heavyweight, Nowick won by default; in the middleweight Robinson and Hennan, first bout 7 minutes and the second bout 5 minutes, Robinson won; in the lightweight Quinn, Morrison, and Edwall; Edwall drew bye. Quinn and Morrison first bout, 1 minute and 15 seconds, second bout 8 minutes and 40 seconds both won by Quinn. In the finals with Edwall and Quinn, first bout, 5 minutes, Quinn won, second bout, Edwall won in 11 minutes and third bout Quinn won in 6 minutes and 36 seconds. Medals will be presented to the champions.

High scores for the week in duckpins are as follows: Davis, 104, 108, 102, 101, 100, 102, 100, 101, 107, 106, 103; King, 111, 117, 117, 100; Sims, 107, 107, 107; Arnold, 125, 125, 101; Denst, 104, 102, 104, 102, 102; Gebhart, 112, 113, 112, 113, 101, 101; Stoehr, 104, 104, 106, 103, 100; Cornthers, 109, 109; Seebt, 102, 108, 102; Powell, 103; Norwick, 102; Denlop, 109, 100; Stewart, 105; Musal, 102.

Standing in the ragtime tournament—Arnold and Stewart, 585; Denst and Sims, 581. Singles—Sims (three games), 297; Stewart (high score), 115.

Mixed tournament held on February 8—Mr. and Mrs. Stoehr, 491; Mr. Hilty and Miss Knutson, 468, high score for lady, Miss Knutson, 79.

The Gorgona Chorus assisted by the Camp Otis orchestra will give a concert on February 20.

A special country school program is being arranged for the latter part of February.

A literary society is being organized and will be in running order by February 25.

GATUN.

Gatun defeated Corozal two out of three games of duckpins on Saturday evening, February 8. The score follows:

Corozal.	Gatun Reds.
Beall..... 90 95 72	Wells..... 96 96 101
Kite..... 77 82	DeMoll..... 89 74 88
Ryan..... 68	Coleman..... 95 70 83
Harper..... 90 70 83	Green..... 86 79 89
Bartlett..... 94 95 94	Claherty.... 83 93 103
Tougher..... 83 87 92	
Totals.... 425 424 423	450 412 463

About 300 people saw the basketball game on Thursday evening, February 5 between teams from the Ohio and the Gatun Y. M. C. A. The score resulted 36 to 6 in favor of Gatun. In the preliminary game between the working boys and the school boys, the working boys won with a score of 7 to 6. Following the basketball games, a wrestling match was held between John Wendell, the champion middleweight wrestler of the United States Navy and Fred Huber of Gatun, the welterweight champion of the Isthmus. A brass band of 16 pieces from the Ohio played several selections.

CRISTOBAL.

There was an attendance of 115 at the moving picture show on Monday night, February 3.

The five men making the highest averages during the month of January are as follows:

Name.	Games	Pin-fall.	Average.	High.	Low.
Barrett.....	49	4,585	93-26	116	75
Hess.....	13	1,119	92-3	112	80
Bullard.....	54	4,944	91-30	111	65
Herrington....	58	5,276	90-56	113	77
Weston.....	51	4,595	90-5	106	75

Stanley Ashton won the prize for high score during the month by a score of 123.

Regular gymnasium classes every Tuesday and Friday night; the track and field men meet on Thursday nights.

OFFICIAL CIRCULARS.

Acting Chief Quartermaster.

CULEBRA, C. Z., February 7, 1913.

CIRCULAR No. 474:

Effective Sunday, February 9, 1913, Captain R. E. Wood will act as Chief Quartermaster during the absence of Colonel C. A. Devol.

GEO. W. GOETHALS, Chairman.

Oil for Lanterns used by Employees in Going to and from Their Work.

CULEBRA, C. Z., February 4, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is reported that it is the common practice of employees of the Commission, especially silver employees, in going to and from their work in other than hours of daylight to use lanterns, for which purpose kerosene is ordinarily furnished without charge. The item when taken as a whole is an appreciable one. It is therefore desired that you institute an inquiry, and submit a report whether you consider the furnishing of kerosene for this purpose is an expense which should be born by the Commission.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Return of Metal Drums which have Contained Oil.

CULEBRA, C. Z., February 6, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The metal drums in which the great part of the lubricating and illuminating oils is furnished have to be returned to the contractor in good condition. It has been reported that a number of these drums are being returned to the Depot Quartermaster in a damaged condition due to careless handling. Please notify all employees concerned that they will be held responsible for the return of these drums in good condition to the Depot Quartermaster, and any negligence or carelessness in the handling of same should be immediately reported to this office for such action as the case may warrant.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Pacific Mail Steamship Company Employees' Rate.

CULEBRA, C. Z., February 8, 1913.

CIRCULAR No. 175-K:

Effective with the steamer scheduled to sail from San Francisco February 13, 1913, and from Balboa February 17, 1913, the Pacific Mail Steamship Company will charge employees of the Isthmian Canal Commission and dependent members of their families a flat rate of \$85.00 between Balboa and San Francisco on both coastwise and direct steamers.

GEO. W. GOETHALS, Chairman.

Acting Surveying Officer.

CULEBRA, C. Z., February 3, 1913.

CIRCULAR No. 476:

Effective February 4th, Mr. Ben Litt will act as Surveying Officer during the absence of Mr. H. S. Farish on leave.

GEO. W. GOETHALS, Chairman.

Contract for Clearing Trails.

Bids will be received by the Purchasing Agent on the Isthmus, Isthmian Canal Commission, Mount Hope, C. Z., until 2.30 p. m. Wednesday, February 19, 1913, at which time they will be opened in the presence of attending bidders, for the clearing of the following trails: Arrajain-Rio Grande, Arrijan-Cochinito, Gamboa-Cruces, Mount Hope-Majagual. Work shall be done in accordance with the specifications to be obtained upon application to the Superintendent of Public Works, Isthmian Canal Commission, Administration Building, Panama. Proposals may be made for any or all trails. The successful bidder will be required to furnish a bond or to make a cash deposit in the sum of 10 per cent of the amount bid as a guarantee that the work will be performed. The Commission reserves the right to reject any or all bids, or accept any bid as may be deemed to its interest, or to waive defects and informalities in proposals. Proposals should be inclosed in sealed envelopes, marked "Proposal for Clearing Canal Zone Trails," and addressed to C. Nixon, Purchasing Agent on the Isthmus, Mount Hope, C. Z.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending February 22, 1913. (75th meridian time.):

†Indicates advances on last list.
‡Fowls weigh each about as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock supply next lightest weight is supplied and refund note sent for difference.
§Sold only from Commissaries; no orders take for delivery.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon, during the week ending February 8:

Pastores, February 2, from New York, with 131 pieces structural steel, 23 cases structural steel for Mechanical Division; 68 rolls wire cloth, Atlantic Division; 378 bundles steel bars, Panama Railroad Company; 26 reels cable, Superintendent of Erection; 7 cases electrical material, First Division; 200 bundles steel bars, Fortifications; 200 pieces steel bars, 13 cases tape fuse, 20 cases putty, 23 pieces sheet steel, 10 cases hardware, for stock.

Colon, February 3, from New York, with 9 rolls leather, 27 cases envelopes, 10 cases mining machinery, 10 crates mop handles, 11 cases castings, 75 cases lanterns, 16 bales cotton waste, 68 cases caustic soda, 55 drums calcium carbide, 29 cases rubber packing, 34 kegs rivets, 30 cases handles, 34 reels sash cord, 250 kegs track spikes, for stock; 60 pieces structural steel, 150 pieces car couplers, 25 bundles plates, for Mechanical Division; 61 cases electrical material, Superintendent of Erection; 30 cases bridge material, Panama Railroad Company; and a miscellaneous cargo, the whole consisting of 1,200 packages, weighing 300 tons.

Prins August Wilhelm, February 3, from New York, with 200 bundles steel bars for Fortifications; 200 steel bars, for stock; 7 cases electrical material, for First Division.

Nubian, February 5, from Liverpool, with 210 barrels carbolic acid, for stock.

Metapan, February 5, from New York, with 12 cases electrical material, for Mechanical Division; 23 crates pump machinery, 126 cases gate machinery, 18 cases valve machinery, for Superintendent of Erection; 45 coils Manila rope, 400 cases linseed oil, for stock; 120 bundles steel bars, for Panama Railroad Company.

Cartago, February 6, from New Orleans, with 345 pieces White Oak, 1 reel steel cable, for Mechanical Division; 107 pieces piling, 4,654 pieces cross ties, 3,931 pieces Yellow Pine lumber, 10 bundles oars, 1,055 cases oils and greases, 28 rolls cotton duck, 10 cases paint, for stock.

Belle Vernon, February 7, from Galveston with 24,387 pieces Yellow Pine lumber, for stock.

The following ships arrived at, or departed from, the port of Balboa during the week ending February 8:

Arrivals—February 3, *Pachitea*, from Mollendo; February 3, *Guatemala*, from Callao; February 4, *Quito*, from Guayaquil; February 5, *Arica*, from Buenaventura; February 6, *Peru*, from Guayaquil.
Departures—February 3, *Limari*, to Valparaiso; February 7, *Kansas City*, to San Francisco.

FOUND—In Culebra, a watch. Owner may secure the same from E. C. Smith Jr., Assistant Chief Engineer's office, Culebra, C. Z.

MOVEMENT OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sail thus: the *Prins Joachim* and the *Prins August Wilhelm* on alternate Tuesdays at 10 a. m., and the *Prins Sigismund* and the *Prinz Eitel Friedrich* on alternate Mondays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Boca de Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, FEBRUARY 19, 1913.

No. 26.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication, or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Increased Excavation on Account of Slides.

The development of slides in Culebra Cut has resulted in an addition of 5,634,161 cubic yards to the total estimated excavation on that part of the work, so that the estimate now stands at 99,516,817 cubic yards. In the estimates of December, 1908, the excavation in Culebra Cut was placed at 78,042,295 cubic yards, in 1910 this was changed to 84,186,724 cubic yards, 1911 to 89,444,005 cubic yards, 1912 to 93,882,000. The total canal excavation now is estimated at 218,138,299 cubic yards, of which 190,892,279 cubic yards have been accomplished. The condition of the work in the Cut was discussed in detail in last week's issue of THE CANAL RECORD.

Canal Work in January.

The grand total of Canal excavation to February 1 was 190,892,279 cubic yards leaving to be excavated 27,246,020 cubic yards. Since the last monthly report of excavation was published there have been added to the excavation yet to be accomplished in Culebra Cut 5,634,161 cubic yards on account of the slides that have been developing there.

The total excavation for the month of January was 2,612,020 cubic yards. The dry excavation amounted to 1,672,117 cubic yards and was entirely by steamshovels. The dredges and monitors removed 939,903 cubic yards. The progress in the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 555,111 cubic yards. Of this total 46,773 cubic yards consisted of dry excavation at Gatun Locks, and the remainder was wet excavation—508,338 cubic yards from the Atlantic entrance.

The total excavation in the Central Division was 1,135,580 cubic yards, which includes 18,360 cubic yards in the Culebra Cut section charged to Obispo Diversion.

In the Pacific Division, the total excavation was 912,329 cubic yards, 489,764 cubic yards

of which consisted of dry excavation. Of the 431,565 cubic yards of wet excavation 215,025 cubic yards were from the channel, and 216,540 cubic yards were taken out at the Balboa terminals.

A detailed statement of the excavation, and a summary of the work on the locks and dams follows:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
Dry excavation—			
Locks, dam and spillway	46,773		46,773
Mindi Terminal			
Total	46,773		46,773
Wet excavation—			
Atlantic entrance	583,338		508,338
Locks, dam and spillway			
Terminal			
Total	508,338		508,338
Total wet and dry excavation	555,111		555,111

CENTRAL DIVISION.

Dry excavation—		
Culebra Cut	1,117,220	1,172,200
Chagres section		
Obispo Diversion	18,360	18,360
Total	1,135,580	1,135,580

PACIFIC DIVISION.

Dry excavation—		
Locks, dams and spillways	27,600	27,630
Terminal	54,114	54,670
Prism	407,957	407,967
Total	489,711	489,764
Wet excavation—		
Pacific entrance	215,125	215,125
Miraflores Locks		
Diversions		
Terminal	216,540	216,540
Total	431,565	431,565
Total wet and dry excavation	921,276	921,329

TOTAL CANAL EXCAVATION.

Dry excavation	1,672,117	1,672,117
Wet excavation	939,903	939,903
Total	2,612,020	2,612,020

LOCKS AND DAMS.

MATERIAL.	Atlantic.	Pacific.	Total.
	Cu. Yds.	Cu. Yds.	Cu. Yds.
Concrete placed in locks	28,085	55,108	83,193
Concrete placed in dams and spillways	4,186	3,983	8,169
Fill placed in dams	149,602	72,343	221,945

Mean rainfall along Canal (ten stations) 2.82 inches. By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as a prism, diversions, or locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Erecting Lock Gates.

All the material for the lock gates has been shipped from the shops of the contractor in the United States, and the last delivery should be made on the Isthmus this week. Spare parts are being furnished, also, and some of the material for these is still being manufactured. These consist of all the parts necessary for the erection of any two gate leaves for use in case of injury to a gate. They will be stored temporarily at Paraiso, and later they will be taken to the permanent shops at Balboa for storage.

At the end of January the gates were 68 per cent erected, 51 per cent riveted, and 5 per cent finished, the state of completion at each lock being:

	Gatun	Pedro Miguel	Miraflores
Erecting	78	82	43
Riveting	66	70	15
Finishing	10		
Number of leaves	40	24	28

Work is in progress at Gatun on all of the 40 gate leaves, at Pedro Miguel on all of the 24 leaves, at Miraflores on 20 of the 28 leaves. During January the progress was better than during any previous month. The number of rivets driven in January, the total driven to February 1, and the number yet to be driven are shown in the following statement:

Locks.	Driven in January.	Driven to Feb. 1.	Remaining to be driven approximately.
Gatun	269,372	1,590,600	819,400
Pedro Miguel	152,279	980,000	420,000
Miraflores	119,568	261,000	1,479,000

There are 76 gangs at work riveting at Gatun, 40 at Pedro Miguel, and 27 at Miraflores. Practically all the men operating riveting machines are negroes. The hand riveting is done by white Americans. The total force at work on the gates in January was 514 Americans, and 3,371 negro laborers, a total of 3,885, or 445 more than in December.

High Record for Berm Cranes.

Berm crane "H", working at the south end of the west wall of the lower chamber of Miraflores Locks on January 31, mixed and placed 954 cubic yards of concrete in 8 hours and 20 minutes, actual working time. This was an average of one cubic yard for every 31½ seconds; during one hour, 160 cubic yards were placed. This establishes a new record for cranes in this class, the best previous record being 952 cubic yards on a day of 12 hours. The operators on January 31 were James G. Emerson and William O'Mara, on boom and cantilever, respectively, and O. D. Carlton, foreman of the crane, in charge of mixing. The crane is equipped with two 2-cubic yard concrete mixers.

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

Over 97 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on February 15, the amount in place being 4,306,209 cubic yards.

GATUN LOCKS AND SPILLWAY.

Over 95 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on February 15, being 1,953,457 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 218,203 cubic yards out of the total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending February 15, and of the total, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers			Large stone.	Total.	SPILLWAY

Work on New Pier at Balboa.

Sinking caissons for supporting the new Pier No. 1 of the Balboa terminals began on February 4, at the outer end, which is about 2,650 feet east of the Canal axis and approximately opposite the west end of Sosa Hill. The pier will be 1,000 feet long by 201.33 feet wide and in its construction will cut through the west toe of the old Sosa Dam; the inner end will connect at right angles with the quay wall which forms the head of the slips and which will be itself parallel

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is almost completed, 910,870 cubic yards, having been placed at the close of work on February 15. The record for each of the working days of last week, follows:

DATE.	AUXILIARY PLANT.						Mixed by hand	Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.					
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers			
	Cu. Yds.			Cu. Yds.			Cu. Yds.	Cu. Yds.	Cu. Yds.

Previously reported,								4,493	910,329
Grand total.....								4,493	910,870

with the Canal. The caissons will be sunk throughout the length of the proposed pier in six rows; the distance between the center rows being 58 feet from center to center, the floor and depressed tracks will in this space rest directly on the ground if the material proves sufficiently stable after the slips are dredged. The site crosses the old channel of the Rio Hondo and spoil from the first caissons is being dumped across it from a trestle to dike it off so the water will not interfere with sinking the caissons when the work reaches this channel.

Examinations by Board of Local Inspectors.

Examinations for pilots, masters, mates, engineers, chauffeurs, and navigators of motor boats, will be held by the Board of

Local Inspectors at the Administration Building, Ancon, on Wednesday, February 26, 1913, beginning promptly at 8 a. m. All applicants for licenses must secure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate same.

Six automatic gas buoys for use in the Canal have arrived and are being assembled at Balboa. They will be placed in the Pacific entrance about March 1.

FOUND.—At Ancon Hospital, a draft on London, drawn by Panama Banking Company. Apply to Chief Clerk, Ancon Hospital.

PORTABLE MIXING PLANT.

Concrete Mixer and Supplies Move in Train to Collapsible Forms.

The new piers and wharves of the Balboa terminals will be supported on concrete caissons, sunk to rock. The large quantity of caisson shell required for this work has caused the construction of a special plant for its manufacture. Its essential feature is a movable mixing plant which can be shunted along a railroad track beside the platform on which the collapsible forms and reinforcement for the sections are set up. The plant has a portable concrete mixer mounted on cribbing on a flat car so that the spout is 14 feet above the platform. Coupled to the flat car is a box car containing cement, and at the "flat's" other end are alternate cars of sand and crushed rock. Portable runways for wheel barrows are laid along the tops of the cars, which are connected in train and moved as a unit. Thus all the materials for the concrete are kept constantly near the mixer, even when the train is in motion from one form to another. It is moved ordinarily by an air winch which draws through stationary sheaves at the ends of the track a $\frac{3}{8}$ -inch hauling cable with connections to the ends of the train.

When the train has been "spotted" opposite a form which is ready the concrete is poured into it through a chute. As it falls from the chute it is caught on a circular wooden platform set over the inner shell, and distributed to the annular space by men with hoes. The placement is quite simple and proceeds at the rate of mixer output. As soon as the shell has been cast the train is moved to another form. The concrete is allowed to set for 24 hours and then the forms are removed and cleaned at a special platform for their storage, after which they are set up again on the operating platform. The caisson shell is allowed to harden for three days before removal to a storage yard.

The platform on which the forms are set up and filled is 15 feet wide by 350 feet long, with an extension 50 feet in length at the south end on which the reinforcing steel is assembled. As the reinforcing bars are unloaded from the cars they are laid in a stock pile at the end of the platform, next which a set of steel rolls has been placed. The rods are fed from the pile directly into the rolls, which are set to bend them into hoops of a diameter four inches less than the outside diameter of the finished shell. The bars are set up around a wooden cage and tied together, after which the reinforcement is handled as one piece. A light derrick mounted on a truck and hand-operated picks up a set of reinforcement and carries it to one of the erected inner forms for the shells, dropping the reinforcement around it like a cage. Six pipes are then placed vertically around the reinforcement at equal distances to make cores for connecting rods, the outer form is erected and the space between forms adjusted with wooden blocks. The completed form is then ready for the concrete.

Each section of shell is six feet high, with an inside diameter of 5 feet 6 inches and a thickness of shell of one foot, and contains 4 $\frac{3}{4}$ cubic yards of concrete. In a normal day's work about 16 such sections will be poured from the $\frac{1}{2}$ -cubic yard mixer. During the month of January 1,724 linear feet were made with a $\frac{1}{2}$ -yard mixer and it is expected that the run during February, with the larger

mixer, will approximate 2,200 feet. In all, about 28,000 linear feet of concrete caisson will be used in the one pier and the quay wall, the construction of which has been authorized to date. Steel shells will be used in deep water, on account of their greater length, which facilitates driving. Both concrete and steel shells will be filled with concrete containing a well protected reinforcement of steel rails.

The cost of production at the Balboa plant is considerably less than the cost of making shell at other points in the Canal construction. No comparison with such work off the Isthmus is available because so great a quantity of shell has not been made elsewhere.

New Steamship Service from San Francisco to Panama.

The through billing concession for United States coastwise trade, formerly made to the California and Atlantic Steamship Company, and held also by the Pacific Mail Steamship Company, has been extended by the Panama Railroad Co., to the Edgar F. Luckenbach Company of New York, which proposes to operate ships between the Isthmus and San Francisco. The first ship of the service will arrive at Balboa on February 19, the *Lewis Luckenbach*. The company owns 27 vessels of American register, but at present only three of these will be devoted to the San Francisco trade—*Lewis Luckenbach*, 6,000 cargo tons; *Pleiades*, 5,500 cargo tons; and *Lyra*, 6,000 cargo tons. This fleet will be added to as rapidly as the Panama railroad is able to increase the amount of cargo it can handle, because there is an abundance of freight offering both ways. Cargo on the Atlantic side will be handled by the Panama railroad ships. The home office of the company will be in San Francisco, and the Panama office at Balboa with Mr. R. E. Wheelan in charge.

Spiders on the Canal Work.

A number of spiders down at Gorgona Shops are contributing their little share to the construction of the Canal. They are in the instrument room, and are carefully protected, because from their cocoons the instrument makers procure filament for use in the transits of the surveyors. In the microscopes of the transits are very fine threads by means of which the surveyor determines when his instrument is centered upon an object. This thread is of platinum when the instruments are new, but when it wears out and must be replaced the instrument repair men at Gorgona have been using the thread taken from the cocoon of a certain variety of spider that has been encouraged to multiply in the instrument shop for the past seven years. This use of the filament from the cocoon is not original on the Isthmus, indeed it has been a common practice for many years.

It has been found that when the instruments so repaired are used early in the morning or during a rain the thread does not remain taut, because the instrument itself contracts. As soon as the instrument warms up, however, the spider web answers its purpose very well. In order that there may be no time of the day in which the transits may not be used, an order has been placed for platinum thread. As soon as it arrives on the Isthmus the use of the spider web will be discontinued, and the Canal force will be reduced by at least half a dozen more workers, for there are at least that many spiders spinning fiber at Gorgona Shops.

STEAMSHOVEL RECORDS.

Work of Central Division Steamshovels During the Month of January.

During the month of January the total amount of material excavated in the Central Division was 1,135,580 cubic yards, of which 186,131 cubic yards were classified as earth, and 949,449 cubic yards as rock. Of the total 1,117,220 cubic yards were primary excavation in the Canal Prism, and 18,360 cubic yards were from the Obispo Diversion. The total of 1,135,580 cubic yards was removed by steamshovels.

The high record for the month was made by shovel 227 working 26 days in the Empire District, which excavated 45,541 cubic yards of rock. The second best record for the month was made by shovel 208 working 26 days in the Culebra District, which excavated 44,481 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel 109 working 25 $\frac{1}{2}$ days in the Culebra District, which excavated 28,056 cubic yards of earth.

Shovel 256 working in the Culebra District made a high record for one day by excavating 3,230 cubic yards of earth on January 9.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month and for one day are shown in the following table:

BEST RECORDS FOR THE MONTH.

SHOVEL No.	CUBIC YARDS.			No. of days at work.
	Earth.	Rock.	Total.	
227.....		45,541	45,541	26

Extension at Pier 11, Cristobal.

It has been decided to extend Wharf 11, newly erected along the south side of the extreme end of Cristobal Point, to connect with the present Pier 11. This will be an additional construction 175 feet long which will make a continuous wharf along the south side. The supports will be steel-shelled concrete caissons like those used on the new Wharf 16.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending March 1, 1913 (75th meridian time):

DATE.	Low	High	Low	High	Low

COST KEEPING.

Method and Effect of Keeping Costs of Construction and Engineering.

Cost keeping in connection with the construction and engineering work on the Canal has the threefold object of informing the Chief Engineer each month regarding (1) the cost of work compared with the estimates made in December 1908; (2) the cost of work of a similar nature on two or more parts of the Canal; (3) the costs of similar pieces of work from month to month on the same part of the Canal. No attempt is made to keep so minute a record as would be kept on similar work in the United States, because this would involve an elaborate and costly system, and when the data were compiled they would not be comparable with data for similar work in any other part of the world.

The results of the cost keeping have been to keep alive the spirit of emulation that exists among the various divisions, encourage close supervision by indicating to men in responsible positions where and how economies may be effected, and generally to promote the spirit of economy by emphasizing the question of costs.

Returns from the cost keeping are placed before the Chief Engineer each month, and careful comparisons are made. If it is found that the costs of excavation, masonry, dams, machinery erection or other classes of work are excessive in one part of the Canal relative to similar work on another part, or in one month relative to the cost of work in previous months, the responsible official is so informed in order that he may make due explanation or take steps to remedy the situation.

The present cost system dates from January 1, 1910, and was evolved from a system begun on July 1, 1907. For administrative purposes, the costs are compiled by an accountant in the office of each division engineer, and sent thence to the Cost Keeping Accountant in the office of the Chief Engineer at Culebra, where they are checked and compiled for publication.

There are three main sources of expense—labor, materials, and administration. The foremen on the work keep track of the distribution of labor in two sets of books, one for odd days and one for even days. Each night the books used that day are sent to the Division offices, and are looked over carefully by the supervisors of the work and by the cost accountant before they are again sent into the field. In this way they are kept in perfect order. At the end of each month the amount of labor that went into each job and class of work is determined. This method is applied only where the variety of work requires it. In the Central Division where all the work is dry excavation the labor charges are taken from the time rolls and from the daily reports of the men in charge of equipment.

Material costs are located by a system of foreman's orders kept in triplicate, by which materials drawn from stores are reported by the storekeepers of the Quartermaster's Department, and by them to the Division offices. The costs are charged each day by the division cost accountant to the various classes of work and at the end of each month these must agree with reports sent to the Cost Keeping Accountant in the Chief Engineers' office by the storekeepers of the Quartermaster's Department. A similar system is used in

accounting for materials drawn for the shops. The methods employed in the shops will be referred to in a future article.

The arbitrary charge for plant and equipment on each part of the work is based upon the cost of the plant and the amount of work it must accomplish, as determined by the estimates of 1908. It was estimated at that time, for instance, that the plant for handling concrete at Miraflores Locks would cost \$674,651.13 and that the concrete to be placed would amount to 1,503,570 cubic yards. The plant arbitrary added to every cubic yard of concrete produced by this plant is enough to represent the proportion of the plant cost that each yard should bear. Every six months this arbitrary is adjusted on the basis of work performed and to be done. In this way the cost of the plant will be absorbed by the time the work is accomplished. This method of determining arbitraries is employed throughout the Department of Construction and Engineering.

Overhead charges are located in each division by the cost accountants. The general administrative expenses are prorated to the construction divisions on the basis of total expenditures, except where they can be definitely located to the work. Other miscellaneous general expenses are prorated as nearly as possible on the basis of the benefits received by each division.

Excavation is one class of work carried on in all divisions and is one of the simplest from the cost keeping standpoint. The work is divided into its various parts and careful track is kept in the field of the work and materials devoted to each part. This classification is shown in the following statement of costs of dry excavation in the Central Division for the quarter ending December 31, 1912:

Classification.	MONTH.	
	October	November
Quantities—Cubic Yards.	1,113,420	973,071
Clearing.....		
Drilling.....	\$0.0657	\$0.0691
Blasting.....	.0514	.0532
Loading.....	.0550	.0566
Tracks.....	.0912	.1005
Transportation.....	.1015	.0879
Dumps.....	.0507	.0697
Pumps.....	.0085	.0126
Maintenance of Equipment..	.1075	.1277
Plant arbitrary.....		
Division expense.....	.0140	.0142
Total Division cost.....	.5455	.5915
Administration and General expenses.....	.0186	.0400
Total cost.....	\$0.5641	\$0.6315

Classification.	MONTH.	
	December	Total
Quantities—Cubic Yards—	1,074,510	3,161,001
Clearing.....		
Drilling.....	\$0.0601	\$0.0648
Blasting.....	.0534	.0536
Loading.....	.0529	.0548
Tracks.....	.0950	.0957
Transportation.....	.0806	.0902
Dumps.....	.0632	.0608
Pumps.....	.0057	.0088
Maintenance of Equipment..	.1118	.1152
Plant arbitrary.....		
Division expense.....	.0114	.0132
Total Division cost.....	.5350	.5561
Administration and General expenses.....	.0372	.0315
Total cost.....	\$0.5722	\$0.5876

Each of these groups or classes is subdivided into "operation" and "repairs," and each of these according to the elements that enter into the cost. In December the subdivision was as follows:

Drilling—Labor, shop expenses, material and supplies, power, repairs. Repairs are again subdivided into labor, shop expense, and material and supplies.

Blasting—Labor, shop expense, material

and supplies, explosives including freight and handling.

Transportation—Labor, coal including freight and handling, material and supplies, hostling, repairs to locomotives, cars and cranes

Dumps—Labor, shop expense, material and supplies, repairs.

Tracks—Labor, shop expense, material and supplies, repairs and equipment.

Drainage and Sumps—Labor, shop expense, material and supplies.

Loading and maintenance of equipment costs are compiled from the items reported above, and do not form a separate class in the reports of the division engineers.

No clearing and no plant arbitrary are charged. The clearing for excavation in Culebra Cut is finished; and the plant arbitrary assigned to this work has been absorbed, because it was based on an estimate in 1908 of 87,644,493 cubic yards, which amount, due to the slides in Culebra Cut, has already been exceeded.

Elements entering into the varying costs of classes from month to month do not appear in the printed cost statement, but form part of the reports of the division engineers. One of the largest and most variable items is transportation, which was \$.01015 per cubic yard in October, \$.00879 in November, and \$.00806 in December. The amount of material handled and the rainfall, which was greater in October than in the other months, are unclassified elements in the greater cost; the more tangible elements are the following:

GROSS COST OF OPERATING TRAINS.

	December	November	October
Labor.....	\$97,910.76	\$99,065.55	\$101,219.15
Coal.....	43,863.93	40,711.60	44,582.84
Material and supplies.....	2,622.82	2,428.43	14,062.09
Hoisting.....	4,924.40	5,409.26	5,364.20
Repairs to locomotives.....	36,503.97	32,170.91	34,224.96
Repairs to cars, wood.....	36,583.42	37,429.02	38,976.14
Repairs to cars, steel.....	10,684.67	11,427.43	12,148.71
Repairs cranes, wrecking.....	251.88	2.38	17.79
Miscellaneous.....			122.02
Total.....	\$233,345.85	\$228,644.58	\$250,717.90

All the classes are susceptible of analysis in the above manner, and it is this dividing of each part of work into its components that makes the cost keeping system of value in supervision.

A comparison of similar classes of work in different divisions, as affected by local conditions, is afforded by the cost of dry excavation in the Central and Pacific Divisions for the last quarter of 1912:

COST PER CUBIC YARD OF DRY EXCAVATION.

Cubic yds.—Excavation.	Central Division 3,161,001	Pacific Division 759,985
Drilling.....	.0648	.0862
Blasting.....	.0526	.0159
Loading.....	.0548	.0941
Tracks.....	.0957	.2008
Transportation.....	.0902	.0969
Dumps.....	.0608	.0173
Pumps.....	.0088	.0309
Maintenance of Equipment	.1152	.0873
Plant arbitrary.....		.0701
Division expense.....	.0132	.0276

Administration and General Expense.....	.0315	.0557
Total cost.....	\$0.5876	\$0.7828

Dry excavation in the Pacific Division is confined to two small sections, the channel between Pedro Miguel and Miraflores locks,

and the channel below Miraflores locks. The space is restricted, the moving of tracks is constant, and the shifting of steamshovels is frequent.

The cost of blasting per yard is small in the Pacific Division because most of the material does not require blasting; the cost of loading is high because of the restricted area of work making constant shifting of cars necessary; the cost of tracks is high because they must be shifted continually; the cost of dumps is low because most of the material is used as filling, when the expense of dumping is charged to the cost of filling; the plant arbitrary forms part of the cost because the amount of excavation estimated in 1908, upon which the arbitrary charge is based, has not yet been exceeded.

From the cost statement, which forms a part of this issue of THE CANAL RECORD, comparisons may be made of costs on any parts of the work.

PERSONAL.

Col. W. C. Gorgas, accompanied by Miss Gorgas, returned to the Isthmus on the *Panama* which arrived at Cristobal on February 16.

Representatives Dudley M. Hughes, Michael F. Conry and John M. Hamilton, composing a sub-committee of the House Committee on Military Affairs, are making an inspection of the Canal construction, the fortifications and the sanitary conditions in the Canal Zone. Mrs. Hughes, Mrs. Conry and Miss Henniell Hughes are with them. Accompanying the sub-committee unofficially are Representative Charles A. Korbly, with Mrs. Korbly, and Representative D. H. Mays, with the Misses Mays. Other ladies in the Congressional party are Mrs. William A. Cullop, Mrs. Keller, Misses Callie and Lucy Smith, and Miss Alice Page.

Three Killed in Dynamite Blast.

Three men were killed and seven injured in a premature explosion of dynamite at Quebrancha quarry near Monte Lirio on the morning of February 16. The dead are Lucus Ryce, negro from Trinidad; Arthur Lee, negro from Barbadoes; William Waid, negro from Montserrat. The injured are J. McNally, white American, foreman; Charles Graves, Samuel Hull, John Smithen, James Morris, Fred Johnson, Adolphus Grubs, negro laborers.

Shooting at Gatun.

Harry Stern, an employe of the Commissary Department of the Panama railroad, died in Colon Hospital on February 11, from gunshot wounds inflicted by J. Frank Houston, at Gatun on February 8. Stern was 33 years old, single, a native of Hot Springs, Ark., and is survived by his father, Philip Stern, living there.

Missing Men.

Any one having information regarding the whereabouts of Rudolph Eilenberg, who is supposed to be on the Isthmus, is requested to communicate with his sister, Augusta Eilenberg, 285 Central Park West, New York City.

Any one having information regarding the whereabouts of John Henry Faux, of Pittsburgh, Pa., who is supposed to be on the Isthmus, and John Hope Goudy, of Grafton, West Va., who is also supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

Mrs. William B. Williams, treasurer of the General Federation of Women's Clubs, was a visitor to the Canal Zone on February 14. Mrs. Williams is also in charge of the Sarah Platt Decker Endowment Fund, and advisory board member of the State Federations of New York, New Jersey, Michigan, and Panama.

The Canal Zone Federation Committee on the disposition of the Federation pictures and the books in connection with the art collection consists of Mrs. A. H. Herman of Gorgona, chairman, Mrs. Prather and Mrs. Smith, both of Empire, members. This committee is expected to report on its decision at the meeting of the Executive Board in April.

Church Notes.

A newly appointed agent for the American Bible Society, the Rev. W. J. Dunkun, of Virginia, will arrive on the Isthmus on February 20, to take charge of the society's work in Panama and the Canal Zone. Mr. Dunkun will make his headquarters at Colon. On the same day the evangelist, Mr. Hugh Taylor will arrive at Colon for a series of evangelistic meetings in the Protestant churches of the Canal Zone. Several meetings will be held at the Methodist Episcopal church in Panama.

The Fidelity Bible Class of the Empire Christian League, at the monthly social meeting in the chapel on February 11, was entertained by the senior class of girls of the Empire Sunday school. The class provided refreshments. There were about 40 present.

The Rt. Rev. Albion W. Knight, Bishop of Cuba, will arrive in Colon on Easter Day for a two week's visitation.

Catholic Missions.

At the meeting of the Altar Society of St. Ferdinand's Church, Empire, the Rev. Father Molyneaux, the missionary at present holding missions in the Zone churches, made an address on the necessity of organization among the members of churches. He also urged the bringing of the children of the church into active life in the parish. There was an election of officers for the ensuing year which resulted as follows: For president, Mrs. Golden, reelected; vice-president, Mrs. Morton; secretary, Mrs. Westberg, reelected. A special collection was taken up and the money will be used for the purpose of altar linens. The mission closed with the service on Sunday evening, February 16. Father Molyneaux is holding a mission at St. Categan's, parish, Gorgona, this week, and beginning on Sunday, February 23, he will hold a week's mission at the Church of the Immaculate Conception, Colon. There will be masses during the week at 5 and 8 a. m., and sermon and benediction every evening at 7.30. At the close of this mission Father Molyneaux will return to Philadelphia.

Christ Church, Colon.

The interior of Christ Church, Colon Beach, is being entirely renovated and repaired; the walls are freshly kalsomined and the woodwork throughout is painted. A concrete platform has been placed in the organ chamber for the new organ, and a platform with three approach steps has been constructed for the new altar. The work, including the

purchase and installation of the organ and altar, will cost about \$2,000. It is expected that the whole will be completed by Easter and that the Bishop of Cuba, who will arrive on the Isthmus on that day, will consecrate the organ and altar.

On Thursday, March 6, a quiet day for women will be observed at Christ Church. Members of Altar Guilds and other church societies are invited to be present. The day will begin with a celebration of the Holy Communion at 9.15 to be followed by a service of thanksgiving, an address on the meaning of the service and a meditation. At noon there will be an hour's recess for light refreshments. The afternoon service will consist of a second meditation followed by choral evensong. Any women wishing to attend the retreat whether or not they are affiliated with local church societies may send their names to the Rev. Edward J. Cooper, rector of Christ Church, Cristobal Post Office.

Band Concerts.

The Tenth Infantry will be encamped at Pedro Miguel on February 21 and 22, and at Corozal on February 24, and while at those places the regiment band will give a concert on the afternoon of February 22 at the former place and on the evening of February 24 at the latter place.

A concert will be given by the Isthmian Canal Commission Band at the Hotel Tivoli, Ancon, C. Z., on Sunday, February 23, 1913 at 8 p. m. The program follows:

1. March—2nd. Regt. Conn. N. G. Reeves
2. Selection—*The Rose Maid* (by request) Granichstaedten
3. a. *Simple Aveu* Thome
- b. *Pilgrims Chorus from Tannhauser* Wagner
4. Overture—*Martha* Flotow
5. Intermezzo—*In the Shadows* Finck
6. Popular Song—*Moonlight Bay* (by request). Wenrich
7. Waltz—*Lion and the Mouse* Bendix
8. Grand International Fantasia—*Hands*

Across the Sea Tobani

Introducing national airs of the following countries: America, Canada, Scotland, Italy, Sweden, Norway, Denmark, England, Cuba, Mexico, Austria, Ireland, Spain, Japan, Germany, Russia and France; concluding with a finale combining airs of the United States, England and Germany.

9. March—*Col. Moulton* Brooks

CHARLES E. JENNINGS, Musical Director.

The same program will be played at Cristobal on February 26, with "The Men Behind the Dirt" substituted for the last number.

Family Quarters

Applications for family quarters on file January 31, were as follows:

DISTRICT.	List No. 1.	List No. 2.
Balboa	1 (1)	49 (6)
Ancon	6 (3)	84 (18)
Ancon Hospital	1 (1)	2
Corozal	2 (2)	60 (15)
Pedro Miguel	3	44 (4)
Culebra	2 (1)	42 (9)
Empire	1	119 (19)
Las Cascadas		47 (2)
Bas Obispo		22 (1)
Gorgona		50 (75)
Gatun		92 (1)
Cristobal		139 (9)
Toro Point	1 (1)	6
Proto Bello		10 (11)
Total	17 (9)	766 (110)

NOTE—The figures in parentheses show the number of applicants already occupying regular or non-house-keeping family quarters at stations other than those at which applications are filed.

The Knights of Columbus will hold a meeting in Building No. 1, Cristobal, on Sunday, February 23 at 3.30 p. m. All members are invited to attend.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Owing to the many excursions planned for Washington's Birthday, uncertainty as to the plans of the 10th Infantry, and lack of opportunity for practice in many localities, it has been decided to cancel the proposed athletic meet that was to have been held at Empire on February 22.

The Edith Harris Scott Company, consisting of Edith Harris Scott, reader and contralto; E. Lucille Miller, soprano; C. E. McAfee, pianist, and Ruth Thoburn, violinist, will arrive on February 27. The dates for the first engagements are as follows: Friday, February 28, Empire; Monday, March 3, Corozal; Tuesday, March 4, Cristobal; Wednesday, March 5, Gorgona; Thursday, March 6, Culebra; Friday, March 7, Gatun; Saturday, March 8, Porto Bello. Later dates will be announced in next week's CANAL RECORD.

The moving picture schedule for week February 24 to March 1 is as follows: Monday, Corozal; Tuesday, Empire; Wednesday, Culebra; Thursday, Gatun; Friday, Gorgona; Saturday, Cristobal.

COROZAL.

Music for the moving pictures Monday night was furnished by Mr. McMahon at the piano, and Mrs. A. P. Boyd sang two solos.

The regular activities have been resumed since the completion of the new floor in the assembly hall.

The refurnished bowling alleys were opened Monday, February 10. Corozal lost two out of three games to Gorgona on the Corozal alleys Saturday night, February 15.

A member's smoker will be held at the Corozal Y. M. C. A., Thursday night, February 20.

CULEBRA.

High scores in duckpins for the week are as follows: Case, 101, 107; Hill, 106; Brown, 111, 123, 102; Ketchum, 104; & Warner, 102; Durand, 102, 103; Palmer, 101.

EMPIRE.

On the evening of February 10 the remaining five couples of the married men's bowling tournament bowled their games, but none were able to beat the score made by Mr. and Mrs. Johnson on the previous Friday. The prizes for the tournament were awarded as follows. First to Mr. and Mrs. J. E. Johnson, second, to Mr. and Mrs. J. Whaler; prize to lady making the highest score, Mrs. Johnson.

Owing to illness, Mr. F. A. Gause was not able to deliver his lecture on "Abraham Lincoln" on Sunday evening, February 16. Instead a song service, with music by Gray's orchestra, was held.

A Fraternal tenpin bowling tournament will be started the first of March in which all are invited to take part.

The gymnasium class which meets twice weekly now has twenty men enrolled. Visitors are welcome.

There was an attendance of 319 at the moving picture show held Friday, February 14, the largest attendance yet reported.

GORGONA.

Three hundred and fifty attended the motion pictures on Monday evening. Mrs. Pearson sang several solos. The next show will be on Friday evening, February 21.

A musical will be given at Gorgona on Thursday evening, February 20. It will consist of chorus, duets, solos, and selections by a 15-piece orchestra.

The following are the high scores for the week in the bowling alleys: Davis, 123, 103, 111, 118, 101, 101; Keppler, 101; Sims, 110, 105, 106; King, 105, 113, 111; Misal, 103; Dehst, 110; Dunlap, 100; Gebhart, 113; Sebt, 101; Roper, 107.

The leaders in the ragtime tournament are Davis and Keppler (doubles), 612; Davis (singles), 321; Davis (high score), 125.

GATUN.

Indoor tennis will be introduced at the clubhouse just as soon as the floor lines are painted. Any member may use the court.

Two books of popular cartoons have been added to the library.

A large order of several kinds of gymnasium shoes have just been received from the States. New binders for the magazines have also been received.

At the second rehearsal of the glee club, Mr. Harry E. Ruckert was selected as its director and Mrs. Carl T. Gilbert accompanist. Several selections, from the new music recently received from the States were sung. Among the members of the club are Messrs. Arthur, Coleman, Winters, Laughlin, Miller, Wilkie, Keruish, Duer, Smith, Gilbert, Dye, Aaron, Purchase, Johnson, and Noble.

The new equipment received for the bowling alleys includes eight sets of duckpins and ten black minter-alite duckpin balls.

The third anniversary of the Gatun Y. M. C. A.

will be celebrated by a "smoker" on March 3 and a public entertainment and reception on March 4. The Gatun Woman's Club will have charge of the refreshments.

The following students are enrolled in educational classes at the Gatun Y. M. C. A.: *Spanish* (four classes, Dr. Farmer, Dr. Valleley, Messrs. Duckworth, Waid, Roberts, Goldent, Dr. Alyea, Margeson, Mead, Tharp, Seely, Mackey, Brewbaker, Dalton, Pelly, Nock, and Dr. Crandall, Mrs. Parmeter, Mrs. Waid and Mrs. Weidner. *Arithmetic* (two classes)—F. J. Sweet, Sam. King, Chris. Severn, J. Olson, L. Finlayson, Patrick. *Latin*—P. J. Flynn, K. Crowell. *French*—P. J. Flynn, K. Crowell. *Algebra*—Olson. *Spelling, English and Penmanship*—Butler. *Stenography*—Miller and Ashley. The educational program is as follows: Latin class meets Mondays and Wednesdays at 6 p. m. Spelling, English, and penmanship, Mondays and Thursdays at 7.15 p. m. Arithmetic classes meet Mondays, Tuesdays, Thursdays and Fridays at 8.15, 7, 8.15, and 7 p. m., respectively. Algebra class meets Tuesdays and Fridays at 8 p. m. Spanish class for ladies meets Tuesdays and Thursdays at 2.30 p. m. Spanish classes, Elementary, intermediate and advanced, Wednesdays and Fridays (same hours both days) at 9.30, 8.30, and 7.30 p. m. Stenography class at 7 p. m. Saturdays.

CRISTOBAL.

The local bowlers took three games from Gatun on Saturday night, by the following scores:

Gatun.				Cristobal.			
Gibson.....	82	93	75	Weston.....	81	76	86
Carlson.....	78	78	94	C. Cotton.....	77	76	89

Morrissey.....	74	82	88	Orr.....	81	96	..
Kohl.....	69	84	67	Smith.....	83	100	83
				Bullard.....	89

Totals.... 392 420 396 407 431 447

The monthly married folks tournament will be held on the night of February 22. Entries will be limited to 12 couples. Prizes have been donated for both the lady and gentleman making the high score in each of the three games, as well as the usual gold medal for the couple with the highest pinfall for the three games. One game each of duckpins, candlepins, and Newport will be rolled.

At the moving picture show Wednesday night, February 12, there was an attendance of 195. The next show at Cristobal will be on Saturday, February 22.

PORTO BELLO.

Twenty-eight persons are enrolled in the Spanish class which meets each Tuesday and Thursday night. Mr. Dan'l A. Quayle is instructor.

About fifty persons attended the farewell reception given Miss Minnie Moon, sister of Mrs. A. C. Cornelison, Wednesday night, February 12. After a luncheon served by the ladies, Miss Moon was presented with some carved ivory as an expression of appreciation by the members of the association for interest she had shown in the social activities of the Y. M. C. A.

A picnic will be given on Washington's Birthday. After dinner a swim and athletic stunts are planned.

An Easter entertainment is being arranged by the members of the Sunday school.

Misdirected Letters.

Mulheran, Dan	Woolworth, P. F.
McPeake, Mrs. John	

OFFICIAL CIRCULARS.

Absence of Employes with Approval of Head of Department or Division.

CULEBRA, C. Z., February 13, 1913.

CIRCULAR No. 241-A:

Circular No. 241 provides that any absence of two or more days shall be reported to this office by letter. In the future an employe may, with the approval of the head of his department or division, absent himself without pay for a period of not more than seven days without the prior approval of this office, and such absence shall be reported to this office on Form 287 C. E. Prior authority must be obtained from this office for any absence in excess of seven days, and such absence will be shown on Daily Leave Order.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Eye and Ear Examination of Railway Employes.

CULEBRA, C. Z., February 11, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The following rules governing the determination of visual acuity, color perception, and hearing of railway employes in the Canal Zone will govern hereafter:

Before appointment each applicant must be examined by an oculist designated by the Chairman. This examination shall determine:

1. The visual acuity as shown by reading Snellen's test types at a distance of twenty feet in a good illumination (either natural or artificial); tests to be made with each eye separately, and then with both together, and each result recorded.

2. The power of accommodation, as shown by determining the near point for each eye on the standard reading card; said near point to be 8 inches from the second line of the card.

3. Whether or not manifest hyperopia exists, as demonstrated by the "fogging method" (getting the visual acuity through convex lenses). A manifest hyperopia of more than 2 D. should exclude. A better method still would be to determine the absolute refraction in all applicants under 45 years of age by means of a retinoscopic examination under a cycloplegic. In this case a total hyperopia of more than 3 D. should exclude in classes A., B. and C.

4. The ocular muscle balance, as evidenced by the Maddox rod. Marked imbalance should disqualify in classes A., B., C., D., and E.

5. Color perception, as determined by the Holmgren woolen test and supplemented by the Williams lantern. Color blindness should disqualify in all classes.

Applicants for classes A and B must be given field tests as described below. A bracket pole with two dolls or straight poles (placed the same distance as dolls on the standard bracket pole) carrying four standard semaphore arms and lights should be used. Test made standing and candidates should approach the signals to a point where they are able to see them clearly, and promptly call changes as made in position or arms and color of lights.

The standards to be adopted should be as follows:

INDOOR TESTS.

Class "A"—

Enginemen, road service, Hostlers who run on main track; Freight Conductors:

Not less than 20-30 combined, nor less than 20-70 in either eye without glasses. Vision to be corrected to 20-20 combined with glasses.

Class "B"—

Enginemen, yard service, Hostlers, road service on main track:

Not less than 20-40 combined, nor less than 20-70 in either eye without glasses. To be capable of correction to 20-30 combined with glasses.

Class "C"—

Firemen, Trainmen, Freight Brakemen, and Switch Tenders:

Same as Class "B."

Class "D"—

Passenger Conductors, Yard Conductors, Yard Masters, and Train Baggage-men:

Not less than 20-50 combined, nor less than 20-100 in either eye without glasses. To be capable of correction to 20-40 combined with glasses. In exceptional cases a man who is practically blind in one eye may be accepted provided the other is 20-20.

Class "E"—

Station Agents, Telegraph Operators, Signal Foremen, Drawbridge Tender, and Car and Engine Inspectors:

Same as Class "B."

Class "F"—

Crossing Guards and Gate-men:

Same as Class "D."

FIELD TESTS.

Class "A"—

Enginemen, Road service, By day, bright sunshine: Without glasses, 200, 400 and 2,600 feet. With glasses 200, 400 and 5,000 feet.

By day, cloudy, by night.
Without glasses 200, 400 and 2,000 feet. With
glasses 200, 400 and 4,000 feet.
Class "B"—

Engineer Yard service—By day or night:
Without glasses 200, 400 and 800 feet. With
glasses 200, 400 and 2,600 feet.

Re-examination: All employees should be re-examined every two years. Those to whom glasses are necessary should be re-examined annually. Re-examinations should be made upon the promotion of all employees, and should conform to the regulations for the class to which he is to be promoted; also after any accident in which employees are concerned which may have been caused by defective vision, color sense, or hearing. Examination should also be made after any serious accident or illness, or severe inflammations of the eyes.

Where employees have less than normal vision and same can be improved by proper lenses, they should be required to wear their lenses constantly while on duty, and in this country amber glasses should be encouraged as a better protection to the eyes than the usual glass. All employees who wear glasses shall at all times carry an extra pair in the pocket for use in case of breakage.

Examination of hearing: Applicants must be able to repeat ordinary conversation, names, numbers, etc., when spoken in an ordinary conversational tone at a distance of 20 feet, in a quiet room. In this case the hearing should be recorded as 20-20 or normal.

Employees will not be retained in the service if hearing is less than 10-20 in each ear, but an employee with 5-20 in one ear may be retained provided he has as good as 15-20 in the better ear.

Employees with less than normal hearing should re-examine semi-annually.

The heads of departments and divisions concerned will take proper steps to carry into effect the rules relative to re-examination given above.

GEO. W. GOETHALS, Chairman.

Sale of Hotel Books Restricted.

CULEBRA, C. Z., February 17, 1913.

CIRCULAR No. 256-1:

In the future, the sale of \$4.80 hotel books will be restricted:

1. To new employees arriving on the Isthmus, to whom one book may be issued on arrival.
2. To married employees occupying Commission family quarters and employees boarding regularly at private messes who are compelled to occasionally take meals away from home on account of official business, when the request is approved by the head of the department or division.

GEO. W. GOETHALS, Chairman.

Unloading and Release of Panama Railroad Cars.

CULEBRA, C. Z., February 13, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The Panama railroad has been handicapped for some time past in the movement of material, owing to the shortage of cars. Complaint has been frequently made that this shortage of cars is partially due to failure on the part of the Commission to promptly unload and release cars consigned to the various departments and divisions.

I desire that you issue positive instructions to all concerned that, in future, every effort must be made to promptly unload and release P. R. R. cars, and under no circumstances must cars be allowed to stand under load when it is possible by any reasonable means to effect their release.

GEO. W. GOETHALS, Chairman.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Commissary Cold Storage.

No material changes have been made in the prices of cold storage commodities sold at the Commissary stores since the last publication of the price list.

The following ships arrived at, or departed from the port of Balboa during the week ending February 15:
Arrivals—February 10, *Acapulco*, from San Francisco; February 11, *Salvadora* (tug boat), from Callao; February 11, *Ucayali*, from Valparaiso; February 12, 12 *Aysen*, from Valparaiso; February 14, *Pennsylvania*, from San Francisco.

Departures—February 9, *City of Sydney*, to San Francisco; February 9, *Pachitea*, to Mollendo; February 10, *Guatemala*, to Callao; February 10, *Quito*, to Guayaquil; February 14, *Arica*, to Guayaquil.

Rainfall from February 1 to 15, 1913, Inclusive.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon and Balboa, during the week ending February 15:

Tivives, February 9, from New York, with 1,497 sacks oats, 155 coils Manila rope, 500 pieces steel rope, 13 crates water closet parts, 10 cases hardware, for stock; 156 cases electrical material for Superintendent of Erection; 60 cases electrical material for emergency dams.

Advance, February 10, from New York, with 11 crates marble slabs, 534 crates tile slabs, 111 packages signal material, 13 pieces bridge material, 10 cases lamp globes, for Panama Railroad Company; 10 kegs bolts, 18 pieces locomotive tires, 148 barrels sand, for Mechanical Division; 15 barrels soda ash, for Sanitary Department; 11 cases coupon books, for Examiner of Accounts; 25 cases paper napkins, 9 cases oil, 26 cases files, 140 cases water coolers, 30 cases concentrated lye, 20 cases mining machinery, 83 drums calcium carbide, 750 pieces black pipe, 737 bundles sheet iron, 200 drums paint, 34 cases graphite, 30 cases sal. soda, for stock; 44 reels electric cable, for Superintendent of Erection; and a miscellaneous cargo, the whole consisting of 3,585 packages, weighing 400 tons.

Prinz Sigismund, February 11, from New York with 108 coils copper wire, 10 bundles copper wire for Mechanical Division; 30 kegs rivets, 25 cases hex nuts, 217 kegs bolts for stock.

Sarnia, February 10, from Hamburg, with 18 cases castings, for Superintendent of Erection.

Haakon VII, February 12, from Jacksonville, with 730 pieces piling, for stock; 26,790 pieces cross ties, for Panama Railroad Company.

Atenas, February 12, from New Orleans, with 1,675 pieces cross ties, 1,630 pieces yellow pine lumber, 100 bales hay, 150 casks feed, for stock.

Zacapa, February 12, from New York, with 85 barrels carbolineum, for First Division Chief Engineer's Office; 10 cases electrical material, for Mechanical Division; 15 cases hardware, for stock.

Heredia, February 13, from New Orleans, with 12,424 pieces lumber, for Mechanical Division; 2,155 pieces lumber, 1,325 pieces cross ties, 80 barrels sea coal facing, 13 cases castings, 240 cases grease, for stock.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line:

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m. and Thursdays at 2 p. m.; for Boca de Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

The Panamanian Steamship Company's steamer *Panama* will sail from Panama for Aguadulce and Pedregal on March 1, 11, and 19.

STATEMENT OF
CONSTRUCTION EXPENDITURES
TO DECEMBER 31, 1912

(Part II of The Canal Record, February 19, 1913.)

STATEMENT OF CONSTRUCTION EXPENDITURES TO DECEMBER 31, 1912.

Table No. 1.

Includes administrative and general expenses, but does not include "General Items" or expenditures for sanitation, hospitals, or civil administration.

ITEMS.	SECOND QUARTER, FISCAL YEAR 1913.			TO SEPTEMBER 30, 1912			TOTAL TO DECEMBER 31, 1912.

Item No. 43—Central Division Dredging Excavation Prism, preliminary surveys.
 Item No. 45—Represents operation of cement gun used in facing walls of the Cut.
 Item No. 64—Pacific Division, Miraflores Dam, Hydraulic Filling. Expenditures represent cost of pipe lines, flumes, etc. 661,048 cubic yards have been deposited in the dams from dredges and hydraulic excavation in lock chambers and in prism below the locks. The expense thereof has been charged to excavation.
 Items Nos. 81, 82, 83—Pacific Division, La Boca Locks and Dams. This expense was incurred prior to the adoption of Miraflores as the site for the lower locks and dam at the Pacific entrance of the Canal.
 Item No. 84—Naos Island Breakwater. Though shown under Pacific Division, the breakwater is being constructed entirely by the Central Division with material from the Cut. Only the excess cost of dumping here as compared with regular dumps is charged to this item.
 Items Nos. 46, 46, and 86—The expenditures from plant and Equipment are absorbed in the construction costs on the basis of estimated cost of the plant and estimated quantities of work to be done. The amounts shown under these items represent the balances which were to be absorbed into construction costs after December 31, 1912.
 General—When the excavated material is used for filling, such as dams, back-filling, etc., the cost of dumping only is charged to the item benefited, other expenses being charged to Excavation.

DAM CONSTRUCTION.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, FEBRUARY 26, 1913.

No. 27.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication, or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Las Sabanas Lands Need Not Be Purchased.

An executive order has been signed at Washington exempting from the operation of the order of December 5, 1912, which provides for extinguishing all private titles in the Canal Zone, the lands in the Zone near Panama city known as "Las Sabanas." This land is occupied principally by estates of residents of Panama who have country houses there.

Work at Gorgona Shops.

The policy of decreasing the amount of spare parts carried in stores, and the constant increase in the amount of work being done on the Canal, have made the past year the busiest ever experienced at Gorgona Shops and Foundry. The record of work orders issued and of output of the foundry is given by months in the following statement, and this is in addition to the large amount of repair work done on all classes of equipment:

MONTH.	Work Orders. Number	FOUNDRY OUTPUT.	
		Iron	Brass
		Pounds.	Pounds.
January.....	990	518,621	34,713
February.....	867	615,040	27,637
March.....	1,083	675,366	34,654
April.....	978	561,620	31,891
May.....	932	569,087	47,447
June.....	884	574,506	38,529
July.....	1,195	672,269	19,660
August.....	1,193	563,780	19,639
September.....	1,120	511,445	16,844
October.....	1,115	626,351	25,310
November.....	1,093	610,327	25,905
December.....	1,170	539,002	32,743
Total....	12,730	7,047,414	354,972

In addition to the above and repair work, there were turned out by the steel converter 504,913 pounds of steel castings, 95 heats being required. The largest month in the steel foundry was December when 65,481 pounds of castings were manufactured.

In October the force was the largest in the history of the Mechanical Division, the total being 3,487, of whom 1,153 were "gold" employees or Americans above the common

laborer grade. The total pay roll was \$217,-129.03. Of the total employed by the division, 779 "gold" men were working at Gorgona and 1,259 "silver" men, the balance being distributed among the small shops and engine houses at Gatun, Pedro Miguel, Las Cascadas, Gold Hill, Empire, and Balboa, and the steamshovel repair gangs in Culebra Cut and the Pacific Division. In January, 1913 the number of work orders issued, 1,280, was the largest of record, as also of orders completed, 1,217.

The work in the Gorgona shops fluctuates considerably. During December it fell off to such an extent as to call for a small reduction in the force and it was thought at that time that a larger reduction would be necessary within a few weeks, instead of which, the work during the past two months has increased to such an extent as to make it necessary to work considerable overtime in all departments, and requisitions have been cabled to the Washington Office for new employees in several of the trades.

Cranes for Permanent Shops.

Specifications have been forwarded to the United States for the purchase of three 60-ton, two 25-ton, and two 20-ton traveling cranes for the permanent shops at Balboa.

The 60-ton cranes will be placed in the erecting, machine, and boiler and ship fitters shops. They will have a span from center to center of rails of 56 feet 10 inches, the weight of runway will be 100 pounds per yard, the height of the top rail above the floor, 32 feet. Each will be equipped with four motors and a main and auxiliary hoist, the main hoist to have a maximum working capacity of 120,000 pounds, and the auxiliary of 20,000 pounds. The main hoist motor will have a minimum rating of 50 horsepower, auxiliary hoist motor of 27 horsepower, trolley motor of 10 horsepower, and bridge motor of 50 horsepower.

The 25-ton cranes will be erected in the forge shop and foundry. They will have a span from center to center of rails of 57 feet 6 inches, weight of runway 70 pounds per yard. There will be but one hoist, and this of 50,000 pounds maximum working capacity. The main hoist motors will be of 30 horsepower, trolley of 7½ horsepower, and bridge of 30 horsepower.

The 20-ton cranes will be erected in the boiler and ship fitters shop, and the machine shop. They will have a span from center to center of rails of 56 feet, 10 inches, and the weight of the runway will be 100 pounds per yard. The main hoist will have a maximum working capacity of 40,000 pounds, and be equipped with a 30 horsepower motor. The bridge motor will have a capacity of 25 horsepower, and the trolley motor of 7½ horsepower.

GEOLOGY OF THE ISTHMUS.

Excavation Reveals Connecting Link in Rock Succession.

Excavation for the spillway of Miraflores Lake during the past week uncovered the information that practically completes the chain of evidence showing the relation of the rocks on the Atlantic side of the Isthmus with those on the Pacific side. The Commission geologist, D. F. MacDonald, has made the following preliminary report:

With the information procured at Miraflores Spillway it is now possible to draw a cross section of the Isthmus, showing the different rock formations and the succession in which they were formed. The geological data so far collected within the Canal Zone from all sources, and especially from the Canal and Panama railroad excavations, are more complete than that obtained from any other part of the tropical world, and are of international importance to the sciences. Canal Zone Geology, when the complete report is written, will be the chief section of comparison for all Central American and Antillian geological study. Nowhere else in the tropical world have the rocks yielded such a rich collection of fossils, and the study of the animals that lived in the olden time, together with the study of the different rock beds and the succession in which they were formed, will reveal the history of the joining of the two continents, and the vicissitudes of their long union down to the present time. This history will have more than geological interest because biologists have for many years been trying to solve the problem of the intermigration of animals and plants between the two continents. Their work was of little value until the geological evidence of the age of the joining of the two continents could be found out, as it now practically is, although the final studies yet remain to be completed. A short description of the different rock formations, and the succession in which they were laid down, beginning with the oldest, follows:

ROCK SUCCESSION OF THE ISTHMUS.

Within the Canal Zone are eleven distinct groups or formations of what may broadly be designated as bedded rocks. There are also six broad rock groups of igneous origin. Of the former, the oldest two formations contain no fossils, so their age is unknown. The lower part of the Bohio conglomerate is also of unknown age. The other formations range from lower Oligocene to late Pleistocene. The Miocene is, so far as known, not represented in the rock succession. Correlation across the Isthmus is a difficult matter because of sparsity of outcrops, hence further work may slightly modify the conclusions reached herein.

Number 1. Bas Obispo Formation—The Bas Obispo formation, the oldest Isthmian formation so far known, and probably of pre-Tertiary age, is of volcanic breccia with some

local meta-conglomerate of andesitic composition. It outcrops extensively at Bas Obispo, and near Old Panama, and small outcrops rise above the alluvium near Miraflores and Diablo Ridge.

Number 2. Las Cascadas Agglomerate—The Las Cascadas Agglomerate overlies the basal breccia and outcrops extensively along the Canal between Empire and Las Cascadas. It consists of greenish to gray basic agglomerate, which contains large and small sub-angular fragments in a fine grained ground mass of volcanic clay and tuff. The whole is arranged in massive to roughly bedded unconformable deposits interbedded with which are andesitic flow breccias, some fine grained

grayish, and some coarse grained dark andesitic flows, and a few easily crumbled lava mud flows which show columnar jointing where exposed in the Canal. The whole is cut by large and small basalt dikes.

Number 3. Bohio Conglomerate—The Bohio Conglomerate consists of two members. The lowermost of these is, so far, of indeterminable age, but seems to be considerably younger than the Las Cascadas agglomerate. It consists of gravel, cobbles, and boulders up to several feet in diameter, fairly well bedded but locally massive. Interbedded with the coarser material are sandstone and argillite layers. The uppermost member is of the same general composition but contains some beds of dark

gray foraminiferal marls, probably of early Oligocene age. The cobbles and boulders in both formations are cherts andesites, and diorites in composition, and were derived from the older intrusive masses of igneous rock now found at intervals along the central part of the Isthmian region. The formation is probably nearly one thousand feet thick and it outcrops extensively in the vicinity of Bohio and near Gamboa Bridge and Caimito Junction.

Number 4. The Culebra Formation—The Culebra formation is the oldest series that has, so far, yielded many determinable fossils. Doctors W. H. Dall and T. W. Vaughn, U. S. Geological Survey specialists in the study of Tertiary fossils, regard its fauna as possibly marine Eocene but very likely lower Oligocene. When they have carefully studied the collection, the questions of age will be cleared up. The formation consists of an upper and a lower member. The lower member (a) consists of dark, well-laminated beds of soft shales, marls, and carbonaceous clays, with some pebbly, sandy, and tufaceous layers, and a few thin beds of lignitic shale. It outcrops in Culebra Cut, near Culebra, and near Pedro Miguel. The upper member (b) consists of beds and lenses of sandy limestone to calcareous sandstone, 3 to 10 feet thick, separated by partings of carbonaceous clays and fine-bedded tuffs. This formation seems to be at least five hundred feet thick.

Number 5. Cucuracha Formation—The Cucuracha formation consists of greenish, fine grained clay with some local red beds. It is fairly massive but contains a few beds of lignitic shale, some lenses of gravel, sandy beds, and one extensive flow of gray andesitic lava about 20 feet thick. It outcrops along the Canal near Rio Grande and on both sides of Gold and Contractor's Hills. Its chemical composition is andesitic, it is cut by some basalt dikes and is about four hundred feet thick.

Number 6. Emperador Limestone—The Emperador limestone lies unconformably on several of the older beds. It is a light colored, fairly pure limestone, which contains many corals, some pelecypods and other marine fossils. Its outcrops are somewhat flaggy and occupy comparatively small areas. Near Las Cascadas a section cut by the Canal shows five different beds, some of which are marly sandstone. The lower beds are four to six feet and the upper one about 25 feet thick. The formation outcrops northwest of Empire, south of Las Cascadas, on the relocated line of the Panama railroad near San Pablo, near

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

Over 97 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on February 21, the amount in place being 4,330,198 cubic yards.

GATUN LOCKS AND SPILLWAY.

Over 95 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on February 21, being 1,960,157 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 218,896 cubic yards out of the total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending February 22, and of the total, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.				Large stone.	Total.	SPILLWAY		
	Concrete placed.	Hour worked.	No. of mixer	Concrete laid.			Hours worked.	No. mixers used.

Frijoles, in the swamp southeast of Diablo Bridge, and extensively near Alhajuela. This limestone is referred by Doctors Dall and Vaughn to the lower Oligocene.

Number 7. The Caimito Formation—The Caimito formation consists of four parts, any one of which may be absent. These are (a) a light gray marly argillite, which overlies the Emperador limestone; (b) a yellowish and somewhat spherical weathering argillitic sandstone, which is bluish gray on fresh fracture, (c) a peculiarly calcareous conglomerate with some fragments of much decayed basic rock, which locally gives a bright green stain to small patches of the formation. (d) More yellowish spherical weathering argillitic sandstone. "A" is found mostly overlying the limestone and in immediate contact with it; "b" and "d" may be seen in the section at Bald Hill north of Miraflores, and "b" is thought to be the rock which outcrops in the Chagres River at Barbacoas, near San Pablo. "c" outcrops at Bald Hill, extensively at San Pablo, and at the site of the proposed wireless telegraph station opposite San Pablo. This whole formation has at least four hundred feet of thickness.

Number 8. Panama Formation—The Panama formation, first named by Hill in his bulletin on the geology of Panama, is a light colored well-bedded tuff, somewhat acid in composition and locally containing beds of argillite and sandy marl. It has a few fossils, and outcrops extensively from Miraflores to Panama, and locally in some other places. The formation is at least four hundred feet thick, and overlies the Caimito beds.

Number 9. Gatun Formation—This formation consists of three members: (a) About five hundred feet of marls and argillites containing many marine fossils, and some beds of soft sandstone and conglomerate. It is dark gray in color, except locally where many brown specks indicating fragments of organic material are shown. (b) Mostly fine soft sandstone, about one hundred feet thick, containing a few fossils. (c) Light colored indurated clay beds. The formation is very extensive and constitutes the foundation on which the Gatun Locks are built. The upper part of the formation weathers into red clay, and except where this is cut through by streams it covers the solid rock to a depth of 20 to 25 feet. Large collections of fossils have been made from these beds and from a study of them it is known that the formation was deposited in Oligocene time. The light colored indurated clay beds forming the upper part of the Gatun series seem to correspond to the Panama formation, while the Caimito formation is probably the equivalent of the middle and the lower Gatun beds.

Number 10. Caribbean Limestone—The Caribbean limestone (Gabb's Antillite) is a sandy fragmental limestone, locally a coquina or shell marl. It fringes the Caribbean coast forming low bluffs on many of the headlands. Near the river mouths and the lower ends of the valleys it is generally absent. It outcrops at Toro Point, west of Gatun Dam, and at the mouth of the Chagres River, and is the rock from which Fort San Lorenzo was built. From its fossils it is provisionally referred to the Pliocene. In Costa Rica this limestone fringes the Caribbean shore in many places, and inland from it are argillite beds of the same age.

Number 11. Pleistocene Formations—These consist of (a) Bench gravels up to one hundred

feet above present river levels; (b) Swamp formations filling old channels to depths of 375 feet below present sea levels; (c) River gravels ten feet above present flood plane levels, old sea beaches six to ten feet above present beach levels; (d) shoals, beaches, and present river alluvium.

The old channels mentioned under (b) were cut out by the rivers when the land stood at least 400 feet higher than it now is. It then slowly sank to about eight feet below its present level. Its last motion was upward eight feet, as shown by the geologically very recently raised beaches west of Limon Bay, and at many other points westward into Costa Rica.

Igneous Rocks—The group of igneous rocks are: (1) Quartz diorites and granitic rocks, such as that of Cocovi Island and the granitic float locally found in the Chagres River wash, indicating granitic outcrops somewhere within the river valley. (2) Andesitic rocks as at Point Farfan, opposite Balboa, locally in Culebra Cut, and at other places within the Chagres River basin, as evidenced by the andesite pebbles in the wash of that river. (3) Rhyolitic rocks, as at Ancon Hill, the rock used in the concrete of the Pacific Locks. (4) Basalts, as at Paraiso, the top of Gold Hill near Rio Grande, and locally as dikes in the Culebra Cut, as well as at many other places within the Canal Zone. (5) Mud lava flows and breccias, as shown locally between Empire and Las Cascadas. (6) Meta-sediments and breccias, some of which may have been pushed up cold, as crown masses on top of basalt intrusions. Genetically they are a peculiar and distinct type which so far as known seem not to have been previously described in geology. Gold Hill, Contractor's Hill, Empire Bridge, and some of the Paraiso breccias are of this type.

Building Notes.

Two type No 5 quarters are being taken down at Gorgona and will be erected at Corozal.

At Toro Point, the lower floor of a No 18 bachelor quarters is being changed to accommodate four families. The rear of the dispensary is being converted into quarters for one family.

Water Supply South of Pedro Miguel.

A committee has been appointed to recommend methods of storage, distribution, and treatment of water for the supply south of Pedro Miguel after the Canal is completed. The members are Messrs. H. H. Rousseau, H. O. Cole, Geo. M. Wells, J. T. B. Bowles, and Luis Ernst.

Obituary.

John F. Catto, an employe of the Quartermaster's Department at Empire, was struck and killed by a railroad train near Corozal on the morning of February 22. He was 40 years of age, married, and had been on the Isthmus six years. He is survived by his wife living at Empire.

Missing Men.

Any one having information regarding the whereabouts of John McCaw and John Egan, both of Philadelphia, Pa., and supposed to be on the Isthmus, are requested to communicate with the American Legation, Panama.

Lost—Commissary book No. 59647 between the Ancon cold storage and No. 198 Central Avenue, Panama. A reward is offered if returned to H. H. Hunter, 198 Central Avenue Panama.

CONCRETE REFLECTORS.

Operating Tunnels and Machine Rooms of the Locks.

THE CANAL RECORD of January 8, 1913, published an article on Lock Illumination, outlining the general method of lighting the Canal locks, both exterior and interior. It was mentioned that the tunnel and machine room reflectors were to be made of concrete. Recent experiments made in the evening by the First Division at the Pedro Miguel locks have demonstrated the superiority of the interior lighting arrangement which has been adopted.

Qualitative experiments were conducted to determine:

1. The feasibility of concrete reflectors for both the operating tunnel and the machine room lighting.
2. The general arrangement of the lamp and reflector units to produce proper illumination for the inspection and cleaning of the individual machines.
3. The advantage of tungsten-filament lamps over carbon-filament lamps.
4. The advantage of white-washed walls over concrete walls.
5. General character of the illumination.

When the lock lighting was first taken up, it was considered advisable to cast concrete reflectors into the ceilings of the operating tunnel and the walls of the machine rooms. Concrete reflectors are to be favored upon the Isthmus, as the material is free from a natural deterioration that causes metal reflectors to corrode quickly in a tropical humidity. Later it was suggested that special enamelled-steel fixtures be manufactured by contractors in the United States, and proposals for this material were requested by the General Purchasing Officer under Circular 732. The bids received were quite unsatisfactory, both as to high price and as to the arrangement of the lamp in the reflectors. Particular effort had been made to obtain reflectors of a type to conceal the lamp filament from the eye without obliterating the lighting flux over the areas to be illuminated. The bidders seemed to be unable to obtain this essential feature to any degree of satisfaction. Hence the bids for the reflectors were rejected, and the Commission's engineers worked up new designs of concrete reflectors which would be suited to the requirements of the installation.

The greatest difficulty in the tunnel lighting is occasioned by a low head-room of seven feet. At this height it is somewhat difficult to secure uniform illumination at the floor line. This difficulty has been overcome by placing the lamps on fifteen foot centers along the longitudinal axis of the tunnel. The tunnel is 5 feet 6 inches wide and 7 feet in the clear, and extends nearly the full length of each of the lock walls, connecting together all the machine rooms. The lamps are set in the ceiling on the center line of the tunnel. Alternate lamps are connected upon different circuits and groups of ten or twelve lamps are wired upon the same circuit, permitting an economical control of the lighting whenever operating conditions are such that a mild one-half illumination is sufficient. The wires for the lighting circuits are run in covered chases, which are formed in the concrete at the upper corner of the tunnel. The switches are located in panel boards situated at convenient load-centers along the tunnel.

In the experiments, a 200-foot length of

operating tunnel was fitted up with concrete ceiling reflectors. It was found that the illumination produced by one circuit of alternate lamps was sufficient for the ordinary service and that the illumination produced when all lamps were burning was exceptionally uniform. With all lamps burning, there were no objectionable shadows and the reflected light on the ceiling was unusually satisfactory.

The reflector for the ceiling is of comparatively simple design, consisting of inclined surfaces at the four sides to throw the lighting flux in proper directions. The method of supporting the fixtures was given considerable attention in order to devise an easy mounting. The operating tunnel and a detail of the tunnel reflector are shown in the accompanying cut.

The fort of the designers was directed toward shading the direct ray from the eye without a sacrifice in the illumination of the machinery. The solution is simple and is illustrated in the accompanying cut. A concrete reflector, similar to the ceiling reflector, is grouted into the wall recess. A lamp socket is set in the top of the reflector, and wires are brought to the socket through chases in the walls. In front of the lamp is placed a concrete shade which contains a semi-circular opening at the bottom. The shade is adjusted in a vertical plane to cut off the direct glare of the filament permitting the lighting flux to penetrate through the opening, flooding the machine with an excellent illumination. The lamp recesses are placed so as to light all sides of the machine. The illumination is more than

produced by the tungsten lamps. Forty-watt lamps were used because of an inability to procure sufficient 25-watt lamps, which it is expected will be ultimately installed. It is considered that the tungsten illumination, represented by 100 watts of energy per room, is far superior to the carbon filament illumination, represented by 220 watts of electrical energy per room. The saving is obvious, particularly in view of the present reduced manufacturing cost of the tungsten lamps. In the past some fear has been entertained regarding the life of the tungsten lamps when subjected to possible vibration occasioned by passing locomotives and the operation of the machinery. It is now considered that the stability of the walls and decking will render this vibration of very small magnitude, per-

OPERATING TUNNEL IN LOCK WALLS.

(a) Reflector for Ceiling Lamps. (b) Reflector for Wall Lamps. (c) Chase for Wiring. (d) Cylindrical valve machine. (e) Decks for lighting and power cables.

DETAIL OF TUNNEL REFLECTORS.

(c) Chase for Wiring. (b) Reflector for Wall Lamps.

companying cut. The total number of tunnel lamps is approximately twenty-one hundred

The machine rooms are individual chambers opening into the operating tunnel. Each room houses a special remote-controlled, motor-operated train of gears which drives one of the lock mechanisms, such as the miter gates, the rising stem valves, the chain fenders, the cylindrical valves, etc. The lighting of the individual machine room has presented considerable difficulty, owing to the fact that the lamps could not be placed at the most desirable point in the ceiling on account of large covers and manholes which permit gaining a hurried access through the decking to the equipment by means of cranes operated upon the tracks of the lock coping. It was necessary to depend upon side-wall illumination, approximately 5,000 lamp recesses being cast in the concrete walls at about the level of the eye. To install a lamp in this recess without some shading feature was to invite the disadvantage of vision occasioned by glancing into a direct glare of the lamp filament. Whenever the eye is forced to gaze upon a bright source of light, the pupil contracts to a minimum aperture, preventing the retina from transmitting a distinct picture of the less luminous surfaces. Consequently, every ef-

ample for ordinary inspection and cleaning, and is sufficient for the majority of repair work that does not require the concentrated light of a portable extension.

In the experiments, two cylindrical valve rooms, a rising stem valve room, and an auxiliary valve room were fitted with the shaded concrete reflectors. In every case the results were excellent. The rising stem valve in particular was eminently satisfactory. This chamber is quite deep, extending as a pit, 22 feet 3 inches below the floor of the operating tunnel, requiring three levels of wall lamps. The illumination in the pit was excellent, as was also the illumination of the motor and upper machine parts which are unfavorably situated respecting the source of lighting.

An experiment was conducted to demonstrate the superiority of the tungsten-filament lamps over carbon-filament lamps. Two adjacent cylindrical valve rooms in the center wall were each fitted up with four concrete reflectors. In one room sixteen-candle-power-carbon-filament lamps were used and in the other forty-watt tungsten lamps were used. The illumination with the tungsten lamps was vastly superior to that of the carbon-filament, the yellow light emitted by the carbon lamps being very inferior to the white light

mitting the use of a drawn metallic filament lamp without undue breakage.

Excellent results were obtained by whitewashing the walls of a section of the tunnel and of the machine rooms where the wall reflectors were installed. The lighting flux is diffused much better and sharp shadows are practically eliminated. The inside of all reflectors were whitewashed, which, if advisable, may later be changed to a more durable white enamel. Portions of the tunnel which were not whitewashed looked dingy and the illumination was not nearly as uniform. It is apparent that, as an operating measure, the whitewashing of walls in the tunnels and machine rooms will prove of extreme advantage from every point of view—sanitation, cleanliness, and illumination.

The results of the lighting experiments demonstrated that the permanent lighting of the tunnels and machine rooms of the locks would be proper, and that the side wall lighting would not prove to be the eye-sore that might be imagined. By actually making trial reflectors of varying shapes certain objectionable features of the original design were eliminated, and the construction of the details of support were given consideration which was not apparent on the original sketches.

CANAL WORK IN JANUARY.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., February 15, 1913.

The Honorable the Secretary of War,
Washington, D. C.

Sir: I have the honor to submit the following report of operations on the Isthmus for the month of January, 1913:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d. Div.	5th Div.	6th Div.	Total.
Work excavation, dry	Cubic yards..	46,773	1,135,580	54,114	435,597		1,672,063
Work excavation, wet	Cubic yards..	508,338		216,540		215,025	939,904
Total work excavation	Cubic yards..	555,111	1,135,580	270,654	435,597	215,025	2,611,067
Plant excavation, dry	Cubic yards..			53			53
Plant excavation, wet	Cubic yards..						
Total plant excavation	Cubic yards..			53			53
Total Canal excavation	Cubic yards..	555,111	1,135,580	270,707	435,597	215,025	2,612,020
Material placed in dams	Cubic yards..	149,609			72,393		222,002
Concrete placed at locks, dams and spillways	Cubic yards..	32,271			59,091		91,362
Explosives used	Tons (Gross)	22.91	177.	7.43	96.54	20	323.98
Rock drilled	Feet	22,038	389,634	13,856	126,182	12,175	563,885
Tracks removed	Miles		6.98				6.94
New tracks laid	Miles	4	17.36		2.50		23.86
Rock crushed	Cubic yards..				70,188		70,188
Cement used	Barrels	39,453	27		61,957	18	101,455
New roads built	Miles				1,573		1,573
Water mains laid	Feet		2.5				1.78
Sewers laid	Feet						
Open drains and ditches dug	Feet	9,184	30,708		177		40,069
Average daily force		4,783	6,619	812	5,885	1,298	19,398
Average rainfall	Inches	5.67	2.50	.78	1.10	.78	2.82

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the Division Engineer of the Atlantic Division, Resident Engineer Cole and the Erection subdivision of this office. The inspection of this work is being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF INSTALLATION OF RISING STEM GATE VALVES, ERECTION OF SPILLWAY GATES AND CAISSONS, AND ASSEMBLY OF HYDRO-ELECTRIC DRAFT TUBES AT GATUN.

The work of erection of caisson at Gatun was continued and the work completed on January 25. Work was resumed on the erection of the eight spillway gates at Miraflores and at the close of the month was about 25 per cent completed.

There was no work done on the caisson for Miraflores.

Work was continued on the preparation of rising stem gate valve machinery chambers at Gatun, Pedro Miguel, and Miraflores, and satisfactory progress was made.

Work was continued on assembling and riveting of draft tubes for the hydroelectric station at Gatun.

LOCK GATES AND PROTECTIVE DEVICES.

Up to January 20, a total of 61,897 tons of steel plates and shapes had been accepted at the rolling mills. Shipments of riveted structural steel from the Rankin shops totaled 51,374 tons, or about 99 per cent of the con-

tract weight required for the 92 leaves to be erected. Of this total, 1,379 tons were shipped during the month. There were also 286 tons of spare part shipped during January. So far as erection, reaming, and riveting are concerned, the contractors progressed satisfactorily. The total tonnage of lock gate material erected on February 1 in all locks, without regard to its being fully reamed or riveted, was 39,096 tons, or about 68 per cent of the total required. Of this 3,066 tons, or about 6 per cent were erected during the month. The total number of field rivets driven was 2,831,600; there remain about 2,700,000 to be driven. The status of the work in the several locks may be summarized as follows:

livery up to the promised schedule. The rate of installing the machines keeps pace with the receipt of the various parts. The following tabulations are given as a summary of the work:

Gatun—Work is in progress on all of the leaves, 40 in number. Erection 78 per cent completed, Reaming 75 per cent completed, Riveting 66 per cent completed, and Finishing 10 per cent completed.

Pedro Miguel—Work is in progress on the entire 24 leaves. Erection 82 per cent completed, Reaming 86 per cent completed, Riveting 70 per cent completed.

Miraflores—Work is in progress on 16 of the 28 leaves. Erection 43 per cent completed, Reaming 25 per cent completed, Riveting 15 per cent completed.

LOCK GATE RECESS COVERS.

All recess covers at Gatun have been erected and grouted and the portable part of ten covers fitted in place. At Pedro Miguel all the covers have been erected and grouted and the portable part of four covers fitted in place. At Miraflores 20 of the 24 covers have been erected and riveted in place, but only one has been grouted.

CHAIN FENDERS.

Work in the field consisted of completing the piping in chain fenders 812 and 813 in the upper approach at Gatun Locks. The tank and pump were fully installed. In pit 812 the concrete was placed in the floor; in pit 813 the floor concreting is practically completed.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection of the operating machinery and electrical equipment. The contractors are generally behind hand in their deliveries, but the progress is being made with a view to bringing the rates of de-

ELECTRICAL WORK—ATLANTIC LOCKS.

Conductor rails, insulators, brackets and cover plates were installed on 1,320 feet of straight and 500 feet of curved track, making a total to date of 19,046 feet. Of this 9,036 feet have been equipped with steel conductor bar and 10,010 with copper conductor bar. Progress has been made in pulling cable into the conduit system, a total of 270,602 feet having been pulled at the end of the month, practically completing this work. Nearly all of the cable pulled has been protected with tile in the manholes. All ducts installed have now been rodded, cleaned and wired, 29,925 feet having been completed during the month of January. Thirty-two control panels for cylindrical valve machines and 11 control panels for miter gate moving machines have been assembled ready for conduit and cable work. Eight of the bases for rising stem valve machines are ready for installation of panels. Eighteen cylindrical valve machines and three auxiliary culvert valve machines were tested and operated satisfactorily, making a total of 36 cylindrical valve machines tested and operated to date. There were 13 rising stem valve machines tested and operated in accordance with specifications, making a total of 21.

ELECTRICAL WORK—PACIFIC LOCKS.

Pedro Miguel—Conductor rails, insulators, brackets, and copper plates were installed on 2,736 feet of track, making a total of 8,430 feet. Of this amount, 3,469 feet have been equipped with steel and 4,961 feet with copper conductor bar. A total of 94,466 duct feet of vitrified tile and 13,162 duct feet of fibre conduit has been prepared to receive cable. There were 2,436 feet of 3-conductor No. 0000 cable pulled during the month, making a total of 15,336 feet. The total amount of 3-conductor No. 00 cable pulled—3,360 feet—was not increased during the month. Twenty control panels for cylindrical valve machines have been installed ready for conduit and cable. A total of 11 control boxes for miter gate hand railings has been installed, seven being installed during January. Six of the 200 K. V. A. power transformers were placed.

Miraflores—Steel conductor bar, insulator brackets and plates were installed on 1,920 feet of track. There were 44,333 feet of duct rodded, cleaned and wired preparatory to pulling cable. Preliminary test was made on four rising stem gate valve machines.

The 20 cylindrical valve machines at Pedro Miguel were tested and operated satisfactorily.

EMERGENCY DAMS.

Inspection was in progress at five localities in the United States and 194 tons of material were accepted. At the end of the month 7,728 tons had been fabricated and accepted. About 1,606 tons were delivered on the Isthmus during the month and approximately 927 tons were erected. On January 31 a total of

7,212 tons had been delivered and 3,613 tons erected. Approximately 50 per cent of the material required for all emergency dams has been received, of which about 27 per cent has been erected. Work was in progress on the east and west dams at Gatun and the west dam at Pedro Miguel.

AIDS TO NAVIGATION.

Ten range towers of the Atlantic and Pacific type, including foundations, were completed, except that two steel lantern doors must be hung, stair railings erected, towers painted and permanent lights installed. Work on the outside walls and newel post of one tower is well under way. Nine towers of the Gatun Lake section type, with foundations, were completed, except that doors must be hung, steel lanterns erected, lantern glass set in place, and permanent lights installed. Seven of these towers are still to be painted. One foundation for Atlantic and Pacific type was completed. The electric light line from Aguadulce pumping station to range No. 1-2 and beacons No. 5 and 7, Pacific end, was completed, except that electric fittings must be placed and connections made. Work was in progress on range towers Nos. 2, 11, and 15, Gatun Lake section, wiring electric light line, Pacific end, and making the necessary surveys and reconnoissances.

Second Division—Office of the Chief Engineer.

Dikes.....	7,871
Fifth Division (estimated).....	5,600
Total.....	54,320

CONCRETE PLACED.

	Cu. Yds.
Caissons.....	1,193
Shop foundations.....	442
Total.....	1,635

GENERAL REMARKS.

Excavation by steam shovel was continued in Sosa Hill and in the Dry Dock. The general service and sand line track, previously constructed as far Diablo, was extended into Corozal, thus permitting the removal of the tracks in the vicinity of the proposed shop buildings. Other extensions and rearrangements of tracks were made in accordance with the general construction scheme decided upon. The driving of piles, sheeting, excavating and concrete work for the foundations of the proposed shop buildings were proceeded with, No. 6 being completed. The amount of caisson sunk for the substructure of the proposed quay wall northeast of the present concrete dock was an increase over that of any

previous month, and tracks were constructed for the commencement of work on pier No. 1. The caisson manufacturing plant was enlarged and facilities provided for the manufacture of approximately 100 lineal feet of caisson daily.

METEOROLOGY AND HYDROGRAPHY.

The usual observations and measurements were continued during the month.

Fifth Division—Office of the Chief Engineer.

DISTRICT NO. 1, LOCKS, DAMS, AND DRY EXCAVATION

Excavation—The total excavation during the month amounted to 436,002 cubic yards, of which 318,366 cubic yards were classified as rock and 117,636 cubic yards as earth.

Filling and Embankment—During the month 20,198 cubic yards of dry filling were added to the prism of the Pedro Miguel west dam, increasing the total amount of fill in place at the end of the month to 690,878 cubic yards. The backfill at Pedro Miguel was increased by 26,471 cubic yards, the total quantity in place at the close of the month being 801,418 cubic yards.

At Miraflores, the dry filling in the toes of the west dam was increased by 52,195 cubic yards, making the total quantities of dry and hydraulic filling in place at the end of the month 1,540,614 cubic yards and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 112,293 cubic yards, the total amount in place at the close of the month being 1,178,596 cubic yards.

Pedro Miguel Locks—Excavation was continued in the Canal prism south of the locks and in the foundation of the lower guide wall. Backfilling of the two side walls and north wing walls was continued. The concrete work consisted of the construction of the south guide wall extension, emergency dam quadrants and installation of electric cable ducts. The total amount of concrete and large stone laid at Pedro Miguel was 6,446 cubic yards placed as follows: 613 cubic yards in the east wall, 327 cubic yards in the west wall, 28 cubic yards in the floors, 5,198 cubic yards in the south center guide wall, 278 cubic yards in the northeast core wall, 1 cubic yard around ducts in area A and one cubic yard around ducts in area B.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT—OF PEDRO MIGUEL.

Length of working day (hours).....	8.00
Average number of hours per day worked laying concrete and large stone (actual working time).....	6.75
Average number of mixers per day.....	4.19
Average hourly output per mixer, actual working time (cubic yards).....	8.80
Large rock laid (cubic yards).....	
Concrete laid (cubic yards).....	6,471.00

Total concrete laid (cubic yards)..... *6,741.00

*Includes 25 cubic yards laid for the American Bridge Company.

Miraflores Locks—Dry excavation was continued in the Canal prism south of the locks, the material being used for backfilling the locks, filling on the west dam and for swamp reclamation. Excavation of the spillway was continued. Concrete work consisted of the construction of north approach and wing walls, spillway, extension of west wall, south guide wall, operating tunnels, sills and floor of lower west chamber, and northeast core wall. Fixed irons aggregating 981,702 pounds were placed in the masonry. The total amount of concrete and large stone laid at Miraflores was 54,221 cubic yards, placed as follows: 1,763 cubic yards in the northeast wing wall, 1,156 cubic yards in the north center

guide wall, 1,535 cubic yards in the east wall, 2,628 cubic yards in the northeast core wall, 5,430 cubic yards in the center wall, 13,068 cubic yards in the west wall, 19,300 cubic yards in the south approach wall, 8,198 cubic yards in the floors, 40 cubic yards around ducts in area A, 8 cubic yards around ducts in area B, and 18 cubic yards around ducts in area C.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS—MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours).....	8.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time).....	4.87	7.85
Average number of mixers per day.....	7.92	4.35
Average hourly output per mixer, actual working time (cubic yards).....	43.89	11.52
Average amount of concrete and large stone laid per hour per berm or chamber crane, actual working time (cubic yards).....	58.57	
Large rock laid (cubic yards).....		
Concrete laid (cubic yards).....	37,356.00	16,920.00
Total concrete laid (cu. yds.).....	37,356.00	16,920.00

Above totals include 50 cubic yards placed for the McClintic-Marshall Company.

Auxiliary plant consisted of two 1-cubic yard mixers (daily average 1.87), four 3-cubic yard mixers (daily average 2.54), and four locomotive cranes and derricks (daily average 2.23). Output of these mixers was either placed by locomotive cranes and derricks or discharged directly into forms. Permanent plant consisted of four berm and four chamber cranes.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

Reservoirs, water mains, sewers and oil pipe lines were maintained and extended as required to facilitate construction work, and preliminary work was begun on the new town-site at Balboa.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT

Length of working day (hours).....	12.00
Average number of hours per day, actual working time.....	9.26
Average number of cubic yards crushed per hour per working day.....	224.96
Average number of cubic yards crushed per working hour.....	291.61
Total output for the month (cubic yards).....	70,188.00

Sixth Division—Office of Chief Engineer.

The following is a statement of the output of the six dredges which were in operation during the month:

DREDGE.	Type.	WORK.			PLANT.		Total.	Remarks.
		Earth Cu. Yds.	Clay Cu. Yds.	Rock Cu. Yds.	Earth Cu. Yds.	Rock Cu. Yds.		
Badger.....	Ladder.....	69,454	4,347				73,791	Place measurement
Cardenas.....	Dipper.....		11,664	10,344			22,008	Place measurement
Corozal.....	Ladder.....		27,451	67,209			94,660	Place measurement
Culebra.....	Suction.....							Undergoing repairs
Marmot.....	Ladder.....		7,994	5,789			13,783	Place measurement
Mole.....	Ladder.....	650	1,200	8,933			10,783	Scow measurement
No. 85.....	Hydraulic.....				216,540		216,540	Place measurement
Total.....		70,104	52,646	92,275	216,540		4,1565	

*Accomplished by 6th division for the 2nd division.

CHAME SAND EXCAVATION.

Approximately 37,000 cubic yards of sand were excavated at Punta Chame and delivered to the Balboa sand bins.

BALBOA SHOPS.

The manufacturing and repair work in the shops and shipways was satisfactorily performed during the month.

Atlantic Division.

GATUN LOCKS.

Excavation—There were 46,523 cubic yards

excavated during the month, all removed in preparing foundations for the lock walls.

Backfill—Backfilling behind the side walls was continued, the quantity placed during the month aggregating 33,411 cubic yards. The total amount placed to February 1 was 1,974,998 cubic yards.

On that date the work was 95.2 per cent completed.

Receiving and Issuing Material—The issues of rock for the month amounted to 26,582 cubic yards. There were 13,537 cubic yards of sand issued. Cement receipts totaled 9,376 barrels and the issues amounted to 34,541 barrels.

Mixing and Placing Plants—Plant No. 1 and portable mixers were kept in satisfactory operation during the month.

Concrete Work—A total of 28,790 cubic yards of concrete was laid, distributed as follows:

Upper lock 19½ cubic yards, Middle lock 14½ cubic yards, Lower lock 28,756 cubic yards. On January 31 the concrete work was 94.51 per cent completed.

At four o'clock on the morning of January 25 the east bank of the excavation, north of the east side wall, gave way, carrying with it the main line and two construction tracks. The moving material extended north and south, covering the site of the north approach wall with from 5 to 18 feet of mud. In its progress two skid pile drivers were overturned and destroyed, or at least so badly wrecked that it is not deemed expedient to repair them. A Bucyrus pile driver was secured from the Panama railroad, which will be used in driving the remaining piling. A large amount of piling and miscellaneous material was carried down and some of it covered up by the mud. Most of the piling was recovered. The mud over the site of the approach wall is being removed by sluicing and by locomotive crane. It is probable that the completion of the north approach wall will be delayed about two months on account of this slide.

OPERATION OF CONCRETE CONSTRUCTION PLANT.

Length of working day (hours).....	9.00
Average number of hours per day worked, per strand of cableway, laying concrete, actual working time.....	4.775
Average number of mixers per day.....	3½
Average hourly output per mixer, actual working time (cubic yards).....	60.
Average amount of concrete laid per hour, per strand of cableway.....	29.49
Concrete laid (cu. yds.) cableways.....	29,176
Concrete laid (cu. yds.) derricks.....	
Concrete laid (cu. yds.) portable mixers.....	101
Concrete laid (cu. yds) hand mixed.....	19

Total amount of concrete laid (cu. yds.)... 29,296.00

GATUN DAM.

Construction during the month increased the total fill, as determined by cross section

of the borrow pit from which the material was taken, by 149,609 cubic yards, making the total amount in place 21,217,689 cubic yards. On February 1 the dam was 96.4 per cent completed.

Hydraulic Fill—There was no increase made in the hydraulic fill, the total in place remaining at 10,124,082 cubic yards.

Dry Fill—There were added to the dry fill 149,609 cubic yards of material received from steam shovels; this was placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 11,093,607 cubic yards.

Hydroelectric Plant—During the month 250 cubic yards of rock were removed by hand in the preparation of foundations, making a total excavation of 97,961 cubic yards. There were 163 cubic yards of concrete placed, making a total of 812 cubic yards.

GATUN SPILLWAY.

Backfill—No backfilling behind the spillway walls was done, the total on January 31 remaining at 16,495 cubic yards.

Concrete—A total of 4,186 cubic yards of concrete was laid during the month. Concrete work for the spillway is 95.9 per cent completed.

Excavation—There was no material excavated during the month, the total remaining at 1,591,261 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging—Ocean to Mindi—Seven dredges removed 467,720 cubic yards of earth and 40,618 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 16,012 cubic yards of earth from the slip between docks 16 and 17, Panama Railroad Company's Cristobal terminal docks, while the dredge *Caribbean* removed 302,029 cubic yards of earth from the Cristobal approach channel. On January 31 forty feet of water could be carried from zero to zero plus 2,100 feet, 35 feet to mile post 4 plus 3,500 feet, 30 feet to mile post 5 plus 2,200 feet, 20 feet to mile post 6 plus 2,335 feet, ten feet to mile post 6 plus 2,800 feet. The *Terrier* drilled 2,970 feet, used 25,300 pounds of dynamite and shot 4,378 cubic yards of earth and 27,579 cubic yards of rock to minus 45 feet, mean sea level.

West Breakwater—Colon—There were 18,383 cubic yards of Porto Bello rock unloaded, of which 11,363 cubic yards were handled by cranes and 7,020 cubic yards by the derrick barges, making the total amount unloaded to February 1st 152,973 cubic yards.

MUNICIPAL ENGINEERING.

New Colon Waterworks—Excavation for the clear water basin was completed and about 700 cubic yards of material removed. Five hundred piles were driven to bed rock in connection with foundations for the filter building, which completed this work. The reinforced concrete slab covering those piles and forming the floor of the clear water basin was laid and the forms for the side walls commenced. The creosoted poles carrying the foundation of the pump station walls were driven and the excavation for the concrete footings was completed.

The reservoirs, water mains, sewers, roads and oil pipe lines were maintained and extended as required to facilitate construction work.

Central Division.

During the month the total amount of material excavated was 1,135,580 cubic yards,

of which 186,131 cubic yards were classified as earth and 949,449 cubic yards as rock. The entire amount was removed by steam shovels. Of this total, 1,117,220 cubic yards were primary excavation in the Canal prism and 18,360 cubic yards were from the Obispo Diversion.

The daily average number of steam shovels at work was 35.44 and the total number of shovel days was 921½, as compared with 34.28 shovels at work and 857 shovel days in December. For comparison with the work done by steam shovels during the corresponding month of the previous year, the following table is presented:

Period	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel per day.
		Rock.	Earth.			
1912:						
Jan...	Cu. Yds. 1,421,133	Cu. Yds. 1,204,657	Cu. Yds. 216,476	41.92	26	1,303.79
1913:						
Jan...	1,135,580	949,449	186,131	35.44	26	1,232.00

Rainfall at Empire: 1912, .01 ins.; 1913, 1.67 ins.

The above table shows the average output per shovel to be 5.51 per cent less in January 1913 than in the corresponding month of 1912.

The total amount of material excavated from the Culebra Section in January 1913—1,135,580 cubic yards—is the lowest record in that section for the month of January since 1907; in January of that year only 566,750 cubic yards were removed.

The total estimated amount of material (dry excavation) to be removed in the Central Division, according to revised estimate of July 1, 1912, was 106,116,221 cubic yards and up to February 1, 1913, 101,994,239 cubic yards had been removed, leaving 4,121,982 cubic yards to be removed in order to complete all dry excavation. From these figures it will be seen that 96.12 per cent of all excavation in this division was completed on January 31. At the close of the month's operations the status of the excavation in the two sections which compose this division was as follows:

	CULEBRA CUT.	Cu. Yds.
Completed...		89,609,584
To be completed.....		4,121,982
	CHAGRES SECTION.	Cu. Yds.
Completed.....		12,384,655

Thus it will be seen that the Culebra Cut is 95.60 per cent completed. The Chagres section is entirely completed, so far as dry excavation is concerned, but it is estimated that about 300,000 cubic yards of wet excavation will have to be made in this section.

The work of excavation which this division had been doing for the Fifth Division on the site of the Miraflores spillway was completed. In all, the Central Division excavated 58,171 cubic yards at this point.

There were furnished during the month to the Panama Railroad Company, for the Cristobal mole, 37,856 cubic yards, the total amount furnished to January 31 for this purpose being 189,356 cubic yards.

There were 56,334 cubic yards of material dumped on Naos Island trestle, making a total of 1,177,567 cubic yards. The construction of a double track trestle over that portion of Naos Island trestle already single tracked was authorized in December, 1912, and this work was commenced on January 10th, 1913 lineal feet of trestle being driven to the end of the month.

There was employed a daily average of

6,054 laborers, while the average number of gold men working was 565.

Quartermaster's Department.

Labor—The force report shows that the actual working force of the Commission and Panama Railroad Company averaged more than 37,000 men daily. If to this be added the forces of the McClintic-Marshall Construction Company and the other contractors engaged on the work, the total will be found to exceed 43,000 men—the largest force ever employed on the Canal. The shortage of unskilled labor continued, despite the receipt of a small shipment of laborers from Barbados. Upon arrival of the 428 additional men who left Barbados on January 24, it is believed the shortage will be taken care of to a large extent.

Buildings—Practically the only work done during the month was the removal of barracks to Corozal and Gamboa.

Quarters—The congestion of gold bachelor quarters at Gatun and in the districts on the Pacific end continued.

Material and supplies—The value of material received was \$1,851,567.91. In point of value, considerably more than half of this material was consigned to the First Division of the Chief Engineer's Office. The material came forward in 34 steamers, the total weight of cargo, exclusive of lumber, piling and ties, being 37,515 tons.

Subsistence Department.

The Hotel Tivoli showed a net profit of \$13,587.71. The operation of the line hotels, European laborers' messes, colored laborers' kitchens, restaurants, penitentiary, tugs and dredges returned a net profit of \$3,033.76. The total net profit on subsistence operations during the month was \$16,621.47.

Department of Civil Administration.

COURTS.

During the month 73 civil and 31 criminal cases were disposed of in the Circuit Courts, and 51 civil and 600 criminal cases in the District Courts.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$422,076.28, and the fees to \$1,982.68. Receipts from stamp and card sales and newspaper postage aggregated \$9,274.33. The total collection of revenues made was \$16,829.77 and the collections on account of court fines, costs, and fees \$3,358.19. A total of \$132,568 was deposited in postal savings accounts and a total of \$94,654 was withdrawn. At the port of Ancon 21 vessels entered and 23 cleared, and at the port of Cristobal 28 entered and 23 cleared.

POLICE AND PRISONS.

The total number of persons arrested was 628, of whom 545 were men and 83 women. Twenty-two nations or forty-two separate states and dependencies were represented. There were ten convicts committed to the penitentiary and five were discharged, leaving 124 convicts in confinement at the close of the month. The cost of guarding and subsisting these convicts was \$2,366.11 and the value of the work performed by them on the roads of the Canal Zone was \$2,210.25.

FIRE PROTECTION.

There were 12 fires reported in the Canal Zone. The damage to Commission property was \$177.50 and to private property \$150.

PUBLIC WORKS.

In the city of Panama the daily average consumption of water was 1,891,580 gallons

and in Colon 1,342,007 gallons. The usual inspection and maintenance work in this division was performed.

SCHOOLS.

The net enrollment in the white schools was 1,301, the average number of pupils belonging was 1,122.5, and the average daily attendance 1,050.3. In the colored schools the net enrollment was 1,364, the average number of pupils belonging was 986.1, and the average daily attendance 786.7. At the close of the month there were employed in the white schools 47 teachers and in the colored schools 31 teachers, the total being the same as employed at the close of the preceding month.

Department of Sanitation.

The total number of deaths from all causes among employes was 51, divided as follows: From disease 32 and from violence 19, giving an annual average per thousand of 7.37 and 4.37, respectively. The annual death rate per thousand among employes for the month of January, 1912, was 8.10.

The annual death rate per thousand in the Canal Zone and in the cities of Colon and Panama, including both employes and non-employes, was 23.24. This rate is based upon a population in the Canal Zone of 62,810 according to the census of February, 1912, and populations in Colon and Panama respectively, of 20,232 and 47,172, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of January, 1912, was 17.67.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: Whites 3.82, blacks 8.49, giving a general average for disease of 7.37. For the same month during 1911 the annual average death rate per thousand from disease among whites was 1.89, blacks 6.23, giving a general average of 5.07; and for the same month during 1912, whites 7.57, blacks 3.98, giving a general average of 4.86.
